## CASH RECEIPTS FROM FARMING IN OHIO, 1982

Ohio cash receipts from farm marketings of crops, livestock and livestock products were \$3,673,806,000 in 1982, up 9 percent from the previous year. At \$2,122,503,000, the 1982 sale of crops increased 10 percent from 1981 and accounted for 57.8 percent of the total cash receipts from farm marketings compared with 57.3 percent a year earlier. Cash receipts from livestock and livestock products, at \$1,551,303,000 were up 7.9 percent from the previous year and accounted for 42.2 percent of the total compared to 42.7 percent in 1981. Government payments amounted to an additional \$42,398,000.

Total 1982 realized gross farm income in Ohio was \$4,274,200,000, of which \$600,400,000 was from services other than farm marketings. About 91 percent of the total gross farm income was needed for production expenses, leaving a figure of \$373,100,000 as realized net income compared to \$151,800,000 in 1981. The percent of income going for expenses compares with 96 percent a year earlier. Farm production expenses in 1982 showed the smallest increase in years, less than 1 percent.

Soybean cash receipts, at \$806,966,000 for 1982, placed number one and accounted for 22.0 percent of the total cash receipts from the farm marketings in Ohio. Soybeans ranked first in 1974 and annually each year since 1977. The all-time high for any commodity was \$1,116,156,000 for soybeans in 1980, more than 38 percent above the 1982 total. Corn, with 1982 cash receipts of \$695,218,000 remained in second position, and increased 18 percent from 1981. Wheat maintained the sixth position ranking with receipts of \$179,347,000, a 27 percent decrease from a year earlier. Greenhouse and nursery crops totaled \$163,000,000 for the seventh position in total cash receipts.

In the major livestock groups, cash receipts from dairy products of \$617,537,000 increased 3 percent from 1981 and retained third position. Improved prices pushed total hog cash receipts 27 percent above the previous year and into fourth place. Cattle and calves dropped to fifth position with sales of \$350,166,000 which increased 4 percent above 1981. Poultry and eggs held eighth position with cash receipts of \$156,691,000, a 1.5 percent increase over 1981.

Mercer County with cash receipts of \$130.8 million retained first place ranking over Darke County with cash receipts of \$124.9 million. During the past decade, Mercer County held first place ranking for 1978, 1979 and 1981; Darke County led for all other years. The next three highest counties were Wayne (\$121.8 million), Fulton (\$88.9 million), and Putnam (\$83.1 million). Leading counties by commodities were: soybeans, Darke; corn, Wood; dairy products, Wayne; hogs, Darke; cattle and calves, Clark; wheat, Seneca; other crops, Lorain; and other livestock, Mercer.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1945-1982

Year	Farm marketings			Government payments	Total cash receipts and government payments	Percent of all commodities	
	Livestock and livestock products	Crops	Total livestock and crops			Livestock and products	Crops

## PROCEDURE

Ohio estimates of cash receipts from farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Statistical Reporting Service of the United States Department of Agriculture. This bulletin contains 1982 Ohio county cash receipts estimates and revised 1980-81 State estimates. County production estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin.

Current cash receipts estimates for Ohio and other States appear in the USDA's ECONOMIC INDICATORS OF THE FARM SECTOR: State Income and Balance Sheet Statistics, 1982. These estimates are prepared by the Economic Research Service of the U.S. Department of Agriculture, from basic data provided by the Statistical Reporting Service, the Census of Agriculture, and other sources. Estimates presented in this publication may differ from previously published data due to revisions in marketings, inshipments, inventory numbers, and other data, as more complete information becomes available. Cash receipts for some commodities were combined to avoid disclosure.

Cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from marketings are derived by allocating State estimates to counties on the basis of crop reporting and Census marketings by crop reporting districts. Check data such as county dairy production from the milk market administrators are also used.

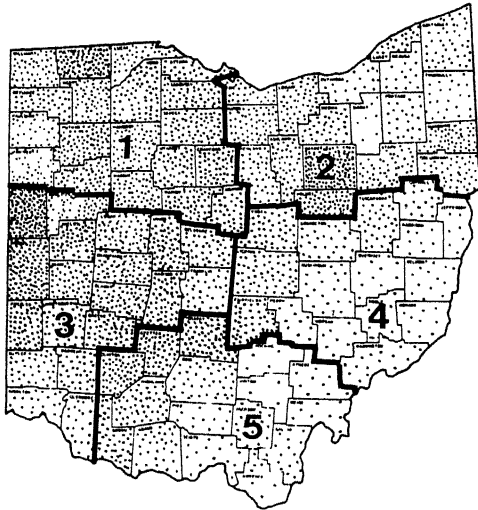

The definition of a farm includes places which had annual sales of agricultural products of \$1,000 or more. This definition has been used since the 1974 Census of Agriculture. The average cash receipts per farm will aid in the comparison of counties with similar farm practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people. Included are personnel of agricultural agencies throughout Ohio. The greatest recognition is due the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
