Below is a sample plan of study for completion of the coursework requirements for the Ed.S. in school psychology, however each individual student's plan of study varies depending on their pace in the program and individual choices when options are available. The Educational Specialist program in School Psychology is completed concurrently with the Masters in Education (M.Ed.) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.Ed. coursework.

First Year

	1-6	1-6	

Total Credits: 32-42

Comprehensive Examination Process

The comprehensive examination for the Ed.S. in School Psychology includes two components: a portfolio documenting specific clinical experiences completed during the internship year and the Praxis II national School Psychology exam (administered by the Educational Testing Service).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

PhD in Educational, School, and Counseling Psychology

Admission Contact Information

Christina Edholm (EdholmC@missouri.edu) 16 Hill Hall Columbia, MO 65211 (573) 882-7738

Admission Criteria

- Fall deadline: December 1st for most programs except Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE), which is January 15th
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
92	580

· Recommended GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
On or After August 1, 2014	305	4.0

Required Application Materials

To the Office of Graduate Studies:

- All required Graduate Studies documents
- · Official transcripts
- · GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

PhD in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements

I. GENERAL PSYCHOLOGY CORE*	27
Statistics and Research Methodology	15
Psychological Foundations	12
II. COUNSELING PSYCHOLOGY CORE	89
(Exclusive of and in addition to the General Psychology Core)	
Historical and Research Foundations	9
Ethic and Legal Standards	3
Human Diversity	5
Intervention Procedures	18
Assessment	12
Supervision	3
Clinical	24
Consultation	3
Dissertation	12

Sample Plan of Study

A student's plan of study will vary depending on her/his program track and career goals and should be completed in consultation with her/his academic advisor.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as a achieving a grade of "B" or better in each of the courses comprising the "core" courses for each of four emphasis areas. These courses are:

ESC_PS 7120 Theories and Techniques of Counseling ESC_PS 8040 Counseling Methods and Practices ESC_PS 8135 Foundations of Career Psychology

Comprehensive Examination Process

The Comprehensive Exam is administered once a year in July or August. The Comprehensive Exam is administered as a take-home exam and follows an essay/long answer response format. It is expected that responses will not exceed 10 pages (double-spaced; not including

references) in length and will adequately provide both breadth and depth on the topic. Appropriate citations are expected. Attention should also be paid to grammar, APA style, and overall professional writing conventions. Students will have two consecutive weekends to complete the exam. Students schedule an oral exam after successfully passing the written portion of the comprehensive exam.

The Comprehensive Exam is designed as an integrative, culminating assessment of foundational knowledge of (1) counseling theories, assessment and practice, (2) research design, measurement, and statistics, (3) multicultural and professional issues, and (4) career development. Thus, the exam is designed to assess students' ability to (a) use counseling theories and appropriate assessment strategies to conceptualize clinical cases and to identify appropriate intervention strategies in clinical practice; (b) design research studies, including developing appropriate research questions, addressing issues related to a study's internal and external validity, applying appropriate methods for the research methodology, and identifying appropriate statistical analyses; (c) understand multicultural, ethical and professional issues related to counseling psychology; and (d) apply appropriate vocational theories and assessment in practice.

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1st for the next Fall cohort.

- Three letters of recommendation
- Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
 - Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- · Statement of purpose addressing the following:
 - a. Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
 - Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
 - Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how

these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (1000 word maximum)

- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2014 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor's degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program.

PhD in Educational, School, and Counseling Psychology with Emphasis in Educational Psychology

Degree Requirements

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people's thinking, motivation, and behavior change across time. We study how different social settings like classroom, family, work, and peers affect people's well-being, learning, and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand:

- how to improve learning, academic achievement, and motivation
- · developmental influences on learning and well-being
- · how society influences learning and behavior
- · school influences on students' development in other settings
- · improving human performance

The Ph.D. program focuses on generating original research and consists of a minimum of 72 semester hours of graduate credit beyond the bachelor's degree. The plan of study provides additional details about requirements. The following is a synopsis.

I. Core Statistics and Research Courses		
ESC_PS 8020	Overview of Research Methods	3
ESC_PS 8082	Foundations of Educational and Psychological Measurement	3
ESC_PS 8850	Quantitative Foundations in Educational Research	3
ED_LPA 8957	Qualitative Methods in Educational Research I	3
ESC_PS 9650	Application of Multivariate Analysis in Educational Research	3
Electives		6
II. Core Learning and Development		15
ESC_PS 8060	Lifespan Development	3
ESC_PS 8320	Advanced Human Learning	3

ESC_PS 8355	Cognition and Emotion	3
ESC_PS 9450	Motivation	3
Human Diversity (Releva	nt Course)	3
III. Electives		27
Students can take more than 6 research hours if they wish to enroll in more electives. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Science, Psychological Sciences, or Information Science and Learning Technology.		
IV. Dissertation		6-18

Sample Plan of Study

The plan of study will depend on the student's career goals and research interests, and should be completed in consultation with the Doctoral Dissertation Committee.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as a achieving a grade of "B" or better in each of the courses comprising the "core" courses. For educational psychology, these courses are the following:

- ESC_PS 8060 Lifespan Development
- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC_PS 8355 Cognition and Emotion

Comprehensive Examination Process

To complete the comprehensive exam, students must complete evidence of professional activity, evidence of teaching, two assigned papers, and an oral exam. The two papers are administered as a take-home exam with one week for completion of each paper. The procedure is described in a separate document. The papers can be written during any semester. They must be scored as passing before the oral exam can be conducted. The oral exam must be scheduled during fall or spring semesters.

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with the doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation

- 2. Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
 - a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- 4. Statement of purpose addressing the following:
 - Describe experiences teaching, designing instruction, and engaging in research and how these experiences have prepared you for graduate study. (500 word maximum)
 - b. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty (3) your career objectives, and (4) how being accepted into MU's program will benefit your career aspirations. (Please limit to 500 words)
- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Admissions

This program is not accepting admissions at this time.

PhD in Educational, School, and Counseling Psychology with Emphasis in School Psychology, Certification

The doctoral program in School Psychology is focused on training the next generation of research, teaching, clinical, and policy leaders who are singularly focused on solving significant societal problems in education and psychology. We utilize an integrated systems approach to address academic and behavioral evidence-based practice with world-class research lines in prevention science, assessment, and intervention. Our graduates are prepared to work in higher education and research settings as well as clinical settings, such as schools, community health agencies, and hospitals. The PhD program is accredited by the American Psychological Association and approved by the National Association of School Psychologists. The Doctoral (PhD) program in School Psychology is completed concurrently with the Masters in Arts (MA) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.Ed. coursework.

Degree Requirements

Total Credits: 76-87

Qualifying Process

The qualifying examination for the Ph.D. in School Psychology includes a take-home written examination. It is typically completed at the start of the Fall semester of year 2 in the program, presuming successful completion of ESC_PS 8125, ESC_PS 9125, and ESC_PS 8082

Comprehensive Examination Process

The comprehensive examination for the Ph.D. in School Psychology includes a take-home written examination followed by an oral examination with the doctoral committee. This examination process is typically completed at the beginning of the winter semester in year 3 or the start of the fall semester in year 4. Students jointly enrolled in the Masters of Arts program in School Psychology must have completed their master's thesis/manuscript prior to sitting for their Doctoral Comprehensive exams.

6-18

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee. The dissertation proposal must be approved by committee prior to applying for terminal internships.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by December 1 for the next Fall cohort.

- 1. Three letters of recommendation
- 2. Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
 - a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- 4. Statement of purpose addressing the following:
 - a. Describe interests and experiences with working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
 - Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
 - Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty. (Please limit to 500 words)
 - d. Describe (1) your career objectives (2) how these career objectives have developed, and (3) how being accepted into MU's program will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 500 words)
- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

PhD in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

IV. Dissertation

Sample Plan of Study

The plan of study will depend on the student's career goals and research interests, and it should be completed in consultation with the doctoral dissertation committee.

Qualifying Process

Acceptable performance on the departmental qualifying examination is defined as achieving a grade of "B" or better in each of the courses comprising the selected courses. If a student receives lower than a "B" on a course, the student must retake the course. Failure to receive the appropriate grade a second time could result in dismissal from the program. For Statistics, Measurement, and Evaluation in Education, these courses are the following:

- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC PS 8020 Overview of Research Methods
- ESC_PS 8850 Quantitative Foundations in Educational Research

Comprehensive Examination Process

To complete the comprehensive exam, students must complete: 1) Curriculum Vitae including teaching experience, 2) Demonstration of knowledge via written exam, 3) Demonstration of research via published work, submitted manuscript, conference paper presentation, or a literature review created specifically to meet this requirement; 4) Oral exam on both the demonstration of knowledge and demonstration of research items from above.

Dissertation Requirements

The student works with an academic advisor to develop a dissertation proposal. The student meets with the doctoral program committee to obtain approval of the written dissertation proposal. Upon study completion, the student defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Office of Graduate Studies (https://applygrad.missouri.edu/apply) application form by January 15th for the next Fall cohort.

- 1. The three letters of recommendation
- 2. Curriculum Vitae
- Unofficial academic transcripts of all previous undergraduate and graduate work
 - a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- 4. Statement of purpose addressing the following:
 - a. Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU's program will benefit your career aspirations (500 words max).

- Describe your experiences in educational measurement, assessment, or evaluation (250 words max).
- Describe interests and experience in analyzing empirical data.
 Briefly describe why you have chosen particular statistical models to answer the research questions (250 words max.).
- d. Describe experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study (250 words max).
- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2014 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher).

Educational Leadership & Policy Analysis

ELPA - Our mission is to create knowledge while preparing leaders to critically shape and transform educational issues, policies, and practices.

Consider ELPA if you:

- Want to improve your organizational leadership skills and knowledge in elementary, secondary, or postsecondary settings
- · Are interested in principal or superintendent certification
- Want to work in student affairs or higher education administration
- Want to become a scholar or researcher in an academic setting
- Desire to shape policy through legislative or research activity

Undergraduate

While MU does not offer undergraduate degrees specifically in educational leadership and policy analysis, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

Director of Graduate Studies: Sarah Diem

About ELPA's Graduate Programs

The graduate programs in the Department of Educational Leadership and Policy Analysis are designed to meet the specific educational needs of the student in a particular area of emphasis. Graduates find employment in a wide range of settings including colleges and universities, public schools, policy agencies, professional associations, government and business and industry.

The PhD Program in ELPA requires a minimum of 60 hours beyond the master's degree. The goal of the PhD program is the preparation of professional researchers and scholars who have high levels of competence in conducting research that adds to the knowledge base.

The program also has a goal of meeting the student's individual career goals and interests through the development of an appropriate plan of study. Each emphasis area has slightly different requirements and areas of focus; however, all 3 emphasis areas require a department-wide core; emphasis area coursework; electives; a research core; and the completion of a minimum of 6 hours for the dissertation.

The Statewide Cooperative EdD Program in Educational Leadership is a cohort program designed for practicing educational leaders to enhance their knowledge and competencies so they provide optimal leadership in organizations that educate a wide range of learners from youth to adult. The program's curriculum is designed to prepare leaders who are inquiring, reflective practitioners who are competent in defining and solving complex problems in education.

The **Educational Specialist (EdSp) Program** is designed to enhance the knowledge and competencies of K-12 educational administrators and to lead to advanced principal certification and/or superintendent certification. The program has a thematic, integrated, problem-based curriculum intended to prepare school and district leaders who are inquiring, reflective practitioners. The curriculum is aligned with state standards for certification.

The department's **Master's Programs** are intended to provide initial preparation for leaders in a variety of educational contexts, including higher education and PK-12 schools. Programs vary according to emphasis area and are designed to meet student's individual career goals and interests — e.g., student affairs administration, initial principal certification and higher education administration.

A minimum of 33 credit hours is required for the M Ed or MA in Higher Education and a minimum of 30 hours is required for the M Ed in Educational Leadership.

Note: Per ELPA policy, students have 5 years to complete their MA or M Ed degree.

Graduate Certificates:

- Education Policy
- Higher and Continuing Education Administration

Satisfactory Rate of Progress

All ELPA students are expected to make satisfactory progress toward their degrees. Satisfactory progress of students will be determined through an annual review by the director of graduate studies, graduate

students' academic advisors and their committees. Judgments about satisfactory progress will include consideration of the following:

- University-wide time limits for degree completion
- · GPA for departmental courses
- Continuous enrollment and active engagement in course work or research (EdD and PhD)
- · Student performance in research credits
- · Timely resolution of incomplete grades

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

At this time we are not offering an MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, **Secondary Principal**, Certification.

You do have the option of getting both certifications – Elementary and Secondary. Please refer to MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 426).

EdD in Educational Leadership

The University of Missouri Statewide Cooperative EdD Program (https://education.missouri.edu/degree/educational-leadership-edd) is an innovative, cohort-based program in educational leadership. This professional doctorate enhances knowledge and competencies of leaders in PK-20+ educational organizations. The emphasis of the doctor of education program is on developing effective, thoughtful and reflective practitioners who are competent in identifying and solving complex problems of practice in educational settings.

Locations

We work with four partner institutions to deliver the program at locations throughout the state of Missouri:

- · Missouri State University
- Northwest Missouri State University
- · Southeast Missouri State University
- · University of Central Missouri

Students are employed full time as educational leaders while in the program, and many remain in their current positions following graduation, often receiving a pay raise for completing an advanced degree. Several of our students have also received promotions while in the program or soon after graduating, and some have even transitioned into higher level positions within other educational organizations.

Admission Contact Information

Educational Leadership & Policy Analysis 202 Hill Hall 573-884-2163 573-884-5714 (fax) http://edd.missouri.edu/

Admission Criteria

- · Competitive GRE score
- GPA of 3.0 (4.0 scale) in the last 60 hours of undergraduate education
- GPA of 3.5 (4.0 scale) in Graduate School (Master's Degree)
- Competitive TOEFL or IELTS scores
 - Internet-based test (iBT)

- 80 (minimum score of 17 necessary in each subcategory)
- Paper-based test (PBT)
 - 550 (minimum score of 52 necessary in each subcategory)
- IELTS minimum score of 6.5 (score of at least 6 necessary in each subcategory)

EdD Application Information

This cohort program accepts applicants only during even-numbered years with a deadline of December I. (Starting in 2020, this deadline will move to October 15.)

http://edd.missouri.edu/

Candidates who are selected during the initial screening are invited to the MU campus to participate in an interview and a problem-solving and writing activity.

Note: Admissions screening and decisions for all graduate programs are not made until all required materials have been submitted. Admissions recommendations are based on a profile developed from data that include undergraduate (last 60 hours) and graduate grade point averages, scores on the Graduate Record Examinations (GRE), recommendations, evidence of consistency between candidate and program goals, and relevant organizational or educational leadership experience.

Degree Requirements

This educational doctorate program is known as **The Statewide Cooperative EdD Program**.

The EdD program requires a minimum of 76 credit hours beyond the baccalaureate degree. The program, offered in a cohort format, includes 34 hours of course work in 6 contiguous semesters, beginning in the summer of odd years and concluding in the spring semester 2 years later. In addition to course work credit, 12 credit hours of dissertation-in-practice research are required.

ED_LPA 9429	Superintendent: Communication, Team Leadership	3
ED_LPA 9430	Superintendent: Fiscal, Legal Leadership	3
ED_LPA 9461	Ethics in Education	3

Internship Requirement

Students may become eligible for both elementary and secondary level principal certifications by completing two internships, but in three semesters (a total of 6 graduate hours). To be eligible for PK-12 building level certifications, 600 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for central office/superintendent certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

All internships may be completed simultaneously, if the student's workday and class schedule allows. (For two building level internships and one central office internship, however, it is unlikely that a student would be able to complete all requirements.) The total number of graduate hours required for both elementary principal and central office/superintendent certifications is 12. **NOTE:** DESE requires two years of building-level administration before they will issue a superintendent certificate.

ED_LPA 9429	Superintendent: Communication, Team Leadership	3
ED_LPA 9430	Superintendent: Fiscal, Legal Leadership	3
ED_LPA 9461	Ethics in Education	3

Internship Requirement

The internship experience required by ELPA for graduation and recommendation to the MO DESE for secondary principal certification is gained over two semesters and two hours of coursework per semester (a total of 4 graduate hours). To be eligible for secondary building level certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for central office/superintendent level certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

The internships may be completed simultaneously, if the student's workday and class schedule allows. The total number of graduate hours required for both secondary principal and central office/superintendent certifications is 10. **NOTE:** DESE requires two years of building-level administration before they will issue a superintendent certificate.

Qualifying Process

Contact department for more information.

Comprehensive Examination Process

Upon completion of course work and during the semester of graduation, all students must take and pass a capstone exam.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/pk-12-administration/

Educational Studies

Dr. Laurie Kingsley, Director of Teacher Education Department of Learning, Teaching and Curriculum 202 Townsend Hall 573-882-0560

TeacherEducation@missouri.edu

The online Bachelor of Educational Studies (BES) degree program coordinated by the LTC program area is the undergraduate option for individuals who want to teach or work in workforce education. The degree program is designed for people who plan to work with adult learners at community colleges, workforce development programs, and continuing professional education programs. It is intended to prepare students to become effective educational professionals by providing not only the traditional broad-based education of a 4-year degree, but also a foundation in curriculum design, teaching methods, and other aspects of the field of adult education.

For information about the online BES program, contact the College of Education Advising Office:

Phone: 573-882-5659 Address: 101 Hill Hall

email: MizzouEdAdvising@missouri.edu

Assistant Teaching Professor L. Arend, R. Metro, V. Spain

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BES in Educational Studies (p. 435)
 - with emphasis in Interdepartmental (p. 436)

Graduate

For graduate degree programs related to educational studies, please see the Department of Educational Leadership and Policy Analysis (p. 423) or other College of Education (p. 387) programs. You might also browse the complete list of degree options (p. 18) at the University of Missouri.

BES in Educational Studies

Degree Program Description

The Bachelor of Educational Studies prepares students for education-related careers. This degree is to render the field of education available to students who wish to engage in the study of education as a scholarly discipline without the requirement of preparing to engage in the professional practice of education in PK-12 schools. The Bachelor of Educational Studies is for students with interests in the scientific and scholarly study of education and/or education-related careers in non-school settings. The College of Education will not recommend certification to teach in the public schools on the basis of this degree.

The Bachelor of Educational Studies may be completed on campus or online. Students interested in this degree on campus may complete an individualized major course of study developed with an advisor from the office of Advising Services. Students interested in the online BES degree, may complete an individualized major course of study in collaboration with the program director.

Major Program Requirements

The Bachelor of Educational Studies (BES) degree prepares students for education-related careers. The College of Education will not recommend certification to teach in the public schools on the basis of the BES degree. This degree may be completed on campus or online. Students interested in the BES degree on campus may complete an individualized major course of study developed with an advisor from Advising Services. Students interested in the online BES degree may complete an individualized major course of study in collaboration with the Program Director. Please contact Mizzou Online at 1-800-609-3727 or mizzouonline@missouri.edu.

In addition to University requirements (p. 33), such as University general education (p. 34) and graduation requirements, students must complete the following requirements:

- Multicultural studies: Students address this requirement by demonstrating competence through a multicultural studies course.
- A minimum of 24 32 credits in the study of the field of education
- A minimum of 24 32 credits in a concentration option

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BES in Educational Studies with Emphasis in Interdepartmental

Degree Program Description

The Bachelor of Educational Studies is for students with interests in the scientific and scholarly study of education and education-related careers in non-school settings, without the requirement of preparing to teach in PK-12 schools. This is not for students pursuing certification to teach in the public schools. The program may be completed on campus or online. Students will be able to develop an individualized major course of study.

Major Program Requirements

The Bachelor of Educational Studies (BES) degree prepares students for education-related careers. The College of Education will not recommend certification to teach in the public schools on the basis of the BES degree. This degree may be completed on campus or online. Students interested in the BES degree on campus may complete an individualized major course of study developed with an advisor from Advising Services. Students interested in the online BES degree may complete an individualized major course of study in collaboration with the Program Director. Please contact Mizzou Online at 1-800-609-3727 or mizzouonline@missouri.edu.

In addition to University requirements (p. 33), such as University general education (p. 34) and graduation requirements, students must complete the following requirements:

- Multicultural studies: Students address this requirement by demonstrating competence through a multicultural studies course.
- A minimum of 24 32 credits in the study of the field of education
- · A minimum of 24 32 credits in a concentration option

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

Elementary Education

Dr. Laurie Kingsley, Director of Teacher Education Department of Learning, Teaching and Curriculum 202 Townsend Hall 573-882-0560

TeacherEducation@missouri.edu

Professional education coursework is delivered by four departments within the College of Education, namely, Learning, Teaching and Curriculum; Special Education; Educational Leadership and Policy Analysis; and Educational, School and Counseling Psychology.

Faculty

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSEd in Elementary Education (p. 437)
 - with emphasis in Elementary Education (p. 437)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education, professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

The Elementary Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 1-6. We currently offer a Master's and Doctoral (PhD or EdD) in Learning, Teaching and Curriculum with an emphasis in Elementary Education. You can find out more about these programs at http://education.missouri.edu/LTC/elementary/.

You might also browse the complete list of degree options (p. 18) at the University of Missouri.

BSEd in Elementary Education

Degree Program Description

The Elementary Education program leads to a Bachelor of Science in Education in Elementary Education, grades one through six. Coursework focuses on development of the knowledge, skills, and dispositions needed to support teaching and learning in a variety of diverse settings, and includes elementary methods courses designed to support elementary school teaching and learning in all subject areas. Each semester includes extensive experiences in elementary classrooms working with teachers and children, with immediate opportunities to put course ideas into practice. Placements are carefully chosen to represent schools that represent diverse demographics and populations. The culminating Senior Year On-Site Program (SYOSP) is a unique yearlong internship that gives interns the opportunity to experience all facets of the teaching profession. SYOSP is designed to immerse the interns in the life and culture of a school community, and begins with teacher back-to-school meetings and assisting with classroom set-up. Interns are regarded as full-time members of the school faculty and participate in all school events and experiences such as teacher workdays, professional learning communities, and data team meetings. Students will spend a minimum of three full days per week in the schools during the first semester while also completing a full course load that complements the internship. During the second semester, the internship extends to five full days in a single classroom where the SYOSP intern completes the student teaching experience.

Major Program Requirements

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices and where options are available.

Faculty

Professor S. Erdelez**, R. Marra**, J. Moore**, J. Strobel** **Associate Professor** D. Adkins**, J. Bossaller**, I. Jahnke**, H. Moulaison-Sandy**

Assistant Professor S. Buchanan**, T. Gibson**, X. Xu**

Teaching Professor J. Howland*

Associate Teaching Professor A. Klimczak*

Associate Clinical Professor Z. March

Assistant Teaching Professor B. Brendler*, K. Robinson*, Professor Emeriti J. M. Budd**, J. Caplow*, G. Fitzgerald**, T. R. Kochtanek**, J. Laffey**, M. Sievert

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Information Science and Learning Technologies (p. 439)

About Information Science & Learning Technologies

In January 1997, the School of Information Science & Learning Technologies became the home for MU's graduate programs in Library and Information Science and Educational Technologies as well as a new, interdisciplinary doctoral program in Information Science & Learning Technologies.

SISLT faculty are internationally renowned for their research and development accomplishments. Faculty and students are committed to a collaborative, interdisciplinary approach – both within MU and among other research-extensive universities. Nowhere is this more evident than in the Allen Institute (http://alleninstitute.missouri.edu), a 10,000 square foot facility dedicated to supporting collaborative R&D at the intersection of Information & Learning.

PhD in Information Science and Learning Technologies

About the Program

The PhD program prepares professionals to understand and influence learning, information and performance in diverse settings, especially through the use of interactive technologies. We seek individuals who are committed to conducting research that integrates theory and practice.

You will gain the competencies required to:

- Analyze specific informational organization and retrieval, learning and performance needs and evaluate systems to meet these needs.
- Design, develop and implement technologies and technological interventions to improve information organization and retrieval, learning and performance.
- Conduct systematic research, which contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology.

Degree Requirements

1-3 master's level conceptual courses in Educational Technology or Library Science (if entering doctoral program without Master's in Educational Technology, Library Science, or a related field)

Doctoral Seminar Courses (9 credit hours)

IS_LT 9411	Doctoral Seminar in Information Science	9
	and Learning Technologies (Design	
	& Analysis of Research in Information	
	Science & Learning Technologies, and	
	other research and theory seminars)	

Elective SISLT Coursework (minimum of 18 credit hours)

IS_LT coursework 18

Research Methodologies (minimum of 9 credit hours)

9 credit hours minimum includes: at least one course in qualitative research design and one course in quantitative research design. You should choose research methods courses that will support your dissertation. You may choose them from the College of Education's research method courses, or you may look outside the College of Education if your Program of Study committee thinks it is appropriate.

ESC_PS 7170	Introduction to Applied Statistics	3
ESC_PS 8957	Qualitative Methods in Educational Research I	3
ESC_PS 9620	Qualitative Methods in Educational Research II	3

Support Field (9 or more credit hours)

Coordinated coursework related to an area of emphasis outside IS_LT and research courses selected in consultation with your program committee

Dissertation

Course work, internships and independent study projects support the achievement of these competencies, and your program centers on producing a portfolio of achievements indicating that the competencies have been attained. While course work supports production of the portfolio, we encourage students to develop products that cut across several courses, resulting in products that are personally satisfying,

solve real problems and represent high quality work. We are particularly interested in products developed in collaboration with other students, faculty, practicing professionals and others beyond our program and campus.

The program culminates with a significant research effort - the dissertation - that contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology. Whether one major study or a series of smaller studies, the research is designed to position our graduates alongside the leading theorists, researchers and practitioners in the field. There is no minimum number of 9090 research hours.

Sample Plan of Study

During your first two academic semesters, you will work with your assigned advisor to select courses and identify Professional Immersion activities that will successfully lead toward the completion of your degree. During this same time period, you should work to establish professional relationships with faculty in SISLT and your supporting field who you would like to include on your Program Committee. Prior to the beginning of your second academic year of study, you must have identified your Program Committee and conducted a Program of Study meeting with your Program Committee. Early approval of your Program of Study will enhance your academic experience in SISLT. This is a very important part of the degree planning process; failure to receive approval of your Program of Study prior to the second academic year may mean that courses or activities completed afterward may not count toward your degree.

Qualifying Examination

Approximately one to two semesters after you have had your Program of Study and Residency plan approved by your committee, AND BEFORE you may complete your portfolio and take comprehensive exams, you will be required to complete a qualifying examination. The exam task will require you to complete a task that academic professionals would be required to perform. For example, we might have you provide a scholarly review of a journal or conference paper submission. Your advisor will provide more details.

Comprehensive Examination Process

The comprehensive examination is an assessment of your comprehensive knowledge of information science and learning technologies. It is your responsibility to inform your committee members of your intent to complete your comprehensive exam prior to the beginning of the semester in which you plan to complete the exam.

The IS< examination consists of three parts:

- Portfolio
- Written component
- Oral component

For more information on the comprehensive exam process, please refer to the SISLT PhD Handbook at http://sislt.missouri.edu/phd_handbook/index.html.

Dissertation Requirements

You should become involved in research throughout your program so that, by the time the comprehensive examination is completed, you have a well-formulated topic for research. Research may include required coursework activities, collaborations with faculty, or an independent effort.

Earlier research can serve to explore a dissertation topic, serve as a pilot study, or become part of a dissertation prospectus. However, formal approval of a dissertation prospectus by your Committee must precede the serious pursuit of the study.

Dissertation Committee

Following the completion of the comprehensive examination, the responsibility of the Program Committee is completed. You will then form a committee to direct your dissertation. This committee may, but does not have to, consist of the same members as the Program Committee. You are encouraged to include those faculty members who can best support your line of research as members of your Dissertation Committee. During your academic program, your interests may change and should be reflected in the Dissertation Committee membership. The Dissertation Committee must consist of a minimum of three SISLT faculty members. The Dissertation Committee chair must be a member of the MU doctoral faculty. A faculty member or practitioner holding a terminal degree from outside of SISLT who has expertise in your research may be added as a special Committee member with program approval. At least one member must be from a program other than IS<, typically from your minor or supporting field.

Dissertation Proposal Meeting

You will be required to schedule a dissertation proposal meeting prior to beginning your research. Your Dissertation Committee must approve your conceptualization and methodology prior to beginning any data collection. The proposal meeting is open to all faculty and students in the School. The proposal should include the first three chapters (Chapter 1: Rationale for the Study, Chapter 2: Literature Review, Chapter 3: Description of Methodology) of the dissertation unless your Committee has approved an alternative form.

Dissertation Defense

After receiving your Dissertation Chair's approval, you may schedule your dissertation defense. A copy of your dissertation must be sent to each committee member at least three weeks prior to the defense meeting. Other faculty, students, and staff may also attend your oral defense. It will be announced to the entire program at least one week prior to the scheduled examination time. These people will be excused while the Committee evaluates your performance.

Admissions

Email: sislt@missouri.edu

SISLT Student Services Coordinator

304 Townsend Hall Columbia. MO 65211

Phone: 573-882-4546 or toll free 877-747-5868

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Information Science and Learning Technologies program (http://sislt.missouri.edu/islt) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Learning, Teaching and Curriculum

Professionals interested in advancing their careers in education can specialize in a variety of disciplines in MU's Department of Learning, Teaching and Curriculum. LTC specializes in teacher preparation and in graduate programming for professionals in education. Students find challenging, yet rewarding, opportunities through MU's dynamic research centers and projects and are supported by faculty who are subject matter experts.

Consider LTC if you:

- want to advance as a professional in education through a field specialization
- enjoy exercising independent judgment, and
- desire to help all learners achieve success and strengthen the future through education.

http://education.missouri.edu/learning-teaching-curriculum/

Director of Graduate Studies: Tony Castro

About the Program

Graduate study in Learning, Teaching, & Curriculum prepares teachers, curriculum leaders and teacher educators for professional excellence. With the rapid changes in education--especially developments in instructional materials and techniques, curriculum construction and classroom organization--teachers who have completed their certification may need to update, refine and extend their knowledge and skills.

Further, many educators enter new roles as subject-matter specialists, curriculum coordinators, supervisors of instruction, department heads, leaders of professional development education or teacher educators. Graduate programs in Learning, Teaching, & Curriculum are designed to prepare the professionals for these new roles.

Areas of Study

Depending on the degree program, students can pursue disciplinespecific emphasis areas (e.g., English education, mathematics education, science education and others) and focus on curriculum development, research, or teacher education.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

MA in Learning, Teaching and Curriculum

Our department is no longer admitting students to the MA in Learning, Teaching and Curriculum. We invite you to explore the other graduate degree options in Learning, Teaching and Curriculum (p. 441) and the College of Education. (p. 391)

MA in Learning, Teaching and Curriculum with Emphasis in General

Our department is no longer admitting students to the MA in Learning, Teaching and Curriculum. We invite you to explore the other graduate

degree options in Learning, Teaching and Curriculum (p. 441) and the College of Education. (p. 391)

MEd in Learning, Teaching and Curriculum

Admission Contact Information

Caitlin Rosbach rosbachc@missouri.edu 303 Townsend Hall Columbia, MO 65211 573-882-3742

About the M.Ed.

The M.Ed. program requires a minimum of 30 hours in Learning, Teaching, & Curriculum coursework. The following emphasis areas are currently offered: Art Education; Early Childhood Education; English Education; Literacy Education, Mathematics Education; Music Education; Science Education; Social Studies Education; and Teaching English to Speakers of Other Languages (TESOL).

Admissions Deadlines

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

- Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
- Minimum TOEFL scores for most areas:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

 Minimum GRE score* required for following emphasis areas only: Early Childhood Education, English Education, Mathematics Education, Science Education, and TESOL.

When did you take the GRE?	Verbal + Quantitative
On or After August 1, 2011	291= (V150,Q141)

^{*}Clarification: Not all LTC programs require the GRE exam - only those listed above.

Required Application Materials to the Office of Graduate Studies

- · All required documents
- · Official transcripts
- GRE scores required for Early Childhood Education, English Education, Mathematics Education, Science Education, and TESOL.
- TOEFL scores (international applicants)

Required Application Materials to the Learning, Teaching, & Curriculum Program

- Personal data sheet form (complete through the online application system)
- · Statement of purpose

- GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Office of Graduate Studies)
- Letters of recommendation; a minimum of 2 letters of recommendation. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE OFFICE OF GRADUATE STUDIES APPLICATION SYSTEM.

MEd in Learning, Teaching and Curriculum with Emphasis in Art Education

Degree Requirements

The master's degree in Art Education is designed to allow elementary teachers or secondary teachers to pursue a program of study to increase competence in curriculum planning, techniques of teaching art, and the subject matter of studio art and art history.

The MEd degree in Art Education comprises 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (http://online.missouri.edu/degreeprograms/education/art/masters) for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Art Education, Certification

Degree Requirements

The master's degree in Art Education with certification is designed to allow non-certified students to pursue a program of study to increase competence in curriculum planning, techniques of teaching art, and the subject matter of studio art and art history and lead to certification to teach art.

The MEd degree in Art Education comprises 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

MEd in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

Overview

In the early childhood education emphasis, students will gain increased knowledge and skills in the design, delivery and evaluation of educational services to children from birth through age 8. The program addresses the essential problems of practice with special emphasis given to effective teaching approaches for children who are at risk for school failure: children with special needs, children who are English-language learners and children who have challenging behaviors.

The program is designed for early childhood practitioners, Head Start teachers, early childhood special education teachers, child-care center staff and others who work with children from birth through age 8.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

More information about the Early Childhood Education M.Ed. program (http://online.missouri.edu/degreeprograms/education/early-childhood/masters) can be found at the Mizzou Online website.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)

 For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education, Certification

Overview

In the early childhood education emphasis, students will gain increased knowledge and skills in the design, delivery and evaluation of educational services to children from birth through age 8. The program addresses the essential problems of practice with special emphasis given to effective teaching approaches for children who are at risk for school failure: children with special needs, children who are English-language learners and children who have challenging behaviors. Students may pursue initial certification with this degree.

Those students seeking certification have to meet all Early Childhood Education requirements (at least two years of coursework in Phase II) and then take additional courses for an M.Ed.

The program is designed for early childhood practitioners, Head Start teachers, early childhood special education teachers, child-care center staff and others who work with children from birth through age 8.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

More information about the Early Childhood Education M.Ed. program can be found at the MizzouOnline website. http://online.missouri.edu/degreeprograms/education/early-childhood/masters/

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or hetter
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150,Q141,A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Elementary Education

This emphasis is <u>currently suspended</u> within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

MEd in Learning, Teaching and Curriculum with Emphasis in English Education

Overview

The English area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

This degree program is a completely online masters of education degree in English Education. More information specific to this program can be found here: http://online.missouri.edu/degreeprograms/education/english/masters

MEd in Learning, Teaching and Curriculum with Emphasis in Literacy Education

Overview

Do you want to improve your literacy instruction (K-12)? Do you want to be certified as a Special Reading teacher (K-12) in the state of Missouri? Do you want to become a literacy education researcher?

The nationally-recognized Literacy Faculty at the University of Missouri-Columbia are prepared to help you accomplish your professional goals.

This degree program is a completely online masters of education degree in Literacy Education. More information specific to this program can be found here: http://online.missouri.edu/degreeprograms/education/literacy/masters/

Teachers with this certification are qualified for such positions as: Remedial Reading, Title I Reading, Reading Development, Special Education, and Language Arts. Depending on your initial certification experience (BA/BS), this certification may require as few as 6 courses.

