Ohio crop summary	4
United States crop summary	5
Acreage, yield, and production, by counties	
Corn	6- 7
All wheat	8- 9
Oats	10-11
Soybeans	12-13-14-15
All hay	16-17
Soybeans, acreage utilization	15
Winter wheat, abandonment of planted acres	9
Acreage, yield, production, price, and value of principal crops	18-19-20
Prices received by Ohio farmers for principal crops	21-22-23
Commercial vegetables for fresh market	24
Commercial vegetables for processing	25
Maple products	26
Livestock	
Number on farms January 1, Ohio and United States	26
Number of sows farrowed and pigs saved	26
Number on farms January 1, by classes	27
Number on farms January 1, by counties	
All cattle and calves	28
Milk cows and heifers	29
Hogs, including pigs	30
Stock sheep and lambs	31
Chickens	32
Milk cows and milk production, by counties	33-34
Number and value on farms, January 1	35
Inventory numbers, disposition, production, and income	36-37-38
Bang's disease and tuberculin tests	39
Milk, pounds produced per cow per day, by districts	39
Chickens	
Production, consumption and sales	40
Average number of laying hens and pullets, by months	40
Number on farms January 1, by classes	41
Commercial broiler production	41
Eggs	
Production, consumption, and sales	41
Monthly production	41
Average number produced per 100 hens in farm flocks, by districts	42
Turkeys, number produced, and sales	42
Prices received by Ohio farmers for livestock, by months	43
Prices received by Ohio farmers for livestock products, poultry, and poultry products, by months	44
Prices received by Ohio farmers as of December 15, by districts	45-46
Season average prices received by farmers, by districts	47-48
Farm wage rates	49
Potatoes, December 15 prices in leading potato states	49
Estimated gross cash farm income	50
The 1954 crop season	51
Ohio farm income	51

EXPLANATIONS

This bulletin contains, in addition to other data, the current estimates of acreage, yield, and production of crops by counties, and livestock numbers on January 1, by counties. Similar information for former years can be obtained in Bulletin 735, for 1951 and 1952; Bulletin 722, 1949-1950; Bulletin 690, 1947-1948; Bulletin 691, 1942-1946; and Bulletin 642 for 1940-1941.

Estimates of crop production, livestock numbers, and prices for the state are shown for a five-year period. The historical series of state data on crops and livestock prior to 1950, can be found in: Agricultural Experiment Station Bulletin 722, back to the year 1946; to the year 1935 in Bulletin 691; to the year 1924 for crop data and 1925 for livestock data in Bulletin 642; to the year 1919 for crop data and 1920 for livestock data in Bulletin 554; and to the year 1910 for crop data in Bulletin 460.

Estimates of acreage, yield per acre, total crop production, numbers of livestock on farms and prices of crops and livestock products, unless otherwise stated, are based upon the data furnished by the reporters of the Federal-State Cooperative Crop and Livestock Reporting Service. In some instances the yield per acre for various crops is computed by dividing the production by the acreage harvested.

Monthly crop and livestock prices are those of the fifteenth of the month unless otherwise indicated. Prices used in computing the value of total production of crops are weighted average prices for the particular crop year.

~~~~~

## ACKNOWLEDGMENTS

The authors are greatly indebted to the large groups of Ohio farmers and people closely connected with agriculture who so splendidly cooperated by furnishing information monthly or by supplying special information at various times during the year.

We are also very grateful to the postmasters who, through the rural mail carriers, distributed and collected the livestock and acreage survey cards, which furnish information regarding changes in crop acreage and numbers of livestock on farms from year to year.

OHIO CROP SUMMARY: Acreage, yield, and production, 1953 and 1954

| Crop                         | Year | Acreage harvested | Yield per acre | Unit                 | Production                   |
|------------------------------|------|-------------------|----------------|----------------------|------------------------------|
| Corn.....                    | 1953 | 3,531,000         | 55.0           | Bu.                  | 194,205,000                  |
|                              | 1954 | 3,743,000         | 62.0           | Bu.                  | 232,066,000                  |
| All wheat.....               | 1953 | 2,384,000         | 29.0           | Bu.                  | 69,136,000                   |
|                              | 1954 | 1,764,000         | 27.5           | Bu.                  | 48,510,000                   |
| Oats.....                    | 1953 | 1,129,000         | 42.0           | Bu.                  | 47,418,000                   |
|                              | 1954 | 1,219,000         | 46.5           | Bu.                  | 56,684,000                   |

109-

a/ Total for wheat, corn and oats.  
b/ Preliminary.

## **THE 1954 CROP SEASON**

In 1954 record per acre yields of corn, oats, barley, rye, soybeans, sugar beets, tobacco, and all hay were obtained in Ohio.

Dry weather during the fall of 1953 was unfavorable for the planting of fall seeded crops. However, with moderate weather prevailing from December through February, little winter injury resulted. While excessive moisture in March and April delayed the planting of spring crops, it was favorable for the growth of wheat, hay, and pastures.

During the summer months weather conditions were generally favorable for crop growth except for periods of limited rainfall in some areas, however, rains were received before any serious damage occurred.

The dry weather during September was favorable for maturing corn and soybeans and allowed harvesting operations to progress rapidly. Frequent showers during October slowed harvest, but with favorable weather again early in November harvesting was completed with little loss.

## **OHIO FARM INCOME 1953-1954**

Ohio ranked seventh among forty-eight states in agricultural income for both 1953 and 1954. The cash receipts of Ohio farmers exceeded 1,100 million dollars in the calendar year of 1953 and was over 1,091 million dollars in 1954. In addition the State's farmers received government payments estimated at 6.4 million dollars in 1953 and 6.5 million dollars in 1954.

The largest share of the agricultural income was from the dairy enterprise, which accounted for nearly 23 percent of total cash receipts during the 1953-1954 period. Hogs were second with just under 21 percent of the State's agricultural receipts. Other important agricultural products and their proportional share of Ohio's farm income were: poultry with approximately 12 percent, wheat with 9 percent, and corn and beef cattle with about 8 percent each.

Relatively high soybean prices during the earlier months of 1954 and a record crop harvested in the fall of the year, resulted in an income of 68.8 million dollars for the calendar year. This was an all time high for that crop. Other farm products for which 1954 income was well above 1953 were corn and beef cattle.
