# Corrigendum: Frequency of Microplastics in Mesopelagic Fishes from the Northwest Atlantic

Alina M. Wieczorek<sup>1,2\*</sup>, Liam Morrison<sup>1</sup>, Peter L. Croot<sup>1,3</sup>, A. Louise Allcock<sup>2</sup>, Eoin MacLoughlin<sup>2</sup>, Olivier Savard<sup>4</sup>, Hannah Brownlow<sup>2</sup> and Thomas K. Doyle<sup>2,5</sup>

<sup>1</sup> Earth and Ocean Sciences and Ryan Institute, School of Natural Sciences, National University of Ireland Galway, Galway, Ireland, <sup>2</sup> Zoology and Ryan Institute, School of Natural Sciences, National University of Ireland Galway, Galway, Ireland, <sup>3</sup> Irish Centre for Research in Applied Geoscience, Earth and Ocean Sciences, School of Natural Sciences, National University of Ireland Galway, Galway, Ireland, <sup>4</sup> Perkin Elmer, Beaconsfield, United Kingdom, <sup>5</sup> School of Biological, Earth and Environmental Sciences, MaREI Centre, Environmental Research Institute, University College Cork, Cork, Ireland

**Keywords:** myctophids, marine litter, micro-FTIR, fibres, eddy, deep sea, biogeochemical cycling, carbon sequestration

## A corrigendum on

### Frequency of Microplastics in Mesopelagic Fishes from the Northwest Atlantic

by Wieczorek, A. M., Morrison, L., Croot, P. L., Allcock, A. L., MacLoughlin, E., Savard, O., et al. (2018). *Front. Mar. Sci.* 5:39. doi: 10.3389/fmars.2018.00039

1: In paragraph 2 of the Discussion section the retracted article by Lönnstedt and Eklöv (2016) was mistakenly cited in the manuscript. While the authors were aware of the retraction it was accidentally introduced. It should be replaced by Carpenter et al. (1972) who also showed ingestion of microplastics by fish larvae.

In the original article, we incorrectly cited Lönnstedt and Eklöv (2016), as follows:

“Indeed the most common prey of mesopelagic fish are copepods, euphausiids, amphipods, larvae, and decapods and all have been reported to ingest microplastics (Setälä et al., 2014; Desforges and Ross, 2015; Lönnstedt and Eklöv, 2016).”

This reference should be replaced with the following:

“Indeed the most common prey of mesopelagic fish are copepods, euphausiids, amphipods, larvae, and decapods and all have been reported to ingest microplastics (Carpenter et al., 1972; Setälä et al., 2014; Desforges and Ross, 2015).”

2: In the sixth sentence of the abstract it states that samples were collected 1,200 km due west of Newfoundland. This should have stated “east” of Newfoundland. The authors very much apologize for these mistakes. These errors do not change the scientific conclusions of the article in any way.

The original article has been updated.