Degree Requirements

The MEd degree in Literacy Education comprises a minimum of 32 semester hours of graduate work that meets the professional needs of the students. The courses include 16 hours of classes at the 8000-9000 level and 16 hours of work in education at the 7000-9000 level or above, which includes a course that enables the student to read, interpret and evaluate research.

Sample Plan of Study

- Prerequisites (0-9 semester hours)
- Psychological or Philosophical Foundations of Education (3 semester hours)
- Educational Research (3 semester hours)
- Foundations of Literacy Education (12-15 hours)
- Area of Specialization (0-9 semester hours)
 - Children's Literature
 - · Media and Technology
 - Special Reading Certification (K-12)
 - · Teaching Literacy to Diverse Learners
 - · Writing Instruction
- Electives (0-9 semester hours)

Thesis/Non-Thesis Requirements

To complete the masters programs, students are required to pass "comprehensive exams" or equivalent. Please speak with your advisor what this exam/project may entail.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). MEd in Learning, Teaching and Curriculum with Emphasis in Teaching English to Speakers of Other Languages

The University of Missouri's Teaching English to Speakers of Other Languages (TESOL) program is designed to meet the challenges of a diverse student body in a variety of education settings. Given the use of English as a global lingua franca, learning the unique methodology and theories associated with second language teaching is crucial to effectively meeting the challenges of a multilingual global society.

The TESOL program at MU can meet the needs of teachers seeking ESOL certification in the state of Missouri, those seeking advanced education in ESL/EFL teaching and learning, as well as those who seek further education in TESOL. Currently, many of our students begin the ESOL certification courses but find the topic so intriguing that they go on to pursue advanced education in the field (all TESOL courses taken at the graduate level are fully transferable to the M.Ed. degree).

The student body in the TESOL program at MU is incredibly diverse with students from a variety of ethnicities, cultures, and linguistic and educational backgrounds. We welcome traditional and nontraditional students as the program is designed to meet the needs of a variety of learners in a variety of academic settings.

The TESOL program at MU is informed by the second language acquisition theories and pedagogy unique to students who speak English in addition to their native language(s). The courses in the TESOL program are taught by faculty with expertise and knowledge in the field of English language learning including applied linguistics, sociolinguistics, intercultural communication, and English language education. By focusing on the interplay of theory and methods, as well as the cultural and linguistic diversity of English Language Learners, this program focuses on developing effective, responsive scholars and practitioners who use theory and research to enhance their work in a global, diverse, and technological society.

Degree Requirements

The M Ed program in TESOL requires 33 semester hours beyond the Bachelor's (16 hours at the 8000 or 9000 level), planned in agreement with the student's Advisory Committee.

Sample Plan of Study

TESOL Focus Courses (21 semester hours)

LTC 8645	Second Language Acquisition	3
LTC 8646	Materials for and Assessment of English Language Learners	3
LTC 8647	Language and Culture for Educators	3
LTC 8648	Linguistics for Educators	3
LTC 8649	Methods of Teaching English Language Learners	3
LTC 8650	English to Speakers of Other Languages Practicum	3
LTC 8654	ESOL Curriculum Development	3

Practicum: All master's students will be required to complete a practicum upon completion of the TESOL focus courses. LTC 8649 Methods of Teaching English Language Learners is a prerequisite and cannot be taken during the same semester as the practicum. If you are currently teaching English language learners, the 16-week practicum can be conducted in your own classroom and will be supervised online by a TESOL instructor. The Practicum may be waived for two years of full-time teaching experience in an ELL program

Core Master's Courses (6 semester hours)		
ESC_PS 7115	Human Learning	3
LTC 8915	Classroom Research-Learning, Teaching and Curriculum	1-3
Electives (6 semester hou	rs)	
LTC 8900	Seminar in Curriculum and Instruction (Teaching ESL/EFL to Adult Learners)	1-3
LTC 8642	Teaching Writing and Reading in Content Areas	3
LTC 8643	Teaching ESL/EFL to Adult Learners	3
LTC 8644	Teaching English Grammar and Pronunciation	3
LTC 8683	Celebrating Reading Through Good Books	3
LTC 8900	Seminar in Curriculum and Instruction (Seminar in Bilingual Education)	1-3
IS_LT 9467	Technology to Enhance Learning	3
Other electives may be chosen in consultation with your advisor		

Thesis/Non-Thesis Requirements

To complete the masters programs, students are required to pass "comprehensive exams" or equivalent. Please speak with your advisor what this exam/project may entail.

Admission

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150,Q145,A3.5 or higher). The verbal <u>must meet</u> the 150 minimum in order to be considered for the program.

 For students whose native language is not English, a score of 550 or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdD in Learning, Teaching and Curriculum

Admission Contact Information

Caitlin Rosbach rosbachc@missouri.edu 303 Townsend Hall Columbia, MO 65211 573-882-3742

About the Ed.D.

The LTC department offers the doctorate of education with emphasis in General LTC studies, Elementary Education, or Reading Education.

Application Deadline

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to expedite completely. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

- Completion of an appropriate preliminary degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
- Minimum TOEFL scores for most areas:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

Minimum GRE score* (varies by program area). Generally:

When did you take the GRE?	Verbal + Quantitative	
On or After August 1, 2011	291= (V150,Q141)	

*Note: Minimum GRE score varies by program area. All LTC doctoral programs require the GRE exam in order to be considered for the program.

Required Application Materials to the Office of Graduate Studies:

- · All required Graduate Studies documents
- Official transcripts
- Official GRE Scores
- Official TOEFL scores

Required Application Materials to the Learning, Teaching, & Curriculum Program

- · Personal data sheet form
- · Statement of purpose
- GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Graduate School)
- 3 letters of recommendation are required for all doctoral applicants.
 ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED
 ACCORDINGLY THROUGH THE GRADUATE STUDIES
 APPLICATION SYSTEM.

Financial Aid from the Program

Internal assistantships, fellowships or other funding packages require a departmental application, starting Fall 2010, and must be completed every year in order to have funding renewed. Completion of the application does not guarantee renewal. Check the program Web site or ask the program contact for details.

EdD in Learning, Teaching and Curriculum with Emphasis in Elementary Education

This emphasis is <u>currently suspended</u> within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Would you like to become a district coordinator for Elementary Education or a professor of Elementary Education? You can participate in advanced research-based courses in literacy/reading, mathematics education, science education, and social studies education. In addition, you will be mentored to teach at the university level and to conduct publishable research. The majority of Ed.D. students in elementary education move into administrative roles at the district or state level. The majority of Ph.D. students in elementary education move on to take positions at universities or colleges. This program offers 72-hours beyond the bachelor's degree.

Goals of the Doctoral Programs

Prepares students to:

- Understand the depth and breath of the fields of literacy, mathematics education, social studies education, and science education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of elementary education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching

and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 7.0 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdD in Learning, Teaching and Curriculum with Emphasis in General

This emphasis is <u>currently suspended</u> within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/current-students/doctoral). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

EdD in Learning, Teaching and Curriculum with Emphasis in Reading Education

The Ed.D. in Reading Education is a 72-hour program above the bachelor's. Students can expect to:

- Understand the depth and breath of literacy education in terms of research, curriculum, policy, teacher development and student learning:
- Develop, carry out, and report independent research in literacy education:
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/current-students/doctoral). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or hetter
- · A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum

Admission Contact Information

Caitlin Rosbach rosbachc@missouri.edu 303 Townsend Hall Columbia, MO 65211 573-882-3742

About the Ed.S.

This post-master Educational Specialist degree is offered with the following emphasis areas: Literacy Education; Mathematics Education; Music Education; and Science Education.

Admissions Deadlines

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

- Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
- Minimum TOEFL scores for most areas:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

Minimum GRE score is required for all applicants of the Ed.S. program.

When did you take the GRE?	Verbal + Quantitative		
On or After August 1, 2011	291+= (V150,Q141)		

Required Application Materials to the Office of Graduate Studies:

- · All required Graduate Studies documents
- · Official transcripts
- GRE scores
- TOEFL scores

Required Application Materials to the Learning, Teaching, & Curriculum Program

- Personal data sheet form (complete through online application)
- · Statement of purpose
- GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Graduate School)
- 3 letters of recommendation. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE GRADUATE STUDIES APPLICATION SYSTEM.

EdSp in Learning, Teaching and Curriculum with Emphasis in Literacy Education

Degree Requirements

The EdSp is a 30-hour program of specialization built on the master's degree. The program requires course work in core, research, and electives. The program is directed by an advisory committee (3 members) and supervised by the major advisor.

Sample Plan of Study

Please consult with an advisor to inquire what a sample program of study may look like. Coursework will generally comprise upper-level graduate work in literacy education, tailored to the student's needs and career objectives.

- Prerequisites
 - Foundations of Educational Psychology (or equivalent)
 - Introduction to Statistics (or equivalent)
- English Education or Literacy Education Core
 - To be negotiated with advisor to meet your professional goals
- Education Core (3+ semester hours)
 - If not completed as a part of the master's degree, one or more graduate courses in the behavioral, social, philosophical, or historical foundations of education
- Research Courses (6+ semester hours)
 - Introduction to Educational Statistics
 - · Overview of Educational Research
- Electives
 - May be taken to deepen specialization or to advance the student's career goals

Comprehensive Examination Process

A thesis or seminar paper and final examination are required.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/literacy-education-eds) for the EdSp program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better
- · A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)

 For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The Educational Specialist degree in Mathematics Education is intended for teachers who have already completed a masters degree and are seeking additional work related to leadership, curriculum development, research and/or improving their own teaching skills.

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/mathematics-educations-eds) for the Ed.S. program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed Ed.S. degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Program of Study

The program of study for the Educational Specialist degree in Mathematics Education is comprised of three key areas:

- 1.) 14+ hours of Mathematics Education curriculum
- 2.) Up to 9 hours of general electives
- 3.) 7 hours of research core: ESC_PS 7170 (3), ESC_PS 8020 (3), and LTC 8910 (1)

More information about the courses available that comprise the program can be found at the MizzouOnline website: http://online.missouri.edu/degreeprograms/education/mathematics/education-specialist/admissions.aspx

EdSp in Learning, Teaching and Curriculum with Emphasis in Music Education

The Educational Specialist Degree (EdS) in Learning, Teaching, & Curriculum with an emphasis in Music Education, is offered by the College of Education in close collaboration with the School of Music. The Ed.S. represents a planned program of approved graduate course work beyond the master's degree, organized to meet the specific needs of the student. The program is one of specialization and is designed to build upon the foundation represented by previous coursework and teaching experience.

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/music-education-eds) for the Ed.S. program.

 Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.

- Completion of an appropriate master's degree with a GPA of 3.0 or better
- · A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed Ed.S. degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum with Emphasis in Science Education

The Educational Specialist (EdS) Program in Science Education is designed for individuals holding a Master's in Science Education who desire further education. The EdS in Science Education is typically considered a terminal degree, not a stepping stone to the PhD.

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/science-education-eds) for the Ed.S. program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.

- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q141, A3.5 or higher)
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

PhD in Learning, Teaching and Curriculum

Admission Contact Information

Caitlin Rosbach, rosbachc@missouri.edu 303 Townsend Hall Columbia, MO 65211 573-882-3742

About the Ph.D.

The LTC Department offers the Doctorate of Philosophy (Ph.D.) with emphasis options in General LTC; Art Education; Early Childhood Education; Elementary Education; Mathematics Education; Music Education; Reading Education; Science Education; or Social Studies Education.

Application Deadlines

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

Admission Requirements

- Completion of an appropriate preliminary degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
- Minimum TOEFL scores for most areas:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

• Minimum GRE score* (varies by program area). Generally:

When did you take the GRE?	Verbal + Quantitative
On or After August 1, 2011	V153,Q144=297+

Note: Minimum GRE score varies by program area. All LTC doctoral programs require the GRE exam in order to be considered for the program.

Required Application Materials to the Office of Graduate Studies:

- All required Graduate Studies documents
- · Official transcripts

- · Official GRE scores
- · Official TOEFL scores

Required Application Materials to the Learning, Teaching, & Curriculum Program

- Personal data sheet form (select appropriate form from the department website)
- · Statement of purpose
- GRE scores (a copy may be sent to the department too; minimum, an official result needs to be sent to Office of Graduate Studies)
 - 3 letters of recommendation are required for all doctoral applicants. ALL LETTERS MUST BE CONFIDENTIAL AND SUBMITTED ACCORDINGLY THROUGH THE OFFICE OF GRADUATE STUDIES APPLICATION SYSTEM.

Financial Aid from the Program

Internal assistantships, fellowships or other funding packages require a departmental application and must be completed every semester in order to have funding renewed. Completion of the application does not guarantee renewal. Check the program website or ask the program contact for details.

PhD in Learning, Teaching and Curriculum with Emphasis in Art Education

The MU Art Education PhD program prepares individuals for research and teacher education careers in higher education and for leadership positions in various educational settings. The program offers opportunities to expand a teaching repertoire and research current topics in art education as well as to develop expertise in conceptualizing, conducting and reporting research in the arts arena.

The individual and a faculty committee develop an individualized program of study based upon a candidate's background, experiences, and professional goals. The majority of MU PhD graduates take positions in Colleges of Education or Fine Arts in Art and Art Education at universities or colleges. However, some graduates move into administrative and supervisory positions at art museums, and arts agencies.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/art-education-phd) for the Doctoral program.

 Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.

- Completion of an appropriate master's degree with a GPA of 3.0 or hetter
- · A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

The faculty and students in early childhood education work closely together. Faculty and students share ideas and learn from one another. Your faculty advisor has the strongest interest in your professional/personal growth, but each early childhood faculty member will be a valued part of your community.

Goals of the PhD Program

These goals are achieved through a combination of course-work, internships and authentic experiences with research, development, and teacher education.

- Understand the depth and breath of the field of early childhood education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of early childhood education;
- · Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and learn how memberships in organizations can lead to a service agenda.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Elementary Education

This emphasis is <u>currently suspended</u> within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Would you like to become a district coordinator for Elementary Education or a professor of Elementary Education? You can participate in advanced research-based courses in literacy/reading, mathematics education, science education, and social studies education. In addition, you will be mentored to teach at the university level and to conduct publishable research. The majority of Ed.D. students in elementary education move into administrative roles at the district or state level. The majority of Ph.D. students in elementary education move on to take positions at universities or colleges. This program offers 72-hours beyond the bachelor's degree.

Goals of the Doctoral Programs

Prepares students to:

- Understand the depth and breath of the fields of literacy, mathematics education, social studies education, and science education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in some area of elementary education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better
- · A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in English Education

The English Education area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

In order to earn a PhD in English Education, a minimum of 72 semester hours beyond the bachelor's degree is required.

Study Plan:

English Education	33-36 semester hours
Support Area I	12-15 semester hours
Support Area II	12-15 semester hours
Research Methodology	12-15 semester hours
Dissertation	9 semester hours

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Foreign Language Education

The Learning, Teaching, & Curriculum Graduate Program is no longer accepting students into the Foreign Language Education program.

PhD in Learning, Teaching and Curriculum with Emphasis in General

This emphasis is <u>currently suspended</u> within the Learning, Teaching, and Curriculum program due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

PhD in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The MU Ph.D. program in Mathematics Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. The program aims to enhance student knowledge about the field of mathematics education and develop expertise in conceptualizing, conducting and reporting research studies. Programs of study are individually planned with a faculty committee, and are based upon candidate's background, experiences, and professional goals. The majority of our graduates take positions in Colleges of Education or Departments of Mathematics at universities or colleges. However, some graduates move into administrative and supervisory roles at district or state levels.

Detailed information about all of the elements of the program can be found in the MU Mathematics Education Ph.D. Program: Faculty and Student Handbook (http://education.missouri.edu/LTC/mathematics/files/math_ed_handbook.pdf).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer

to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions) for the PhD program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or hetter
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Reading Education

The Doctoral Program in Literacy Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. Besides enhancing students' knowledge of literacy education, students develop expertise in conceptualizing, conducting and reporting research studies.

Programs of study are individually planned with a faculty committee. Recommendations include the following:

I. Literacy Education Core (18+ hours)

- A. Foundations (9-12 hours)
- Theoretical Foundations of Literacy
- Whole Language Curriculum or Talk in the Curriculum
- History of Literacy or Issues and Trends of Literacy Education
- Linguistics, Sociolinguistics, Psycholinguistics
- B. Concentration (9-12 hours)

Declared area of interest or specialization selected in consultation with advisor. Possible areas of specialization include:

- · Early Literacy
- Children's Literature

- · Linguistics and Literacy
- Literacy in a Digital World
- · Literacy for Special Needs Children
- Other

II. Professional Education Core

(12 hours, 3 hours from each category)

A. Humanistic Dimensions of Education

- · Social and Philosophical Aspects of Teaching
- · Sociology of the Classroom
- Issues in Education and Human Development: Historical and Philosophical
- Multicultural Dimensions of Education
- B. Psychological Foundations of Education
- · Psychological Foundations of Education
- · Human Learning
- Human Cognition
- Applications of Computer Based Systems to Educational Settings
- · Instructional Programs for Young Children
- · Parents, the School, and the Community

III. Research Core (12 hours of the following or equivalent courses)

- Quantitative Methods in Educational Research I
- Quantitative Methods in Educational Research II
- · Qualitative Methods of Educational Research I
- Qualitative Methods of Educational Research II

IV. Teaching and Research Internships (0-6 hours)

To be negotiated with advisor to meet your professional goals

V. Electives (0-12+ hours)

Select courses within or outside the College of Education that will help focus and support your research interests (with committee approval). Or take a concentrated set of 9-12 hours as a minor

VI. Dissertation (12 hours)

Includes proposal approval, Institutional Review Board Approval, approval from participants, write up, and oral defense

Doctoral Regulations:

Minimum total semester hours: 72 beyond the baccalaureate degree

Minimum semester hours 8000-level or above: 15 exclusive of research, problems, and independent study experiences

PREREQUISITES:

- Introduction to Statistics (or equivalent)
- Foundations of Educational Psychology (or equivalent)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer

to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/reading-education-phd/#degree-requirements) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- · A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Science Education

The doctoral program emphasizes science education research and culminates with a dissertation project completed under the supervision of a science education faculty member. The program requires coursework in science education, science content, educational foundations, and educational research.

The Science Education Ph.D. requires a minimum of 72 semester hours beyond the Bachelor's degree (the Master's degree can be counted toward this total). The Science Education Ph.D. program includes three emphasis areas:

- 1. Elementary Science Education
- 2. Middle/Secondary Science Education
- 3. College Science Teaching

Each emphasis area requires coursework in science education, science content, and educational research as well as teaching and research experiences.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching

and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/science-education-phd/#apply) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Social Studies Education

The Ph.D. in Social Studies Education at the University of Missouri provides increased opportunities for its graduates to assume leadership roles in a variety of academic, knowledge-driven, and/or governmental and politically-based institutions and organizations. The core of the Ph.D. experience lies in scholarship and in the process by which graduate students transition from being knowledge-consumers to knowledge-producers. Hence, the doctoral experience involves a journey of personal growth and development, which leads the graduate student towards a deeper sense of the self and towards crafting a personal agenda for scholarship in the social studies field.

The Culture of the Social Studies Education Doctoral Program

Unique among graduate programs, the social studies doctoral students and faculty form a community of learners and employ democratic practices to shape the direction of the community, its scholarship, and future coursework. As a result, in dialogue with faculty members, doctoral students help co-direct the structure of their Ph.D. experience.

This occurs in two ways. First, doctoral students have flexibility in much of the design of their own coursework, research endeavors, and scholarship. Second, in community with the other doctoral students and faculty members, doctoral students vote on coursework requirements, expectations for the program, and program goals.

An important aspect of forming this community of learners involves identifying and clarifying the academic and research interests of its members. As a result, the current doctoral students have established four **research clusters**, or areas that describe their often overlapping research interests in the social studies education field. At this time, these clusters include the following:

- Social Studies Teacher Education for Social Justice: addressing issues of citizenship, diversity, and social justice in teacher education.
- Multicultural and Global Education: Preparing teachers and students to address local, national, and global concerns of culture, environment, and the socio- and geopolitical landscape in education.
- Social Studies Curriculum and Instruction: Confronting persistent issues in social studies curriculum and teaching, including official and master narratives, teaching methodologies, assessment, technology, and student engagement in the classroom.
- Educational Policy and Politics Affecting Social Studies
 Teaching: Investigating the power structures, political dynamic, curriculum control, and educational policy and system structure influence social studies education and teaching.

These research clusters not only clarify and support doctoral students in team-oriented scholarship, but also inform social studies faculty on which courses to offer and what kinds of research opportunities to promote. Research clusters are reviewed and revised on a yearly basis. Because admission into the doctoral program also includes membership into our community of learners, we recommend that individuals interested in applying for the Social Studies Education doctoral program at the University of Missouri demonstrate research interests that align with one or more of these research clusters.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/degree/social-studies-education-phd/#apply) for the Doctoral program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better
- A minimum of three letters of recommendation; three letters.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.

- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Learning Technologies and Design (p. 464)
 - with emphasis in Online Educator (p. 464)
 - with emphasis in Technology in Schools (p. 465)

- EdSp in Learning Technologies and Design (p. 465)
 - with emphasis in Online Educator (p. 466)
 - with emphasis in Technology in Schools (p. 466)

About Information Science & Learning Technologies

In January 1997, the School of Information Science & Learning Technologies became the home for MU's graduate programs in Library and Information Science and Educational Technologies as well as a new, interdisciplinary doctoral program in Information Science & Learning Technologies.

SISLT faculty are internationally renowned for their research and development accomplishments. Faculty and students are committed to a collaborative, interdisciplinary approach – both within MU and among other research-extensive universities. Nowhere is this more evident than in the Allen Institute (http://alleninstitute.missouri.edu), a 10,000 square foot facility dedicated to supporting collaborative R&D at the intersection of Information & Learning.

Student Services Coordinator, 304 Townsend Hall Columbia, MO 65211 573-882-4546 or toll free 877-747-5868 http://sislt.missouri.edu/

MS in Learning Techologies and Design

Degree information for the MS in Learning Technologies and Design degree may be found on the degree's emphasis pages. They are Online Educator (p. 464), and Technology in Schools (p. 465).

MS in Learning Techologies and Design with Emphasis in Online Educator

In the Online Educator emphasis area you will develop the knowledge and skills in eLearning offerings. You will prepare for jobs in an expanding field where online education is used in schools, universities, industry, health care, museums, and other learning settings. Your work will culminate in an authentic capstone project that documents your learning and accomplishments.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The MS consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. The Online Educator curriculum allows you

to customize your course work by focusing on technology design and development or technology implementation.

Sample Plan of Study

Comprehensive Examination Process

In your final semester, you will develop and present a portfolio of your work to demonstrate your mastery of the competencies specific to your focus area. The portfolio contains descriptions of competencies and what they mean to you, explanations of artifacts, and reflections. You should start on your portfolio early in your coursework.

Portfolios can be submitted spring, fall, and summer semesters. Portfolios must be submitted to the assigned portfolio coach for review no later than three (3) weeks prior to the last day of classes; you will be notified by the SISLT Student Services Office of the specific date at the beginning of your final semester.

The student will work with the portfolio coach who will provide feedback and support to the student as she/he prepares the portfolio for review.

The review process asks three basic questions:

- 1. Does the portfolio demonstrate the student's knowledge of what the competencies mean?
- 2. Does the portfolio demonstrate the student's mastery of the competencies?
- 3. Does the portfolio present the student in a positive and professional manner?

Once a portfolio is deemed acceptable or unacceptable by the portfolio coach, the coach will notify the student and the SISLT Student Services Office. Should the portfolio be deemed unacceptable by the portfolio coach, the student may appeal this decision by petitioning the Director of SISLT and requesting that two other faculty review the portfolio.

Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MS in Learning Techologies and Design with Emphasis in Technology in Schools

The Technology in Schools emphasis area is your portal to excellence and leadership in designing, developing, and implementing technology in education, training and performance support. In the TiS focus area you will prepare to use innovative and effective technology to improve teaching and learning in a wide variety of settings. In addition to gaining a working knowledge of the underlying theories and strategies involved, you will get practical experience using technology as an effective teaching and learning tool.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

The review process asks three basic questions:

- 1. Does the portfolio demonstrate the student's knowledge of what the competencies mean?
- 2. Does the portfolio demonstrate the student's mastery of the competencies?
- 3. Does the portfolio present the student in a positive and professional manner?

Once a portfolio is deemed acceptable or unacceptable by the portfolio coach, the coach will notify the student and the SISLT Student Services Office. Should the portfolio be deemed unacceptable by the portfolio coach, the student may appeal this decision by petitioning the Director of SISLT and requesting that two other faculty review the portfolio.

Admissions

Email: sislt@missouri.edu

SISLT Student Services Coordinator

304 Townsend Hall Columbia, MO 65211

Phone: 573-882-4546 or toll free 877-747-5868

http://edtech.missouri.edu/oe

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Learning Technologies and Design program (http://edtech.missouri.edu/#admission) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

EdSP in Learning Technologies and Design with Emphasis in Technology in Schools

The Educational Specialist degree at MU is your portal to excellence and leadership in designing, developing, and implementing technology in education, training and performance support. In the Technology in Schools (TiS) emphasis area you will prepare to use innovative and effective technology to improve teaching and learning in a wide variety of settings. In addition to gaining a working knowledge of the underlying theories and strategies involved, you will get practical experience using technology as an effective teaching and learning tool.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree in Educational Specialist degree will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The EdSp is a 30 credit hour option is available for students who already have a master's degree. The Technology in Schools curriculum allows you to customize your course work by focusing on technology design and development or technology implementation.

Comprehensive Examination Process

In your final semester, you will develop and present a portfolio of your work to demonstrate your mastery of the competencies specific to your focus area. The portfolio contains descriptions of competencies and what they mean to you, explanations of artifacts, and reflections. You should start on your portfolio early in your coursework.

Portfolios can be submitted spring, fall, and summer semesters. Portfolios must be submitted to the assigned portfolio coach for review no later than three (3) weeks prior to the last day of classes; you will be notified by the SISLT Student Services Office of the specific date at the beginning of your final semester.

The student will work with the portfolio coach who will provide feedback and support to the student as she/he prepares the portfolio for review.

The review process asks three basic questions:

- 1. Does the portfolio demonstrate the student's knowledge of what the competencies mean?
- 2. Does the portfolio demonstrate the student's mastery of the competencies?
- 3. Does the portfolio present the student in a positive and professional manner?

Once a portfolio is deemed acceptable or unacceptable by the portfolio coach, the coach will notify the student and the SISLT Student Services

Office. Should the portfolio be deemed unacceptable by the portfolio coach, the student may appeal this decision by petitioning the Director of SISLT and requesting that two other faculty review the portfolio.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make

up the University. The catalog provides a complete list of these degree options (p. 18).

 with emphasis in Library Media Specialist, Certification (p. 468)

About Information Science & Learning Technologies

In January 1997, the School of Information Science & Learning Technologies became the home for MU's graduate programs in Library and Information Science and Educational Technologies as well as a new, interdisciplinary doctoral program in Information Science & Learning Technologies.

SISLT faculty are internationally renowned for their research and development accomplishments. Faculty and students are committed to a collaborative, interdisciplinary approach – both within MU and among other research-extensive universities. Nowhere is this more evident than in the Allen Institute (http://alleninstitute.missouri.edu), a 10,000 square foot facility dedicated to supporting collaborative R&D at the intersection of Information & Learning.

MLIS Master of Library and Information Science

Degree information for the Master of Library and Information Science (MLIS) degree may be found on the degree's emphasis pages. Library Media Specialist, Certification (p. 468).

MLIS Master of Library and Information Science with Emphasis in Library Media Specialist, Certification

In the state of Missouri, Library Media Certification is granted by the Missouri Department of Elementary and Secondary Education (DESE). The School of Information Science & Learning Technologies (SISLT) LIS Program offers many of the courses approved by DESE for this certification. Presently SISLT does not offer courses in Library Media Administration and Curriculum and the Media Center. Students are encouraged to speak with their academic advisors about completing these courses at other universities in the state of Missouri. For more information about the process of certification, please visit DESE website (http://dese.mo.gov/sites/default/files/04%20Secondary %20Education04-08.pdf).

Undergraduate

- BSEd in Middle School Education (p. 469)
 - with emphasis in Language Arts (p. 469)
 - with emphasis in Mathematics (p. 470)
 - with emphasis in Science (p. 470)
 - with emphasis in Social Studies (p. 471)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education, professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

The Middle School Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 5-9. The College of Education does not currently offer a graduate degree specifically in Middle School Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

- Math
- English/Language Arts
- Science
- Social Studies
- Art
- Music

We also offer a graduate degree in "Reading/Literacy Education" at the M.Ed., Ed.S., Ed.D., and Ph.D. levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.

BSEd in Middle School Education

Degree Program Description

The Bachelor of Science in Education in Middle School Education prepares students to work with children from fifth through ninth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework will help you learn about general teaching and learning strategies as well as those specific to your discipline.

Major Program Requirements

The BSEd in Middle School Education is offered in four emphasis areas: Language Arts (p. 469), Mathematics (p. 470), Science (p. 470), and Social Studies (p. 471). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university (p. 33), general education (p. 34), and content requirements in addition to the degree requirements. Please meet with a Mizzou Ed Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

The BSEd in Middle School Education has emphasis areas in Language Arts (p. 469), Mathematics (p. 470), Science (p. 470), and Social Studies (p. 471). Please see the individual emphasis area pages for semester plans specific to the emphasis area.

Graduate

The Secondary Education Program at the University of Missouri includes degree programs that focus on preparing graduates to teach in grades 9-12. The College of Education does not currently offer a graduate degree specifically to Secondary Education. However, we do offer Masters (M.Ed.) and doctorates (Ph.D) in the following areas.

- Math
- English/Language Arts
- Science
- · Social Studies
- Art
- Music

We also offer a graduate degree in "Reading/Literacy Education" at the M.Ed., Ed.S., Ed.D., and Ph.D. levels.

You can find out more about the programs by going to http://education.missouri.edu/academics/graduate_studies/index.php.

BSEd in Secondary Education

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence.

Major Program Requirements

The BSEd in Secondary Education is offered in nine emphasis areas: Art Education (p. 473), Biology (p. 473), Chemistry (p. 474), Earth Science (p. 474), General Science (p. 475), Language Arts (p. 475), Mathematics Education (p. 476), Physics (p. 477), and Social Studies (p. 478). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

This degree does not currently have a sample semester plan. Please schedule an appointment with an academic advisor to discuss courses.

BSEd in Secondary Education with Emphasis in Art Education

Degree Program Description

The Undergraduate Art Education Program is currently suspended due to low enrollment. The University of Missouri and MU College of Education remain committed to art education and will continue to provide a post-baccalaureate certification program, master's degree and doctorate in art education. BA and BFA candidates may acquire art teaching certification by completing the art education requirements not already completed in the BA or BFA programs. In addition, students must complete all university (p. 33), general education (p. 34) and content requirements. In addition, the MU College of Arts and Science offers a bachelor's degree in art and a bachelor's degree in fine arts.

Major Program Requirements

This degree program does not currently have any program requirements available.

Semester Plan

This degree program does not currently have a semester plan available.

BSEd in Secondary Education with Emphasis in Biology

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary biology. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary Biology provides you with experience in the methods of teaching biology in supporting learners in the development of scientific literacy. This includes consideration of the nature of science, methods for teaching science, strategies for assessing science learning, and pathways for developing into a professional biology educator.

Major Program Requirements

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Special Education

Our mission is to prepare educators to work with children, youth and adults with disabilities to be academically and socially successful lifelong learners. The department offers comprehensive degree programs that blend pedagogy and practices across developmental, specific content, and exceptionality to prepare educators to work with individuals at-risk and those with disabilities. In addition, the department offers comprehensive programs within exceptionalities, curriculum development for learners with disabilities, policy, and research across the lifespan.

- BSEd in Special Education (p. 480)
 - with emphasis in Cross Categorical Special Education (p. 480)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education (p. 34), professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

About Special Education Graduate Programs

We strive to prepare educators to assist children, youth and adults with disabilities to be academically and socially successful life-long learners. Our faculty are consistently recognized — internationally and across the U.S. — for their individual and collaborative teaching and research excellence. The department's unique mix of faculty expertise areas creates a wide range of opportunities for students and researchers. Special Education hosts or co-hosts several state and federally supported training, demonstration and research projects, including the following three centers that focus on facilitating positive developmental outcomes for children and youth with disabilities:

- · Center for School-Wide Positive Behavioral Supports
- · Center for Adolescent Research in Schools
- Thompson Center for Autism and Neuro-developmental Disorders

Areas of Study

Students pursuing a master's degree may pursue course work in autism, behavior disorders, early-childhood special education, general special education (cross categorical), gifted education, or learning disabilities.

Doctoral student may study in areas such as behavior disorders, early-childhood special education, general special education, learning disabilities or developmental disabilities (cognitive impairments).

Careers

Undergraduate and graduate programs prepare teachers and leadership personnel in the field of special education. Program graduates assume roles as teachers in a variety of educational settings, as consulting teachers, college professors, researchers, school administrators and leaders in state and federal governmental agencies. Programs meet students' needs and interests within the framework of the requirements of each specific degree and state certification guidelines.

BSEd in Special Education

Degree Program Description

The Bachelor of Science in Education in Special Education prepares students to work with children from kindergarten through twelfth grade in public, private, and alternative school systems. Students should consider a degree in special education if they enjoy working with children and/ or adolescents who are struggling or who have special needs, want to help these students develop into strong citizens, and are excellent collaborators. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth with and at risk for disabilities. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Students must choose the emphasis area.

Major Program Requirements

Students are required to select the emphasis area in Cross Categorical Special Education (p. 480) for this degree. Refer to the emphasis are for degree requirements.

Semester Plan

For a sample plan of study refer to the semester plan designed for the emphasis in Cross Categorical Special Education (p. 480).

BSEd in Special Education with Emphasis in Cross Categorical Special Education

Degree Program Description

The Bachelor of Science in Education in Special Education prepares students to work with children from kindergarten through twelfth grade in public, private, and alternative school systems. Students should consider a degree in special education if they enjoy working with children and/ or adolescents who are struggling or who have special needs, want to help these students develop into strong citizens, and are excellent collaborators. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth with and at risk for disabilities. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants certification in Special Education: Cross Categorical. Practical and rewarding clinical training in schools begins sophomore year, and continues each semester culminating in a full year seniorlevel teaching internship, enhancing teaching skills and confidence. Students focus on understanding and teaching students with a range of mild and moderate disabilities. Courses within special education address foundational principles of how to teach students with special needs, including methods in mathematics and literacy, behavior management, language, and introduction and methods in cross categorical instruction, among others.

Major Program Requirements

Students must complete all university (p. 33), general education (p. 34), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

As Mizzou Ed continues to implement the new Missouri Standards for the Preparation of Educators mandated by the Department of Elementary and Secondary Education (DESE), curriculum changes will be required that must be met in order to complete your degree and earn teacher certification. Those changes may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

MA in Special Education

Caitlin Rosbach (sped@missouri.edu) 303 Townsend Hall, Columbia, MO 65211 573-882-3742

About Special Education's Master's Degrees

The Master of Arts program emphasizes research and requires 33 hours. MA candidates must follow graduate school guidelines with respect to timeliness and committee formation.

The Master of Education program requires a comprehensive examination and project or thesis.

