ESTIMATED GROSS CASH INCOME TO OHIO FARMERS FROM THE SALE OF
AGRICULTURAL PRODUCTS AND FROM AGRICULTURAL ADJUSTMENT
AGENCY PAYMENTS, BY COUNTIES - 1943 & 1944

This bulletin presents the estimated gross cash income to Ohio farmers from the sale of agricultural commodities and from government payments by counties for 1943 and 1944. Similar estimates have been made for 1927 and for each year since 1929. The results have been published in Mimeograph Bulletins No. 22, No. 27, No. 48, No. 60, No. 93, No. 114, No. 121, No. 130, No. 155 and No. 171 of the Department of Rural Economics, Ohio State University and the Ohio Agricultural Experiment Station.

In this report, as was the case in Bulletins 130, 155, and 171, all income figures were calculated for the calendar year. In previous studies crop income had been calculated on a crop-year basis; that is, the income from a crop was assigned to the year when grown even if part or all of it was sold in the following year, while livestock income was based on the calendar year. Certain changes of methods of calculation became necessary from year to year due to changes in basic sources of information. Because of this fact, figures for some items are not completely comparable from year to year. Moreover, due to the manpowershortage, some short cuts were made this year in calculating the income by counties. Nevertheless, a fair picture of the sources of agricultural income and their relative importance is given by this study.

In this study, gross cash income is used to denote the actual total income to farms in a county from the sale of agricultural commodities. There are a few exceptions, especially in the case of corn and the other feed crops. A large amount of those crops are sold to other farms in the same county. Sales to neighboring farms in the same county have not been included in this study as sales for that county. The data herein do not indicate the relative importance of the various enterprises, but rather their importance as sources of income through sales.

The data used as a basis for this study were secured from the United States Department of Agriculture, Bureau of Agricultural Economics; census publications; information compiled by the Department of Rural Economics, Ohio State University; and the best judgment and opinion of experts in the several agricultural enterprises.

The total income as shown by this study varies slightly from that published by the United States Department of Agriculture because of the omission of income from horses, mules, and honey. There is also a difference between the figures for government payments shown by United States Department of Agriculture publications and those in this study. Government payments herein were secured from the state office of the Agricultural Adjustment Agency and were actual payments made to farmers (including dairy payments) in the 1943 and 1944 calendar years. These were the net payments made to participating farmers after county administrative expenses had been deducted.

As pointed out above, the data given here does not indicate the total value of agricultural production. It is only the amount received for that portion of the production which was sold. The value of that portion consumed on the farm as feed, seed, or for home use has not been included. Neither does it include the other sources of income of farmers such as income from outside work, or interest on outside investment.

Perhaps a brief explanation is necessary stating what has been included under some of the enterprise headings. Under the heading "Dairy" has been included the income from the sale of dairy products, veal calves and cull dairy cows, while under the heading "Cattle" has been included the income from the sale of any cattle for meat purposes except veal calves and cull dairy cows. It should be noted that the cost of feeder cattle purchased has not been deducted from cattle sales. The heading "Poultry" shows the income from eggs and from chickens, turkeys, and other poultry, while "Sheep" includes wool, sheep, and lambs. "Truck" includes canning crops and all other vegetables grown for sale, except greenhouse products and potatoes which were estimated separately.

Owing to the fact that there is such a great variation in the size of counties, the total gross cash income is unsatisfactory as a means of comparing two counties. For that reason it was thought advisable to calculate the gross cash income per farm and per acre. The total gross income was divided by the number of acres of all land in farms and by the number of farms as given by the 1940 census to secure the above values. It should be noted that the low income per acre in some counties was in part due to the fact that the acreage designated in the census as "all land in farms" includes considerable areas of land not actually under cultivation and some not even used for pasture.

TABLE I. Gross Cash Income from the Sale of Agricultural Products from Ohio Farms, by Enterprises, and the Per Cent Each Were of the Total, Calendar Year, 1943

Enterprise	Income from Sales	Per Cent of the Total
Dairy	\$165,292,000	25.12
Hogs	162,832,000	24.75
Poultry	109,679,000	16.67
Cattle	42,322,000	6.43
Soy Beans	32,541,000	4.95
Truck	29,250,000	4.45
Wheat	21,454,000	3.26
Green House	17,637,000	2.68
Corn	16,377,000	2.49
Fruit	14,399,000	2.19
Sheep	11,660,000	1.77
Tobacco	7,846,000	1.19
Potatoes	7,419,000	1.13
Hay	5,089,000	.77
Other	<u>14,277,000</u>	<u>2.15</u>
Total	658,074,000	100.00

TABLE II. Gross Cash Income from the Sale of Agricultural Products from Ohio Farms, by Enterprises, and the Per Cent Each Were of the Total, Calendar Year, 1944

Enterprise	Income from Sales	Per Cent of the Total
Dairy	\$176,182,000	25.71
Hogs	167,518,000	24.45
Poultry	99,464,000	14.51
Wheat	43,008,000	6.28
Cattle	40,740,000	5.95
Soy Beans	29,639,000	4.33
Fruit	27,316,000	3.99
Truck	25,068,000	3.66
Green House	19,290,000	2.82
Corn	13,902,000	2.03
Sheep	9,423,000	1.38
Oats	5,567,000	.81
Tobacco	5,185,000	.76
Hay	5,163,000	.75
Potatoes	5,160,000	.75
Other	<u>12,669,000</u>	<u>1.84</u>
Total	685,295,000	100.00
