CASH RECEIPTS FROM FARMING IN OHIO 1966

Cash receipts to Ohio farmers from marketings and government payments totaled \$1,383,021,000 in 1966. Return from the sale of farm commodities was up over 17 percent from the revised 1965 figure, while government payments rose 6 percent. Total cash receipts from farming in 1966 were about 17 percent higher than a year earlier.

Farm marketings during 1966 amounted to \$1,301,819,000. Of this total, cash receipts from the sale of livestock and livestock products accounted for \$730,724,000 or 56.1 percent. The marketings of crops accounted for \$571,095,000 or 43.9 percent of the total. Cash receipts from crops were up nearly 30 percent while cash receipts from livestock and livestock products were up 9 percent from the comparable revised 1965 estimates. Revisions of the 1965 estimates changed livestock and crops downward less than one-half percent.

Increases of 44 percent in the food grains, 31 percent in the feed crops, and 62 percent in soybeans cash receipts stem from both increased sales and higher prices and are largely responsible for the 30 percent increase in total crop receipts during 1966 over the revised 1965 estimates. Income from wheat and corn marketings rose 45 percent and 37 percent respectively. Some other increases from 1965 were in hay (7 percent), oats (2 percent), tobacco (13 percent), greenhouse and nursery products (6 percent), and vegetables (7 percent). A 25 percent lower return from fruits, reflects sharp reductions in production of all major fruits except cherries.

Cash receipts from meat animals were up over 7 percent from 1965. Higher returns from cattle and calves, hogs, and sheep and lambs were almost totally due to higher prices. Only hogs showed any increase in pounds marketed, and that increase was less than one percent. Cash receipts from dairy products in 1965 were about 11 percent above a year earlier. Receipts from poultry were also up 11 percent from the revised 1965 estimate. Cash receipts from wool marketed were up about 4 percent while honey and beeswax receipts were down over 6 percent.

The sale of dairy products continued to be the largest single source of cash receipts to Ohio farms, accounting for 18.5 percent of the State total returns from farm marketings. Hogs ranked second, and cattle and calves third, accounting for 14.4 and 14.2 percent respectively. Corn and soybeans each accounted for close to 12 percent. These five commodities accounted for 71 percent of the total cash receipts from sales received by Ohio farmers in 1966.

The ten leading counties in total cash receipts from farming each had total returns of over \$25,000,000 in 1966. Darke county led all others and is the only county in Ohio which has exceeded \$40,000,000 for one year's receipts. Five other counties...Wayne, Fulton, Wood, Mercer and Putnam...each had total receipts of over \$30,000,000 during 1966. Wayne County continued as the leading county in the sale of dairy products, Fulton County had the greatest returns from the sale of cattle and calves, and Clinton County led in cash receipts from the sale of hogs in 1966. Leading in cash receipts for corn, wheat, and soybeans was Wood County.

PROCEDURE

Estimates of cash receipts by county from farm marketing in Ohio were published initially in 1927 and annually each year since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Statistical Reporting Service of the U. S. Department of Agriculture. This bulletin contains the 1966 Ohio county cash receipts estimates, and revised 1965 estimates for the state.

Gross and Net Farm Income data are presented on page eight. The information is available only at the State level, but the relative income situation of the Ohio farmer can be observed over a period of years. It is interesting to compare the net income figures with total cash receipts and realized gross income for the State by years.

Cash Receipts represent gross returns from the actual sale of crops and livestock during the calendar year. The value of home consumption and inter-farm sales is not included as cash receipts. Production expenses such as feed, fuel, fertilizer, and purchases of feeder animals are not subtracted from cash receipts. The addition of government payments to cash receipts provides a measure of gross cash income, or total cash receipts from farming.

Current cash receipts estimates for Ohio and other States appear in the USDA's Farm Income Situation--207--Supplement, August 1967. These estimates are prepared by the Economic Research Service of the U. S. Department of Agriculture from basic data provided by the Statistical Reporting Service, the 1964 Census of Agriculture, and other sources.