Admission Criteria

Application Submission/Completion Deadline:

Fall deadline: May 1 Spring deadline: October 1 Summer deadline: March 1 Minimum GPA: 3.0/4.0 Minimum TOEFL scores:

Internet-based test (iBT) Paper-based test (PBT)
80 550

Minimum preferred GRE scores:

When did you take the GRE?	Verbal + Quantitative
On or After August 1, 2011	291+ (V 150 + Q 141) / Analytic
	Writing 3.5

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant's motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials

To the Office of Graduate Studies:

All required Graduate Studies documents

To the Special Education Program:

- Departmental application
- · Letter of intent and professional goals
- 2 letters of recommendation (submitted electronically and confidentially through the online graduate application)
- · GRE score report

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Completion

The MA program emphasizes research and requires 33 hours. MA candidates must follow the guidelines of the Office of Graduate Studies with respect to timeliness and committee formations and complete a thesis.

Retention

To remain in good standing in the master's program and earn a master's degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student's GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of "C" in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of "I" prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education site.

MA in Special Education with Emphasis in Behavior Disorders

Degree Requirements

Coursework and practica in MU's Behavioral Disorders Program focus on the preparation of high quality teachers for students with behavioral disorders. MU prepares teachers for a variety of delivery settings, including general education classrooms as well as resource and self-contained classes from kindergarten through 12th grade.

The program is grounded in the MOSTEP Quality Indicators, the DESE Cross-Categorical Competencies, the standards of the Council for Exceptional Children, relevant research pertaining to best practice, significant field work and a problems-based approach to content.

The M.A. in Behavioral Disorders emphasizes applied knowledge to prepare special educators to work directly with children and youth across a variety of settings.

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

- 1. A completed baccalaureate degree.
- 2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
- GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined

- score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
- A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- 6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed (within the last two years) one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
- Students may be required to complete an interview with special education faculty.
- Students must complete all graduate school and program application materials by the deadline posted each term.

MA in Special Education with Emphasis in Learning Disabilities

Degree Requirements

A Master's degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri. Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master's degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade. A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). MEd in Special Education with Emphasis in Cross Categorical, Certification

Degree Requirements

MU's cross-categorical disabilities program is tailored to graduate students who are receiving initial and secondary certification in cross-categorical special education. Upon completion of the degree, graduates are certified to teach students with mild disabilities (i.e., learning disabilities, emotional/behavior disorders, mental retardation) and are certified to teach all grades K-12.

In addition to enrolling in courses to fulfill general certification requirements, students are required to take graduate coursework (30 hours) in the area of cross-categorical disabilities.

The coursework represents a broad scope of content including language development, assessment, advanced behavior management, vocational education, collaboration and consultation, literacy instruction, mathematics instruction, research, and trends and issues in special education. In addition to the above requirements, students in the crosscategorical program also need to take a 3-hour characteristics of students with cross-categorical disabilities course and a 4-hour strategies for students with cross-categorical disabilities course.

To enhance the generalization of critical skills and knowledge to the classroom setting, students are also required to take two practica concurrent with the characteristics and methods courses that include field experiences and applications of key concepts. Students are required to have their practica represent the range of grade levels for which they will be responsible. More specifically, if their first practicum was in an elementary setting, then their second will be in a middle school, junior high or high school setting or vice versa.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

- 1. A completed baccalaureate degree.
- 2. Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
- GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined

- score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
- A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- 6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
- Students may be required to complete an interview with special education faculty.
- Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Curriculum Development for Exceptional Students

This emphasis is <u>currently suspended</u> within the Special Education Department due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

MEd in Special Education with Emphasis in Early Childhood Special Education

The Early Childhood Special Education (ECSE) Program is a graduate program that provides students with the necessary experiences and information to work with young children, both typically developing and those with disabilities, and their families in a variety of settings, including both home and school. The program also focuses on working effectively with families and children from a variety of cultures and how to provide intervention in a culturally consistent manner.

The Masters program in ECSE is 30 credit hours. In the campus program there are six required courses. Additional coursework is negotiated with

the advisor. The online program coursework is set and can be found at MizzouOnline (http://online.missouri.edu/degreeprograms/education/early-childhood-special-education/masters).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

- 1. A completed baccalaureate degree.
- Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
- GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
- A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- 6. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
- Students may be required to complete an interview with special education faculty.
- 8. Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Gifted Education

Degree Requirements

Online Degree Only

The Gifted Education Master's Program (MEd) is a graduate level program designed to provide candidates with advanced preparation in gifted education methodology and practices. Candidates become equipped with the knowledge and skills necessary to work with children and youth in the field of gifted education. The program meets Missouri Department of Education (DESE) academic requirements for Missouri Gifted Certification. This program is offered through Mizzou Online (http://online.missouri.edu/degreeprograms/education/gifted/masters).

Applicants who are accepted into the master's program will participate in a 30-hour online degree program with 15 hours of gifted education courses and 15 hours of core course work. Courses are selected to provide educators with skills and knowledge in current learning theory and to translate this knowledge into practical strategies and techniques for use in the classroom.

The 15 hours of gifted focus courses include content covering, nature and needs of gifted students, curriculum methods, differentiated curriculum, assessment and evaluation, and gifted practicum. The 15 hours of core course work in this program include study in learning theory, research with exceptional children, instructional technology, instructional leadership, and instructional strategies.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

- 1. A completed baccalaureate degree.
- Graduate grade point average above 3.0 (on a 4.0 scale) or higher in the last 60 hours of undergraduate coursework.
- 3. GRE scores taken within the last five years. For GRE scores taken on or after August 1 2011, they should reflect a preferred combined score of 291 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 3.5 or better.
- A minimum of two letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the graduate level.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.

Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program. International students who have completed within the last two years, one year of college-level full-time study in a country where English is the native language may waive the TOEFL requirement if they meet all the conditions.
- Students may be required to complete an interview with special education faculty.
- Students must complete all graduate school and program application materials by the deadline posted each term.

MEd in Special Education with Emphasis in Learning Disabilities

Degree Requirements

A Master's degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri.

Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master's degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade. A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

- 1. A completed baccalaureate degree.

EdSp in Special Education

Our department is no longer admitting students to the EdSp program. We invite you to explore the other graduate degree options within the College of Education.

EdSp in Special Education with Emphasis in General

Our department is no longer admitting students to the EdSp program. We invite you to explore the other graduate degree options within the College of Education.

PhD in Special Education

Admission Contact Information

Caitlin Rosbach (sped@missouri.edu) 303 Townsend Hall; Columbia, MO 65211 573-882-3742

Admission Criteria

Fall deadline: January 15 Spring deadline: August 15 Minimum GPA: 3.5/4.0

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

Minimum preferred GRE scores:

When did you take the GRE?	Verbal + Quantitative
On or After August 1, 2011	297+ (V153 +Q144) / Analytic
	Writing 4.0

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant's motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials

To the Office of Graduate Studies: All required Graduate Studies documents

To the Special Education Program. Departmental application Letter of intent and professional goals

3 letters of recommendation (submitted confidentially and electronically through our online application system)

GRE score report

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for

Emphasis Areas

For the doctorate's specializations, see Degrees Offered.

Plan of Study

The PhD program requires 72 hours beyond the requirements of the master's degree.

Qualifying Exam

Doctoral students must successfully pass a qualifying exam. This is given to assess the student's current knowledge of the field, their ability to synthesize professional literature, engage in professional writing practices, and orally present/discuss key issues within the field. This process is conducted by three faculty members and may be used to help define the student's plan of study.

Comprehensive Exam and Dissertation

Doctoral students must complete comprehensive exams, which have a written and oral component, which is constructed and evaluated by the student's doctoral committee in order to advance to "candidacy" status. A minimum of six hours of 9090 Research is required for the doctoral program in completion of the dissertation.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education site.

PhD in Special Education with **Emphasis in Administration and Supervision of Special Education**

This emphasis is **currently suspended** within the Special Education Department due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http:// gradstudies.missouri.edu/admissions/eligibility-process/minimum-

requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

PhD in Special Education with Emphasis in Behavior Disorders

Degree Overview and Requirements

The Doctorate of Philosophy program in Behavior Disorders supports advanced instruction and research in Behavior Disorders. Candidates complete individualized programs of study to meet their learning objectives and prepare for further research in the field. The candidate will build on prior graduate coursework through special education doctoral coursework, specified behavior disorders coursework, and dissertation preparation and defense. Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.

- After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.
- 2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
- Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
- 4. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
- Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
- Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
- 7. Students must also comply with all College of Education and Office of Graduate Studies guidelines.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your

application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Admissions to Doctoral programs in Special Education will be based upon the following criteria:

- Graduate grade point average above 3.5 and a preferred combined score of 297 or better on the Verbal Reasoning and Quantitative Reasoning sections and Analytical Writing score of 4.0 or better on the GRE taken within the last 5 years.
- A minimum of three years full-time appropriate teaching or professional experience in pre K-12 or other direct services with persons with disabilities.
- A minimum of three letters of recommendation, which on the whole, clearly reflect professional success and predict academic success at the advanced graduate level.
- 4. Statement of purpose indicating clearly that the proposed doctorate is appropriate to the applicant's professional aspirations.
- 5. For students whose native language is not English, a score of 100 of better on the TOEFL or a grade band score of 7 or better on the IELTS taken within the past two years. Ideally, the TOEFL or IELTS will be taken 6-9 months prior to the term in which the student wishes to start their program.
- 6. An interview may be required by the admissions committee.
- Confer or correspond with one of the special education faculty
 members in the proposed area of concentration prior to submitting an
 application. This contact is ultimately a requirement for admission.

All requirements implicit in the above statement must be completed before consideration of an applicant for admission. The department cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of all applicants. It is the responsibility of this committee to exercise professional judgment related to the criteria which applicants must meet in order to be considered for admission to the program. The committee frequently must use its judgment to discern from among a number of applicants those individuals who are judged to have the greatest potential for program success and ultimate contribution to the profession. Membership in under-represented groups will be a special consideration with regards to admission by the committee.

PhD in Special Education with Emphasis in Curriculum Development for Exceptional Students

This emphasis is <u>currently suspended</u> within the Special Education Department due to budget constraints and limited resources. We are not taking applicants at this time.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Special Education program (https://gradstudies.missouri.edu/degreecategory/special-education) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-

Graduate Certificate in Digital Humanities

The Graduate Certification in Digital Humanities (GCDH) is a twelve-credit hours (4 courses), online and hybrid delivery, interdisciplinary graduate certificate that will be offered through the Digital Humanities Commons at the Allen Institute at the University of Missouri's School of Information Science & Learning Technologies (SISLT). The Certification is an additional credential for students enrolled in graduate programs at MU and as a "stand alone" diploma for distance students.

The Graduate Certificate in Digital Humanities certifies that students are equipped with skills in interdisciplinary research using new digital technologies- skills that university researchers and public and private sector employers recognize as essential in the 21st Century. The Certificate requires completion of a major paper or digital project that integrates specialized disciplinary knowledge and digital media. The Certificate can be completed in two semesters; there is no mandatory time frame for finishing.

"Digital Humanities" (DH) is a rapidly growing "bridge discipline" spanning various subject areas: liberal arts, library and information science, communication arts, media studies, education, journalism, cultural studies, history and philosophy of science and technology, computer science, and informatics. Also, the contexts of the academy, libraries, archives, museums, media, and industry are important for understanding Digital Humanities. A DH scholar uses new computational and statistical tools and methods to address research problems in arts and humanities subject areas, and they apply humanistic modes of inquiry and interpretation to information, "big data," new electronic media, and computer science.

Committee

Students who register for the Graduate Certificate in Digital Humanities will form a committee of two professors who will supervise their program. The supervisor will typically be from the student's home discipline in the humanities, social sciences, or professional school (e.g., English, Romance Languages, Classics, History, Sociology, Computer Science, Library & Information Science, or Journalism). The other advisor will be from the iSchool

The graduate certificate requires 12 graduate credit hours. The overall program structure includes coursework in two categories:

- Required (6 credit hours)
- Electives (6 credit hours). Selected by students in consultation with their committee

Graduate Certificate in Education Policy

Contact Information

Educational Leadership and Policy Analysis 202 Hill Hall 573-882-8221

https://education.missouri.edu/degrees-programs/certificates-minors/education-policy/

Through an interdisciplinary partnership among Education, Law, and Public Policy scholars, our Education Policy Graduate Certificate serves to develop critical leaders, policymakers, and scholars who demonstrate excellence in implementing and analyzing policy. A carefully planned set

of courses will provide students with the knowledge, skills, and tools to answer tough policy questions facing our society, for instance: How do we address the rising costs of higher education? Segregated schooling? Undocumented immigrant students? Families who speak languages other than English?

The Education Policy Graduate Certificate will provide students with:

- Knowledge that they can apply to the study of education policy within their major discipline or their work in policy settings;
- Skills in analyzing education policy issues, i.e., understanding differing values, political and economic arguments, costs/benefits, and policy processes;
- Conceptual tools to use in understanding and resolving issues faced in educational policy development and implementation.

Foundations - Students	choose 1 of the following:	
PUB_AF 8170	Public Policy Processes and Strategies	3
ED_LPA 9402	Educational Policy Analysis	3
Knowledge/Concepts -	Students choose 1 or 2 of the following:	
ED_LPA 9451	Higher Education Finance	3
ED_LPA 9457	Higher Education Policy	3
ED_LPA 7458	Sociology of Education	3
ED_LPA 9462	History of U.S. Education Policy	3
ED_LPA 9463	Politics of Education	3
LAW 5525	Education Law	1-3
Skills - Students choose	e 1 or 2 of the following:	
ED_LPA 8955	Discourse Analysis in Education	3
ED_LPA 9409	Introduction to Research Design	3
PUB_AF 8190	Economic Analysis for Public Affairs	3
PUB_AF 8420	Public Program Evaluation	3
PUB_AF 8430	Public Policy Analysis	3
ESC_PS 8690	Educational Planning and Evaluation	3

After coursework is complete, students will develop a mini-portfolio to demonstrate their learning.

Applications accepted anytime. For more information about this graduate certificate, contact the ELPA Department by phone at 573-882-8221 or by e-mail at elpagrad@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/13.0401-Gedt-Ed_Policy.html.

Graduate Certificate in Elementary Mathematics Specialist

The EMS graduate certificate program includes five integrated mathematics content/pedagogy courses, each with an attached internship and two leadership development courses (total of 24 credits). The program is designed for inservice K-6 teachers interested in pursuing advanced learning experiences and training to increase their knowledge and skill to teach or lead others in teaching mathematics in elementary classrooms. That is, the program is designed for teachers currently working full time. The courses will be offered over a 2-year cycle beginning in the Fall semester (6 semesters of part-time student effort).

For information about certificate, contact Dr. Barbara Reys:

Phone: 573-882-4406 Address: 121 F Townsend email: reysb@missouri.edu

Graduate Certificate in Higher Education Administration

Contact Information

Department of Educational Leadership and Policy Analysis 202 Hill Hall

573-882-8221

https://education.missouri.edu/degrees-programs/certificates-minors/higher-education-administration/

Due to multiple and growing demands upon the academy for quality control, accountability, and productivity, administration of higher education has become increasingly complex. The Graduate Certificate in Higher Education Administration is designed to address the need for enhanced understanding of the higher education institutional context and for improved skills in areas required for effective administration of the higher education enterprise.

The Graduate Certificate in Higher Education Administration is designed to provide students with an overview of higher education administration and governance, and with some technical knowledge about various aspects of administration (e.g., finance, law, policy).

Required Courses

Six semester hours/two 3-cre	edit courses	
ED_LPA 9450	Administration and Governance of Higher Education	3
ED_LPA 9451	Higher Education Finance	3
Elective Courses		
Six semester hours/two 3-cre	edit courses, select two of the following:	6
ED_LPA 9444	Program Planning in Higher Education	
ED_LPA 9446	Student Affairs Administration	
ED_LPA 9447	College Student Culture and Environment	
ED_LPA 9449	History of Higher Education in the United States	
ED_LPA 9452	Overview of Higher Education	
ED_LPA 9454	Introduction to Post-Secondary Law	
ED_LPA 9455	The Community College	
ED_LPA 9457	Higher Education Policy	
Total Credits		12

For more information about this graduate certificate, contact the ELPA Department by phone at 573-882-8221 or by e-mail at elpagrad@missouri.edu.

Graduate Certificate in Multicultural Education

This certificate will provide the requisite awareness, knowledge and skill to effectively work with students and families from diverse cultural backgrounds and is ideal for teachers, counselors and administrators in P-12 school settings. By creating this online certificate, Mizzou is working to increase the number of qualified teachers and other school personnel who can serve diverse populations and prepare all students to function more effectively in society. The 12 hour certificate can be completed entirely online, but some students may choose electives that are offered on campus.

Certificate web site: Multicultural Education Graduate Certificate. (http://online.missouri.edu/degreeprograms/education/multicultural/grad-cert)

Certificate Details

Core Courses

The foundation of the certificate starts with the following two courses:		
ESC_PS 8450	Diversity Issues in School Mental Health	3
ESC_PS 8550	Diversity and Multiculturalism II - Practical Application	3
Electives		

Students complete two cours	ses (6 credit hours):	
ESC_PS 8555	African American Education - Historic and Current Issues	3
ESC_PS 8565	Gay, Lesbian and Bisexual Issues in the Schools	3
ESC_PS 8560	Immigrant Issues in Education	3

How To Apply

Certificate program admission requirements will be the same as those for the Office of Graduate Studies. (https://gradstudies.missouri.edu/fged/13.0202-Gedt-Multicultural_Ed.html)

- Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
- Submit the Office of Graduate Studies online application (https://applygrad.missouri.edu/apply).
- Upload unofficial transcripts when using the Office of Graduate Studies online application system.
- Two letters of recommendation.
- · GRE scores are NOT required.

Application Deadline

None. Rolling admission.

Financial Aid

To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

Graduate Certificate in Online Educator

The Online Educator Graduate Certificate Program will equip individuals with the knowledge and skills needed to design and provide effective online learning experiences including:

- Designing online learning activities and assessments for meaningful learning
- · Designing, facilitating, and evaluating online discussions
- Promoting student engagement and motivation in online learning environments
- Understanding unique characteristics of online learning environments
- Selecting appropriate technology tools and learning objects to support online learners
- Using Learning Management Systems to support and deliver online learning
- Seeking for and evaluating Internet-based information and resources that can be used to enhance online learning
- · Organizing course materials in an online format

Graduate Certificate in Positive Psychology

This online 15-credit hour graduate certificate in positive psychology from Mizzou's Department of Educational, School, and Counseling Psychology (ESCP) is designed for individuals seeking a program that emphasizes applied interventions and theory in building thriving individuals, families, communities and organizations. Combining 21st century psychology and several ancient philosophies, contemporary positive psychology is focused on advancement of individuals and their collective well-being.

The program will provide you with a thorough understanding of the science of well-being and flourishing that will allow you to be more effective in your professional and personal life. Individuals may use this graduate certificate for personal enrichment or to increase their professional marketability across many career paths such as life/career coaching, teaching, managing, and organizational consulting.

Note: This graduate certificate does not provide counselor certification.

Certificate web site: Positive Psychology Graduate Certificate (http://online.missouri.edu/degreeprograms/education/positive-psychology/gradcert)

Certificate Details

Core Course

ESC_PS 7200	Positive Psychology	3
Electives (Select twelve he	ours from the list below.)	
ESC_PS 7087	Seminar in Educational, School, and Counseling Psychology (Creativity and Innovation: Scientific Foundations & Everyday Applications)	3
ESC_PS 8200	Applied Positive Psychology	3
ESC_PS 8700	Life/Career Coaching and Development	3
ESC_PS 8710	Meaning In Work	3
ESC_PS 8720	Community and Stewardship	3
ESC_PS 8730	Positive Organizational Psychology	3

How To Apply

Certificate program admission requirements will be the same as those for the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/degree-certificate-seeking-applicants/admission-process.php).

- Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
- Submit the Office of Graduate Studies online application (https://applygrad.missouri.edu/apply).
- Upload unofficial transcripts when using the Office of Graduate Studies online application system.
- Statement of interest: Briefly describe how this program will benefit your career aspirations and help you act upon your personal beliefs, goals, and philosophy. (Maximum of 500 words)
- Two letters of recommendation.
- · Résumé or curriculum vitae.
- · GRE scores are NOT required.

Application Deadline

None. Rolling admission.

Financial Aid

To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

Graduate Certificate in Qualitative Research

Prerequisites

Open to all MU doctoral students. Students must have taken LTC 8957 Qualitative Methods in Educational Research I* or a comparable course outside the College of Education, as approved by the certificate committee. LTC 8957 will not count towards the 18 hours required for the certificate. *Note: LTC 8957 is cross-listed as ED_LPA 8957 and ESC_PS 8957.

Required Courses

Qualitative Research Meth	Qualitative Research Methods II	
ESC_PS 9620	Qualitative Methods in Educational Research II (or comparable course outside the College of Education as approved by the certificate committee; sometimes listed as ED_LPA or LTC)	
Qualitative III (Combination of advanced courses in qualitative research)		12
Methodologies		
Theories		
Methods of data production and analysis		
Qualitative Research Internship		3
Qualitative Research Internship with a Faculty Member		
Total Credits		18

Courses outside of the College of Education may be accepted upon approval.

For additional information about the CQR, visit: https://education.missouri.edu/degrees-programs/certificates-minors/qualitative-research/ or email: qualcertificate@missouri.edu. (qualcertificate@missouri.edu)

Graduate Certificate in Quantitative Research

The 18-hour Quantitative Research Certificate (QRC) is designed to prepare researchers and scholars to be users and critical consumers of quantitative research. Certificate holders are trained to conduct rigorous, scientific quantitative research.

Students completing the QRC (depending on the chosen track) will be able to:

- Design effective experimental and quasi-experimental studies
- Manage and use large scale datasets
- Analyze various types of datasets (e.g., nested data, longitudinal data) with the appropriate modeling techniques
- Apply advanced statistical methods (e.g., structural equation modeling, multilevel modeling) in their own research
- Critically review studies that make use of a diverse set of statistical methods
- Conduct measurement-related studies using techniques such as factor analysis or item response theory

Requirements

Earning the Quantitative Research Certificate (QRC) requires students to complete 18 hours of approved coursework with a grade of at least a B in all courses. A plan of study must be approved by the QRC committee and may include the following courses:

ESC_PS 7170	Introduction to Applied Statistics (prerequisite coursework not counted towards the 18 hour completion)	3
ESC_PS 8082	Foundations of Educational and Psychological Measurement	3
ESC_PS 8850	Quantitative Foundations in Educational Research	3
ESC_PS 9650	Application of Multivariate Analysis in Educational Research	3
ESC_PS 9710	Structural Equation Modeling	3
or		
ESC_PS 9720	Hierarchical Linear Modeling	3
Elective courses (see QRC	Initial Plan of Study form)	6

For additional information including the Initial Plan of Study, visit: https://education.missouri.edu/degrees-programs/certificates-minors/quantitative-research/

Contact

For more information about the quantitative research certificate, email quantcertificate@missouri.edu.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/13.0601-Gedt-Quantitative Research.html

Graduate Certificate in Teaching English to Speakers of Other Languages

The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) prepares English language teachers, English language program administrators, language testers, and educational materials writers to work in contexts where English is a foreign language (EFL contexts). The objectives of the certificate are to develop professionals with a) knowledge of the structure of the English language; b) an understanding of how languages are used and learned; and c) skills in designing and implementing pedagogical tasks to facilitate language learning. The certificate consists of 18 graduate credit hours divided among five core courses and one elective course.

Certificate web site: http://online.missouri.edu/degreeprograms/ed-tesol/gradcertificate.aspx

For information about certificate, contact:

Dr. Nikki Ashcraft ashcraftn@missouri.edu 573-882-8394

Dr. Rachel Pinnow pinnowr@missouri.edu 573-882-8465

Address:

Learning, Teaching and Curriculum

303 Townsend Hall University of Missouri Columbia, MO 65211

Graduate Certificate in User Experience and Usability

The User Experience and Usability (UXU) Certificate, offered by the School of Information Science & Learning Technologies (https://sislt.missouri.edu), prepares students to design and evaluate technology tools and information systems. The multi-faceted human-centered lens for design and evaluation is a systematic process supported by research and best practices.

Our UXU certificate is uniquely positioned in the area of usability because our Information Experience Laboratory (IE Lab) performs extensive usability and user experience research with internal and external clients. You will prepare for jobs in an expanding field where UXU competencies are used in education, industry, healthcare, museums and other learning and performance settings.

The certificate curriculum consists of 12 graduate credit hours that may be transferred into SISLT's M.S. or Ed.Sp. programs. The 12 graduate credit hours apply toward any of the emphasis areas: Online Education, Technology in Schools.

Required Courses

IS_LT 9474	Front End Analysis of Systems	3
IS_LT 9461	Interaction Design	3
IS_LT 9421	Usability of Information Systems and Services	3
IS_LT 9480	Internship in Information Science and Learning Technologies	1-99

Certificate web site: https://sislt.missouri.edu/certificates/user-experience-and-usability/

For information about certificate, contact:

SISLT Student Services Office 304 Townsend Hall Columbia, MO 65211

Graduate Minor in Multicultural Psychology

As we enter the new millennium, the U.S. population is becoming more multiracial, multiethnic, and multilingual. Some estimate that by the year 2020, racial and ethnic minorities will become the numerical majority. This demographic shift has already occurred in specific contexts, such

as K-12 schools in Los Angeles. Applied psychologists and educators have begun to develop competency standards for professionals to provide culturally relevant and effective services to our ever-changing population. In fact, multiculturalism has been identified as the fourth focus in counseling psychology. The purpose of the graduate minor in multicultural psychology and education would be to (a) expose graduate students to the growing theoretical and empirical research completed in the fields of multicultural psychology and education, (b) help graduate students develop multicultural competencies in research and practice, and (c) provide graduate students with training necessary to meet the psychological and educational demands of diverse populations.

The requirements for the minor are listed below.

- A minimum of 12 credit hours
- 9 credit hours must be taken as a graduate student at the University of Missouri
- No more than 6 credit hours should be listed in the masters or doctoral planner. That is, a maximum of 6 hours can overlap between the courses applied to the Minor in Multicultural Psychology and the courses applied toward a masters or doctoral degree.
- A minimum of 9 credit hours must be 8000 or above (graduate level)
- 6 credit hours must be taken within the core area with a foci on racial and ethnic minorities (see listing below)
- 3 credit hours must be taken in the auxiliary area (see listing below)
- · 3 credit hours must be taken in the skills area (see listing below)

Core Courses

	edit hours from the following courses with a nicity in psychology and/or education	
ESC_PS 8590	Multicultural Counseling Competencies: Theory and Research	3
ESC_PS 9000	Multicultural Issues in Counseling	3
Other racial/ethnic-focused departments, with pre-appro	graduate level courses in other oval.	

Auxiliary Courses

Skill Courses

Must complete 3 credit hours from one of the options below.

I. Research Skills *

ii i tooodi oii oiliio	
ESC_PS 8090	Master's Thesis in Educational, School, and Counseling Psychology
ESC_PS 9090	Doctoral Dissertation Educational School & Counseling Psychology
II Applied Multicultural Skill	s A

II. Applied Multicultural Skills ^

ESC_PS 8943 Practicum in Multicultural Counseling Interventions

Pre-approved Multiculturally-designated applied course (e.g. counseling practica, teaching practica, group counseling practica)

Applied experience via community outreach programs, work placements in agencies, or extended volunteer experiences in community agencies.

Multicultural Competency Portfolio to demonstrate awareness, knowledge and skill competencies, as approved by a Center Director

Consultation courses in organization or systemic changes including applied consultation activities, as pre-approved by a Center Director.

- * The scope and quality of the research project is expected to be of such a caliber that it could be submitted to a refereed journal in the student's discipline. The research project must be on a multiculturalrelated topic (i.e. issues related to race, sexual orientation, gender, and international concerns). Successful completion of this requirement will consist of approval of the project from a Director of the Center for Multicultural Research, Training and Consultation, or have an ESCP faculty affiliated with the Center on the committee with at least one committee member having expertise in multicultural issues.
- ^ The person must demonstrate competencies in working with diverse populations (with an emphasis on racial and ethnic minority populations).

College of Engineering

Administration

Elizabeth Loboa, Dean W1024 Lafferre Hall (573) 882 4378 loboae@missouri.edu

When engineering classes at the University of Missouri began in 1849, a strong tradition was born that continues to grow. At the University of Missouri College of Engineering, we believe that with every innovation we make and every new development we bring to light, we do more than solve the problems of today. Here, we ready the leaders who will blaze forward with a revolution that defines the world for tomorrow. At Mizzou Engineering, collaboration, creativity and research surge together. Where others may see problems, disease and inefficiencies, we see opportunities, potential and infinite possibilities. We teach, we learn, and we analyze — and we demand innovation, inclusion and integrity as we create smarter, safer, more efficient ways of living.

The College of Engineering has a vision for becoming *the* college of choice for faculty and students in four Pillars of Pursuit: Educating Engineering Leaders, Big Data Analytics, Biomedical Innovations and Sustainability in *FEWS*ed (Food, Energy, Water, Smart Cities). These pillars represent the College's areas of strength and greatest potential growth as we seek to recruit faculty and train students who will solve the next generation of global challenges.

The college offers fully accredited degree programs in biological, chemical, civil, computer, electrical, industrial and mechanical engineering, along with computer science. All of programs offer both undergraduate and graduate degrees. The college also offers a bachelor's degree in Information Technology. Naval Science is under the academic administration of the college as well. The hallmark of the College of Engineering is excellence in teaching and scholarly pursuits.

Mission

The mission of the University of Missouri College of Engineering is to educate engineers, create leaders and develop entrepreneurs in a research and interdisciplinary environment.

We do this by:

- Supporting engineering educational programs with extracurricular student activities and research experience.
- Encouraging faculty to be entrepreneurial and interdisciplinary.
- Conducting world class research that produces new knowledge and new researchers for the future.

...resulting in economic development, job creation and an improved standard of living for our state and country.

Undergraduate

- Admissions (p. 499)
- Graduation Requirements (p. 501)
- Academic Regulations (p. 501)
- Student Services (p. 502)

The MU College of Engineering is committed to a longstanding tradition of educating future engineering leaders. Here, students are inspired and challenged. Students work, learn, research and create in an atmosphere

where innovation, collaboration and finding ways to rise above challenges are more than aspirations — they are simply how we operate.

Admissions

Direct Freshman Admission to Engineering

Entering freshmen are expected to have completed 17 units of approved high school course work (in grades 9-12), including 4 units in English, 4 in mathematics and 3 in science with laboratory. Mathematics should include 2 units of algebra, 1 unit of plane and solid geometry (combination course), and 1/2 unit of trigonometry. Additional senior mathematics is recommended.

The College of Engineering has three levels of admissions. Direct department admits, Undeclared Engineering admits, and Pre-Engineering admits. The three levels are explained further below.

Direct Departmental Admit

For direct admission to one of the College of Engineering degree programs, the applicant must meet the qualifications listed below (these numbers are subject to change).

For the Bachelor of Science in Biological Engineering and the Bachelor of Science in Biomedical Engineering:

- ACT-Math of at least 31 AND
- ACT-Composite of at least 31 AND
- High school class rank in the top 10 percent

For the other Engineering degree programs:

- · ACT-Math of at least 32 AND
- · ACT-Composite of at least 32 AND
- · High school class rank in the top 10 percent"

The average ACT scores for first-time freshmen admitted to the College of Engineering for Fall 2016 were ACT-Composite 28.03 and ACT-Math 28.74.

Pre-Engineering Program (PEP)

Freshmen who do not meet the criteria for Direct department admit or Undeclared Engineering are admitted into the Pre-Engineering Program. Since these students are in the College of Engineering, each PEP student has access to the Engineering Advising Office.

Most first-semester PEP students enroll in one preparatory math course and three courses in the College of Arts and Science, which count in both the engineering and arts and science degree programs. The prime objective is to strengthen math preparation sufficiently for success in engineering.

PEP students are eligible to transfer to Undeclared Engineering when they meet the following requirements:

- Satisfactory completion of 24 credits
- GPA of 2.0 or higher both Cumulative and last graded term
- A grade of C- or better in MATH 1500 Analytic Geometry and Calculus I or
- Academic good standing
- Students with 60 credits or more must be admitted to their Department of choice prior to being admitted to Engineering
- For admission to Information Technology, students must have GPA of 2.0 or higher in both Cumulative and last graded term

Declared and Undeclared Status

Freshmen engineering students will start in an undeclared status unless they meet criteria for direct departmental admission (see criteria below). Students admitted to the College of Engineering in undeclared status will work to complete a foundational curriculum consisting of math, science, and engineering courses. Upon completion of the foundational curriculum students will apply for entrance to available degree programs. The specific standards and capacity vary among the degree programs as necessary to align enrollments with educational resources.

Freshman and Transfer Admission Requirement

Bioengineering Department

Courses required before consideration for admission into		
Bioengineering		
MATH 1500	Analytic Geometry and Calculus I	
MATH 1700	Calculus II	
CHEM 1320	College Chemistry I	
PHYSCS 2750	University Physics I	
BIO_SC 1500	Introduction to Biological Systems with Laboratory (recommended)	

Chemical Engineering Department

Courses required before consideration for admission into Chemical Engineering

MATH 1500	Analytic Geometry and Calculus I
MATH 1700	Calculus II
CHEM 1320	College Chemistry I
CHEM 1330	College Chemistry II
PHYSCS 2750	University Physics I
CH_ENG 1000	Introduction to Chemical Engineering

Civil and Environmental Engineering Department

Courses required before consideration for admission into Civil and Environmental Engineering

MATH 1500	Analytic Geometry and Calculus I
MATH 1700	Calculus II
CHEM 1320	College Chemistry I
PHYSCS 2750	University Physics I
ENGLSH 1000	Exposition and Argumentation

Computer Science Department

Courses required before consideration for admission into Computer Science

MATH 1500	Analytic Geometry and Calculus I
MATH 1700	Calculus II
CMP_SC 1050	Algorithm Design and Programming I
CMP_SC 2050	Algorithm Design and Programming II

Information Technology Department

Admittance to Information Technology follows the standard MU admissions requirements

Electrical and Computer Engineering Department

Courses required before consideration for admission into Electrical and Computer Engineering

MATH 1500 Analytic Geometry and Calculus I	
MATH 1700 Calculus II	
CHEM 1320 College Chemistry I	
CMP_SC 1050 Algorithm Design and Programming I	
ECE 2210 Introduction to Logic Systems	

Industrial and Manufacturing Systems Engineering Department

Courses required before consideration for admission into Industrial and Manufacturing Systems Engineering

MATH 1500	Analytic Geometry and Calculus I
MATH 1700	Calculus II
CHEM 1320	College Chemistry I
PHYSCS 2750	University Physics I
ENGLSH 1000	Exposition and Argumentation

Mechanical and Aerospace Engineering Department

Courses required before consideration for admission into Mechanical and Aerospace Engineering

and Aerospace Engineeri	ng
MATH 1500	Analytic Geometry and Calculus I
MATH 1700	Calculus II
CHEM 1320	College Chemistry I
PHYSCS 2750	University Physics I
ENGLSH 1000	Exposition and Argumentation

Undeclared students should discuss course selection with the academic advisor each semester to keep options open among departmental curricula

To transfer from one department to another, students must submit an application to the new department. Admittance to the new department will be based upon the student's academic performance and departmental capacity. Students who transfer must satisfy the specific degree requirements of the new department.

Engineering Dean's Scholars Program

The purpose of the Engineering Dean's Scholars Program is to recognize, mentor and train the highest-achieving students in scholarship and leadership. Engineering Dean's Scholars participate in the Engineering Scholars Freshman Interest Group (FIG) which will be housed in Hudson or Gillett Residence Hall. A faculty-scholar lunch is held during the semester to allow the scholars to meet with engineering faculty and to learn about the engineering profession and undergraduate research opportunities.

