**PREFACE--On 7 November 1989 a "Landscaping for Wildlife Seminar" was convened at the Chicago Botanic Garden, Glencoe, Illinois. The seminar was sponsored by the Landscape Design Critics Council of The Garden Clubs of Illinois, Inc., and the Chicago Botanic Gardens. This list of references is a follow-up to the presentation made by Richard E. Warner at this seminar, entitled "The Interface Between Man & Animals." During this presentation, various publications were referred to by Warner by number. For example, Warner alluded to Adams and Leedy (1986) as "Reference Number 4"; thus, "Reference No. 4" is included in this citation. Most publications also list the address and any costs associated with ordering the material. The back of the report also has a list of addresses of agencies most frequently listed in the report. We hope that you will find this document useful; feel free to contact us if we can be of further assistance.**
