CASH RECEIPTS FROM FARMING IN OHIO, 1980 ^{1/}

Ohio cash receipts from farm marketings of crops, livestock and livestock products was \$3,767,731,000 in 1980, up 12 percent from a year earlier and the highest of record since estimates were first prepared in 1924. At \$2,392,227,000, the 1980 sale of crops increased 21 percent from 1979 and accounted for 63.5 percent of the total cash receipts from farm marketings compared with 58.5 percent a year earlier. Cash receipts from livestock and livestock products at \$1,375,504,000 were down 2 percent from a year earlier and accounted for 36.5 percent of the total compared to 41.5 percent in 1979. Government payments amounted to an additional \$9,403,000.

Ohio's total 1980 realized gross farm income was \$4,526.2 million, of which \$758.5 million was from services other than farm marketings. About 88 percent of the total was needed for production expenses, leaving a figure of \$523.2 million as realized net income, up 5 percent from 1979. The percent of income going for expenses was up slightly from a year earlier.

Soybean cash receipts at \$959,798,000 for 1980 placed number one and accounted for 25.5 percent of the total cash receipts from the farm marketings in Ohio. Soybeans also ranked first in 1974 and annually each year since 1977. The previous all-time high for any commodity of \$836,739,000 was for soybeans in 1979. Corn with 1980 cash receipts of \$783,865,000 remained in second place, an increase of 51 percent from 1979. Wheat maintained the sixth place ranking with receipts of \$253,791,000, a 7 percent increase from a year earlier. Greenhouse and nursery crops totaled \$153 million for seventh place in total cash receipts.

In the major livestock groups, cash receipts from dairy products of \$552,577,000 increased 9 percent from 1979 and retained third place. Cattle and calves with sales of \$386,672,000 were in fourth position. Increased marketings more than offset lower prices for a 3 percent gain. Hog cash receipts dropped 21 percent to \$264,138,000, due to fewer marketings and lower prices but maintained fifth place in total cash receipts. Poultry and eggs in eighth place had cash receipts of \$134,746,000, a 4 percent decline from a year earlier. Lower egg prices were the primary reason for the decline.

After two years in second place ranking, Darke County with cash receipts of \$130.0 million edged out Mercer County which had cash receipts of \$129.5 million. Both these counties are very important in the top six commodities produced in Ohio. The next three highest counties were Wayne (\$109.3 million), Putnam (\$92.8 million), and Wood (\$91.5 million). Madison County retained the position of highest average cash receipts per farm with \$81,187.

Leading counties by commodities were: Soybeans, Wood; Corn, Darke; Dairy products, Wayne; cattle and calves, Clark; hogs, Darke; wheat, Hancock; greenhouse and nursery, Lake; poultry and eggs, Mercer; and fruits and vegetables, Huron.

^{1/}The 1980 cash receipts for turkeys, sugar beets, greenhouse and nursery, and mushrooms are incorrect as published in ECONOMIC INDICATORS OF THE FARM SECTOR: State Income and Balance Sheet Statistics, 1980. The correct totals for these commodities are included in this publication. The correct Ohio cash receipts total for 1980 is \$3,767,731,000.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1945-1980

Year	Farm Marketings			Government Payments	Total Cash Receipts and Government Payments	Percent of All Commodities

Procedure

Ohio estimates of cash receipts by county from farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Statistical Reporting Service of the United States Department of Agriculture. This bulletin contains 1980 Ohio county cash receipts estimates and revised 1979 State estimates. County production estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin.

Current cash receipts estimates for Ohio and other States appear in the USDA's ECONOMIC INDICATORS OF THE FARM SECTOR: State Income and Balance Sheet Statistics, 1980. These estimates are prepared by the Economic Research Service of the U.S. Department of Agriculture, from basic data provided by the Statistical Reporting Service, the Census of Agriculture, and other sources. Estimates presented in this publication may differ from previously published data due to revisions in marketings, inshipments, inventory numbers, and other data, as more complete information becomes available. Cash receipts for some commodities were combined to avoid disclosure of individual operations.

Cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from marketings are derived by allocating State estimates to counties on the basis of crop reporting and census marketings by crop reporting districts. Check data such as county dairy production from the milk market administrators are also used.

The definition of a farm includes places which had annual sales of agricultural products of \$1,000 or more. This definition was used for the 1978 Census of Agriculture. The average cash receipts per farm will aid in the comparison of counties with similar farm practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people. Included are personnel of agricultural agencies throughout Ohio. The greatest recognition is due the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