Scholars participate in leadership or mentoring activities during their sophomore, junior and senior years. Examples of such activities include serving as engineering ambassadors or peer advisors for an engineering FIG, and participating in Undergraduate Research. Students chosen for peer advisor positions have their room and board covered in exchange for their services.

Students who have ACT math and composite scores of 32 and a high school rank in the top 10 percent of their class may submit an application for consideration of admission to the program.

Mizzou Engineering Dean's Scholars Program W1002 Lafferre Hall University of Missouri Columbia, MO 65211 (573) 882-4765

Transfer Students

Students wishing to transfer to MU from an accredited college or university are subject to University regulations described in this catalog.

The MU College of Engineering cooperates with many colleges through articulation agreements that help pre-engineering students transfer to MU with maximum ease and minimum loss of credits. A student may take the first two years at the participating school and then transfer to MU for the

junior and senior years in engineering. After the program is completed, the student is awarded a BS degree in the chosen engineering field.

Transfer students may be admitted to the College as undeclared or may start with a departmental affiliation. Eligibility to enter the College with a departmental affiliation is based upon the student's previous academic performance and department capacity.

Transfer students who enter the College as undeclared, are required to submit an application to enter a degree program. Admittance to the degree program is based upon previous academic performance and department capacity.

To be recommended for the BS degree from the College of Engineering, a student transferring from an accredited institution must complete at least 30 upper-level credits in the degree program at a UM System campus. At least 21 of the 30 credits must be upper-level engineering courses approved by the department awarding the degree.

A student transferring with senior standing from another UM System campus must complete the last 15 credits in residence on the campus where the degree program is located. Twelve of these 15 credits must be in engineering and approved by the department awarding the degree.

Any student whose enrollment in any college-level academic program resulted in dismissal, departure or who are on probation will not be admitted to the College of Engineering.

International Admission

Admission of international students is determined on an individual basis by a committee of representatives from the Admissions Office and the College of Engineering.

Before registering for classes at the University, international students must take the MU English Language Test, developed for international students. Students passing the test are eligible to take ENGLSH 1000 and any other required English courses.

International students whose test scores indicate that additional English training is needed, including those with transferred English credit, are required to register for an English-language support class. The course, developed for international students, should be taken during the first semester of enrollment. This course does not count toward graduation credit, but regular attendance is required and failure to attend will result in dismissal. The English-language support class taken must be satisfactorily completed before the student can enroll in ENGLSH 1000. Students not satisfactorily completing the class in the first semester of enrollment must re-enroll in the second semester. If the student does not satisfactorily complete the English-language support class in the second term of enrollment, the student will not be permitted to re-enroll in the College of Engineering.

60 Credit Hour Rule

To remain in the College of Engineering, students must be admitted to an Engineering degree program by the end of the semester when their total credit hours earned are equal to or greater than 60. Students not admitted by 60 credit hours will become ineligible to remain in the College of Engineering and must transfer to another MU school or college in order to remain a student at the University of Missouri. Transfer students who enter the College of Engineering with 60 or greater credit hours will be given one semester to gain admittance to a degree program. If not admitted to a degree program after one semester, they will become ineligible to remain in the College of Engineering. If more than one semester is needed to complete the courses required to enter a degree

program, a waiver may be granted at the discretion of the college. If students are pre-enrolled for the following term at the time they become ineligible to remain in the College of Engineering, all Engineering courses will be administratively dropped.

Graduation Requirements

The curriculum provides a solid foundation of mathematics and physical sciences followed by the application of these sciences in engineering specialties. The balance of the curriculum encompasses communication skills, English, social sciences and humanities courses.

Many freshmen are eligible to start with calculus. However, some can profit from additional pre-calculus preparation, which is an addition to the undergraduate curricula.

Students should access the engineering web site (http://engineering.missouri.edu) for details regarding social and behavioral sciences and humanities and fine arts requirements.

In addition to the University's general education and graduation requirements, the departments in the College of Engineering may require further specific courses to better equip students to perform in their chosen fields of study.

While many students complete the BS degree program in four years, some may find it advisable to extend the curriculum in order to carry lighter semester loads, add preparatory courses or compensate for part-time work

GPA Requirements for Graduation from the College of Engineering

- GPA of record of at least 2.0
- GPA of at least 2.0 in all engineering courses offered by one of the four campuses of the UM System. "Engineering courses" include all courses that are offered through the College of Engineering or its equivalent on the four campuses, or that have "Engineering" in the curricular designator. Only the last grade in a repeated course will be used in the calculation.

Academic Regulations Degree with Honors Requirements

Latin Honors are granted to students who meet the following cumulative GPA requirements:

Latin Honor	GPA
summa cum laude	3.9
magna cum laude	3.7
cum laude	3.5

Departmental Honors

The college maintains an undergraduate honors program to further challenge those who have established a minimum GPA of 3.0 at the beginning of the junior year. A comparable grade point average is required of transfer students. The program leads to an undergraduate honors thesis on a research or advanced design project, provides for additional curricula flexibility and contains features that ease the transition to graduate school.

Opportunities available to honors students include:

· More personal attention from an honors advisor

 Independent study or undergraduate research with a senior faculty member whose specialty interests the honors candidate

A student who successfully completes the engineering honors program, including the independent project, will be designated an "Honors Scholar in Engineering." Interested students should contact their departmental office.

Qualified engineering students are also welcome to join the programs of the Honors College and may enroll in various honors courses and honors sections of regular courses.

Courses in Basic Skills

No basic skills courses may be taken to fulfill graduation requirements.

Curriculum of Record

The curriculum of record is the curriculum a student must satisfy to meet graduation requirements. For students who maintain continuous, full-time enrollment, the curriculum of record is the one approved by the College of Engineering at the time the student achieves upper-division status in the discipline of choice. For others, the curriculum of record is decided by the department faculty.

Academic Probation and Dismissal

- A student whose term and cumulative UM GPA are 2.0 or higher is in good academic standing. A "term" is defined as a semester or summer session.
- A student will be placed on academic probation if while in good academic standing the student has a term GPA less than 2.0 but equal to or greater than 1.0.
 - While on academic probation, a student must enroll in and complete each semester at MU at least 12 credits of course work necessary for the degree. Courses taken through MU's Mizzou Online (self-paced) count as part of these 12 credits. Part-time students must enroll in at least as many credits each semester as the college rules governing part time enrollment.
 - A student will be removed from probation at the end of the term when the term and cumulative GPA are 2.0 or higher, provided the student completed 12 or more hours applicable toward the degree.
 - A student will be continued on probation if while on probation the student has a term GPA greater than or equal to 2.0, but whose cumulative GPA is below 2.0.
- A student will be dismissed from the College of Engineering if the student:
 - · Receives a term GPA of less than 1.0.
 - · Receives a term GPA of less than 2.0 while on probation.
 - Fails to complete at least 12 credit hours toward their Engineering degree program while on academic probation.

4. Readmission:

- Students who are dismissed from the College of Engineering and who wish to appeal their case for continuation must write an appeal letter and submit it to the academic appeals committee.
- If the appeals committee allows a student to re-enroll on final probation, it may set conditions such as courses to be taken, minimum grades, total hours, etc to which the student must adhere.

- A student who has been dismissed for academic reasons may be readmitted upon a successful appeal to the academic appeals committee of the College of Engineering.
- Similarly, students who wish to re-enroll in the college of Engineering after having been out of school as a result of a dismissal must write a letter of appeal to the College of Engineering academic appeals committee requesting readmission.
- Letter of appeal may be addressed to: Engineering Academic
 Appeals Committee, W1002 Lafferre Hall, University of Missouri,
 Columbia, MO 65211. A personal visit with the director of
 undergraduate studies of the students' department and advisor
 before appealing by letter is recommended and often helpful,
 both to the student and to the committee.
- One of the primary objectives of the appeals committee is evaluate indicators of the likelihood of future success of the student. Accordingly, any appeal letter should include an explanation for past poor performance and reason for expecting better outcomes in the future.
- A student who is dismissed while on final probation will normally be ineligible for readmission.

Satisfactory/Unsatisfactory Grading Option

Under Satisfactory/Unsatisfactory (S/U) grading, an S is assigned for a grade in the A, B or C range, and a U is assigned for a grade in the D range or for an F. Neither an S nor a U will be calculated into a student's grade point average. A student enrolled in the College of Engineering may not take any math, science or engineering course that counts toward degree requirements under the S/U grading option, unless the course is only offered S/U. In addition, any course specifically required (by course number) in the curriculum may not be taken S/U. This includes ENGLSH 1000 or ENGLSH 1000H. The 18 credits taken to fulfill the University general education distribution requirement may be taken S/U.

Restrictions

- First-semester freshmen are ineligible to take any course S/U unless it is only offered S/U.
- Only one course per semester may be taken S/U.
- Students on academic probation are not allowed to take any course S/U.
- To be eligible for the Dean's List each term, a student must complete 12 graded credits (S/U courses are not considered "graded").

Student Services

Advising

Each student in the College of Engineering is assigned an advisor from the College of Engineering Advising Office who assists the student in reaching academic and professional goals, as well as assist students with time management and academic success strategies. Students are encouraged to meet with their advisors as often as needed. Engineering students have advising holds placed on their accounts each semester and will work with their advisor to verify enrollment and degree progress before enrolling for the following semester. In addition, students have access to work with a faculty mentor in their degree program who can assist with career planning and selection of technical elective coursework.

Diversity and Outreach Initiatives

At Mizzou Engineering we honor our values by insuring a diverse and inclusive college. The College of Engineering Office of Diversity and Outreach Initiatives facilitates the outreach, recruitment, retention, and overall success of all members of our community, especially those from backgrounds traditionally underrepresented in engineering. The Office of Diversity and Outreach Initiatives provides professional development programming surrounding inclusion, equity, and diversity for all of our undergraduate and graduate students, staff, and faculty. The Office houses many programs including:

- The Inclusivity Center which provides a physical space where everyone is welcome as well as a venue for our events and activities.
- The Women in Engineering Program which focuses on all activities that support and recruit women students.
- The Minority Engineering Program which fosters a support network between students, faculty, and staff to ensure academic success by providing structured progress checks, professional development trainings, early research experience, counseling, academic enrichment, mentoring and information about graduate study for the Engineering Diversity Scholarship recipients.
- The Office of Diversity and Outreach Initiatives serves as a resource for the College of Engineering student organizations to further engage them in diversity and inclusion efforts.

Study Abroad

College of Engineering and STEM students have opportunities to pursue academic, leadership, and service opportunities around the world. Students can participate in short-term study abroad programs in Europe, Asia, and Latin America and earn college credit towards general education requirements, core engineering requirements, and engineering technical electives to complete graduation requirements. Students can also participate in semester long programs.

Learning Communities

The college cosponsors several living/learning options for engineering students. The college believes that an environment conducive to the formation of networks, with aspects of social and academic interaction, enhances the retention and ultimate success of students in the engineering curriculum. Students selecting these options generally earn higher grades and are more likely to graduate than the average engineering student.

The Engineering Learning Community (ELC) is a special co-ed environment that offers engineering majors a full range of academic support and activities. ELC allows engineering students to live together, study together and have fun together. Freshman Interest Groups (FIGs) support incoming freshmen. Members of a FIG are co-enrolled in three courses during the first semester of the freshman year with a group of up to 20 students. Each community has its own computer lab, peer tutors, study groups and quiet hours.

Professional Engineering Registration

The revised statutes of Missouri (Section 327.221) require that each applicant for registration as a professional engineer in Missouri must be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology. The MU undergraduate programs in bioengineering, chemical, civil, computer

engineering, electrical, industrial and mechanical engineering, and computer science at MU are so accredited.

Senior students are strongly encouraged to take the Fundamentals of Engineering Exam leading to the Fundamentals in Engineering (FE) status as a first step toward registration.

The MU undergraduate programs in bioengineering, chemical, civil, computer engineering, electrical, industrial and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET and computer science is accredited by the Computing Accreditation Commission of ABET www.abet.org (http://www.abet.org).

Naval Reserve Officers Training Corps (NROTC)

NROTC was established in 1926 to offer college students the necessary naval science courses to qualify for commissions in the Navy or Marine Corps Reserve. Today, NROTC is one of the primary accession sources of officers for the Navy and Marine Corps.

Scholarship NROTC midshipmen incur no military obligation during their freshman year. This allows students to get a better understanding and appreciation of the life of a Navy or Marine Corps officer. Navy NROTC graduates incur a minimum five years military obligation. Marine NROTC graduates incur a minimum four year military obligation. The two-year NROTC program is designed for transfer students and for MU students who did not participate in NROTC during the first two years. MU also offers a Minor in Naval Science (p. 569).

Navy students should major in a technical course of study while marine students may major in any course of study leading to a baccalaureate degree. Academic credit for naval science courses is accepted toward a baccalaureate degree by most MU schools and colleges. Midshipmen take one naval science course for credit each semester, which provides education and training in various aspects of the Navy or Marine Corps. Associated with each course is a leadership laboratory. NROTC activities include water survival, self-defense, physical fitness, orienteering, aviation, nuclear power indoctrination, pistol/rifle marksmanship and a variety of field trips. Upon graduation, midshipmen are commissioned as Ensigns in the Navy or Second Lieutenants in the Marine Corps.

For additional information, contact: Department of Naval Science 105 Crowder Hall (573) 882-6693 or 888-MU-NROTC NROTCMU@missouri.edu http://nrotc.missouri.edu/

Graduate

Graduate students have many opportunities to develop special skills in the career paths they choose. Students interested in pursuing a career in academia can participate in the Preparing Future Faculty Fellowship Program, where they can choose courses from the College of Education and have the opportunity to co-teach engineering courses and write proposals.

Additionally, MU promotes technology, innovation and entrepreneurship. Mizzou Engineering sustains a variety of research centers, programs, groups and facilities along with other departmental groups that are designated as areas of exemplary expertise and success. The college contributes significantly to MU's overall annual research and development

spending. The College also offers exceptional business opportunities to corporations, small businesses and start-ups.

MU graduate students have gone on to become faculty at world-class academic institutions in the U.S. and around the world, have created start-up companies as successful entrepreneurs and have secured jobs with leading companies, including Oak Ridge National Laboratory, PepsiCo, Amazon, Google and more.

Graduate engineering programs include

- · Bioengineering
- · Chemical Engineering
- · Civil & Environmental Engineering
- Computer Science
- · Electrical & Computer Engineering
- · Industrial Manufacturing & Systems Engineering
- Mechanical & Aerospace Engineering
- · MU Informatics Institute

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Biological Engineering

J. Tan, Chair College of Engineering College of Agriculture, Food and Natural Resources 215 Agricultural Engineering Building (573) 882-7044

TanJ@missouri.edu

Recognizing the immense promise of biological engineering and the unique position of Mizzou for a strong biological engineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces.

The Department of Bioengineering unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering.

Faculty

Primary Faculty

Professors K. D. Gillis**, S. A. Grant**, L. Gu**, J. Tan**, A. L. Thompson**, G. Yao**

Associate Professors S. C. Borgelt*, S. Ding**, D. Gil Pages*, H. Hunt**, W. A. Jacoby**, R. Kannan**, A. Schrum*, S. Sengupta**
Assistant Professors N. Aloysius*, I. Ozden*, F. M. Pfeiffer*, R. Thomen*, C. Wan*

Professor Emeritus F. H. Hsieh

Affiliated Faculty

Professors D. Burke**, D. Brune**, C. S. Cutler*, M. Davis**, M. W. Downs*, D. Duan**, G. Forgacs*, S. Gangopadhyay**, M. Hill**, T. Hwang**, K. V. Katti**, M. L. Katz*, A. McClellan**, G. Meininger**, S. Nair**, L. G. Schumacher*, S. Segal*, P. Yu**

Associate Professors D. E. Baker*, P. V. Cornish**, T. M. Guess**, J. W. Kwon*, H. Li*, T. T. Lim*

Assistant Professors L. A. Martinez-Lemus**, L. Polo-Parada**, R. A. White*, J. Zulovich*

Adjunct Professors T. Rahhal, E. J. Sadler*, K. A. Sudduth**, E. Vories

- Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Advising and Scholarship Contacts

Heather K. Hunt, Director of Undergraduate Studies hunthk@missouri.edu

Jean Gruenewald, Academic Advisor W1006 Lafferre Hall (573) 882-4659 gruenewaldj@missouri.edu

Biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biological engineering program is a broadly-based curriculum that prepares students for careers in three areas:

- Biomedical engineering (including pre-medicine)
- · Bioprocess engineering
- · Bioenvironmental engineering

Biological engineering graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies, and by government agencies. Some attend graduate and medical schools. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license.

The Bachelor of Science with a major in Biological Engineering (BS BE) program at MU is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org). The biological engineering curriculum was developed to meet the mission, program objectives and student outcomes described below.

Mission and Objectives

The department mission is to educate biological engineers to integrate engineering and biological sciences in the contexts of health, sustainability and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth.

Program Educational Objectives

The undergraduate program leads to a Bachelor of Science degree in Biological Engineering, producing graduates who will, within 3-5 years:

- Show proficiency in quantitative analysis, engineering design and development.
- 2. Interact effectively with life science and other professionals.
- Leverage principles of biological and engineering sciences for the design and development of innovative systems.

- Demonstrate leadership and professionalism as they continually add value to their chosen field of endeavor.
- Succeed in advanced study in engineering, medicine or other fields, if pursued.

Student Outcomes

By the time of graduation, Biological Engineering students will possess:

- a. An ability to apply knowledge of mathematics, science and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- d. An ability to function on multi-disciplinary teams;
- e. An ability to identify, formulate and solve engineering problems;
- f. An understanding of professional and ethical responsibility;
- g. An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- A recognition of the need for, and an ability to engage in, life-long learning;
- A knowledge of contemporary issues;
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- An ability to integrate engineering and biological sciences to develop systems and processes for improved health, bio-resource utilization, and environmental protection.

Graduate

- MS in Biological Engineering (p. 507)
- PhD in Biological Engineering (p. 508)

Department of Bioengineering 254 Agricultural Engineering Building Columbia, MO 65211-5160 (573) 882-7044 http://bioengineering.missouri.edu/

Director of Graduate Studies: Gang (Gary) Yao

About Biological Engineering

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Bioengineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. The Department confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the

specific requirements for the masters degree and the doctoral degree of the Department of Bioengineering.

Thesis Research and Funding

Research assistantships are available to qualified graduate students. Thesis research may emphasize bioprocessing, biomedical engineering, environmental engineering or precision agriculture. Laboratories are well equipped for research in biomaterials, biomedical optics, bioprocessing, biosensors, computer vision, electrophysiology, food extrusion, properties of biological and food materials, process control, GIS, precision agriculture, water quality, wetlands, chemical application technology, soil physics, hydrology and renewable energy.

BSBE in Biological Engineering

Degree Program Description

Biological Engineering is a science-based engineering curriculum that integrates engineering and biological sciences in the areas of health, sustainability and environmental stewardship. Students are prepared in three engineering areas: biomedical, bioprocess, and bioenvironmental. In addition to the core program courses, the program includes courses in basic sciences; social, behavioral and engineering sciences; and humanities and fine arts. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies and government agencies, or opt to further their education in graduate, medical or veterinary medical school. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license. The BSBE in biological engineering is accredited by the Engineering Accreditation Commission of ABET.

Major Program Requirements

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education (p. 34) requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better.

MS in Biological Engineering

Admission Contact Information

Jean Gruenewald W1041C Lafferre Hall Columbia, MO 65211-5200 573-882-4659

Admission Criteria

- Fall deadline: June 1st
- Minimum GPA: 3.0 in the last 60 hours
- BS in engineering from an accredited university or equivalent experience
- Minimum English Proficiency Requirements (for International Applicants):

Item	Score
IELTS	6.5
TOEFL (Internet-based)	80
TOEFL (Paper-based)	550

Required Application Materials

Prospective students should submit graduate applications online: https://applygrad.missouri.edu/apply/. The following materials are required:

To the Office of Graduate Studies:

- All required Graduate Admissions documents
- · Official transcripts
- TOEFL scores (for International Applicants)

To the Bioengineering Master's Program:

• Résumé or CV

6

- · Statement of Purpose
- Three Recommendation Letters
- GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Graduation Requirements: Master of Science (MS) and Master of Engineering (ME) in Biological Engineering

Students without a BS in engineering will be required to complete additional courses in mathematics, basic sciences and engineering science. Students with engineering degrees other than biological engineering should meet certain proficiency requirements.

The Biological Engineering Program requires a minimum of 30 semester hours beyond the baccalaureate degree for the MS thesis (MST) degree and a minimum of 36 semester hours for the MS non-thesis (MSNT) degrees. A student may also choose to complete a Master of Engineering (p. 550) (ME) degree with a focus in Biological Engineering. The ME degree requires a minimum of 36 semester hours. See the Master of Engineering page for general requirements (p. 550).

If approved by the student's Master's Program Committee, the program of study may include up to six hours of graduate credit transferred from another university or from another campus of the MU system. In general, the Graduate School does not accept correspondence or extension course credit earned at any other campus. However, a student may take up to eight hours of correspondence courses that are authorized for graduate credit and offered through Mizzou Online. Courses to be taken for graduate credit must be approved by the Graduate Dean, and the enrollment form has a place designated for the Graduate Dean's signature. See online.missouri.edu for more information on distance education opportunities.

As a minimum, the Program of Study for **MST** and **MSNT** should include the following:

BIOL_EN 8402	Research Methods	2
BIOL_EN 8087	Seminar in Biological Engineering	1
BIOL_EN 8180	Numerical Methods in Engineering Research	3
BIOL_EN 8990	Masters Thesis Research in Biological Engineering ³ credits maximum for MSNT degree; 6 credits minimum for MST degree	1-12
A graduate level Statistics of	3	
Additional Bioengineering 8000 level courses (excluding Readings or Problems or Research): two for MST, three for MSNT		

As a minimum, the Program of Study for **ME** should include the following:

BIOL_EN 8087	Seminar in Biological Engineering	1
BIOL_EN 8000	Scientific Discovery Leading to Life Science Innovations	3
BIOL_EN 8180	Numerical Methods in Engineering Research	3
A graduate level Statistics c	ourse	3

Two additional Bioengineering 8000 level courses (excluding Readings or Problems or Research).

A minimum of 21 hours must be from the College of Engineering with at least 15 hours in 8000+ level courses.

The combined hours of Research, Problems, and Readings can not be more than 3 credit hours.

Additional course hours for the Master's study may come from Bioengineering courses numbered 7000 or above or courses from other MU departments numbered 7000 or above. Classes chosen to fill the plan of study may include those needed to fulfill proficiency areas if they are taken for graduate credit. Other courses should be chosen to strengthen the student's ability to do research in their specific area.

PhD in Biological Engineering

Admission Contact Information

Jean Gruenewald W1041C Lafferre Hall Columbia, MO 65211-5200 573-882-4659

Admission Criteria

- Fall deadline: June 1Minimum GPA: 3.2
- BS and MS in engineering from an accredited university or equivalent experience. In rare instances, an exceptional student will be allowed to study for the PhD without first completing an MS degree.
- Minimum English Proficiency Requirements (for International Applicants):

Item	Score
IELTS	6.5
TOEFL (Internet-based)	80
TOEFL (Paper-based)	550

Required BE Doctoral Degree Application Materials

Prospective students should submit graduate applications online: https://applygrad.missouri.edu/apply/. The following materials are required:

To the Office of Graduate Studies:

- All required Graduate Admissions documents
- Official transcripts
- TOEFL scores (for International Applicants)

To the BE Program:

- Résumé or CV
- Statement of Purpose
- Three Recommendation Letters
- · GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Degree Requirements

Within the first year in the program, each PhD student must pass a qualifying examination before continuing enrollment. The exam is designed to test the student's ability to undertake advanced learning and carry out independent research.

A doctoral candidate must complete a minimum of 72 credit hours of course work beyond the BS degree with a minimum of fifteen hours (exclusive of research, problems or independent study courses) at the 8000 (graduate) level, including at least three BE courses. In addition, there will be a minimum of one hour of Seminar (BIOL_EN 8087) and research (BIOL_EN 9990) may not exceed 28 hours of the total 72 hours required in the PhD Program of Study. The courses and research plan must be approved by the doctoral program committee.

The student is required to pass a comprehensive examination, which includes both written and oral components. The student must demonstrate his or her ability for in-depth research by presenting and successfully defending a dissertation embodying the results of original research. A foreign language is not required.

Biomedical Engineering

J. Tan, Chair
College of Engineering
College of Agriculture, Food and Natural Resources
215 Agricultural Engineering Building
(573) 882-7044
TanJ@missouri.edu

The Department of Bioengineering, which is home to the undergraduate biomedical and biological engineering degree programs, seeks to educate the next generation of bioengineering leaders who integrate engineering and biological sciences in the contexts of health, sustainability, and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth. Our undergraduates are part of a diverse and vibrant department with over one hundred years of excellence in engineering education. We provide a supportive and stimulating environment that combines talented students, a diverse faculty body, and excellent teaching and research facilities. Bioengineering uniquely positions graduates to pursue careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics.

Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of integrated, 5 –year, bachelor plus master degree programs at MU.

Faculty

Professors K. D. Gillis**, S. A. Grant**, L. Gu**, J. Tan**, A. L. Thompson**, G. Yao**

Associate Professors S. C. Borgelt*, S. Ding**, D. Gil Pages*, H. Hunt**, W. A. Jacoby**, R. Kannan**, A. Schrum*, S. Sengupta**
Assistant Professors N. Aloysius*, I. Ozden*, F. M. Pfeiffer*, R. Thomen*, C. Wan*

Professor Emeritus F. H. Hsieh

Professors D. Burke**, D. Brune**, C. S. Cutler*, M. Davis**, M. W. Downs*, D. Duan**, G. Forgacs*, S. Gangopadhyay**, M. Hill**, T.

Hwang**, K. V. Katti**, M. L. Katz*, A. McClellan**, G. Meininger**, S. Nair**, L. G. Schumacher*, S. Segal*, P. Yu**

Associate Professors D. E. Baker*, P. V. Cornish**, T. M. Guess**, J. W. Kwon*, H. Li*, T. T. Lim*

Assistant Professors L. A. Martinez-Lemus**, L. Polo-Parada**, R. A. White*, J. Zulovich*

Adjunct Professors T. Rahhal, E. J. Sadler*, K. A. Sudduth**, E. Vories

- * Graduate Faculty Member membership is required to teach graduatelevel courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

Advising and Scholarship Contacts

Heather K. Hunt, Undergraduate Director hunthk@missouri.edu

Jean Gruenewald, Academic Advisor W1006 Lafferre Hall (573) 882-4659 gruenewaldj@missouri.edu

Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biomedical engineering program is a broad-based curriculum that prepares students for careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. Biomedical engineering graduates are hired by biotechnology, medical, and pharmaceutical companies, as well as by government agencies and major research laboratories. Many of our undergraduate students attend graduate, medical, or law schools post-graduation. Graduates are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

The Bachelor of Science with a major in Biomedical Engineering (B.S. B.M.E.) program at MU was developed to meet the mission, program objectives and student outcomes described below.

Program Educational Objectives

The structure of the curriculum provides both breadth and depth across the range of engineering and science topics consistent with the program educational objectives and student outcomes. The undergraduate program leads to a Bachelor of Science degree in Biomedical Engineering, producing graduates who will, within 3-5 years:

- Applying principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations) and statistics;
- Solving bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems;
- Analyzing, modeling, designing, and realizing bio/biomedical engineering devices, systems, components, or processes; and
- 4. Making measurements on and interpreting data from living systems.

Student Outcomes

The bioengineering program should produce graduates that have:

- an ability to apply knowledge of mathematics, science and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data,
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- 4. an ability to function on multi-disciplinary teams;
- 5. an ability to identify, formulate and solve engineering problems;
- 6. an understanding of professional and ethical responsibility;
- 7. an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and an ability to engage in, life-long learning;
- 10. a knowledge of contemporary issues;
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; and
- an ability to integrate engineering and biological sciences to develop systems and processes for improved health, bio-resource utilization, and environmental protection

Graduate

A graduate degree in Biomedical Engineering is not currently offered. Please see Biological Engineering (p. 504) for similar graduate degree programs.

BS in Biomedical Engineering

Degree Program Description

The Biomedical Engineering undergraduate degree program offers four tracks from which our students can develop their primary expertise: biomaterials, biomechanics, biomedical imaging and instrumentation, and bioinformatics. In collaboration with colleagues from the School of Medicine, the College of Veterinary Medicine, the School of Health Professions, the Sinclair School of Nursing, the Honors College, and the College of Engineering, we develop students into engineering leaders with skills in creative and critical thinking, problem-solving, innovation, engineering design, communication, entrepreneurship, and team-building. Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of integrated, 5 –year, bachelor plus master degree programs at MU.

Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biomedical engineering program is a broad-based curriculum that prepares students for careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. Biomedical engineering graduates are hired by biotechnology, medical, and pharmaceutical companies, as well as by government agencies and major research laboratories. Many of our undergraduate students attend graduate, medical, or law schools post-graduation. Graduates

are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

Major Program Requirements

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biomedical engineering principles and design. In a capstone design course sequence, each student completes a design project under the direction of a faculty mentor. Technical electives allow students to place emphasis on biomaterials, biomechanics, bioinformatics, and biomedical imaging and instrumentation.

Students earning a Bachelor of Science in Biomedical Engineering are required to complete all University general education (p. 34), University undergraduate requirements (p. 33), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better. Courses designated a core biomedical engineering course must be completed with a grade of C or better.

Semester Plan

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

Chemical Engineering

Patrick Pinhero, Interim Chair College of Engineering W2033 Lafferre Hall (573) 882-4877 pinherop@missouri.edu http://engineering.missouri.edu/chemical/

Chemical Engineering at the University of Missouri focuses on education and research involving industrial chemicals, materials, environmental, and life-science processes. We aim to be a reservoir of talent for the research, design, and management of complex process challenges. The Department strives to provide its faculty and students with an environment for research, learning, and professional growth.

The faculty of the MU Department of Chemical Engineering prepares its students for careers in a broad range of fields and to assume leadership roles in society through a well-rounded general and rigorous technical education. The technical curriculum challenges students with a broad education in Chemical Engineering theory and practice, and to improve their skills in problem solving, critical thinking, and appreciation of the relationship between technology and society. Innovative development and use of technology facilitates both research and teaching, creating a diverse, learning environment.

MU Chemical Engineering program aims to develop versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic sciences, engineering topics, and problem solving and design. A flexible program offering environmental, material, and biochemical options allows our graduates to move into non-traditional careers as well as traditional chemical engineering.

Additionally, we build teamwork and design skills by integrating team design projects, laboratories, and reports into our curriculum.

Director of Graduate Studies: David G. Retzloff

About Chemical Engineering

Established in 1906, MU Chemical Engineering has a long standing commitment to provide quality undergraduate and graduate education. Our department serves the discipline well by providing state of the art research in many cutting edge fields including batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling & simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

Faculty Research

Currently active research areas include batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling and simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

Facilities and Resources

There are excellent facilities for research students, including electron microscopy, ultra-high vacuum (UHV surface science, atomic force microscopy, a heterogeneous catalysis and reaction kinetics laboratory, a heat and mass transport laboratory, an air pollution monitoring and control laboratory, a biochemical engineering laboratory, a computational laboratory, and a transport properties phenomena laboratory. Excellent library facilities provide the latest domestic and international journals specific to chemical engineering and physical sciences research.

Internal Funding

Research and teaching assistantships are available to qualified students for the entire year. The yearly stipend for graduate students ranges from \$17,500 to \$20,000, depending on the student's terminal degree. Assistantships also include a tuition waiver and health insurance. Academically qualified students may receive additional scholarship awards. Grant research assistantships and some industrial and Graduate School fellowships may also be available. Extremely well-qualified students may be eligible for the Robert and Dorcas Holtzsmith Graduate Fellowship

RA and TA appointments allow for 12 credit hours of advanced study each semester. The applicant's academic record and research potential determine the financial assistance offered. Students who receive financial assistance are expected to continue their appointment during the summer session as well, as these appointments are year long positions.

BSChE in Chemical Engineering

Degree Program Description

The curriculum provides a well-rounded general and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as Chemical Engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well

as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences and other engineering disciplines.

Major Program Requirements

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational and experimental techniques. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below are in addition to University graduation requirements, including University general education (p. 34), and College of Engineering requirements. Students are also required to complete emphasis area requirements.

BSChE in Chemical Engineering with Emphasis in Materials

Degree Program Description

The curriculum provides a well-rounded general and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as Chemical Engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences and other engineering disciplines.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), and the BSChE requirements (p. 511), in addition to the emphasis requirements below.

ENGINR 1200	Statics and Elementary Strength of Materials	3
ENGINR 2200	Intermediate Strength of Materials	3
CH_ENG 4317	Chemical Processing in Semiconductor Device	3
CH_ENG 4319	Introduction to Polymer Materials	3
MAE 4232	Ceramic Materials and Processing	3
Approved Materials Elective		6

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
MATH 1500	5 CHEM 1330	4
CHEM 1320	4 Humanities and Social Science	3

Total Credits: 127

- If these classes are not available, any 4000 level ChE elective that is related to materials science and engineering may be used to replace ECE 4550, ChE 4319 and/or MAE 4232 but only with Advisor consent.
- Materials elective choices: Any approved course related to materials. Choices include (but are not limited to): ECE 3510, ECE 4650, ECE 3510, ECE 4650, ECE4670, MAE 4250, MAE 4270, MAE 4600, Geol 3250, NE 4349, Phy 3150, or anything listed under item 5.

MS in Chemical Engineering

Minimum Graduate School Requirements

- The student's program must include a minimum of 30 hours of graduate credit beyond the bachelor's degree (or its equivalent).
- At least 3 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 4-% of the total can be research-based.
- The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
- Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
- Students must present a thesis.
- · Students must be enrolled.

Sample course list

CH_ENG 8336	Advanced Heat and Momentum Transfer	3
CH_ENG 8337	Advanced Mass Transfer	3

Total Credits		30
CH_ENG 7226	Engineering Research Calculations and Reporting (Or Math 7000+)	3
	gineering, Physical, Chemical, or Biological proved by student's thesis advisor and thesis	6
CH_ENG 8990	Research-Masters Thesis in Chemical Engineering	8
CH_ENG 8087	Seminar in Chemical Engineering	1
CH_ENG 8463	Chemical Reaction Engineering Science	3
CH_ENG 8451	Advanced Chemical Engineering Thermodynamics I	3

Admissions

Applicants are required to meet two sets of minimum qualifications for admission consideration: the requirements of the M.S. in Chemical Engineering program (https://gradstudies.missouri.edu/degreecategory/chemical-engineering) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/apply). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Application Deadlines

• Fall Deadline: March 15

• With change of degree within MU: May 15

• Spring Deadline: October 15

• With change of degree within MU: November 1

Civil Engineering

Zhiqiang Hu, Interim Chair

Department of Civil & Environmental Engineering E2509 Lafferre Hall (573) 882-6084 http://engineering.missouri.edu/civil/

Civil engineers are responsible for planning, design, construction, and operation of public and private facilities essential to modern life; including infrastructure for transportation of people and goods, water supply and water treatment, waste disposal, communications, and energy. Civil engineers are problem solvers, meeting the challenges of infrastructure, pollution, traffic congestion, drinking water supply, energy, national security, communications, urban redevelopment, and sustainable community planning.

