Wool .....	79
Chickens .....	79, 80
Eggs .....	81, 82
Farm Wages .....	83, 84
Farm Prices of Ohio Farm Products .....	85, 86, 87
Estimated Gross Cash Income from Sale of Products from Ohio Farms .....	88

Crop Reporting Districts

#### ACKNOWLEDGMENTS

The authors are greatly indebted to two large groups of Ohio farmers; one that has so splendidly cooperated in furnishing information each month, and another that supplied special information at least once during the year by filling out and returning a livestock or acreage survey card, the results of which are contained in this bulletin.

We are also very grateful to the Postmasters who, through their rural mail carriers, distributed and collected the above mentioned livestock and acreage survey cards, which furnish the best available information regarding changes in crop acreage and numbers of livestock on farms from year to year.

## EXPLANATIONS

This bulletin contains preliminary county estimates of the acreage, yield per acre, and total production of corn, winter wheat, oats, tame hay, and potatoes for 1935 and revised county estimates for 1930-1934 for corn, wheat, and oats and for 1929-1934 for potatoes and tame hay. It also contains preliminary county estimates of the numbers of livestock on farms January 1, 1936, and revised county estimates for January 1, 1930-1935.

During recent months data from the Federal Census of 1935, covering crops of 1934 and livestock on hand January 1, 1935, became available. As an actual enumeration of acreage and production of crops and numbers of livestock is considered the best evidence obtainable, estimates of crops for 1934 and of livestock for January 1, 1935, have been revised to conform with the Census enumeration except where other check data indicated a different figure. The adjustments of the 1934 acreages and yields and January 1, 1935, numbers of livestock to the Census base necessitated revision of the estimates prior to 1934. Such revisions have been made for the State and the revised figures published herein.

The estimates of all tame hay include unrevised estimates of annual legume hay, for which revisions have not been made as yet. These figures are subject to further revision when annual legume hay figures are revised.

Estimates of acreage, yield per acre, and total crop production, numbers of livestock on farms, and prices of crops, livestock, and livestock products, unless otherwise stated, are based upon the reports made by the reporters of the Federal-State Cooperative Crop and Livestock Reporting Service.

Monthly crop and livestock prices are those of the fifteenth of the month, unless otherwise indicated. Prices used in computing the value of total production of crops are December 1 prices, except in 1934 and 1935; for these years they are weighted average prices for the particular crop year.
