### ACKNOWLEDGMENTS

The authors are greatly indebted to two large groups of Ohio farmers; one that has so splendidly cooperated in furnishing information each month, and another that supplied special information at least once during the year by filling out and returning a livestock or acreage survey card, the results of which are contained in this bulletin.

We are also very grateful to the Postmasters who, through their rural mail carriers, distributed and collected the above mentioned livestock and acreage survey cards, which furnish the best available information regarding changes in crop acreage and numbers of livestock on farms from year to year.

### EXPLANATIONS

This bulletin contains preliminary county estimates of the acreage, yield per acre, and total production of corn, winter wheat, oats, tame hay, and potatoes for 1932 and revised county estimates of winter wheat for the years 1929, 1930, and 1931. There are also presented herein preliminary county estimates of the numbers of livestock on farms January 1, 1933, and revised estimates of the number of sheep for 1932.

Estimates of acreage, yield per acre, and total crop production, numbers of livestock on farms, and prices of crops, livestock, and livestock products, and other data, unless otherwise stated, are based upon the reports made by the reporters of the Federal-State Cooperative Crop and Livestock Reporting Service.

Monthly crop and livestock prices are those of the fifteenth of the month, unless otherwise indicated.