Faculty

Professor J. J. Bowders Jr**, P.E., W. G. Buttlar*, P.E., Z. Chen**, P.E., B. Deng**, V. S. Gopalaratnam*, P.E., Z. Hu**, P.E., H. A. Salim**, P.E., C. C. Sun**, P.E., Esq., G. Washer**, P.E.

Associate Professor P. K. Edara**, P.E., M. M. Fidalgo**, J. E. Loehr**, P.E., T. C. Matisziw**, S. L. Orton**, P.E., B. L. Rosenblad**, P.E., K. M. Trauth**, P.E.

Assistant Teaching Professor E. C. Inniss**

Adjunct Faculty A. Boeckmann, P.E., H. Brown*, P.E., C. J. Nemmers*, P.E.

Professor Emeritus T. E. Clevenger*, S. A. Kiger*, M. R. Virkler*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSCiE in Civil Engineering (p. 517)

The Department of Civil and Environmental Engineering offers a Bachelor of Science in Civil Engineering (BSCIE). Most graduates take the Fundamentals of Engineering Exam. Graduates are encouraged to become registered professional engineers and to continue their education throughout their careers.

Departmental Honors

Students who will graduate with a 3.0 GPA or higher are eligible for the College of Engineering honors program. Interested students should ask their advisor for details about this highly rewarding program that can include earning a salary for research performed under the guidance of a faculty member, and eligibility for dual enrollment in graduate classes.

Educational Mission

The educational objectives of the Bachelor of Science in Civil Engineering describe the expected accomplishments of graduates after graduation. It is expected that nearly all students completing the requirements of the Bachelor of Science in Civil Engineering will engage in the life-long learning necessary to advance professionally in the field of civil engineering and contribute to society and the profession through involvement in professional or other service activities.

It is expected that most graduates will

- Enter the profession of civil engineering with proficiency in environmental engineering, geotechnical engineering, structural engineering, transportation engineering and water resources engineering. In doing so, these students will
 - a. Take and pass the Fundamentals of Engineering exam
 - b. Gain employment as an engineer-in-training
 - c. Take and pass the Professional Engineers Exam, and
 - d. Be licensed to practice engineering in one or more states

It is expected that some graduates will

- Begin careers in civil engineering-related industries, especially construction and other careers not requiring professional licensure
- Begin and complete graduate study in civil engineering at MU or other Carnegie doctoral extensive universities, and
- Begin and complete graduate/professional study in other associated fields

The following list of outcomes describes what graduates are expected to know and to be able to do when they complete the program. At graduation, graduates will have:

- Ability to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science
- Ability to conduct laboratory experiments and to critically analyze and interpret experimental data
- Ability to perform civil engineering design by means of design experiences integrated throughout the professional component of the curriculum
- Ability to function on teams that must integrate contributions from different areas of civil engineering toward the solution of multidisciplinary projects
- · Ability to identify, formulate and solve civil engineering problems
- Understanding of professional practice issues in civil engineering including professional and ethical responsibility
- · Ability to communicate effectively
- The broad education necessary to understand the impact of civil engineering solutions in a global economic, environmental, and societal context
- Recognition of the need for, and an ability to engage in, life-long learning
- Knowledge of contemporary issues as they relate to civil engineering problems and solutions
- Ability to use the techniques, skills and modern engineering tools necessary for civil engineering practice, particularly in areas of environmental/water resources, geotechnical, structural and transportation engineering

Graduate

- MS in Civil Engineering (p. 519)
- PhD in Civil Engineering (p. 519)

http://engineering.missouri.edu/civil/

Director of Graduate Studies: Praveen Edara

About the Program

Civil engineering education at MU began in 1856. Graduate programs offered by the department prepare students for leadership positions in

academia, research and advanced practice engineering careers. Major program areas include: structural mechanics, structural engineering and materials, transportation engineering, geotechnical and geoenvironmental engineering, environmental engineering, hydrology and water resources engineering.

Areas of Study

Structural Mechanics, Structural Engineering and Materials. Study areas: fracture and failure of composites, model-based simulation, inelastic response of materials and structures, bridge engineering, linear and nonlinear structural dynamics, explosion resistant structural design, timber engineering, microstructure of porous materials, concrete and aggregate durability, advanced fiber reinforced composites for construction and nondestructive structural health evaluation

Environmental Engineering. Study areas: water and air pollution control, water purification, wastewater treatment, environmental remediation, hazardous and solid waste treatment and management, membrane processes, implication and application of environmental nanotechnology and renewable energy issues. Other areas of research include the application of physical, chemical and biological principles to design of water supply systems, pollution control facilities and fate and transport of contaminants in soils and groundwater.

Geotechnical and Geoenvironmental. Study areas: strength, deformation and flow properties of earthen materials and application of this understanding to foundation engineering, slope stability analyses, earth structures design, pavement design and performance, and geoenvironmental challenges. Research areas include: unsaturated soil mechanics, soil improvement techniques, geosynthetics, landfills and waste containment, stabilization and maintenance of earth slopes, in situ soil cleanup technologies, geotechnical earthquake engineering, nondestructive geophysical technologies for subsurface applications, satellite – and ground-based remote sensing risk analysis and reliability-based design.

Transportation Engineering. Study areas: traffic engineering, intelligent transportation systems, highway safety, network modeling and simulation, geographic information systems, security and evacuations, transportation planning, traffic flow theory, highway design, intersection operations, bicycle and pedestrian facilities, infrastructure management, driver behavior, airport engineering, transportation legal issues, artificial intelligence and advanced computing applications in transportation.

Hydrology and Water Resources. Study areas: hydrologic, hydraulic, regulatory/public policy and geographic information system applications for transportation, surface water quality and storm water management and decision making.

Facilities and Resources

The department has laboratories for experimental research in structural engineering, materials, geotechnical and geoenvironmental engineering, environmental engineering, and transportation engineering.

Structural Testing. Several computer-controlled electrohydraulic testing machines and associated instrumentation are available in the high-bay structural engineering and materials engineering laboratories. The laboratories are serviced by a 5-ton overhead crane. An additional structural testing facility located south of the campus houses a 100-foot by 20-foot structural floor with anchor points on a 4-foot-square grid. This high-bay facility is serviced by a 10-ton overhead crane. There is also a materials laboratory for concrete mix design and evaluation.

Geotechnical Testing. The laboratories house state-of-the-art permeability, consolidation, triaxial, geosynthetics, soil dynamics and unsaturated soil mechanics testing equipment and is home to the Missouri Soil Characterization Laboratory. Additional laboratories include facilities and equipment for large-scale model testing of slopes, piles and other geotechnical systems, including a 10-acre geotechnical experiment site.

Environmental Labs. The laboratories are supplied with analytical equipment for the complete physical, chemical and microbiological analysis of environmental samples. Additional capacities include membrane fabrication and characterization facilities, and chemical reactors and bioreactors for contaminant removal and/or degradation.

Transportation Laboratory. The laboratories include capabilities in advanced surveillance and video image processing, transportation modeling and simulation, Geographical Information Systems, traffic management and control, driver behavior, and safety, and ZouSim (bicycle, wheelchair, and driving simulator).

Missouri Asphalt Pavement and Innovation Laboratory (MAPIL). Advanced asphalt binder and mixture tests, including bending beam rheometer, dynamic shear rheometers (2), extraction and recovery apparatus, mixture creep, fatigue, rutting and fracture tests, compaction and fabrication equipment, advanced numerical modeling workstations and software, and an innovation center focusing on sustainable and resilient infrastructure development and intelligent infrastructure sensing and data analytics.

Funding

In addition to assistantships sponsored by the National Science Foundation (NSF), the US Environmental Protection Agency, Federal Highway Administration and other governmental agencies, several graduate assistantships are available each year. The assistantships are primarily research appointments; however, the Department does make a limited number of teaching assistantship appointments. Most assistantships offer tuition waivers and health insurance.

BSCiE in Civil Engineering

Degree Program Description

Civil engineers are responsible for design, construction, and operation of our public and private infrastructure, for protecting our natural resources, and for preserving the health and safety of the general public. Civil engineers are vital to our nation's economic vitality as they provide infrastructure for safe, efficient, and sustainable transportation of people and goods. The curriculum includes fundamental coursework in math and basic sciences, specialized coursework covering the subdisciplines of structural engineering, transportation engineering, geotechnical engineering, environmental engineering, and water resources engineering, as well as general education courses in the humanities and social sciences. Graduates are well prepared to become licensed Professional Engineers. The BS degree in civil engineering is accredited by the Engineering Commission of ABET. Graduates are commonly employed by private firms that provide design and consulting services, by construction contractors that build our infrastructure, and by government agencies responsible for specific components of the nation's infrastructure. Some graduates opt to further specialize within the civil engineering profession by pursuing graduate degrees.

Major Program Requirements

Engineering topics start with basic computer and graphics courses. These are followed with basic engineering science courses, which ground the students in the fundamentals necessary for future course work and a sophomore design experience.

Engineering topics courses in the junior year provide students with the basic fundamentals in the areas of environmental engineering, geotechnical engineering, hydrology/water resources, structural engineering, and transportation/traffic engineering. Many of these courses contain elements of civil engineering design. Elective courses in the senior year enable students to either begin to specialize within or to maintain a broad educational background across the civil engineering discipline.

Design and communication skills are integrated throughout the curriculum culminating in a capstone design project, which is usually supplied by consultants or governmental agencies. This "final" course requires working in teams, making oral and written presentations, and completing a final design report. Oversight, interaction, and evaluation are provided by practicing engineers from industry and governmental organizations.

Students earning a Bachelor of Science in Civil Engineering are required to complete all University general education (http://catalog.missouri.edu/ academicdegreerequirements/generaleducationrequirements), University undergraduate requirements (http://catalog.missouri.edu/ academicdegreerequirements/universityrequirements), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Approximately onethird of the course work for the degree is completed in engineering or professionally related courses.

Major Core Requirements

Math		16

MS in Civil Engineering

Dr. Praveen Edara Director of Graduate Studies http://engineering.missouri.edu/civil/

Degree Requirements

A student's program must include a minimum of 30 hours (transportation area) or 31 hours of graduate credit beyond the bachelor's degree (or its equivalent). A total of 15 hours of the 30-hour minimum must be selected from courses at the 8000 or 9000 level. No more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, research (CV_ENG 8990), readings and/or problems courses. The student's GPA must be 3.0 or greater. Students should consult with their academic advisor to ensure all requirements are satisfied.

Sample Plan of Study

- 8 or more courses (3 credit hours each) at the appropriate level
- Up to 6 hours of research (CV_ENG 8990)
- One or more 1-hour seminars associated with your specialty area (seminar is not required in all areas; see your academic advisor for details).

Thesis/Non-Thesis Requirements

All candidates for the Master of Science degree are required to complete a substantial independent effort reflecting some measure of creativity and/or originality and to produce evidence of such effort. A final oral examination is required of all master's candidates. Approximately two weeks before this examination, a candidate must submit to an examining committee a thesis, a formal report or a design of professional quality applying the knowledge gained in course work to the solution of an engineering problem. Students who receive research appointments or traineeships are required to submit a thesis. Formal or design report is at the discretion of the advisor.

Academic credit allowed for this portion of a student's program of study shall be for 3 credit hours for a report and 6 credit hours for a thesis.

Admissions

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria

- Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 5.0 for Analytical.
- Minimum TOEFL and IELTS scores for international students: See language requirements by the Office of Graduate Studies.

Required Application Materials

Upload to the Office of Graduate Studies:

- · All required Graduate Admissions documents
- 3 Letters of Recommendation (at least two from faculty members who have taught or advised you)
- · GRE scores
- Résumé
- · Statement of Purpose

Financial Aid from the Program

If you wish to be considered for financial aid, please complete the financial aid section of the departmental application.

PhD in Civil Engineering

Dr. Praveen Edara

Director of Graduate Studies

https://engineering.missouri.edu/departments/civil-environmental-engineering/

Degree Requirements

PhD programs are committee administered and tailored to fit the needs of each individual student. A minimum of 72 credit hours, including the credit hours taken during the MS program beyond the bachelor's degree, are required. Students who received the MS degree from other than MU may transfer up to 30 hours of credit from their MS degree. The candidate must pass a comprehensive examination and submit and defend a dissertation at a final oral examination.

Residency Requirement

A student must complete at least two nine-hour semesters or three six-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be approved by the student's doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirements.

Qualifying for Candidacy

Students are accepted for advisement upon CE Graduate Admissions Committee review. Formal acceptance to the PhD program is based on a qualifying examination during the first year of post-master's work.

The Qualifying Examination is required to determine the formal acceptance to candidacy for the PhD. degree and is based on a written

and/or oral examination administered by faculty members in the student's area of concentration. The student, upon passing this examination, will be advised on the program of coursework that should be taken to prepare for the PhD. degree.

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework to determine if the PhD. candidate is adequately prepared to conduct the doctoral research. This examination will focus on the coursework and/or research/proposal writing. The student may be advised to take some additional coursework. A written proposal of the research must be distributed to the student's doctoral committee for review after which an oral presentation and examination on the proposed work will be administrated.

Dissertation Requirements

The third examination, called the *Defense of the Doctoral Dissertation*, is required to determine if the PhD. degree should be awarded on the basis of the research that is presented. The student must submit the written dissertation to the committee members at least two weeks prior to the exam. This is an oral examination that is administered by the Doctoral Committee.

Graduate students are required to submit one copy of their dissertation or thesis to the Office of Graduate Studies, 210 Jesse Hall on a CD.

Admissions

Application Deadlines

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria

- Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and between 3.0 and 4.0 for Analytical.
- Minimum TOEFL and IELTS scores for international students: See language requirements by the Office of Graduate Studies.

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS and ME degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/ history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 40+ faculty members, not including instructors, teaching professors, and emeriti.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering

(BS CoE) (https://engineering.missouri.edu/departments/electricalengineering-computer-science/bachelor-science-computer-engineeringbs) and Bachelor of Science in Electrical Engineering (BS EE) (https:// engineering.missouri.edu/departments/electrical-engineering-computerscience/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively. Not to mention majors and minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnolwogy; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics).

At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

with options for dual masters and Masters in Engineering (ME) -- i.e. coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Computer Engineering, Electrical Engineering, Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized CoE and EE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, that is often multidisciplinary in nature, spanning interdepartmental and

cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research and development as well as product teams. Close integration of research with education is a constant goal in the department's graduate programs. It emphasizes indepth studies that can also be tailored to fit graduate students' individual interests. Additionally, members of the ECEP are among the leading faculty in University's Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

Summary

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering)
- Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and

research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- · mobile video communication;
- · wireless and digital communications;
- · satellite remote sensing;
- · geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- · eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep networks, fuzzy systems;
- · computer vision;
- · robotic vision;
- robotic assistive technology;
- · human/robot interaction;
- · landmine detection;
- · pulsed power and plasmatechnolwogy;
- nuclear and renewable energy systems;
- · semiconductor devices;
- · photonics;
- · accelerators and beams;
- · antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- · heterostructure and microfabrication;
- · feedback and control systems;
- · parallel processing;
- computer architecture;
- · autonomous systems;
- · real-time embedded architectures;
- · high performance computing;
- · sensor networks; and
- human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- · Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Advising and Scholarship Contact

Tami Beatty

Undergraduate Program Office W1002 Thomas & Nell Lafferre Hall (573) 882-2648 beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either disciple and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS CpE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program

- Graduates will meet or exceed the expectations of their employers
- · Qualified graduates will pursue advanced study if desired

 Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:

- Graduates will meet or exceed the expectations of their employers
- · Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements (p. 33) including University general education (p. 34), as well as all degree and college or school requirements.

Electrical and Computer Engineering (ECE) Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of a least 3.0 receive the designation "Honors Scholar in Engineering" at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

The Department also offers a PhD in Electrical and Computer Engineering (p. 538), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 550).

Research Areas

The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- · Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Specific Topics of Study

- · mobile video communication;
- · wireless and digital communications;
- · satellite remote sensing;
- · geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- · eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- · computer vision;
- · robotic vision;
- · robotic assistive technology;
- human/robot interaction;
- · landmine detection;
- · pulsed power and plasma technology;
- nuclear and renewable energy systems;
- · semiconductor devices;
- · photonics;
- · accelerators and beams;
- · antennas and radar systems;
- nano and microelectromechanical systems;
- bioMFMS
- · heterostructure and microfabrication;
- feedback and control systems;
- · parallel processing;
- · computer architecture;

- · autonomous systems;
- · real-time embedded architectures;
- · high performance computing;
- · sensor networks; and
- human-computer interfaces.

Admission Requirements for the MS and ME Programs in EE or CE

- · GPA from BS program
- · GRE: Quantitative, Verbal and Analytic scores.
- · International students:
 - · Computer-based TOEFL, or
 - · Paper-based TOEFL, or
 - · Internet-based TOEFL, or
 - IELTS exam
- 3 letters of recommendation
- · Statement of purpose
- Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU's Institutional Code for the GRE and TOEFL is: 6875.)

In addition to the Graduate School requirements, the ECE programs have the following additional requirements:

The three letters of recommendation should be from persons familiar with the applicant's engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender's institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person's institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look 'unofficial' will be disregarded.

To be accepted outright by the Director of Graduate Studies in ECE (DGS-ECE), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements.

Students who meet the academic requirements but have degrees in other Engineering or Science disciplines can be accepted directly into the MS/ME programs by the Graduate Program Committee in ECE (GPC-ECE).

Such students are strongly encouraged to consult with the DGS-ECE or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who don't meet the above requirements may still be admitted on Probation by the GPC if there are mitigating factors. Students admitted on Probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS/ME program.

Fast Tracking

In an effort to streamline and accelerate the acquisition of MU graduate degree(s) we establish fast tracking options for our current undergraduate students and our 3+2 students. For MU undergraduate students, the

fast track option allows them to become integrated into the research environment of the EECS department early in their career and to earn between 6 and 12 hours of graduate credit as their schedules allow. For these qualified graduate school bound students, we will waive the GRE requirement and give them preference in TA and RA positions. For the 3+2 students who demonstrate excellence in their first semester of ECE course work at MU, we will waive the GRE and provide up to 12 hours of graduate credit prior to entry into one of the ECE graduate programs. The summary follows.

MU BS students (all relevant majors)

- GPA > 3.0 after junior year
- Waive GRE requirement for admission to ECE graduate programs
- Use 6 hours of 126 for graduate credit (after 90 credit hours have been earned)
- Earn 6 additional hours of graduate credit as schedule allows (after 90 credit hours have been earned)
- Participate in Undergraduate Research at least one semester
- · Participate in Honors Scholars' Program

International or Domestic 3 + 2 students

- GPA from Home institution (last 60 hours) > 3.2
- MU GPA in at least 12 hours of ECE courses >= 3.5
- · Waive GRE requirement for admission
- Take up to 12 hours as dual enrolled student (second semester of first year)

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of "Teaching Fellows" are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

BSCoE in Computer Engineering

Degree Program Description

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department.

Major Program Requirements

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department. (Focus areas are not listed on transcripts or diplomas.)

Students must complete all university requirements, including general education (p. 34), and Department Level Requirements (p. 522), in addition to the degree requirements below.

Major core requirements Constitutional Elective

MS in Computer Engineering

Admission

349 Engineering Building West, Columbia, MO 65211

Phone: (573) 882-4436

Email: umcengrecegradoff@missouri.edu http://engineering.missouri.edu/ece/

Admission Criteria

Fall deadline: February 15 Spring deadline: September 1

Note: Applications received after these deadlines will be evaluated as

time allows.

. Minimum GPA: 3.0 for the last 60 hours

· Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	80th percentile	will be considered	will be considered
On or After August 1, 2011	80th percentile	will be considered	will be considered

International applicants only:

• Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

· Minimum Academic IELTS scores:

Item	Score
Listening	5.5
Reading	5.5
Writing	5.5
Speaking	5.5

Required Application Materials:

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed

to: The Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

To the Office of Graduate Studies:

Official Transcripts. The mailing address is: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU's Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student's advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master's degree.
- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in

Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).

- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master's thesis or a master's Report.
- The student's cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of "C" in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student's academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor's assistance, completes the Program of Study form that outlines the plan of study for the student's graduate program. M1 - Program of Study form.

The form is forwarded through the DGS to the Office of Graduate Studies for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student's main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Office of Graduate Stuides by the end of the student's second semester of enrollment. Upon approval of the program by the Graduate School, the student is a candidate for the degree. If changes must be made on a student's Program of Study form, a Program of Study Substitution form is used.

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Office of Graduate Studies by the end of the student's second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Office of Graduate

Studies to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person's curriculum vitae. The Office of Graduate Studies maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student's Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master's Examining Committee

The purpose of the M-3 Report of the Master's Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student's committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Office of Graduate Studies by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student's department. The form is due in the Office of Graduate Studies two weeks prior to graduation.

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering

Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS and ME degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate CS degree program prepares students for rewarding careers in software systems and computing technologies and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 35 faculty members (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/eecs-faculty), not including instructors, teaching professors, and emeriti.

About Computer Science Programs

The Computer Science Program (CSP) in the Electrical Engineering and Computer Science (EECS) Department continues to be a dynamic, rapidly evolving and research-active unit at the University of Missouri. The Computer Science Program offers a comprehensive curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computing and information technology. Students are able to pursue dual degrees in related fields including information technology, computer engineering and electrical engineering as well as minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty lead computer science activities on campus and their research covers both well established and emerging fields including big data analytics, machine learning, cloud computing, cyber-physical, Internet of Things, artificial intelligence, computer vision, robotics, autonomous systems, embedded architectures, high performance computing, computational biology and bioinformatics, biomedical and geospatial informatics, cyber-security, distributed and mobile computing, learning systems, multimedia communications, data visualization, information fusion, sensor networks, spoken language processing, human-computer interfaces, virtual and augmented reality.

The CSP offers graduate programs in masters, dual masters, and doctoral degrees. The graduate degree programs prepare graduates of four-year BS degrees in Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well

as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the Computer Science Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often multidisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce computer scientists who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department's graduate programs. It emphasizes indepth studies that can also be tailored to fit graduate students' individual interests. Additionally, members of the CSP lead the University's institutional efforts in developing infrastructure for bioinformatics, computational biology, and high-performance computing and networking. Our major research projects are funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) which are examples of federal funding, Microsoft, Honeywell and Monsanto are representative of industrial funding.

Research facilities are well established around faculty expertise in cloud computing, bioinformatics and computational biology, biological and biomedical image analysis, graphics, visualization and virtual reality, mobile computing, artificial intelligence, multimedia, networking, human-computer interaction, information web services, and computer science foundations. These facilities are clustered in core laboratories for bioinformatics, multimedia and visualization, video processing, spoken-language processing, mobile networking and communications, wireless sensor networks, high-performance computing, cyber security, and medical informatics. Faculty in the Computer Science Program work closely with faculty in the Computer Engineering and Electrical Engineering Programs within the EECS Department.

Careers and Graduate study

The Computer Science curriculum prepares graduates of four-year B.S. degrees in Computer Science for successful careers as computer and information technology professionals in industry as part of the rapidly expanding and pervasive information economy. Graduates with B.S. degrees in Computer Science or closely related areas can choose to pursue advanced study at the masters and doctoral level under the mentorship of a faculty in specialized research fields within the broad discipline of computing with engaging opportunities in multidisciplinary collaborative research across departments and colleges.

The M.S. and Ph.D. programs are a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training is available through close interaction with faculty mentors in their active research fields. For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in Computer Science is available. Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

With foundations in undergraduate courses covering algorithms, compilers, software engineering, web technologies, database, networking, operating systems, programming languages, artificial intelligence and computational complexity, the graduate programs are integrated over many application areas and multidisciplinary fields such as:

- · cyber-security
- · social multimedia and databases
- · big data analytics
- · web services and content delivery networks
- · wearable and embedded devices, architectures and systems
- · smartphone applications
- · video games, film and entertainment
- · mobile and sensor networks
- · personalized learning systems
- · high performance computing and networking
- · information search, discovery and retrieval systems
- · smart communities and smart grid energy systems
- robotics and industrial automation systems
- · bioinformatics and computational biology
- · biomedical image analysis
- · medical informatics and healthcare
- · human and animal medicine
- · space, defense and security imaging systems
- · precision agriculture and food security
- · management information systems and business analytics
- journalism and the media of the future

Research

This CSP is the hub of computer science research activities on campus that involve theoretical, experimental, computational and applied research areas in:

- · cloud computing and high performance computing
- big data science and machine learning
- · bioinformatics and computational biology
- · bioimaging and phenomics
- · graphics, visualization, virtual and augmented reality
- · computer vision and image processing
- · geospatial information mining and retrieval
- · biomedical image analysis
- · satellite and aerial imaging
- information fusion & filtering
- · cyber-security and cryptography
- · cyber-physical and IoT
- multimedia communications and databases
- ambient intelligence and sensor networks
- mobile, distributed and pervasive computing
- spoken language processing
- gesture and human-computer interfaces, etc.

Additionally, members of the CSP lead the University's institutional efforts in developing infrastructure for cloud computing, bioinformatics,

computational biology, visualization and high-performance computing and networking.

Faculty

Professor J. Cheng**, G. Guidoboni**, J. Keller**, K. Palaniappan**, Y. Shang**, C. R. Shyu**, M. Skubic**, D. Xu**, Y. Zhao**, X. Zhuang** Associate Professor Y. Duan**, S. Goggins**, W. L. Harrison**, M. Jurczyk**, T. Kazic**, Y. Saab**, J. Uhlmann**

Assistant Professor P. Calyam**, R. Chadha**, K. Anuarul Hoque Assistant Research Professor H. Aliakbarpour*, F. Bunyak**, S.

Prasath*, T. Joshi*

Associate Teaching Professor D. Musser* Assistant Teaching Professor F. Wang*

Associate Professor Emeritus G. K. Springer**

Adjunct F. Esposito, D. Korkin**, G. Seetharaman*, W. Zeng**, Y. S. Zeng

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Introduction

The EECS graduate programs lead to the degrees of Master of Science in Computer Science (MS CS), Computer Engineering (MS CE) and Electrical Engineering (MS EE), Master of Engineering (ME), and Doctor of Philosophy in Computer Science (PhD CS) and Doctor of Philosophy in Electrical and Computer Engineering (PhD ECE). The EECS graduate degree programs prepare prior recipients of four-year BS degrees in Computer Science, Computer Engineering, Electrical Engineering or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals. The Ph.D. program is a research degree designed to prepare students for various advanced professional careers, including college teaching and research, as well as research and development in leading industrial and government R&D facilities.

The ME degree is designed for entering master students interested in a terminal master's degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in the department.

Application Procedures for CS MS and PhD Programs

In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

Fall admission: Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th. **Spring admission:** Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the online application system. An application must be accompanied by an application fee. In addition, the applicant must have the following original paperwork sent directly from the originating institutions to the Office of Graduate Studies:

- · Official transcripts from ALL institutions attended
- Official GRE score report from Educational Testing Service in New Jersey (and TOEFL or IELTS scores for international applicants)

The following supplemental materials must be uploaded in the online application:

- Your résumé
- A personal goal statement indicating why you feel prepared to pursue the degree program and why you want to pursue this degree
- Three letters of recommendation from professors who know your abilities that must address your ability and readiness to pursue a graduate program in computer science (submitted by your references directly to your online application)
- · Copies (unofficial) of all transcripts
- Copies of GRE results (and TOEFL or IELTS, if applicable).

Note: Copies of the required documents (transcripts, GRE scores, etc.) cannot be accepted in lieu of the official reports from the originating institutions. Copies of these records should be submitted for evaluation, but any decision on admission is non-binding until the official records have been received.

Current/Former MU students: All current and former MU students must meet the same requirements as external students *and* file one of the following forms (in lieu of an MU Application Form):

- Current Non-Degree Graduate Students: Change of Division, Degree, Program, Emphasis, or Advisor form,
- Current graduate students in another department: Change of Division, Degree, Program, Emphasis, or Advisor form (same as 1)
- Previous graduate students returning to same program: Re-Activation form.

Degree Completion Requirements

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees. The Master of Science degree program has both a thesis and a non-thesis option, which can be chosen by the student after consultation with their selected advisor.

Credit toward a Second Master's Degree

A student who has completed one Master's degree at MU or elsewhere may present, upon the recommendation of the student's advisor and approval by the Director of Graduate Studies and the Graduate School, a maximum of six hours of credit earned in the previous program toward a second Master's degree.

Master of Engineering Degree

A student may also choose to complete a Master of Engineering (p. 550) degree. The requirements for the ME degree are the same as the MS CS with the following exceptions: 1) the student must complete at least 36 hours of graduate courses, 2) a minimum of 30 credit hours must be earned from UM System institutions, 3) at least 21 hours must be courses offered by the CS Department, 4) at least 15 hours must be 8000 level courses offered by CS Department (excluding CMP_SC 8085), 5) CMP_SC 8980 , CMP_SC 8990 and CMP_SC 9990 may not be taken, 6) at most 3 hours of CMP_SC 8085 may be taken, 7) No final examination is required. Only the M1 *Program of Study* is submitted for this program. Master of Engineering, not Computer Science, is noted on the student's transcripts. The degree completion letter is tied to meeting the seminar attendance requirement (see M.S. Degree above). Entrance requirements for ME and MS degree are the same.

Financial Aid

Teaching and research assistantships are available on a competitive basis for qualified students in the graduate programs.

Teaching assistantships and research assistantships are available with tuition waivers in the Department. Requests for financial aid are examined at the same time as those for graduate admission, which are due before January 15 for fall semester and October 1 for spring semester.

BS in Computer Science

Degree Program Description

Computer Science emphasizes the study of algorithms, programming methodology, software systems, computational theories and algorithms, computer organization, networking, computer graphics, cyber-security, machine learning, artificial intelligence, high performance computing, and database. In the two-semester capstone design courses, students

complete design projects that serve as a culminating academic experience. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. The BS CS degree is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems, or attend graduate schools.

Major Program Requirements

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems, computational theories and algorithms, computer organization, networking, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math with appropriate grades at MU can earn a math minor.

The BS degree requires the completion of 126 credits. To graduate, a student must earn a 2.0 GPA or better in all CMP SC/IT courses.

The Engineering Leadership, Engagement & Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in Fall 2018 or after. A student who started college before Fall 2018 and who has been continuously enrolled as a full-time student may be pursuing the previous program and should contact the department for information on these degree requirements.

In addition to the major core requirements, students must complete all University graduation requirements including University general education (p. 34), as well as all degree and college or school requirements.

Major Core Requirements

Computer science courses

CMP_SC 1000	Introduction to Computer Science	1
CMP_SC 1050	Algorithm Design and Programming I	4
CMP_SC 2050	Algorithm Design and Programming II	4
CMP_SC 2270	Introduction to Logic Systems	3
CMP_SC 3050	Advanced Algorithm Design	3
CMP_SC 3280	Computer Organization and Assembly Language	3
CMP_SC 3330	Object Oriented Programming	3
CMP_SC 3380	Database Applications and Information Systems	3
CMP_SC 4050	Design and Analysis of Algorithms I	3
CMP_SC 4320	Software Engineering I	3
CMP_SC 4520	Operating Systems I	3
CMP_SC 4850	Computer Networks I	3
CMP_SC 4970	Senior Capstone Design I	3
CMP_SC 4980	Senior Capstone Design II	3
CMP SC courses chosen from the following list ¹ 21		
CMP_SC 2010	Intellectual Property for Engineers	

CMP_SC 2830	Introduction to the Internet, WWW and Multimedia Systems	
CMP_SC 3530	UNIX Operating System	
CMP_SC 3940	Internship in Computer Science	
CMP_SC 4001	Topics in Computer Science	
CMP_SC 4060	String Algorithms	
CMP_SC 4070	Numerical Methods for Science and Engineering	
CMP_SC 4080	Parallel Programming for High Performance Computing	
CMP_SC 4085	Problems in Computer Science	
CMP_SC 4270	Computer Organization	
CMP_SC 4280	Network Systems Architecture	
CMP_SC 4330	Object Oriented Design I	
CMP_SC 4350	Big Data Analytics	
CMP_SC 4380	Database Management Systems I	
CMP_SC 4410	Theory of Computation I	
CMP_SC 4430	Compilers I	
CMP_SC 4440	Malware Analysis and Defense	
CMP_SC 4450	Principles of Programming Languages	
CMP_SC 4460	Introduction to Cryptography	
CMP_SC 4530	Cloud Computing	
CMP_SC 4610	Computer Graphics I	
CMP_SC 4650	Digital Image Processing	
CMP_SC 4670	Digital Image Compression	
CMP_SC 4720	Introduction to Machine Learning and Pattern Recognition	
CMP_SC 4730	Building Intelligent Robots	
CMP_SC 4740	Interdisciplinary Introduction to NLP	
CMP_SC 4750	Artificial Intelligence I	
CMP_SC 4770	Introduction to Computational Intelligence	
CMP_SC 4830	Science and Engineering of the World Wide Web	
CMP_SC 4990	Undergraduate Research in Computer Science	
CMP_SC 4995	Undergraduate Research in Computer Science - Honors	
Related courses		22
MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
MATH 2300	Calculus III	3
MATH 2320	Discrete Mathematical Structures	3
STAT 4710	Introduction to Mathematical Statistics	3
Technical elective 2		3
Science courses (choose one of the following four sequences) minimum 12		
Physics sequence:		
(credit not given for both PH PHYSCS 1220 and PHYSCS	YSCS 1210 and PHYSCS 2750, or S 2760)	
PHYSCS 1210	College Physics I	8
& PHYSCS 1220	and College Physics II	
PHYSCS 2750	University Physics I	10
& PHYSCS 2760	and University Physics II	
Chemistry sequence:

	Callaga Chamiatru II	

College Chemistry II

CHEM 1330

Biology sequence:

BIO_SC 1010	General Principles and Concepts of Biology	3
BIO_SC 1020	General Biology Laboratory	2
Select one of the follow	ring:	
BIO_SC 1200	General Botany with Laboratory	
BIOCHM 2110	The Living World: Molecular Scale	
BIOCHM 2112	Biotechnology in Society	
ANTHRO 2050	Introduction to Biological Anthropology with Laboratory	
OR		
ANTHRO 2051 & ANTHRO 2052	Introduction to Biological Anthropology and Biological Anthropology Laboratory	
BIO_SC 2100	Infectious Diseases	
BIO_SC 2600	Ornithology	
BIO_SC 3050	Genetics and Society	
BIO_SC 3210	Plant Systematics	
Geology sequence:		
GEOL 1100	Principles of Geology with Laboratory	4
or GEOL 1200	Environmental Geology with Laboratory	
Select one of the following:		
GEOL 2130	Physical Geology for Scientists and Engineers	
GEOL 2150	The Age of the Dinosaurs	
GEOL 2300	Earth Systems and Global Change	
GEOL 2350	Historical Geology	
GEOL 2400	Surficial Earth Processes and Products with Laboratory	
GEOL 2450	Global Water Cycle	
GEOL 2600	Mineral and Energy Resources of the Earth	
Additional courses to co	mplete 12 credits in science	

ASTRON 1010	Introduction to Astronomy	4
ASTRON 1020	Introduction to Laboratory Astronomy	2

Any science sequence courses outside the student's selected

Any biology, biochemistry, chemistry, geology, or physics courses beyond the levels listed above.

Other science courses pre-approved by the advisor.

Non-Science Electives

Students must complete 8 hours of non-science electives which include courses in business, education, or additional social, behavioral or humanities courses beyond what is required in those categories.

