ACKNOWLEDGEMENT

BISMILLAHIRRAHMANIRRAHIM

Alhamdulillah, first off all, I would like to express my gratitude to the Almighty for blessing me with strength and courage to complete this thesis. From the beginning till the end of this thesis, I have so many people who stand by me, given me guidance for every obstacle that stand in my way. Therefore, I would like to express my deepest appreciation to those involve in this thesis.

First and foremost, I would like to express my gratitude and millions of thanks to my thesis supervisor, Puan Radziah binti Ali, who had showered me with guidance through the whole time till the last second. I will never forget all sacrifices and only God could ever repay what you have done for me.

I also would like to express my appreciation to the Communication Technology and Networking (CTN) lecturers, especially Dr. Saadiah Bt Yahya and En. Adzhar B. Abd Kadir for making this project to be augmented with their priceless guidance, ideas and critics to make the best of this thesis.

Last but not for least, I would like to express my appreciation to my beloved parents for the unconditional love and support that let me through the toughest days in my life. To all my friends who share ideas to make my thesis better. For those whom not stated here, I would like to thanks for their help, friendship and countless support to me. May Allah S.W.T bless all of them for their support and kindness?

Thank you.

Abstract

This project is about email alert via SMS that were implementing at FTMSK. This project were implementing at FTMSK network. Email and short messaging technology is important services now, especially to a person who busy with their work. Significant of this project is to make email technology at faculty become effective and efficient among student and lecturer.

The advantages of this project are to make student more alert with their mail. Student always alert with every mail that through in their mail box, by SMS. Beside that student know when to check their mail. They only go check their mail if get SMS, that save their time and energy. In this project, discussed about what Email and SMS can do, why used email alert and, How to implement Email must alert via SMS.

In the end of this project, we will document all the hardware and software development and provide a simulation model of the system.