The 1965-66 data in this publication reflect SRS Census revisions which were available around the middle of May this year. Thus, most livestock and field crops are on the revised basis. Commercial vegetable revisions were used for 1965 although 1966 is on an unrevised basis. Potatoes, sweetpotatoes, apples, and some other fruits are on an unrevised basis. Estimates for forest products, greenhouse and nursery products, and other commodities for which SRS does not estimate value of production have not been revised to 1964 census levels. The State estimates published in this bulletin may differ from previously published estimates due to revisions in marketings, inshipments, inventory numbers, etc., as more complete information becomes available.

County estimates of cash receipts from the sale of dairy products for 1965 and 1966 are not entirely comparable with 1964 or earlier years. Data from milk market administrators provided a basis for allocating receipts of milk from producers at plants operating under the Federal Order to counties. Data from the Animal Health Division of the Agricultural Research Service provided information on the location by county of producers selling milk to dairy plants. The number of producers in each county was used as a basis of breaking down total receipts at plants not under Federal Order to counties. This assumes annual deliveries per producer to each plant would not differ significantly at the county level. Each grade of milk was considered separately in arriving at the county total cash receipts.

As in recent bulletins the sale of dairy cows and veal calves has been included with the sale of cattle and calves. Poultry cash receipts include income from the sale of eggs, farm chickens, broilers and turkeys during 1966. Because of the confidential nature of the data, cash receipts from turkey eggs and other poultry are included as other livestock. Included with sheep cash receipts are returns from wool sales as well as income from sale of sheep and lambs.

Cash receipts from the sale of greenhouse vegetables are included with vegetable cash receipts, and not with greenhouse and nursery. The county vegetable estimates are a combination of field grown vegetables and vegetables grown under glass. For purposes of ranking, potatoes were considered as separate from vegetable cash receipts. Cash receipts from fruit crops are made up of returns from small fruits as well as from tree fruits and nuts.

In 1966, government payments amounted to \$81,202,000 or nearly six percent of the total cash receipts in Ohio. The Feed Grain Program was again the largest program accounting for \$52,302,000. The Wheat Program accounted for \$16,124,000, Conservation Payments, \$6,102,000, and the Soil Bank Program \$1,669,000. Cropland Adjustment Payments amounted to \$2,328,000. Payments under the Sugar Act and Wool Act accounted for \$1,623,000 and \$1,054,000 respectively.

Two important factors influencing any comparison by counties are the size of the counties and the major source of cash receipts in each county. Table VI presents the average cash receipts per farm and per acre by county. These averages aid in the comparison of counties with similar farming practices better than a comparison of the total cash receipts. The average per farm and per acre are based on the 1964 U. S. Census of Agriculture "number of farms" and acres of "all land in farms." In some counties the average per acre cash receipts are relatively low because the Census designated acres of "all land in farms" includes a considerable amount of land not cultivated and some not even used for pasture. The 1964 Census defined a farm as any tract operated as a unit of 10 or more acres if the estimated sales of agricultural products for the year amounted or normally would amount to at least \$50; or if less than 10 acres, had sales of agricultural products totaling \$250 or more.

County estimates of cash receipts do not include the value of commodities used on farms. For example, producers may market grain and hay in the form of beef or milk rather than in its original form. By counties the relative importance of some commodities would be different if the value of these commodities used on farms where produced were computed. Assuming a season average price for each commodity, the value of selected crops used on farms where produced in 1966 would amount to \$140,000,000 for corn, \$16,000,000 for oats and \$71,000,000 for hay.

This bulletin has been prepared through the efforts of many people. Included are personnel of the Ohio Agricultural Stabilization and Conservation Service, Federal Milk Market Orders operating in Ohio, the Ohio Department of Agriculture, the Ohio Agricultural Research and Development Center and the Agricultural Research Service. Special recognition is due the professional and clerical work done by the staff of the Ohio office of the Statistical Reporting Service. However, the greatest recognition is due the large number of Ohio farmers and Agribusinessmen for their interest and help in providing the basic data used in compiling the information for this bulletin.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1930-1966

| Year | Farm Marketings | | | Government Payments | Total Cash Receipts and Government Payments | Percent of All Commodities | |
|------|---|---------|------------------------------------|------------------------|--|---|-------|
| | Livestock and Livestock Products | Crops | Total Livestock and Crops | | | Livestock and Livestock Products | Crops |
| | - Thousand Dollars - | | | | | - Percent - | |