At least 15 credit hours of computer science electives must be numbered above 4000; one of the 4000-level courses must be CMP_SC 4410 or CMP_SC 4450. A maximum of 6 hours of IT courses can be taken as CS electives with the following stipulations: One 3000/4000 level INFOTC course (excluding INFOTC 4400 and INFOTC 4500) can be taken as a CMP_SC elective but it is counted as a lower level (below 4000) CMP SC course. INFOTC 4400 and INFOTC 4500 are counted as CS 4000 level courses. Students may also take six hours of problems or research courses. ECE 3220 Software Design in C and C++ can count as a lower level CS elective.

- 2000-level or above CMP SC course or 4000-level MATH course. 2000-level or above engineering courses, MANGMT 3000, FINANC 3000 or other courses that meet prior approval of Computer Science advisor. An INFOTC course at the 2000 level or above can be taken. Students cannot take INFOTC 2810 or INFOTC 2910 as a technical elective if they have already taken CMP SC 4850.
- Including one of the two-semester sequences below. At least one of the courses must include a lab. Labs listed separately are not considered a second science course (for example, BIO_SC 1010 and BIO_SC 1020 equal one science course).

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR

Minor in Computer Science

A minor in computer science is offered through the College of Engineering. To obtain a minor, a student must complete 20 hours of courses approved by the Department of Electrical Engineering and Computer Science. The student must earn a grade of C- or better in each course counting toward the minor (except when the prerequisite for the course is C) and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence. The following courses are required.

CMP_SC 1050	Algorithm Design and Programming I	4
CMP_SC 2050	Algorithm Design and Programming II	4
CMP_SC 2270/ECE 2210	Introduction to Logic Systems	3
Three additional department-approved CMP SC courses with at least one numbered above 3000		
Total Credits		20

MS in Computer Science

All students completing a master's degree must fulfill the following minimum requirements:

- The student must earn a minimum of 30 credit hours of computer science (CS) course work approved by the EECS Department.
 This course work must include at least 15 credit hours of computer science course work numbered 8000 or above (CMP_SC 8990 Research-Masters Thesis Computer Science credit is counted in the required 15 credit hours, but CMP_SC 8980 is not).
- 2. The overall GPA of course work taken as an enrolled graduate student must be at least 3.0 (out of 4.0).
- 3. Up to 6 credit hours from courses taken in other departments or from non-CS courses in the EECS Department will be considered for approval as part of a student's MS program. Written approval from faculty advisors or the Computer Science Director of Graduate Studies is required prior to the student undertaking the coursework. Selected non-CS courses, such as IS_LT 7360 and IS_LT 7370, Intro and Intermediate Web Development, and IS_LT 7310 Seminar in Mobile App Development will not be counted.
- 4. Non-Thesis Option:In order to complete the non-thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8980 (Non-Thesis Research) for at least one hour of credit. This project is documented and presented to a faculty committee of at least three graduate faculty members and defended in a public defense as part of a final oral examination. The CMP_SC 8980 course grade is assigned by the student's faculty advisor upon the conclusion of the oral examination. This course is graded on an S/U basis and cannot be used to increase the student's overall GPA in graduate work. In this option, at most 3 credit hours of Research, Reading, and/or Problem courses (such as CMP_SC 8980, CMP_SC 8990, CMP_SC 8085) can be counted toward the 30-hour MS graduate requirements.
- 5. Thesis Option: In order to complete the thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8990 (Thesis Research) for at least three hours of credit. A maximum of six credit hours of CMP_SC 8990 can be counted

- toward the required 30 credit hours for the MS degree program. The thesis project is documented in a formal thesis, presented to a faculty committee of at least three graduate faculty members (one of whom is a faculty member from another department) and defended in a public defense as part of a final oral examination. The CMP_SC 8990 course grade(s) is/are assigned by the student's faculty advisor upon the conclusion of the oral examination. CMP_SC 8990 is graded on an S/U basis and cannot be used to increase the student's overall GPA in graduate work. In this option, at most 9 credit hours of Research, Reading, and/or Problem courses (such as CMP_SC 8980, CMP_SC 8990, CMP_SC 8085) can be counted toward the 30-hour MS graduate requirements.
- 6. Seminar Attendance: The approval of the M3 form is tied to the attendance records for the department's seminar series. MS and ME students are required to attend a total of at least ten EECS seminars during the course of their Master's program. PhD students are required to attend a total of at least twenty EECS seminars during the course of their PhD program. Master's students who add the PhD program can apply their seminar attendance as part of their Master's program toward the attendance requirement for PhD students.
- 7. M Forms: By the end of the second semester in the program, the M1 Plan of Study form should be prepared and submitted, with the aid of a faculty advisor in the department. A faculty advisor should be selected during the student's first year. If a thesis option is chosen, the student must form a thesis committee and submit the M2 Request for Thesis Committee form. The M3 Report of Master's Examining Committee form is submitted after the thesis or project defense during the final semester.
- 8. Annual Review Requirement of the Graduate School: All graduate students are required to complete the Annual Review Requirement by updating their information in the Graduate Student Progress System. The CS department requires that this report be approved online by the student's faculty advisor, and a printed copy attached to each M form before being signed by the CS Director of Graduate Studies.

PhD in Computer Science

All students completing a PhD degree must fulfill the following minimum requirements:

- Complete all of the computer science (CS) course work requirements
 of the Master's degree in CS or have an MS degree in CS from
 another institution. The required 15 hours at the 8000- level must
 be regular CS courses, excluding Research or Problems courses.
 The student must maintain an overall GPA of at least 3.4/4.0 in
 their graduate level course work (excluding Research and Problems
 courses).
- Pass a qualifying examination* to be admitted to candidacy in the CS PhD program within three years of program enrollment.
- Earn a minimum of 72 credit hours of course work and research past the student's Bachelor's degree.
- 4. Pass a comprehensive examination covering their areas of expertise within five years of program enrollment.
- Complete a doctoral dissertation on a topic approved by the candidate's advisory committee.
- 6. Defend the dissertation in a final oral examination.
- Have at least one journal paper submitted, accepted or published, as approved by the advisor.

- Present on a research topic as part of the CS Seminar Series at some point between passing the qualifying exam and the dissertation defense. This policy is effective for entering PhD students in Spring 2013 and after.
- 9. Seminar Attendance: The approval of the D4 form is tied to the attendance records for the department's seminar series. PhD students are required to attend a total of at least twenty EECS Seminar Series presentations. Master's students who add the PhD program can apply their seminar attendance as part of their Master's program toward the attendance requirement for doctoral students.
- 10. D Forms: After the successful completion of the Qualifying Examination, the D1 Qualifying Exam Results and Doctoral Committee Approval form should be submitted to the Graduate School, followed by the D2 Plan of Study for the Doctoral Degree form. The D3 form Doctoral Comprehensive Examination Results is submitted when the student has completed the Comprehensive Exam. Graduate School policy requires the completion of the Comprehensive Exam within five years of starting the PhD program. At least seven months must pass between the Comp Exam and the dissertation defense, which is followed by submission of the D4 Dissertation Defense form.
- 11. Annual Review Requirement of the Graduate School: All graduate students are required to complete the Annual Review Requirement by updating their information in the Graduate Student Progress System. The Department requires that this report be approved online by the student's faculty advisor and a printed copy attached to each D form before being signed by the CS Director of Graduate Studies.

*Students cannot take CMP_SC 9990 before passing the PhD qualifying exam. Pre-Qual students should take CMP_SC 8990 for Research credit.

Electrical and Computer Engineering

NairS@missouri.edu

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security

to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 40+ faculty members, not including instructors, teaching professors, and emeriti.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electricalengineering-computer-science/bachelor-science-computer-engineeringbs) and Bachelor of Science in Electrical Engineering (BS EE) (https:// engineering.missouri.edu/departments/electrical-engineering-computerscience/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively. Not to mention majors and minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience: systems biology: eldercare technology: computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnolwogy; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems: nano and microelectromechanical systems: bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics).

At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

with options for dual masters and Masters in Engineering (ME) -- i.e. coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Computer Engineering, Electrical Engineering, Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized CoE and EE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often multidisciplinary in nature spanning interdepartmental and crosscollege research. The aim is to produce professionals who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department's graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students' individual interests. Additionally, members of the ECEP are among the leading faculty in University's Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

Summary

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering)
- Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- · mobile video communication;
- · wireless and digital communications;
- · satellite remote sensing;
- · geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- · computer vision;
- robotic vision;
- · robotic assistive technology;
- · human/robot interaction;
- landmine detection;
- · pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- · photonics;
- · accelerators and beams;
- · antennas and radar systems;
- · nano and microelectromechanical systems;
- bioMEMS;
- · heterostructure and microfabrication;

- · feedback and control systems;
- · parallel processing;
- · computer architecture;
- · autonomous systems;
- · real-time embedded architectures;
- high performance computing;
- · sensor networks; and
- · human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

- · Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- · Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Undergraduate Program Office W1002 Thomas & Nell Lafferre Hall (573) 882-2648

beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either disciple and prepares them for beginning practice in both the traditional and emerging

fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

See Electrical Engineering (p. 543) and Computer Engineering (p. 522) for details on the undergraduate degree programs.

Graduate

• PhD in Electrical and Computer Engineering (p. 538)

201 Naka Hall Columbia, MO 65211 Phone: (573) 882-4436

Email: umcengrecegradoff@missouri.edu http://engineering.missouri.edu/ece/

Director of Graduate Studies: Gui N. DeSouza

325 Naka Hall Columbia, MO 65211 Phone: (573) 882-5579

Email: DeSouzaG@missouri.edu http://engineering.missouri.edu/ece/

The Department also offers an MS in Computer Engineering (p. 527), an MS in Electrical Engineering (p. 548), and the College offers an interdepartmental ME in Engineering with a focus in Computer and Electrical Engineering (p. 550).

Research Areas

The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- · Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- · Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Specific Topics of Study

- · mobile video communication:
- · wireless and digital communications;
- · satellite remote sensing;
- · geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- · eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- · computer vision;
- robotic vision;
- · robotic assistive technology;
- human/robot interaction;
- · landmine detection;

- · pulsed power and plasma technology;
- · nuclear and renewable energy systems;
- · semiconductor devices;
- photonics;
- · accelerators and beams;
- · antennas and radar systems;
- · nano and microelectromechanical systems;
- · bioMEMS;
- · heterostructure and microfabrication;
- · feedback and control systems;
- · parallel processing;
- · computer architecture;
- · autonomous systems;
- · real-time embedded architectures;
- · high performance computing;
- · sensor networks; and
- · human-computer interfaces.

Admission Requirements for the PhD Program in ECE

- · GPA from BS or MS
- · GRE: Quantitative, Verbal and Analytic scores.
- · International students:
 - · Computer-based TOEFL, or
 - Paper-based TOEFL, or
 - Internet-based TOEFL, or
 - IELTS exam
- · 3 letters of recommendation
- · Statement of purpose
- Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU's Institutional Code for the GRE and TOEFL is: 6875.)

The three letters of recommendation should be from persons familiar with the applicant's engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender's institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person's institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look 'unofficial' will be disregarded.

Students who don't meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant's grade trends, experience and maturity, and to the availability of expertise in areas of the applicant's technical interest.

Outstanding BS students who meet the following requirements may be accepted directly for advisement in the department's doctoral program:

 Holds the equivalent of a BS degree in electrical or computer engineering

- GRE quantitative score of at least the 90th percentile. The Graduate Committee will also consider the Verbal and Analytic scores.
- For international students, a minimum score of 550 on the paper-based TOEFL, 213 on the computer-based TOEFL, 80 on the internet-based TOEFL, or 5.5 on the IELTS exam
- A 3.5 or better grad point average (A=4.0) in their undergraduate studies
- Submission of three letters of recommendation from persons familiar with the applicant's engineering or related work
- · Submission of a written statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical Engineering and Computer Science, 201 Naka Building, Columbia, MO 65211, or via email: UMCengrECEgradoff@missouri.edu

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of "Teaching Fellows" are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

PhD in Electrical and Computer Engineering

Admission Contact Information

349 Engineering Building West Columbia, MO 65211 (573) 882-4436

Email: umcengrecegradoff@missouri.edu

The ECE department offers the Doctor of Philosophy in Electrical and Computer Engineering.

Admission Criteria for the PhD Electrical or Computer Engineering

Deadline for Fall entrance: February 15 Deadline for Spring entrance: September 1

- Minimum GPA: 3.5 (with A = 4.0) in the last 60 hours of the MS graded coursework
- · Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1,	will be	90th percentile	will be
2011	considered		considered
On or After	will be	90th percentile	will be
August 1, 2011	considered		considered

International applicants only:

• Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

• Minimum Academic IELTS scores:

Item	Score
Listening	5.5
Reading	5.5
Writing	5.5
Speaking	5.5

 Holds the equivalent of a BS degree in electrical or computer engineering with an outstanding record, or holds the equivalent of an MS degree in electrical or computer engineering

Consideration in doctoral program admissions is given to the applicant's grade trends, experience and maturity, and to the availability of expertise in areas of the applicant's technical interest.

Required Application Materials

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Graduate School, 210 Jesse Hall, Columbia, MO 65211.

To the Office of Graduate Studies:

Official Transcripts. The mailing address is: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri-Columbia. MU's Institutional Code is 6875 (no departmental code is necessary).

To be accepted outright by the director of graduate studies (DGS), the student needs to have an MS degree in either Electrical Engineering or Computer Engineering.

Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted into the PhD program by the Graduate Program Committee (GPC).

Students who don't meet the above requirements may still be admitted by the GPC if there are mitigating factors. Consideration in doctoral program admissions is given to the applicant's grade trends, experience and maturity, and to the availability of expertise in areas of the applicant's technical interest.

Outstanding BS students who meet the following requirements may be accepted directly for advisement in the department's doctoral program:

- Holds the equivalent of a BS degree in electrical or computer engineering
- · GRE quantitative score of at least the 90th percentile
- TOEFL score of at least 550 paper-based. IELTS score: 5.5
- A 3.5 or better grad point average (A=4.0) in their undergraduate studies
- Submission of three letters of recommendation from persons familiar with the applicant's engineering or related work
- · Submission of a statement of research interests

Additional information can be obtained from the Graduate Division of the Department of Electrical and Computer Engineering, 349 Engineering Building West, Columbia, MO 65211, or via email: umcengrecegradoff@missouri.edu

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student's advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Transfer of Credit

The doctoral committee may recommend up to 30 hours of post-baccalaureate graduate credit from an accredited university be transferred toward the total hours required for the doctoral degree. It is the responsibility of the doctoral committee to determine the appropriateness of coursework for transfer credit. All requests for exceptions to this policy must be approved by the Office of Graduate Studies. This policy applies to students who begin their enrollment during the Fall Term 2006 and subsequent semesters.

(Note: The preceding represents a change in policy and becomes effective for graduate students beginning their doctoral programs during the Fall semester 2006. For students who began their doctoral programs prior to the fall 2006 semester, consult the appropriate catalog or the Office of Graduate Studies for policies pertaining to transfer of credit.)

The committee may recommend that courses taken through MU's Extension division be counted toward the credit hour requirement. Extension or correspondence course work from institutions other than MU may not be used to meet the total hours required for the doctoral degree.

Time Limits on Transfer Credits

All courses to be applied to the plan of study must be completed within 8 years of filing the plan.

Requirements to obtain the PhD degree in Electrical Engineering and Computer Engineering

- The student must be qualified to be a PhD candidate.
 Students admitted with an MS degree must prove competency in a written qualifying examination conducted by a PhD qualifying committee within 3 semesters of admission.
 - Students admitted directly from a BS degree program must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within 4 semesters after this requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.
- 2. A minimum of 72 semester hours beyond the BS are required by the Graduate School; the student's doctoral program committee sets the total number of credit hours and specific courses to be completed as part of his/her PhD program. However, the Graduate School requires a minimum of 15 hours of 8000/9000 level classes to be taken at MU exclusive of research, problems, and supervised study.
- The candidate must pass a written and oral comprehensive examination.
- The student must complete a doctoral dissertation on a topic approved by his or her Doctoral Advisory Committee and defend the dissertation in an oral final examination.

These PhD requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE PhD requirements that were in effect for their MU ECE graduate admission semester.

Selection of an Advisor

The student selects an advisor or co-advisors, by mutual consent, from doctoral faculty members who are dissertation supervisors in the department or area program in which the major work is planned. In the event that an advisor retires or leaves MU, he/she may continue to serve as a student's advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the director of graduate studies, will assist to ensure that a replacement is found.

Doctoral Degree Forms

By the end of the second semester of study at MU, a student should begin submitting degree program forms which will aid the academic program and the Graduate School in tracking the student's progress toward degree completion. These forms include the following:

D1 Qualifying Exam Results & Doctoral Committee Approval (http://gradstudies.missouri.edu/forms-downloads/repository/d1.pdf)
 Submitted after passing qualifying exams

- D2 Plan of Study Form (http://gradstudies.missouri.edu/forms-downloads/repository/d2.pdf)
 - Submitted no later than the end of the student's third semester.
- D3 Result of the Comprehensive Examination (http:// gradstudies.missouri.edu/forms-downloads/repository/d3.pdf)
 Submitted to the Graduate School within one month of exam completion
- D4 Report of the Doctoral Dissertation Defense (http:// gradstudies.missouri.edu/forms-downloads/repository/d4.pdf)
 Submitted by the Graduate School deadline for the semester in which the students plan to graduate.
- Change of Committee (http://gradstudies.missouri.edu/formsdownloads/repository/cocform.pdf)
- Plan of Study Course Substitution Form (http:// gradstudies.missouri.edu/forms-downloads/repository/subform.pdf)

More information is available at: http://gradstudies.missouri.edu/academics/graduation-requirements/doctoral-grad-requirements.php

Qualifying Examination/Process

To be officially admitted to the PhD program, the student must pass a qualifying examination/process. The student is given two opportunities to pass the Qualifying Examination with a score of 70% or above.

Qualifying Exam Rules

- 1. To be eligible to take the Qualifying Examination, graduate students must be accepted for advisement in the Ph.D. program. The examination must be passed before the end of his or her second year of advisement as a Ph.D. student. Each student may take the exam twice. Students who have been accepted into the PhD program with a BS degree must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD qualifying examination process, to be passed within two years after the requirement is satisfied, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with the MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.
- 2. All eligible students who intend to take the exam must complete the REQUEST FOR QUALIFYING EXAMINATION form and submit it to the ECE Graduate Office within four weeks after the start of the semester. At this time the student will be asked to select two of the seven topic areas over which he or she wishes to be examined. Only students on the approved lists will be allowed to take the exam. When a student submits the REQUEST FOR QUALIFYING EXAMINATION form, the Graduate Office will provide:
 - a. The date, time and place of the examination;
 - b. A reminder to bring their ID card to the exam.
 - c. A copy of the Qualifying Examination Rules.
 - d. A copy of the Guidelines For Qualifying Exam Committee.
- 3. The examination shall be prepared and administered during the 12th week of both the fall and winter semesters by the Qualifying Examination (QE) Committee. The ECE Graduate Committee currently serves as the QE Committee since it contains a representative from each of the 6 focus areas in the department. The Graduate Director will select the specific date, time and place of the exam at the beginning of each semester.

- It shall be a written examination taken by all students desiring to qualify during the given semester.
- 5. The exam will contain five questions from each of the two areas selected by the student. Each student must select and answer five questions from this set, with no more than three questions from one area. The exam will be closed book, with two standard pages of notes, front and back, allowed. A book of mathematical tables will be provided by the department. The exam will last four hours.
- The QE committee shall administer the examination and identify passing candidates. The ECE faculty as a whole have the responsibility to approve that action.

Qualifying Examination Guidelines

These guidelines have been prepared to help maintain consistency in the form and difficulty of the Department's qualifying examination.

- 1. The QE Committee shall consist of one faculty representative from each of the following topic areas, except Foundations:
 - a. Communications and Signal Processing Area;
 - b. Intelligent Systems Area;
 - c. Physical and Power Electronics Area;
 - d. System Modeling and Control;
 - e. Micro/Nano Electronics;
 - f. Digital/Computer Systems; and
 - g. Applied Physics
 - h. Foundations
- The ECE graduate Committee serves as the QE Committee since it contains a representative from each research area. The ECE department chair appoints the Graduate Committee with input from the Graduate Director.
- 3. The faculty from each topic area will be responsible for maintaining a list of topics which constitute the core material an MS graduate should be expected to have mastered. The members of each group will be responsible for preparing questions for the exam covering topics from the list. For the major core focus area, questions will come from 4000/7000 8000 level courses. Questions for the topics in the Foundation area will be from a set of required 3000 level courses.
- 4. The QE Committee will solicit questions from the faculty group, but the Committee will have the responsibility of combining these questions into a fair, comprehensive exam. The QE Committee member for each group will be responsible for coordinating his or her group. The representatives of each topic group shall call a meeting of all faculty from that group for the purpose of reviewing the exam questions to be submitted to the Qualifying Exam Committee. The group's submission must be approved by a majority vote of those present.
- 5. Solutions will be graded by faculty members who prepared the questions. The grading must be completed within two weeks after the exam. A guideline is that each question should be doable by a strong MS graduate in 40 to 45 minutes.
- Solutions will be graded on a 100 point scale with 70 points as a minimum passing grade.
- Each student's performance will be reviewed by the QE Committee and a majority vote of the QE Committee is required for passing.

The QE Committee must report the results of the exam to the ECE Faculty within four weeks of the exam.

Electrical Engineering

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 (http://missouri.edu/about/history/engineering.php) as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with 35 faculty members (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/eecs-faculty), not including instructors, teaching professors, and emeriti.

About the Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in electrical and computer engineering. Students seeking either one of the two undergraduate

degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electricalengineering-computer-science/bachelor-science-computer-engineeringbs) and Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineeringcomputer-science/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively, along with majors and minors in other Colleges. Students have opportunities to gain indepth hands-on knowledge in specialized areas through undergraduate research experience working with faculty. Faculty research areas cover both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep learning, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasma technology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics).

At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering)

with options for dual Masters and the Masters in Engineering (ME) which is coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Electrical Engineering, Computer Engineering, and Computer Science or closely allied fields for further study at the doctoral level or for successful careers as specialized EE and CoE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and

is often multidisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department's graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students' individual interests. Additionally, members of the ECEP are among the leading faculty in University's Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

Summary

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-electrical-engineering)
- Dual Bachelor of Science in Electrical Engineering & Physics (http://engineering.missouri.edu/ece/degree-programs/bs-eep)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-computer-engineering)
- Master of Science in Electrical Engineering (MS) (https:// engineering.missouri.edu/departments/electrical-engineeringcomputer-science/master-science-electrical-engineering)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineeringcomputer-science/phd-electrical-computer-engineering)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- · mobile video communication;
- · wireless and digital communications;
- · satellite remote sensing;
- · geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- · eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- · computer vision;
- · robotic vision;
- · robotic assistive technology;
- · human/robot interaction;
- · landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- · semiconductor devices;
- · photonics;
- · accelerators and beams;
- · antennas and radar systems;
- · nano and microelectromechanical systems;
- · bioMEMS;
- · heterostructure and microfabrication;
- · feedback and control systems;
- · parallel processing;
- · computer architecture;
- · autonomous systems;
- · real-time embedded architectures;
- high performance computing;
- · sensor networks; and
- human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all programs and units in the College of Engineering at the University of Missouri, with over \$5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- · Applied Physics (AP)
- · Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Faculty

Professor R. D. Curry**, C. H. Davis**, J. M. Gahl**, S. Gangopadhyay**, Z. He**, D. K. C. Ho**, N. E. Islam**, J. M. Keller**, S. D. Kovaleski**, J. W. Kwon**, S. Nair**, R. M. O'Connell**, M. A. Prelas**, M. Skubic**

beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either disciple and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program are:

- Graduates will meet or exceed the expectations of their employers
- · Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:

- · Graduates will meet or exceed the expectations of their employers
- · Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Electrical and Computer Engineering (ECE) Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of a least 3.0 receive the designation "Honors Scholar in Engineering" at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

325 Naka Hall Columbia, MO 65211 Phone: (573) 882-5579 Email: DeSouzaG@missouri.edu http://engineering.missouri.edu/ece/

The Department also offers a PhD in Electrical and Computer Engineering (p. 538), and the College of Engineering offers an interdepartmental ME in Engineering with a focus in Computer or Electrical Engineering (p. 550).

Research Areas

The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over \$5 million in expenditures with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- · Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- · Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Specific Topics of Study

- · mobile video communication;
- · wireless and digital communications;
- · satellite remote sensing;
- geospatial image and video processing;
- · computational neuroscience;
- · systems biology;
- · eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep networks, fuzzy systems;
- · computer vision;
- · robotic vision;
- robotic assistive technology;
- · human/robot interaction;
- · landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- · semiconductor devices;
- · photonics;
- · accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- · heterostructure and microfabrication;
- · feedback and control systems;
- · parallel processing;
- · computer architecture;
- · autonomous systems;
- · real-time embedded architectures;
- high performance computing;
- · sensor networks; and
- human-computer interfaces.

Admission Requirements for the MS and ME Programs in EE or CE

- · GPA from BS program
- · GRE: Quantitative, Verbal and Analytic scores.
- · International students:
 - · Computer-based TOEFL, or
 - · Paper-based TOEFL, or
 - · Internet-based TOEFL, or
 - IELTS exam
- 3 letters of recommendation
- · Statement of purpose
- Transcripts

(When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU's Institutional Code for the GRE and TOEFL is: 6875.)

In addition to the Graduate School requirements, the ECE programs have the following additional requirements:

The three letters of recommendation should be from persons familiar with the applicant's engineering or related work. It is required that the recommendation letter use the institutional letterhead or be sent directly from the recommender's institutional e-mail address (not gmail, hotmail, etc.). Similarly, each provided reference must include the person's institutional e-mail address. Any letters of recommendation or listed reference that does not comply with the above or otherwise look 'unofficial' will be disregarded.

To be accepted outright by the Director of Graduate Studies in ECE (DGS-ECE), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements.

Students who meet the academic requirements but have degrees in other Engineering or Science disciplines can be accepted directly into the MS/ ME programs by the Graduate Program Committee in ECE (GPC-ECE). Such students are strongly encouraged to consult with the DGS-ECE or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into

Students who don't meet the above requirements may still be admitted on Probation by the GPC if there are mitigating factors. Students admitted on Probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS/ME program.

Fast Tracking

the department.

In an effort to streamline and accelerate the acquisition of MU graduate degree(s) we establish fast tracking options for our current undergraduate students and our 3+2 students. For MU undergraduate students, the fast track option allows them to become integrated into the research environment of the EECS department early in their career and to earn between 6 and 12 hours of graduate credit as their schedules allow. For these qualified graduate school bound students, we will waive the GRE requirement and give them preference in TA and RA positions. For the 3+2 students who demonstrate excellence in their first semester of ECE

course work at MU, we will waive the GRE and provide up to 12 hours of graduate credit prior to entry into one of the ECE graduate programs. The summary follows.

MU BS students (all relevant majors)

- GPA > 3.0 after junior year
- Waive GRE requirement for admission to ECE graduate programs
- Use 6 hours of 126 for graduate credit (after 90 credit hours have been earned)
- Earn 6 additional hours of graduate credit as schedule allows (after 90 credit hours have been earned)
- Participate in Undergraduate Research at least one semester
- · Participate in Honors Scholars' Program

International or Domestic 3 + 2 students

- GPA from Home institution (last 60 hours) > 3.2
- MU GPA in at least 12 hours of ECE courses >= 3.5
- · Waive GRE requirement for admission
- Take up to 12 hours as dual enrolled student (second semester of first year)

Internal Funding

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of "Teaching Fellows" are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

BSEE in Electrical Engineering

Degree Program Description

The Bachelor of Science in Electrical Engineering allows student to learn about electrical power generation, communication systems, instrumentation, circuit design and microprocessor design. Students have the opportunity to gain hands on experience as well as research experience and the opportunity to to develop new products.

Major Program Requirements

The electrical engineering degree offers course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

Students must complete all university requirements (p. 33), including general education (p. 34), and degree requirements below.

Major core requirements

MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
MATH 2300	Calculus III	3
MATH 4100	Differential Equations	3
STAT 4710	Introduction to Mathematical Statistics	3
PHYSCS 2750	University Physics I	5
PHYSCS 2760	University Physics II	5
CHEM 1320	College Chemistry I	4
ENGLSH 1000	Exposition and Argumentation	3
Select two of the following:		6
ENGINR 1200	Statics and Elementary Strength of Materials	
ENGINR 2300	Engineering Thermodynamics	
IMSE 2710	Engineering Economic Analysis	
Economics Elective		
Select one of the following:		3
ECONOM 1014	Principles of Microeconomics	
ECONOM 1015	Principles of Macroeconomics	
ECONOM 1024	Fundamentals of Microeconomics	
Constitutional Elective		
Select one of the following:		3
HIST 1100	Survey of American History to 1865	
HIST 1200	Survey of American History Since 1865	
HIST 1400	American History	
HIST 2210	Twentieth Century America	
HIST 2440	History of Missouri	
HIST 4000	Age of Jefferson	
HIST 4220	U.S. Society Between the Wars 1918-1945	
HIST 4230	Our Times: United States Since 1945	
POL_SC 1100	American Government	
POL_SC 2100	State Government	
Humanities/Fine Arts course	S	9
Social Science/Behavioral S	cience courses	3
Other major core requirem	ent courses:	
ENGINR 1000	Introduction to Engineering	1
CMP_SC 1050	Algorithm Design and Programming I	4
ECE 2100	Circuit Theory I	4
ECE 2210	Introduction to Logic Systems	3
ECE 3110	Electrical and Computer Engineering Projects	3
ECE 3210	Microprocessor Engineering for Electrical Engineers	4
ECE 3810	Circuit Theory II	4
ECE 3830	Signals and Linear Systems	3

ECE 3410	Electronic Circuits and Signals I	4
ECE 3510	Electromagnetic Fields	3
ECE 3610	Semiconductors and Devices	3
ECE 4970	Senior Capstone Design	3
Electives		
ECE or CMP_SC 3000+ Elective		12
ECE 4000+ Technical Elective		9
ECE 4000+ Senior Lecture/Lab		4
Any Elective		2

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

available.		
First Year		
Fall	CR Spring	CR
CMP_SC 1050	4 ECE 2210	3
CHEM 1320	4 Constitutional Elective	3
MATH 1500	5 ENGLSH 1000	3
ENGINR 1000	1 MATH 1700	5
Economics Elective	3 Humanities/Fine Arts Elective	3
	17	17

Double Major

Electrical Engineering and Computer Engineering

Many students in the EECS department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

Major Program Requirements

Constitutional Elective Select one of the following:

		_
HIST 1100	Survey of American History to 1865	
HIST 1200	Survey of American History Since 1865	
HIST 1400	American History	
HIST 2210	Twentieth Century America	
HIST 2440	History of Missouri	
HIST 4000	Age of Jefferson	
HIST 4220	U.S. Society Between the Wars 1918-1945	
HIST 4230	Our Times: United States Since 1945	
POL_SC 1100	American Government	
POL_SC 2100	State Government	
Humanities/Fine Arts courses	S	9
Social Science/Behavioral Science	cience courses	3
Select two of the following:		6
ENGINR 1200	Statics and Elementary Strength of Materials	
ENGINR 2300	Engineering Thermodynamics	
IMSE 2710	Engineering Economic Analysis	
Other major core requirem	ent courses:	
MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
MATH 2300	Calculus III	3
MATH 2320	Discrete Mathematical Structures	3
MATH 4100	Differential Equations	3
STAT 4710	Introduction to Mathematical Statistics	3
PHYSCS 2750	University Physics I	5
PHYSCS 2760	University Physics II	5
CHEM 1320	College Chemistry I	4
ENGLSH 1000	Exposition and Argumentation	3

MS in Electrical Engineering

Master of Science in Electrical or Computer Engineering (MS)

Admission

349 Engineering Building West, Columbia, MO 65211

Phone: (573) 882-4436

Email: umcengrecegradoff@missouri.edu http://engineering.missouri.edu/ece/

Admission Criteria

Fall deadline: February 15 Spring deadline: September 1

Note: Applications received after these deadlines will be evaluated as

time allows.

• Minimum GPA: 3.0 for the last 60 hours

• Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	will be considered	80th percentile	will be considered
On or After August 1, 2011	will be considered	80th percentile	will be considered

International applicants only:

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

• Minimum Academic IELTS scores:

Item	Score
Listening	5.5
Reading	5.5
Writing	5.5
Speaking	5.5

Required Application Materials:

- Statement of Purpose (upload to the Supplemental information section of the application)
- Copies of your official transcripts (upload to the Educational History section of the application)
- Copies of your GRE scores (upload to the Test Information section of the application)
- Copies of your TOEFL or IELTS Scores (for non-native English speakers only) (upload to the Test Information section of the application)
- 3 letters of Recommendation (the department accepts electronic recommendations – in the recommendation section of the online

application, enter the information for three recommenders. Each recommender will receive an email with instructions on how to complete the recommendation). The department does also accept hard copy letters of recommendation. The letters may be mailed to: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

To the Office of Graduate Studies:

Official Transcripts. The mailing address is: Office of Graduate Studies, 210 Jesse Hall, Columbia, MO 65211.

Note: when registering for GRE or TOEFL exams, be sure to designate your program of interest at the University of Missouri – Columbia. MU's Institutional Code is 6875 (no departmental code is necessary).

Admissions Criteria for the MS in Electrical or Computer Engineering

To be accepted outright by the director of graduate studies (DGS), the student needs to have a BS degree in either Electrical Engineering or Computer Engineering in addition to meeting the above requirements. Students who meet the academic requirements but have degrees in other engineering or science disciplines can be accepted directly into the MS program by the graduate program committee (GPC). Such students are strongly encouraged to consult with the DGS or their advisor about appropriate bridge courses. Based on individual circumstances, students may be advised to register as an undeclared graduate student to fill in background course work prior to admission into the department.

Students who do not meet the above requirements may still be admitted on probation by the GPC if there are mitigating factors. Students admitted on probation must receive at least a 3.0 GPA for the first 12 hours of graded graduate coursework completed in their first two semesters. Failure to achieve this GPA will result in expulsion from the ECE MS program.

Appeal Process

All students have the right to a timely formal appeal to the GPC. Upon receipt of an admission decision or disciplinary action, the student has 10 working days in which to request a formal appeal. The DGS will convene a meeting of the GPC, the student, and the student's advocate (if appropriate) within 10 working days of receiving the request. The decision of the GPC at the hearing is final.

Degree Requirements

To fulfill the requirements for the MS degree, the following rules apply:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master's degree.

- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- At least one course from each of three different emphasis areas must be taken; a minimum of two of the emphasis areas must be in Electrical and Computer Engineering. (Each ECE graduate course is designated to an emphasis area. Contact the ECE graduate office for a current list).
- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master's thesis or a master's Report.
- The student's cumulative GPA must be at least 3.0 to graduate.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project. These MS requirements apply to ECE graduate students first enrolled in MU ECE in the Fall semester 2007 or later. UM ECE graduate students enrolled prior to Fall semester 2007 may choose to follow the MU ECE MS requirements that were in effect for their MU ECE graduate admission semester.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of "C" in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student's academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor's assistance, completes the Program of Study form that outlines the plan of study for the student's graduate program. M1 - Program of Study form

The form is forwarded through the DGS to the Office of Graduate Studiesl for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student's main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

The Program of Study form must be filed with the Office of Graduate Studies by the end of the student's second semester of enrollment. Upon approval of the program by the Office of Graduate Studies, the student is a candidate for the degree. If changes must be made on a student's Program of Study form, a Program of Study Substitution form is used.

