

Mud to Parks Project Map

By John C. Marlin, Ph.D. and Robert G. Darmody, Ph.D.

ILLINOIS

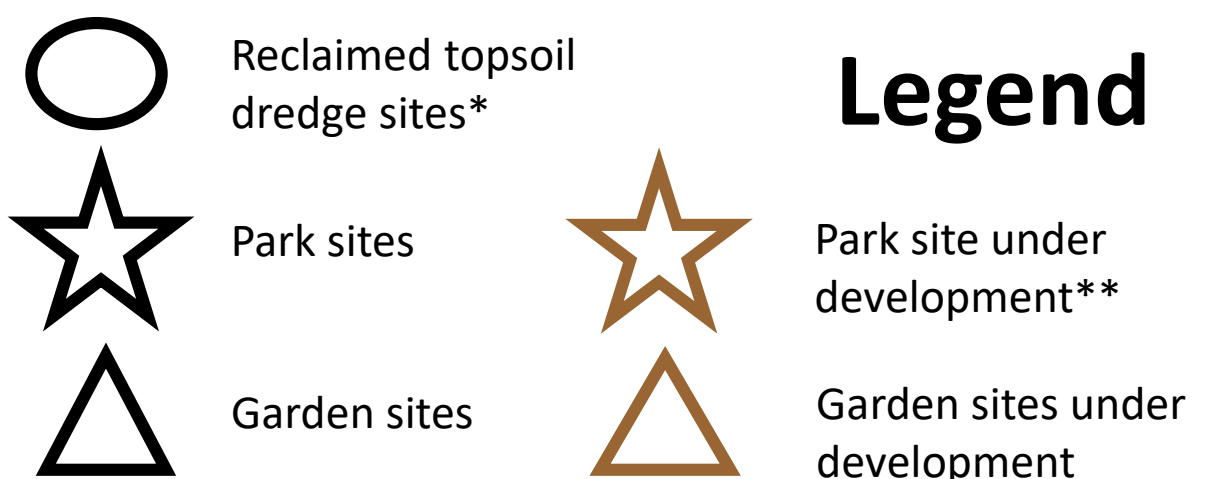

Illinois Sustainable Technology Center
PRAIRIE RESEARCH INSTITUTE

Mud to Parks is a program of the Illinois Department of Natural Resources that finds beneficial uses for material dredged from rivers and lakes. Some of the many major cooperators include ARTCO Fleeting, office of then Lt. Governor Quinn; Attn. Gen. Lisa Madigan; Midwest Foundation, Inc.; Prairie Research Institute; City of Chicago; Chicago Park District; City of East Peoria; and Fon du Lac Park District. Additional information is available at www.istc.illinois.edu/special_projects/il_river.

Mud to Gardens projects, using sediment as top soil, have been sponsored collaboratively by the Illinois Environmental Protection Agency, Department of Transportation and the Illinois Department of Natural Resources.

J. C. Marlin (marlin@illinois.edu) is a research affiliate at the Illinois Sustainable Technology Center and R. G. Darmody is a soil scientist and professor emeritus in the Department of Natural Resources and Environmental Sciences at the University of Illinois.

* Dredge sites are marked with unique colors to indicate reclaimed soil sources for the corresponding colored parks and gardens
** White indicates yet to be determined reclaimed soil source