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Office of Graduate Studies by the end of the student's second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Office of Graduate Studies to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person's curriculum vitae. The Office of Graduate Studies maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Office of Graduate Studies to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student's Problem Committee. It is not required that a member outside of ECE be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in ECE. Students need to supply committee members with copies for review /evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee. A final copy of the problem report must be filed with the ECE graduate office.

Report of the Master's Examining Committee

The purpose of the M-3 Report of the Master's Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student's committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Office of Graduate Studies by a deadline for the semester in which the students plan to graduate. For a report option, the 3rd reader of the committee may be from the student's department. The form is due in the Office of Graduate Studies two weeks prior to graduation.

Engineering

Programs in Engineering are multi-department programs, and administered by the College of Engineering. Requirements are determined based on the specific area of interest. Options include a minor at the undergraduate level, and a master's degree at the graduate level.

College of Engineering W1024 Lafferre Hall Columbia, MO 65211 http://engineering.missouri.edu

Faculty

Please see the appropriate degree program pages for faculty information.

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Engineering (p. 550)

Graduate

• ME in Engineering (p. 550)

The College of Engineering offers the Master of Engineering degree for graduate students interested in a terminal master's degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in a specific focus area within engineering.

Several departments in the College of Engineering administers an ME degree focusing in that area.

Note: A focus area is not listed on the MU transcript. Hence the transcript and the diploma for any student completing an ME degree will only indicate Master of Engineering, with no designation of any specific department.

Minor in Engineering

The minor in engineering is designed for students majoring in disciplines such as physics, math, chemistry and computer science, but it is available to students in all disciplines. It consists of 18 or 19 hours of engineering courses as listed below.

Required Courses

ENGINR 1000	Introduction to Engineering	1
ENGINR 1100	Engineering Graphics Fundamentals	2
ENGINR 1200	Statics and Elementary Strength of Materials	3
ENGINR 2100	Circuit Theory for Engineers	3
ENGINR 2300	Engineering Thermodynamics	3
INFOTC 1040	Introduction to Problem Solving and Programming	3
CMP_SC 1050	Algorithm Design and Programming I	4
Engineering Elective - c	hoose from the list below:	3-4
BIOL_EN 2180	Engineering Analysis of Bioprocesses	3
CH_ENG 2118	Introduction to Energy Technology and Sustainability	3
CH_ENG 2225	Mass and Energy Balance	3
CV_ENG 3100	Fundamentals of Transportation Engineering	4
CV_ENG 3200	Fundamentals of Environmental Engineering	4
CV_ENG 3700	Fluid Mechanics	3
CV_ENG 4250	Environmental Regulatory Compliance	3
CV_ENG 4500	Introduction to Construction Management	3
ENGINR 2200	Intermediate Strength of Materials	3

ECE 2210	Introduction to Logic Systems	3
IMSE 2030	Fundamentals of Systems Design and Analysis	3
IMSE 2110	Probability and Statistics for Engineers	3
IMSE 2210	Linear Algebra for Engineers	3
IMSE 2710	Engineering Economic Analysis	3
MAE 2600	Dynamics	3

ME in Engineering

NOTE: Focus areas do not appear on diplomas or transcripts.

ME with a focus in Biological Engineering

Recognizing the immense promise of bioengineering and the unique position of MU for a strong bioengineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces to form the Department of Biological Engineering (BE). BE unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering. Biological Engineering confers both masters and doctoral degrees to students who satisfy the general requirements of the Graduate School and the specific requirements for the masters degree and the doctoral degree of the Department of Biological Engineering.

ME with a focus in either Electrical or Computer Engineering

The ME degree is designed for entering master students interested in a terminal master's degree, who have a demonstrated need for a professional, non research degree in engineering, and have a academic interest in the department. Please note that the official University transcript and diploma will only indicate Master of Engineering, with no designation of the focus area. The entrance requirements for the ME degree/Electrical and Computer Engineering Focus are the same as for the MS in Electrical Engineering and MS in Computer Engineering. Note: When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU's Institutional Code for the GRE and TOEFL is: 6875.

ME with a focus in Industrial and Manufacturing Systems Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. Of these 36 credits, 21 must be at the 8000 level and the rest at 7000 or above level.

ME Entrance requirements

- GPA of 3.0 on 4.0 scale in the last 60 hours of the BS program
- Minimum GRE scores may vary according to area.

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1,	will be	80th percentile	will be
2011	considered		considered
On or After	will be	80th percentile	will be
August 1, 2011	considered		considered

· Minimum TOEFL scores (international applicants only):

Internet-based test (iBT)	Paper-based test (PBT)
80	550

• Minimum Academic IELTS scores 6.5 with no section below 6.0

Item	Score
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

- 3 letters of recommendation
- · statement of purpose
- · transcripts

When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri - Columbia and your program of interest as locations to receive the scores. MU's institutional code for the GRE and TOEFL is 6875.

Graduation Requirements

An ME student must complete a minimum of 36 credit hours of graduate course work. At least 15 hours must be in 8000+ level courses and a minimum of 21 hours must be from the College of Engineering. The student must maintain at least a 3.0 cumulative gpa and complete the program in eight years. A project may be required by the advisor. For additional degree requirements based on the focus area, students should consult with the specific College of Engineering Department.

How to Apply

Applicants must concurrently apply to the MU Office of Graduate Studies and the engineering department offering the focus area interest.

Industrial Engineering

Luis G. Occeña, Chair College of Engineering E3437 Lafferre Hall (573) 882-2691

https://engineering.missouri.edu/departments/industrial-manufacturing-systems/

Industrial and Manufacturing Systems Engineering builds on a foundation of science, mathematics, computing and data analytics in order to address a wide range of issues in the socio-technical system (complex combinations of people and technology) and environmental (sustainability) domains. With this unique blend of skills, industrial engineering bring optimization-based approaches to a variety of problems in manufacturing, healthcare, supply chain / logistics, sustainability and service organizations.

Industrial engineers in manufacturing organizations address many issues including designing workplaces, considering both the capabilities of machines and humans. They may design computer-integrated manufacturing systems that include automation and robotics. They may also control production, optimize inventory, design quality systems, evaluate new product proposals and build new or improved production facilities.

Industrial engineers working in the supply chain / logistics domain address issues ranging from supplier selection, demand forecasting, inventory systems, facility location, distribution network design, and transportation.

Industrial engineers are also involved in sustainable systems design where they seek to minimize environmental impact while cost-effectively delivering the goods and services demanded by humanity. Issues addressed range from optimizing the environmental performance of an individual product to quantitatively assessing the performance of energy systems.

Industrial engineering skills are used to design better healthcare delivery where they increase the efficiency of the healthcare system. They also work to reduce errors in a wide range of human-centered systems with expertise from data-driven science and ergonomics.

Finally, industrial engineering skills can help facilitate the judicial process, provide faster and more accurate mail distribution, and optimize airline routing and reservation methods. In summary, the industrial engineer may be involved in the design and operation of a range of systems that provide services at a cost that society can afford at the quality that is required.

The MU IMSE department offers the ABET-accredited Bachelor of Science degree with a major in Industrial Engineering (BSIE), and 5 year Industrial Engineering BSIE/MS and BSIE/MBA programs. At the graduate level, the department offers the Master of Science in Industrial Engineering (MSIE) and the Doctor of Philosophy in Industrial Engineering (PhD IE) degrees. The department also offers students the opportunity to obtain Lean Six Sigma Green Belt certification or Global Supply Chain Management certification.

Faculty

Professor C. M. Klein**, J. S. Noble**, B. Wu** Associate Professor L. G. Occeña**

Assistant Professor C. Costello**, J. H. Kim**, R. G. McGarvey**, S. Rajendran*, K. Seo*, S. Srinivas*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSIE in Industrial Engineering (p. 553)

Advising Contact

James S. Noble, Director of Undergraduate Studies

Scholarship Information Contact

Luis G. Occeña

Industrial engineering undergraduates complete a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling.

They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic, integrated, and optimal solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals. Lastly, the curriculum introduces the student to ethical and professional issues in engineering practice.

Industrial engineering design experiences are integrated throughout the curriculum, most often in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

Program Educational Objectives

The IE Program educational objectives have been developed to address the needs of our constituencies and to be consistent with the University of Missouri mission. Within 3-5 years of graduation from the industrial engineering program in the Industrial and Manufacturing Systems Engineering Department at the University of Missouri:

- Graduates will create value for their employers, demonstrating entrepreneurial initiative, and make contributions that benefit society.
- Graduates will expand their capabilities through professional development and advanced education.
- Graduates will provide leadership and be agents of change in their profession and/or communities.

The objectives are based on a few key concepts: value, entrepreneurial initiative, expanding capability, leadership, and being agents of change.

"Value" creation is defined as what a graduate's employer requires in order to achieve its stated objectives. The IMSE graduate adds value to the organization by taking entrepreneurial initiative that contributes to the greater good of society. Graduates face an environment where technology is advancing at an ever increasing pace, therefore, they will need to expand their knowledge and capabilities through professional development and advanced education. Due to their systems view of the enterprise, industrial engineers are often called upon to provide leadership within an enterprise and, as such, are required to manage the change that is inherent in today's dynamic environment.

Student Outcomes

Student outcomes (SO) are defined as the abilities the department's BSIE graduates will have upon graduation that will enable them to achieve the program's educational objectives. The student objectives reflect the assimilation of what has been taught in the curriculum upon completion of the undergraduate education.

All MU BSIE graduates should have:

- (a) an ability to apply knowledge of mathematics, science and engineering
- (b) an ability to design and conduct experiments, as well as to analyze and interpret data
- (c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental,

social, political, ethical, health and safety, manufacturability and sustainability

- (d) an ability to function on multidisciplinary teams
- (e) an ability to identify, formulate, and solve engineering problems
- (f) an understanding of professional and ethical responsibility
- (g) an ability to communicate effectively
- (h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- (i) a recognition of the need for, and an ability to engage in life-long learning
- (j) a knowledge of contemporary issues
- (k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

In summary, graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) will possess a strong foundation upon which they can grow professionally, and continue to build a focused set of fundamental and engineering knowledge and skills that are integrated and applicable to real-world problems in any enterprise setting.

Accreditation

The University of Missouri program in industrial engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET.

IMSE Honors Program

The IMSE Honors Program follows the regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 3 to 6 credits of IMSE 4995 Undergraduate Research Industrial Engineering - Honors. The academic credit for the honors project (3-6 credits in IMSE 4995 replaces an equivalent number of credits of IMSE or Technical electives. The project is conducted under the direction of an IMSE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and a second reader. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

Academic Qualifications for the Honors Program

Honors students must maintain and graduate with a 3.0 overall GPA. In the case of a transfer student, their transferred credit plus their MU credit will average 3.0/4.0. Students must have a minimum of 60 credit hours.

Lean Six Sigma Green Belt Certification

IMSE students have the opportunity to obtain a Lean Six Sigma Green Belt certification either during their degree program or after. Certification requires students to obtain a GPA average of 2.5 or better in IMSE 4110, IMSE 4310, and IMSE 4610, then they must successfully complete IMSE 4385 - Lean Six Sigma Green Belt Project (a 1 credit hour course where DMAIC is used to improve a process within an organization).

Graduate

- MS in Industrial Engineering (p. 554)
- PhD in Industrial Engineering (p. 555)

Industrial & Manufacturing Systems Engineering Graduate Programs College of Engineering E3437 Lafferre Hall

(573) 882-2691

http://engineering.missouri.edu/imse/

Interim Director of Graduate Studies: Luis G. Occeña

About IMSE

The graduate program in industrial engineering provides a scholarly environment in which highly qualified, creative students may obtain the knowledge and develop the skills necessary to solve complex industrial, governmental and societal system design problems. These systems are required to operate within increasingly complex constraints, thus requiring the use of sophisticated and creative designs. The industrial engineer responsible for such designs must be capable of applying a broad spectrum of scientific tools if the most effective systems are to be obtained.

Our master of science program is designed to provide a basic understanding of these tools and experience in the application of these tools in the design process. The doctor of philosophy program is designed to provide the specialized knowledge and skills necessary to develop new tools or methods for solving complex systems design problems. Information on engineering licensure is detailed under Professional Engineering Registration.

General Admission Guidelines

Acceptance for advisement in the department's graduate programs is available to students with an ABET accredited undergraduate engineering degree. Engineering graduates who have not taken linear programming, linear algebra, statistical quality control or engineering economic analysis must complete 12 hours of additional course work before graduation.

Students with baccalaureate degrees in mathematics, physics, chemistry or computer science may be accepted if they have completed 13 hours of calculus, three hours of differential equations and six hours of calculusbased probability and statistics. Several factors are considered in evaluating an applicant's capability, such as overall GPA, grade trends and major area grades. In addition, each applicant is required to take the general test of the GRE and international students must take the TOEFL and TWE, or IELTS.

Facilities and Resources

Laboratory facilities in several major application areas, both within the department and in the college, support the academic program. Neighboring industries, city, county and state government agencies, local hospitals and nearby large metropolitan centers provide a reservoir of research and design opportunities.

Computing and Reference Materials

The department has access to the University of Missouri System computing network and maintains its own computing facilities for student use. Besides Ellis Library facilities, an excellent collection of mathematical, statistical and engineering books and reference

materials are housed in the engineering library and the industrial and manufacturing systems engineering departmental library.

Funding

Fellowships, scholarships and teaching and research assistantships are available to qualified graduate students. These forms of financial assistance are supported by funds made available through state, federal and industrial graduate support programs and through research grants from various industrial and governmental agencies

BSIE in Industrial Engineering

Degree Program Description

The Bachelor of Science in Industrial Engineering has a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling. They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design.

Major Program Requirements

Students earning a Bachelor of Science in Industrial Engineering are required to complete all University general education (http://catalog.missouri.edu/academicdegreerequirements/ generaleducationrequirements), University undergraduate requirements (http://catalog.missouri.edu/academicdegreerequirements/ universityrequirements), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Over half of the course work for the degree is completed in ENGR/IMSE or professionally related courses.

Major Core Requirements

MATH 1500	Analytic Coometry and Calculus I	5
	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
MATH 2300	Calculus III	3
MATH 4100	Differential Equations	3
CHEM 1320	College Chemistry I	4
PHYSCS 2750	University Physics I	5
PHYSCS 2760	University Physics II	5
CMP_SC 1050	Algorithm Design and Programming I	4
ENGINR 1100	Engineering Graphics Fundamentals	2
ENGINR 1200	Statics and Elementary Strength of Materials	3
ENGINR 2200	Intermediate Strength of Materials	3
IMSE 1000	Introduction to Industrial Engineering	1
IMSE 2030	Fundamentals of Systems Design and Analysis	3
IMSE 2210	Linear Algebra for Engineers	3
IMSE 2710	Engineering Economic Analysis	3
IMSE 3110	Probability Models for Engineers	3

IMSE 3810W	Ergonomics and Workstation Design - Writing Intensive	3
IMSE 4110	Engineering Statistics	3
IMSE 4210	Linear Optimization	3
IMSE 4230	Operations Research Models	3
IMSE 4280	Systems Simulation	3
IMSE 4310	Integrated Production Systems Design	3
IMSE 4350	Production and Operations Analysis	3
IMSE 4410	Management Information Systems Design	3
IMSE 4550	Computer Aided Design and Manufacturing	4
IMSE 4610	Engineering Quality Control	3
IMSE 4970W	Capstone Design I - Writing Intensive	1
IMSE 4980W	Capstone Design II - Writing Intensive	3
IMSE electives		6
Choose from the following:		6
IMSE 3030	Manufacturing and Supply Systems	3
IMSE 4001	Topics in Industrial and Manufacturing Systems Engineering	3
IMSE 4085	Problems in Industrial Engineering	1-3
IMSE 4220	Optimization Modeling and Computational Methods	3
IMSE 4330	Material Flow and Logistics System Design	3
IMSE 4360	Supply Chain Engineering	3
IMSE 4370	Service Systems Engineering and Management	3
IMSE 4380	Six Sigma Methodology	3
IMSE 4420	Web-Based Information Systems	3
IMSE 4560	Introduction to Rapid Prototyping	3
IMSE 4570	Computer Integrated Manufacturing Control	3
IMSE 4580	Industrial Energy Efficiency and Management	3
IMSE 4720	Introduction to Life Cycle Analysis	3
IMSE 4750	Entrepreneurial Innovation Management: Enterprise Conception	3
IMSE 4810	Cognitive Ergonomics	3
IMSE 4910	Industrial Engineering Internship	3
IMSE 4920	Industrial Engineering COOP	3
IMSE 4990	Undergraduate Research in Industrial Engineering	1-3
IMSE 4995	Undergraduate Research Industrial Engineering - Honors	1-3
Engineering elective		3
Choose from the following:		3
ENGINR 2100	Circuit Theory for Engineers	3
ENGINR 2300	Engineering Thermodynamics	3
Technical electives		6
A technical elective is define	ed as any course relevant to the degree	

A technical elective is defined as any course relevant to the degree program but not required, such as Computer Science, Engineering, Mathematics, Science courses that are at a level beyond courses required in the IE curriculum, and select business (Economics, Finance, Management, Marketing) courses above 3000 and Accounting courses beyond 2000.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR

MS in Industrial Engineering

Admission Contact Information

Luis G. Occeña, Interim Director of Graduate Studies E3437 Thomas and Nell Lafferre Hall Columbia, MO 65211 (573) 882-2691

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report.

The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/ Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

Master of Engineering

The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program designed to be a terminal degree. The Master of Engineering (ME) degree is a non-research thirty-six-credit-hour program for U.S. students designed to be a terminal degree. The ME curriculum is based upon a seven-course core with the remaining 15 hours made up of courses appropriate to the student's concentration area.

Dual Master's Degree Programs: Master of Science and MBA

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the College of Business, offers a dual master's degree program for those students who wish to combine the specialized skills of the industrial engineer with the general knowledge of the professional manager. The program was developed in recognition of the fact that solutions to organization problems often require that the engineer's analytical abilities be applied simultaneously with the manager's integrative perspective. This dual program has been carefully structured to provide the necessary academic background to obtain an MS in industrial engineering and an MBA simultaneously, in a minimum amount of time, usually two academic years.

Master of Science and MHA

The Department of Industrial and Manufacturing Systems Engineering, in cooperation with the health services management program of the School of Medicine, offers a dual master's degree program to prepare its graduates for careers in the design and administration of health-care delivery systems and organizations. The program was developed in recognition of the highly complex nature of health-care organizations. The program's basic objective is to fuse competencies in health-service management and in health-systems design. The required courses in the industrial engineering program serve as the area of specialization in the health services management program, and the required courses in the health-services management program are used as electives in the industrial engineering program. As a result, it is possible for the student to earn an MHA in health-services management and an MS in industrial engineering simultaneously.

Application Deadlines

Applications accepted throughout the year.

Fall application deadline: March 1 (Priority deadline: January 1)

Spring application deadline: September 15

Minimum Admission Criteria

- Minimum GPA: 3.0/4.0
- Test of Written English: (TWE) of 4.0 (international applicants only)
- Minimum Academic IELTS OVERALL score: 6.0; or Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

. Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative
Prior to August 1, 2011	350	700
On or After August 1, 2011	143	155

• Foreign Language: No foreign language is required in either program.

Required Application Materials

To the Office of Graduate Studies:

• All required Office of Graduate Studies documents

To the IMSE Graduate Program:

- 3 letters of recommendation
- · Statement of Purpose
- Curriculum Vitae (CV)
- · GRE scores

TA/RA Hiring

This academic department does **not** have any function of financial Aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The three current focus areas are Operations Research and Statistics, Manufacturing/ Production/Service Systems and Human and Enterprise Systems. Other focus areas are in development. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

PhD in Industrial Engineering

Admission Contact Information

Luis G. Occeña, Interim Director of Graduate Studies E3437 Thomas and Nell Lafferre Hall Columbia, MO 65211 (573) 882-2691

About the Doctoral Degree

Programs are individually tailored to meet students' objectives and to culminate in an original research dissertation. The PhD builds upon the graduate MS and fundamental BS programmatic areas. The three current focus areas are Operations Research and Statistics, Manufacturing/ Production/Service Systems and Human/Enterprise Systems. Other focus areas are in development. Fundamental IE knowledge in each is expected. The basic goals of the PhD program are to provide students with a solid understanding of the theoretical bases for the latest tools and techniques of systems analysis and design, an extensive experience in applying these analyses and design tools and techniques, and research experience in the development of new tools or applications of existing techniques to design or analyze problems.

Application Deadlines

Applications accepted throughout the year.
Fall application deadlines: March 1 (Priority deadline: January 1)
Spring application deadline: September 15

Minimum Criteria to be Considered for Admission

- Minimum GPA: 3.5/4.0
- · Demonstrated research experience
- Compatible research interests or capabilities with a member of the faculty
- Minimum OVERALL IELTS scores: 6.5; or Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

• Minimum GRE scores

When did you take the GRE?	Verbal	Quantitative
Prior to August 1, 2011	350	700
On or After August 1, 2011	143	155

Note: Only highly qualified students are accepted for advisement in the PhD program. The faculty looks for excellence in undergraduate and graduate work, high GRE scores, thesis training, and strong indications of research potential.

Notification

This department does not use "rolling admission." Applicants will be notified within a month after the application deadline.

Required Application Materials

To the Office of Graduate Studies (https://applygrad.missouri.edu/apply):

· All required Graduate Studies documents

To the IMSE Graduate Program:

- 3 letters of recommendation
- Writing sample demonstrating research experience
- · Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores

TA/RA Hiring

This academic department does **not** have any function of financial Aid. Rather, IMSE hires TA/RA automatically based on the department needs. No separate application or contacts are necessary; all top ranked applicants will be considered.

Degree Completion Requirements

The granting of a PhD requires completion of five major requirements:

- 1. A qualifying examination (D1 form).
- 2. A course of study (Study Plan, D2 form.
- 3. Comprehensive examination, and
- 4. Acceptance of dissertation proposal (D3 form)
- 5. Final defense and submission of completed dissertation (D4 form).

Information Technology

Dong Xu, Director College of Engineering 201 Naka Building (573) 882-2299

https://engineering.missouri.edu/departments/information-technology/bachelor-science-information-technology/

The information technology (IT) degree program was launched in 2005 with a gift from AT&T/SBC. IT students collaborate with students from other disciplines to create software applications, produce videos and films and use technology to solve a wide range of complex information technology, systems integration, social network and societal problems. The program is attractive to students because of its distinguished faculty and state-of-the-art facilities many of which are shared with the Computer Science Program (CSP) (p. 528) in the Electrical Engineering & Computer Science Department that greatly exceeds what is available at competing institutions. Application areas in IT include mobile computing, game design, information systems, software engineering, cybersecurity, systems administration, and audio/video multimedia technology.

Faculty

Assistant Professor of Practice C. Gubera, B. Maurer, N. Wergeles Associate Teaching Professor D. Musser* Assistant Teaching Professor F. Wang

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Information Technology (p. 557)
- Minor in Information Technology (p. 558)

Advising Contact

Sandra Brown W1006 Lafferre Hall (573) 884-6961 brownsan@missouri.edu

Scholarship Information Contact

Heather Ralph (573) 882-4765 ralphhm@missouri.edu

This degree program is offered by the College of Engineering. Career opportunities include database administration, web design, cyber security, game development, film production, and more.

Graduate

While the College of Engineering does not offer a graduate degree specifically in Information Technology, it does offer a number of graduate degrees in closely related areas such as Computer Science (p. 530), and Computer Engineering (p. 523). There is a Master of Engineering degree through the department. The University also offers a number of information technology degrees in its other Colleges, and through interdisciplinary programs such as Health Informatics (p. 728), Health

Administration (p. 725), Informatics (p. 731), or Information Science and Learning Technology (p. 438).

A joint degree program administered through the School of Engineering and the Crosby MBA Program is available for students who wish to earn a Bachelor of Science in Information Technology (BS IT) and a Master of Business Administration (MBA) (p. 361). Individuals interested in pursuing engineering and business will find that this program provides them with a valuable set of skills to excel in this rapidly growing field. If earned separately, the BS IT degree would take four years and the MBA degree would take two years. The dual degrees may be completed in five years assuming normal progress toward each degree.

Or you may browse a complete list of degree options (p. 18) at the University of Missouri.

BS in Information Technology

Degree Program Description

Information Technology (IT) students collaborate with other disciplines to create software applications, design and manage technology-based infrastructures, manage database systems, produce videos and films, and use technology to solve a wide range of complex problems. In the one-semester capstone design course, students complete design projects that serve as a culminating academic experience. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. Some students opt to participate in the joint degree program with the Crosby MBA, earning a BS Information Technology and a Master of Business Administration. Students are prepared to pursue a variety of IT related careers such as programmer analysts, software engineers, database and system administrators, web developers, IT implementation specialists, and business analysts in both the public and private sectors.

Major Program Requirements

To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: Computer Science (CMP_SC) course requirements - 54 hours of CMP_SC/INFOTC core courses, 12 hours of related math and business courses, 9-10 hours of science, 15-22 hours of courses in a possible minor and any remaining hours for elective courses. General education courses include ENGLSH 1000, 9 hours of Social/Behavioral Sciences and 9 hours of Humanities/Fine Arts, with at least one course from Social/Behavioral/Humanities at the 2000 level or higher.

Information Technology students must earn a C-range grade or better in all INFOTC/CMP_SC courses that are prerequisites for other INFOTC/CMP_SC courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all CMP_SC/INFOTC courses.

The MU Engineering Leadership, Engagement and Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions.

These course requirements apply to students beginning full-time Fall 2018 or after.

In addition to the major core requirements, students must complete all University graduation requirements including University general

education, as well as all degree and college or school requirements. See course descriptions for prerequisites.

Minor in Information Technology

A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete courses in a sequence approved by Information Technology. The student must earn a

2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence at MU. At least 9 hours must be at the 2000 level or above. A total of 15 credit hours are required.

The following courses are required for sequence one.

Mechanical and Aerospace Engineering

Noah D. Manring, Interim Chair and Glen A. Barton Professor College of Engineering E3421 Lafferre Hall (573) 882-0693 ManringN@missouri.edu

The Department of Mechanical and Aerospace Engineering is an academic department within the College of Engineering at the University of Missouri.

Established in 1891, this ABET accredited program is home to many undergraduate and graduate students and faculty.

Faculty

See web site for faculty listing: https://engineering.missouri.edu/departments/mechanical-aerospace-engineering/mae-faculty/

Prerequisite: INFOTC 3640

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- · BSME in Mechanical Engineering (p. 561)
 - with emphasis in Aerospace Engineering (p. 562)

Additional minors and certificates (p. 568) are offered through the College of Engineering, including the Aerospace Minor and the Energy Engineering Minor.

Advising Contact

Justin Rich 573-884-6961 RichJ@missouri.edu

Scholarship Contact

Gary L. Solbrekken, Undergraduate Director solbrekkeng@missouri.edu

The Department of Mechanical and Aerospace Engineering prepares students for productive careers in mechanical engineering related disciplines. The program focuses on instruction in the thermal and mechanical systems areas as defined by the Accreditation Board for Engineering and Technology (ABET). To support that mission, the Department has been divided into the focus areas of Design and Manufacturing, Dynamics and Controls, Materials, and Thermal and Fluid Sciences. (NOTE: Focus areas are not listed on transcripts or diplomas.)

The department endeavors to present a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BSME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Mission Statement

The mission of the Mechanical and Aerospace Engineering Department is to:

Prepare our students for successful careers in the mechanical engineering profession, conduct high quality and innovative research, and serve the community and industry providing educational and research resources.

Program Educational Objectives

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (within a few years of graduation):

- 1. successfully practice the mechanical engineering disciplines;
- 2. contribute to society and the profession;

- 3. engage in life-long learning to advance professionally through continuing education and training;
- 4. succed in graduate studies in mechanical engineering or a related field if pursed.

ABET Definition for Program Educational Objectives: Program Education Objectives ae broad statements that describe what graduates are expected to attain within a few years of graduation. Program Educational Objectives are based on the needs of the program's constituencies.

Program Outcomes

Students from the Mechanical Engineering program will attain (by the time of graduation):

- a. an ability to apply knowledge of engineering, science, and mathematics (including multivariate calculus and differential equations);
- b. an ability to design and conduct experiments, as well as to analyze a
- c. an ability to design thermal, fluid, and mechanical systems, components, or processes to meet desired needs within realistic contraints
- d. an ability to function on multi-disciplinary teams;
- e. an ability to identify, formulate, and solve mechanical engineering problems;
- f. an understanding of professional and ethical responsibility;
- g. an ability to communicate effectively
- h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- i. a recognition of the need for, and an ability to engage in, life-long learning;
- j. a knowledge of contemporary issues in mechanical engineering;
- k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Double Majors and Dual Degrees

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

MAE Honors Program

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by highability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995 Undergraduate Honors Research Mechanical & Aerospace

Engineering. The academic credit for the honors project (1-6 credits in MAE 4995 replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

Academic Qualifications for the Honors Program

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Honors students must maintain and graduate with a 3.0 overall GPA.

In the case of a transfer student, transferred credit plus MU credit must average 3.0/4.0. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

Director of Graduate Studies: Frank Feng

About Mechanical & Aerospace Engineering

Like markets merging together to create a global economy, this decade has approached the exciting frontier of joint research. The marriage of Mechanical Engineering to related fields has contributed to a new "Interdisciplinary Era". In meeting the challenges brought on by this co-operative approach to engineering, the Department of Mechanical & Aerospace Engineering (MAE) at the University of Missouri has broadened its scope in both education and research while maintaining strengths in the fundamental disciplines: Dynamics & Control, Design & Manufacturing, Materials & Solids and Thermal & Fluid Science Engineering. Such well-established academic traditions in the undergraduate and graduate curriculum as well as nationally renowned research programs are the basis for MAE having become the largest department in the College of Engineering at MU. An equally important aspect contributing to the quality of the MAE department is the aggressive pursuit of funding, by our faculty, to establish nationally

recognized research programs. Well-earned support through sizable funding from both federal agencies and industry are valuable resources in the promotion of our graduate research and undergraduate teaching.

Career Opportunities

Graduate programs are planned to prepare students for advanced professional engineering careers. In recognition of the broad nature of the field of mechanical and aerospace engineering, considerable latitude in programs is encouraged so students may prepare for employment in industry, education and government. The usual purpose of a PhD program is to prepare a person for a career in research or teaching. The program is oriented toward research culminating in a dissertation suitable for publication.

Areas of Study

A student may pursue an area of concentration selected from Al/expert systems, automation, bioengineering, combustion, control, creep and plasticity, design optimization, numerical methods, computational fluid dynamics, fracture mechanics, heat transfer, interactive computer graphics, laser diagnostics, manufacturing systems, materials science, mechanical syntheses, mechatronics, mechanics, parallel computation, residual stress, robotics, thermal systems design and management and ultrasonic nondestructive evaluation.

Licensure

Information on degree requirements for engineering licensure is detailed under Professional Engineering Registration.

Facilities and Equipment

The department has several specialized laboratories in aerosol mechanics, combustion, computer control, creep and fracture mechanics, fluid mechanics and heat transfer, manufacturing, materials science and structural dynamics.

Besides the modern instrumentation and equipment normally found in well-equipped mechanical and aerospace engineering laboratories, the department has, or has access to, such specialty items as MTS and Instron material and structural test equipment, wind tunnels, X-ray and a scanning electron microscope facility, computer control systems, a scanning laser vibrometer, a microscale heat transfer and electronic coding laboratory, an experimental stress laboratory, a fluid power laboratory and the university research reactor.

Information Technology and Computing

A combination of the campus Division of Information Technology and the Engineering Technical Services (ETS) provided advanced engineering computation for College of Engineering faculty and students. CAD/CAM and graphics are the primary emphasis, although artificial intelligence, multiple high-level programming languages and computational and simulation libraries also are available.

The College of Engineering operates one high performance enterprise server, two super minicomputers and 17 HP workstations. The ETS also provides hardware/software support, locally, to nine College of Engineering departments and their affiliated research centers. These units are networked via Ethernet to the superminicomputers operated by the College of Engineering.

The Division of IT operates two remote terminal sites in the Engineering Buildings East. The University also supports an extensive computer

system consisting of IBM mainframe computers, remote terminal sites, and PC and Macintosh labs throughout the campus.

Financial Aid from the Program

Admission decisions to the graduate program are made without considerations of a student's financial need. Once admitted, a student may be considered for fellowships, research assistantships (RAs) and teaching assistantships (TAs). Awarding of fellowships is initiated by the department. RAs are awarded by individual faculty members. A student may apply by contacting faculty members directly. Application forms for TAs are available in the department office. International students are not eligible for TAs in their first semester of study. For specific departmental requirements, please refer to the MAE Graduate Handbook. Please see the department website for information on how to contact the professors individually about research assistantships offered.

BSME in Mechanical Engineering

Degree Program Description

Mechanical Engineering focuses on thermal and mechanical systems areas. The curriculum presents a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation. Bachelor of Science in Mechanical Engineering prepares students for employment in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Major Core Requirements

In addition to the University general education (p. 34) and graduation requirements, the Department of Mechanical and Aerospace Engineering requires the following courses:

CHEM 1320	College Chemistry I	4
ENGINR 1100	Engineering Graphics Fundamentals	2
ENGINR 1110	Solid Modeling for Engineering Design	1
IMSE 2710	Engineering Economic Analysis	3
MATH 1500	Analytic Geometry and Calculus I	5

MATH 1700	Calculus II	5
MATH 2300	Calculus III	3
MATH 4100	Differential Equations	3
STAT 4710	Introduction to Mathematical Statistics	3
or IMSE 2110	Probability and Statistics for Engineers	
PHYSCS 2750	University Physics I	5
PHYSCS 2760	University Physics II	5
ENGINR 1200	Statics and Elementary Strength of Materials	3
ENGINR 2100	Circuit Theory for Engineers	3
ENGINR 2200	Intermediate Strength of Materials	3
MAE 2300	Thermodynamics	3
MAE 2100	Programming and Software Tools	2
MAE 3100	Computational Methods for Engineering Design	4
MAE 2600	Dynamics	3
MAE 3200	Engineering Materials	4
MAE 3400	Fluid Mechanics	3
MAE 3600	Dynamic Systems and Control	3
MAE 3800	Instrumentation and Measurements Laboratory	3
MAE 3900	Mechanism Design	3
MAE 4300	Heat Transfer	3
MAE 4500	Manufacturing Methods (Pending approval effective FS2020)	4
MAE 4800	Applied Thermal/Fluids Laboratory	4
MAE 4900	Machine Element Design	3
MAE 4980	Senior Capstone Design	3
Elective in approved area of or above	Engineering, Science or Math, 3000-level	3
Electives		
MAE 4000 +: MAE elective		9

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
MATH 1500	5 MATH 1700	5
ENGINR 1100	2 ENGLSH 1000	3
Approved Political Science or History Course	3 CHEM 1320	4
Social/Behavioral Science Elective	3 ENGINR 1110	1
	Social/Behavioral Science Elective	3
	13	16
Second Year		
Fall	CR Spring	CR
MATH 2300	3 MAE 2100	2
PHYSCS 2750	5 MATH 4100	3

BSME in Mechanical Engineering with Emphasis in Aerospace Engineering

Degree Program Description

Mechanical Engineering focuses on thermal and mechanical systems areas. The curriculum presents a strong experimental program through laboratory experiences to expose undergraduate students to modern instrumentation and measurement methodologies. Students work in well-equipped laboratories in design optimization, engineering computation, fluid power dynamics and control, materials, structural dynamics, measurement and instrumentation, laser processing, heat transfer and fluid dynamics, stress measurement and nondestructive evaluation. Bachelor of Science in Mechanical Engineering prepares students for employment in industry or government or for further study toward other degrees such as the JD, MD, MS and PhD.

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements during the junior year. The senior year includes three MAE electives that allow students to develop individual study programs. This enables students to complete a traditional program or create their own with special emphasis on system design, materials, manufacturing, energy systems, controls, or aerospace.

Experience in design is integrated throughout the required courses in the curriculum and culminates in the capstone design sequence. The capstone design experience integrates earlier technical work with economic, safety and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting

of members of the faculty, the MAE Industrial Advisory Council and representatives of the client firms.

Options

The senior year includes three MAE electives and one technical elective that allow students to develop individual study programs. This enables students to complete a traditional program or create their own program with special emphasis on system design, materials, manufacturing, energy systems or controls.

An Aerospace Emphasis area is available to students wanting to pursue careers in the aerospace industry. Completing the aerospace emphasis requires taking at least four senior level MAE 4000+ electives from a selection of available courses. These can be chosen from the broad areas of structures/materials, thermal/propulsion, aerodynamics/fluids, flight mechanics/dynamics/controls, and design. Upon completion of the appropriate coursework, an Aerospace Emphasis is shown on the students transcript.

Semester Plan

A sample plan of study has not been designed for this major. Students should either refer to the plan designed for the BSME in Mechanical Engineering (p. 561) or contact the academic department for assistance with academic planning.

MS in Mechanical and Aerospace Engineering

Admission Contact Information

muengrgraduatesup1@missouri.edu

Application Deadline for all applicants

Fall deadline: May 31 (priority deadline Jan. 1)
Spring deadline: October 31 (priority deadline Oct 1)

Summer deadline: April 30

Admission Criteria

- BS in same or closely related field
- Minimum GPA: 3.0 during last 2 years
- Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
- Minimum TOEFL score: 80
- Minimum academic IELTS overall score: 6.5
- Resume

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master's program:

Step 1: All documents should be uploaded directly at https://applygrad.missouri.edu/apply.

Step 2: Required documents:

 Unofficial Transcripts (all Universities and Colleges attended) Uploaded in S (http://gradstudies.missouri.edu/admissions/ apply)late

- TOEFL/IELTS score sent electronically to the University by ETS (Institution Code 6875 Department Code 1502)
- 3 letters of recommendation uploaded in Slate by the recommenders. Letters must come from a school e-mail address, not personal accounts (like yahoo, gmail, etc).
- GRE score sent electronically by ETS (Institution Code 6875 Department Code 1502)
- Statement of Objectives one page letter telling about yourself and the area you will study if accepted (uploaded in Slate)
- CV/Résumé (Uploaded in Slate)

Contact:

Mechanical & Aerospace Engineering, Graduate Admissions muengrgraduatesup1@missouri.edu

Plan of Study

A plan of study is developed by the student and the advisor, subject to approval. The minimum degree requirement is 30 hours with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE problems.

Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved by designated faculty committees and is deposited in the department libraries.

Passing the MS final committee fulfills the degree requirements.

PhD in Mechanical and Aerospace Engineering

Mechanical & Aerospace Engineering, Graduate Admissions muengrgraduatesup1@missouri.edu

Degree Requirements

A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree from other than MU may transfer a maximum of 30 hours from their MS course work.

A doctoral student must satisfy a special requirement, either proficiency in foreign languages or a collateral field. The collateral field requires a minimum of nine hours of course work in one area other than MAE.

Plan of Study

The PhD candidate plans a plan of study and research under the immediate supervision of an advisor and in close cooperation with the doctoral program committee approved by the dean of the Graduate School upon the department's recommendation.

Qualifying Examination

A qualifying examination is given soon after the student begins doctoral study. Successful completion of this examination is a prerequisite to formal acceptance into the PhD program.

Students with an MS from MU or another accredited U.S. engineering program will be exempt from the qualifying examination if their MS GPA and total GRE scores satisfy a departmental exemption rule. See https://engineering.missouri.edu/departments/mechanical-aerospace-engineering/ for more information.

Comprehensive Examination & Dissertation

A comprehensive examination is given after all course work and language or collateral requirements have been satisfied. Upon completion of the plan of study and research a final examination, essentially a defense of the dissertation, is administered.

Nuclear Engineering

About the Nuclear Engineering Program

The Nuclear Engineering Program at University of Missouri was established in 1964 and conferred its first Master of Science degree in that same year.

Undergraduate students may pursue an academic minor in nuclear engineering (a baccalaureate degree is not offered at this time).

The master's program is designed for those entering students with a B.S. degree in engineering or in chemistry or physics. Students from other fields will be considered on an individual basis. Those students who have attained a B.S. degree in nuclear engineering may be given revised curricula depending on their backgrounds and the requirements of the specific program in which they are enrolled.

The Ph.D. program is typically tailored to fit the academic needs and research goals of our students. The graduate certificates provide students and working professionals with the opportunity to develop unique skills and expertise for jobs in the areas of nuclear material protection, control and accountability.

Faculty

Professor Z. Chen, B. Deng, J. Gahl*, T. K. Ghosh**, N. Islam*, S. Jurisson*, S. Loyalka**, P. Pinhero, M. Prelas**, J. D. Robertson*, R. Thompson**

Associate Professor S. Kovaleski, J. Kwon, K. Trauth*, R. Winholz Assistant Professor M. Bernards

Associate Teaching Professor G. Solbrekken Assistant Teaching Professor S. Naz

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Nuclear Engineering (p. 564)

While MU does not offer undergraduate degrees specifically in nuclear engineering, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Engineering, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Nuclear Engineering (p. 565)
 - with emphasis in Environmental and Regulatory Compliance (p. 565)
 - with emphasis in Health Physics (p. 565)
 - with emphasis in Materials (p. 566)
 - with emphasis in Medical Physics (p. 566)
 - with emphasis in Thermal Hydraulics (p. 566)
- PhD in Nuclear Engineering (p. 566)
 - with emphasis in Environmental and Regulatory Compliance (p. 567)

- with emphasis in Materials (p. 567)
- with emphasis in Thermal Hydraulics (p. 567)
- Graduate Certificate in Nuclear Safeguards Science and Technology (p. 567)

Minor in Nuclear Engineering

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.

The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

Required courses:

ENGINR 2300	Engineering Thermodynamics	3
NU_ENG 4315	Energy Systems and Resources	3
NU_ENG 4346	Introduction to Nuclear Reactor Engineering I	3
NU_ENG 4391	Nuclear Radiation Detection	3
or CHEM 4600	Introduction to Radiochemistry with Lab	
Select one additional cou	rse from the list below:	
NU_ENG 2201	Topics in Nuclear Engineering	3
NU_ENG 4303	Radiation Safety	3
NU_ENG 4330	Science and Technology of Terrorism and Counter Terrorism	3
ECE 7550	Introduction to Plasmas	3

MS in Nuclear Engineering

Contact for prospective students (those intending to apply):

Nuclear Engineering Program

Dr. John M. Gahl, Director 207 Engineering Building West Columbia, MO 65211 (573) 882-5345 or gahlj@missouri.edu https://engineering.missouri.edu/

Preparation for the Program

Students with degrees in physics or chemistry are generally adequately prepared for the nuclear engineering graduate program. Those from other backgrounds may be required to complete engineering undergraduate courses in thermodynamics, advanced engineering mathematics and the full complement of calculus-based physics, based on the student's particular experience.

Application Deadlines

Fall deadline: March 1

Spring deadline for International students: September 1 Spring deadline for Domestic Students: October 1

Applications received after those time frames will be reviewed for acceptance only as time permits.

Admission Criteria

• Minimum TOEFL scores:

Internet-based test (iBT) Paper-based test (PBT)
61 Effective July 1, 2015 must have score of 80 Paper-based test (PBT)
500 Effective July 1, 2015 must have score of 80

Minimum GRE score: none setMinimum GPA: 3.0 during last 2 years

 Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School

All required Graduate School documents

- 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student's qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS advisor.)
- Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program

• Official GRE score report (Use Department Code 1609)

Degree Completion Requirements

The nuclear engineering master's degree program requires 31 hours, including a research project or thesis. The requirements are based on the assumption that the student is entering graduate study with a bachelor's degree in engineering from an ABET-accredited school. An original research project is required either in the form of a three-credit master's project or a six-credit master's thesis. Typical time-to-degree completion for the master's degree is 18 months.

MS in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nuclear Engineering program (https://gradstudies.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Nuclear Engineering with Emphasis in Health Physics

Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Nuclear Engineering with Emphasis in Thermal Hydraulics

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in the Nuclear Engineering program (https://gradstudies.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

PhD in Nuclear Engineering

Contact for prospective students:

Dr. Naz Islam, Director of Graduate Studies 319 Engineering Building West Columbia, MO 65211 (573) 882-7570 or islamn@missouri.edu

Nuclear Engineering Program

Dr. John M. Gahl, Director 207 Engineering Building West Columbia, MO 65211 (573) 882-5345 or gahlj@missouri.edu https://engineering.missouri.edu/

Application Deadlines

Fall deadline: March 1

Spring deadline for International students: September 1 Spring deadline for Domestic Students: October 1

Applications received after those time frames will be reviewed for acceptance only as time permits.

Admission Criteria

• Minimum TOEFL scores:

Internet-based test (iBT) Paper-based test (PBT)

500

- · Minimum GRE score: none set
- Minimum GPA: 3.0 during last 2 years
- Undergraduate degree (with a strong math and physics background) in an engineering field, physics, biology, chemistry or mathematics from an accredited institution.

Required Application Materials

To the Graduate School

• All required Graduate School documents

- 3 letters of recommendation and the online recommendation form from previous instructors or technical employers who are familiar with the student's qualifications for graduate study, submitted directly online through the application. (If the student is applying to the PhD program, one of these letters must be from the MS advisor.)
- Statement of Purpose (uploaded via online application)

To the Nuclear Engineering Program

• Official GRE score report (Use Department Code 1609)

Qualifying Examination

The PhD program is a research program and is tailored to meet specific educational needs. To qualify for the research phase of the PhD program, the student must pass a comprehensive, multi-part qualifying examination, usually administered during the first semester of study for the PhD.

PhD Plan of Study

If the student is entering the PhD program, the planned course of study will be individually evaluated by the nuclear engineering faculty. A comprehensive examination covering the student's dissertation topic is required at least seven months before anticipated graduation. The PhD degree is a research degree, with a suitable dissertation topic to be chosen in the respective field and usually requires 24 classroom credits of advanced courses beyond the MS degree and 18 credits of research. Typical time-to-degree completion for the PhD degree is three years past the MS degree.

PhD in Nuclear Engineering with Emphasis in Environmental and Regulatory Compliance

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in the Nuclear Engineering program (https://gradstudies.missouri.edu/degreecategory/nuclear-engineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

PhD in Nuclear Engineering with Emphasis in Materials

The page for this program is still under construction and should be available in future editions of the catalog. For further information concerning this degree, contact the School or College offering this degree.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in the Nuclear Engineering

program (https://gradstudies.missouri.edu/degreecategory/nuclearengineering) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimumrequirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Graduate Certificate in Nuclear Safeguards Science and Technology

For additional information about this certificate, contact:

Dr. John Gahl, professor of Electrical Engineering (573) 884-7414
GahlJ@missouri.edu

Certificate Objectives and Requirements

The objective of offering the Graduate Certificate in Nuclear Safeguards is to provide graduate students and professional, non-degree-seeking, students in various engineering disciplines with an opportunity to develop unique skills and expertise that will enhance their performance in jobs requiring knowledge of nuclear material protection, control and accountability.

The graduate certificate program serves degree-seeking graduate students and also functions as a stand-alone graduate certificate program for professional, non-degree-seeking students. Both degree-seeking and non-degree-seeking students will be required to take four specific classes (12 credit hours) involving nuclear science, policy and safeguards. The student must complete a Change of Academic Program form to enter the program. The student must also complete the "Course of Study for Graduate Certificate" form, which must be approved by NSEI

before taking any courses. Without this prior approval, the NSEI has the authority to deny the certificate.

For MU students, a maximum of 6 credit hours may be counted for both degree course credit within their department and the Graduate Certificate in Nuclear Safeguards. However, total credit hours needed to complete their degrees need not exceed departmental or Graduate School requirements (see the Graduate School catalog for additional information contact Dr. Gahl)

Nuclear Safeguards Science and Technology Certificate Plan of Study

Four specific classes, comprising 12 hours of course credit, are required for a student to receive this graduate certificate in nuclear safeguards:

NU_ENG 7335	Nuclear Safeguards Science and Technology	3
NU_ENG 7331	Nonproliferation Issues for Weapons of Mass Destruction	3
NU_ENG 7303	Radiation Safety	3
NU_ENG 7391	Nuclear Radiation Detection	3
Total Credits		12

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/14.2301-Gedt-Nuclear_Sci_Tech.html.

Additional Minors and Certificates - Engineering

Undergraduate Minors

- Minor in Aerospace (p. 568)
- Minor in Computational Neuroscience (p. 568)
- Minor in Construction Management (http://catalog.missouri.edu/ undergraduategraduate/collegeofengineering/ additionalminorsandcertificates/minor-construction-management)
- Minor in Energy Engineering (p. 569)
- Minor in Medical/Health Physics (p. 569)
- Minor in Naval Science (p. 569)
- Minor in Radioenvironmental Sciences (p. 569)

Graduate Certificates

- Certificate in Energy Efficiency (p. 571)
- Certificate in Sustainable Energy and Policy (p. 571)

Minor in Aerospace

Purpose

- To provide a fundamental grounding in aerospace engineering
- To prepare students to be competitive for positions in aerospaceoriented industries

Students will take courses from the 4 fundamental areas of aerospace engineering:

- · aerodynamics
- aerospace structures
- · flight mechanics

propulsion

To Apply

- Meet with your advisor sophomore/junior year to plan minor courses into your schedule.
- Complete the necessary course work (at least 18 credit hours).
- Submit the application below in the semester before you are graduating.
- It will then appear on your diploma.

Required Course Work

Must take both:

MAE 3400	Fluid Mechanics	3
MAE 3600	Dynamic Systems and Control	3
Select at least 2 from:		
MAE 4210	Aerospace Structures	3
MAE 4390	Aerospace Propulsion	3
MAE 4420	Intermediate Fluid Mechanics	3
MAE 4430	Introduction to Computational Fluid Dynamics and Heat Transfer	3
MAE 4440	Aerodynamics	3
MAE 4450	Gas Dynamics	3
MAE 4620	Aircraft Flight Performance	3
MAE 4630	Space Flight Mechanics	3
MAE 4940	Aircraft Design	3
Auxiliary Courses		
A maximum of 6 credit hours	can be counted toward the minor	
MAE 4001	Topics in Mechanical and Aerospace Engineering (When taken as topics title "Applied Finite Element Analysis")	3
MAE 4280	Introduction to Finite Element Methods	3
MAE 4320	Design of Thermal Systems	3
MAE 4380	Intermediate Thermodynamics	3
MAE 4600	Advanced Mechanics of Materials	3
MAE 4720	Modern Control	3

Contact

Mechancial & Aerospace Engineering (https://engineering.missouri.edu/departments/mechanical-aerospace-engineering) phone: 573-882-2684

Minor in Computational Neuroscience

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing and communication.

Required for all students:

ECE/BIO_SC 4590	Computational Neuroscience	4
Select 2 courses from the fo	llowing list:	
BIO_SC 3700	Animal Physiology	
BIO_SC 4500	Neurobiology	
BIO_SC 4560	Sensory Physiology and Behavior	

BIO_SC 4986	Neurology of Motor Systems	
BIO_SC 4988	Nerve Cells and Behavior	
BIOL_EN 4070	Bioelectricity	
PHYSCS 4310	Physics in Cell and Developmental Biology	
PHYSCS 4500	Computational Biological Physics	
, ,	Engineering, Physics, Math, Psychology dits from the following list of courses:	
BIO_SC 1010	General Principles and Concepts of Biology (with BIO_SC 1020)	3
BIO_SC 1500	Introduction to Biological Systems with Laboratory	5
BIO_SC 2300	Introduction to Cell Biology	4
F_W 1100	Introductory Zoology with Laboratory	5
PSYCH 2210	Mind, Brain, and Behavior	3
PSYCH 4210	Physiological Psychology	3
For students majoring in E following list of courses:	Biology choose 6 credits from the	
PHYSCS 1220	College Physics II	4
PHYSCS 2760	University Physics II	5
INFOTC 1040	Introduction to Problem Solving and Programming	3
BIOL_EN 2080	Introduction to Programming for Engineers	3
Seminar for Undergraduates	3	1

Minor in Energy Engineering

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests. The minor requires completion of 18 credit hours between the core and the tracks.

Circuit Theory for Engineers

Required Core Courses:

ENGINE 2100

ENGINR 2100	Circuit Theory for Engineers	3
or ECE 2100	Circuit Theory I	
MAE 2300	Thermodynamics	3
or CH_ENG 3261	Chemical Engineering Thermodynamics I	
ECE 4470	Sustainable Electrical Energy Resources	3
IMSE 2710	Engineering Economic Analysis	3
Electric Utility Generation	Track	
ECE 4460	Energy and Machines	3
ECE 3510	Electromagnetic Fields	3
MAE 4320	Design of Thermal Systems	3
MAE 4660	Vibration Analysis	3
ECE 4410	Power Electronics I	4
CV_ENG 4250	Environmental Regulatory Compliance	3
Electric Utility Transmissio	n & Distribution Track	
ECE 3510	Electromagnetic Fields	3
ECE 4410	Power Electronics I	4
CV_ENG 4250	Environmental Regulatory Compliance	3
Energy Infrastructure and	Efficiency Track	
MAE 4320	Design of Thermal Systems	3
MAE 4340	Heating and Air Conditioning	3
MAE 4660	Vibration Analysis	3
MAE 4380	Intermediate Thermodynamics	3
CV_ENG 4250	Environmental Regulatory Compliance	3

Energy Storage Track		
ECE 4001	Topics in Electrical and Computer Engineering	3-4
ECE 4440	Power Systems Analysis	3
ECE 4410	Power Electronics I	4

Minor in Medical/Health Physics

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation in medical utilization and in occupational health and safety.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:

NU_ENG 4303	Radiation Safety	3
NU_ENG 4328	Introductory Radiation Biology	3
NU_ENG 4391	Nuclear Radiation Detection	3
or CHEM 4600	Introduction to Radiochemistry with Lab	
Select additional cours	ses from the below options:	
NU_ENG 2201	Topics in Nuclear Engineering	3
NUCMED 3256	Clinical Nuclear Medicine I	2
CHEM 4170	Medicinal Chemistry	3
NU_ENG 4319	Physics and Chemistry of Materials	3
NUCMED 4329	Radiopharmaceuticals in Nuclear Medicine	3
BIOL_EN 4570	Fluorescent Imaging	3
BIOCHM 3630	General Biochemistry	3

Minor in Naval Science

A minor in Naval Science is available upon the completion of 20 semester hours to include 11 hours of the lower level (1000 or 2000 level) and 9 hours of the upper level (3000 or 4000 level) Naval Science curriculum.

Minor in Radioenvironmental Sciences

The Minor in Radioenvironmental Sciences is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the environmental aspects of radiation and radioactive materials.

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:

NU_ENG 4303	Radiation Safety	3
NU_ENG 4328	Introductory Radiation Biology	3
NU_ENG 4391	Nuclear Radiation Detection	3
or CHEM 4600	Introduction to Radiochemistry with Lab	

Select two additional courses form the list below:

NU_ENG 2201	Topics in Nuclear Engineering	3
NU_ENG 4330	Science and Technology of Terrorism and Counter Terrorism	3
CHEM 3300	Fundamentals of Physical Chemistry	3
CHEM 4280	Environmental Chemistry	3
CV_ENG 3200	Fundamentals of Environmental Engineering	4
CV_ENG 4220	Hazardous Waste Management	3
CV_ENG 4250	Environmental Regulatory Compliance	3

Graduate Certificate in Energy Efficiency

The graduate certificate in Energy Efficiency is currently suspended and not admitting new students at this time.

Core Course (required)

MAE 7355	Industrial Energy Analysis *	3
Other courses:		
ARCHST 7325	Energy-Efficient Building Design	3
CV_ENG 7232	Water and Wastewater Treatment Facilities	3
Other courses may be in dev	velopment for this certificate program	

Students may not use MAE 7355 to fulfill both the Graduate Certificate in Energy Efficiency and the Graduate Certificate in Sustainable Energy and Policy (p. 571).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/degreecategory/energy-efficiency.

Graduate Certificate in Sustainable Energy and Policy

To achieve the goal of reliable and sustainable energy, we need to educate engineers in basics of energy with emphasis on renewable energy, sustainable practices in manufacturing that are informed by new technology, and impact of energy usage on society, economy and the environment. The Graduate Certificate in Sustainable Energy and Policy will give students a broad view of energy engineering, energy economics and policy, and sustainability. The certificate is a stand-alone certificate open to both degree seeking and non-degree seeking students.

Required Course

MAE 7355	Industrial Energy Analysis *	3
Choose three:		
PUB_AF 8177	Energy Economics	3
PUB_AF 8178	Sustainable Energy Policy	3
Total Credits		12

* Students who use MAE 7355 to fulfill the requirements of the Graduate Certificate in Energy Efficiency (p. 571), will have to take all four of the remaining course to fulfill the 12 credit hour requirement.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/30.3301-Gedt-Sustainable_Energy.html.

School of Health Professions

Administration

Kristofer J. Hagglund, Dean Stephanie A. Reid-Arndt, Associate Dean, Academic Affairs Judith C. Goodman, Associate Dean, Research 510 Lewis Hall (573) 884-6705 haydenrm@health.missouri.edu

Advising and Scholarship Contact

SHP Student Services Office 101 Lewis Hall (573) 882-8011 mushpadvising@missouri.edu

The School of Health Professions is Missouri's only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving the health and well-being of individuals and communities. Its six departments and eleven accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Athletic Training, Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Public Health, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Applied Behavior Analysis, Communication Science and Disorders with an emphasis in Speech-Language Pathology, Diagnostic Medical Ultrasound, Occupational Therapy, Physical Therapy and Public Health. While the current degree offered for Athletic Training is a Bachelor of Health Science, the program is in the process of changing the degree to a Master's in Athletic Training in order to meet changing requirements established for professional practice. Students are strongly encouraged to check the program's web site (https://healthprofessions.missouri.edu/athletic-training) for updates and changes.

Students gain valuable experience by participating in nationally recognized service centers including PhysZou, Tiger OT, The Adult Day Connection, the MU Speech and Hearing Clinic, Robert G. Comb's Language Preschool, MU Thompson Center for Autism and Neurodevelopmental Disorders, and more than eight hundred fieldwork sites.

Undergraduate

- · Admissions (p. 572)
- Exploratory Courses (p. 572)
- Required Entry Level Courses (p. 572)
- International Admissions (p. 573)
- Academic Regulations (p. 573)
- Enrolling in Other Institutions Simultaneously (p. 573)
- Advising (p. 573)
- Career Development (p. 573)

Admissions

Undergraduate students enrolled in the School of Health Professions work with a professional academic advisor to ensure timely completion of degree program requirements, as well as developing a personalized plan for achieving academic success. Students admitted to a clinical program will be advised by faculty in that department.

Admission to the University and to the School of Health Professions as a pre-health professions student does not guarantee admission for most Bachelor of Health Science degree programs. Application deadlines and requirements vary for each program (the health science major does not require an application). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards prerequisites, MU General Education (p. 34), and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

HLTH_SCI 1000	Introduction to the Health Professions	3
NUCMED 1000	Orientation to Nuclear Medicine	1
OC_THR 1000	Introduction to Occupational Therapy	1
PH_THR 1000	Introduction to Physical Therapy	1
RS_THR 1000	Introduction to Respiratory Therapy	1
DMU 1000	Introduction to Diagnostic Medical Ultrasound	1
CL_L_S 1000	Orientation to Clinical Laboratory Science	1
P_HLTH 1000	Introduction to Public Health	1

Required Entry-level Courses

All students in the School of Health Professions must complete College Algebra (MATH 1100 or equivalent) and Exposition and Argumentation (ENGLSH 1000) upon completing 60 university-level credit hours, including transfer and MU credit. In addition, the School of Health Professions requires students who are declaring a "pre-Health Professions" or "Undeclared" major to meet the minimum GPA requirement for that program of interest. All undergraduate students are required to declare a plan upon completion of 60 university-level credit hours.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

The application deadlines for the professional component of each program are shown below.

Professional Program	Application Deadline	Classes Begin
Athletic Training	February 1, freshman	Fall
Communication Science and Disorders	Feb. 1, sophomore	Fall
Radiography	Feb. 1, sophomore	Summer
Physical Therapy	Sept. 30, junior or senior	Summer

Nuclear Medicine	Feb. 1, sophomore	Summer
Respiratory Therapy	Feb. 1, sophomore	Summer
Diagnostic Medical Ultrasound	Feb. 1, sophomore	Summer
Clinical Laboratory Science	Nov. 1, junior	Summer
Health Sciences	N/A, freshman	Fall/Spring
Public Health	Feb. 1. sophomore, may be rolling	Fall

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University. Academic advisors in the School of Health Professions assist students with understanding degree requirements and progress towards degree completion.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements (p. 33), which include university general education (p. 34) requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 33), including University general education (p. 34) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

To earn Latin Honors in the School of Health Professions, a student must meet the following requirements:

- 50 graded MU undergraduate credits
- At least a 3.0 MU cumulative GPA
- MU cumulative GPA equal to or greater than 3.5 or
- last 50 graded credits at MU equal to or greater than 3.5
- · GPA for each level

Latin Honor	GPA
Cum laude	3.5
Magna cum laude	3.7
Summa cum laude	3.9

Academic Regulations

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions advising office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 18 credits in a fall or spring term and 9 in a summer term without permission from the advising office; students should contact their advisor for more information.

Independent Study

Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades

A student wishing to enroll in a course on an S/U basis must receive permission from the advising office.

Enrolling in Other Institutions Simultaneously

Students should consult with their advisor before enrolling in another institution while being enrolled at the University of Missouri.

Advising

Students who are pre-Health Professions, Health Science majors or undeclared Health Professions students will be assigned an advisor in the SHP Advising office. Students who are in a professional program may be advised by a faculty member or a professional advisor.

Career Development

The Office of Career Services in the School of Health Professions offers career advising, résumé, cover letter and personal statement review, mock interviews, LinkedIn consultation, job search strategies, and workshops to enhance students' career development. In addition, the SHP Office of Career Services offers a bi-annual Career and Opportunities Fair, which allows SHP students to connect with employers, graduate and professional programs, internships, and experiential learning opportunities. All Health Science majors are required to take Health Science 2100, a career and professional development seminar course, and experiential learning is an integral component of the School of Health Professions. Students are encouraged to seek out and use SHP Career Services early in their undergraduate career to connect with shadowing opportunities, find part-time employment, and explore clinical and non-clinical career paths.

Graduate

The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in

 Applied Behavior Analysis and graduate certificate in Applied Behavior Analysis

- Clinical and Diagnostic Sciences, with an emphasis in Diagnostic Medical Ultrasound
- Communication Science and Disorders, with an emphasis in Speech-Language Pathology
- · Occupational Therapy
- · Physical Therapy
- Public Health, with a dual degree option with Social Work, emphasis areas in Health Promotion and Policy and Veterinary Public Health, and graduate certificates in Public Health, Global Public Health, and Epidemiology

Note: Prospective graduate students must apply to *both* the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Applied Behavior Analysis

The Master of Science in Applied Behavior Analysis (ABA) program is designed to help address the state-wide and national shortage of health care providers by training practitioners to affect meaningful change. ABA is a discipline that relies upon evidenced-based behavioral interventions to improve socially significant behaviors. It has been used as an intervention to improve the quality of life for a variety of populations including, but limited to, individuals with autism spectrum disorder (ASD). The goal of our master's program is to become a leading, accredited professional program that will train highly-skilled Behavior Analysts who apply behavioral science to address the behavioral challenges of individuals in need.

Faculty

Associate Professor: S.W. Kahng **Assistant Visiting Professor:** C. Clay

Undergraduate

While MU does not offer undergraduate degrees specifically in Applied Behavior Analysis, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Applied Behavior Analysis (p. 574)
- Certificate in Applied Behavior Analysis (p. 574)

The Master of Science in Applied Behavior Analysis (ABA) program will train you to be an exceptional behavior analyst who has the skills to improve quality of life for people with behavioral challenges, including children and adults with developmental needs. You will also gain experience, and knowledge, in cutting edge research in the field of ABA. Behavior analysts successfully use ABA techniques across a variety of populations and settings to bring about meaningful and positive change in behavior. Behavior analysts are employed in numerous fields, including general and special education, mental health, disability, business, and institutions of higher learning. There is a high demand for individuals who finish their degree and obtain certification who then can practice as independent educational specialists or clinicians. The Behavior Analyst Certification Board, Inc. (http://bacb.com) has approved the course

sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination. Applicants will have to meet additional requirements to qualify.

MS in Applied Behavior Analysis

The course sequence can be completed in two years on campus. The following is a sample program:

o .		o .		
First Year				
Fall	CR	Spring	CR Summer	CR
HLTHPSYC 8100	3	B HLTHPSYC 8250: Methods in Applied Behavior Analysis (course available Spring 2018).	3 HLTHPSYC 8300	3
HLTHPSYC 8200	3	B HLTHPSYC 8350: Individualized Assessment and Intervention (course available Spring 2018).	3	
HLTHPSYC 8800	3	3 HLTHPSYC 8800	3	
	9)	9	3
Second Year				
Fall	CR	Spring	CR	
HLTHPSYC 8400: Survey of Applied Behavior Analysis (course available Spring 2018)	3	B Theoretical Foundations in Behavior Analysis (course not yet created)	3	
Verbal Behavior (course not yet created)	3	Autism and Behavior Interventions (course not yet created)	3	
Thesis I /Capstone (course not yet created)	3	Thesis II/Capstone (course not yet created)	3	
	9)	9	

Total Credits: 39

In addition to the coursework requirement, you will need to meet experience standards (http://bacb.com/page/69). The BACB has three experience categories: (a) supervised independent fieldwork (1500 hrs), (b) practicum (1000 hrs), or (c) intensive practicum (750 hrs). Students in the Master's program will be required to complete intensive practicum at the MU Thompson Center for Autism and Neurodevelopmental Disorders for credit (6 credits) under the supervision of a BCBA.

Graduate Certificate in Applied Behavior Analysis

For information about the Graduate Certificate in Applied Behavior Analysis including a program description go to: https://gradstudies.missouri.edu/degreecategory/applied-behavior-analysis

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.2212-Gedt-ABA.html.

Athletic Training

Program Director:

David Colt, EdD, LAT, ATC

The Department of Physical Therapy, Athletic Training Program offers a Bachelor of Health Science degree in Athletic Training. The University of Missouri's Athletic Training Program is currently accredited by the Commission on Accreditation of Athletic Training Education (CAATE), 6850 Austin Center Blvd., Suite 100, Austin, TX 78731-3101. The undergraduate program is currently in the process of transitioning to a master's degree and will apply to the CAATE for a change in level of degree pending institutional, state, and regional accreditor approval. The Athletic Training program anticipates notifying the CAATE for a level of degree change in late 2018 or early 2019.

The Athletic Training program is no longer accepting students to the undergraduate athletic training program following the 2017-18 academic year. Pending graduate program approval, program updates will be announced, along with requirements, application procedures and timeline on the Athletic Training program web site.

Athletic training is a health care profession in which the Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings including high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. The practice of athletic training also includes, but is not limited to, physicians' offices, corporate and industrial institutions, the military and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act.

The Athletic Training Program at the University of Missouri is accredited by the Commission on Accreditation of Athletic Training Education (CAATE (http://www.caate.net)). Only graduates of CAATE accredited programs are eligible to sit for the Board of Certification exam.

Faculty

Associate Teaching Professor: D. Colt

Assistant Teaching Professor: D. Belmore, K. Belmore

Adjunct Faculty: M. McElhinney, N. Philpot

Clinical Adjunct Instructors: P. Beckmann, C. Bordelon, J. Gawlik, C. Hairston, C. Imhoff, J. Lewis, D. McDonnell, A. Mosel, R. Sharp, B. Sigley, B. Stephens, M. Swee, A. Williams

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Athletic Training (p. 575)

Graduate

While MU does not offer graduate degrees specifically in athletic training, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions and in the

other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

BHS in Athletic Training

Degree Program Description

Athletic training is a health care profession in which the Athletic Trainer assumes responsibility for the overall health care of the athletic population, particularly having an integral role in the prevention, recognition, care and rehabilitation of athletic injuries. Athletic Trainers have been employed in traditional settings including high schools, colleges, universities, professional sports teams, hospitals, and rehabilitation clinics. The practice of athletic training also includes, but is not limited to, physicians' offices, corporate and industrial institutions, the military and the performing arts. Regardless of the practice setting, Athletic Trainers practice athletic training (or provide athletic training services) according to educational preparation and state practice act. The Athletic Training Program consists of a one-year pre-professional phase followed by a three-year professional phase. Athletic Training is a professional program requiring secondary admission and a clinical education component. Clinical education experiences are completed at locations on and off campus during the three-year professional phase.

Major Program Requirements

The University of Missouri's Athletic Training Program is currently accredited by the Commission on Accreditation of Athletic Training Education (CAATE), 6850 Austin Center Blvd., Suite 100, Austin, TX 78731-3101. The undergraduate program is currently in the process of transitioning to a master's degree and will apply to the CAATE for a change in level of degree pending institutional, state, and regional accreditor approval. The Athletic Training program anticipates notifying the CAATE for a level of degree change in late 2018 or early 2019.

The Athletic Training program is no longer accepting students to the undergraduate athletic training program following the 2017-18 academic year. Pending graduate program approval, program updates will be announced, along with requirements, application procedures and timeline on the Athletic Training program web site.

Total Credits: 120

*The Freshman year is considered pre-professional. Students apply into the professional portion of the program during the Freshman year. All students applying into the professional portion of the program must meet the minimum requirements for application into the BHS in Athletic Training degree program.

Click here (https://healthprofessions.missouri.edu/athletic-training/bhsin-athletic-training/application) for ATP Application Requirements and

Clinical and Diagnostic Sciences

The Clinical and Diagnostic Sciences BHS is made up of five programs; Clinical Laboratory Sciences, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiological Science, and Respiratory Therapy.

Clinical Laboratory Science Program

School of Health Professions

605 Lewis Hall

(573) 882-8011 and (573) 884-1847

Director: Steven Starr

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators -- and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient's diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 16 hours of both Biology and Chemistry, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 11 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska's Medical Center in Omaha. After the initial 11 weeks in the

program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites, which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran's Hospital. Students graduate with a Bachelor of Health Science degree in Clinical and Diagnostic Sciences with emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Diagnostic Medical Ultrasound Program

School of Health Professions 406 Lewis Hall (573) 884-2994

Director: Moses Hdeib

The Diagnostic Medical Ultrasound (DMU) Program in the School of Health Professions (http://shp.missouri.edu) at the University of Missouri (http://www.missouri.edu) offers a Bachelor of Health Science (BHS) in Diagnostic Medical Ultrasound. The DMU Program is a 35-40 hours per week, 52 weeks per year Clinical Education Program. The DMU program has over 25 clinical sites through the state of Missouri in which students are placed during their clinical training.

Nuclear Medicine Program

School of Health Professions 605 Lewis Hall (573) 884-7843 Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of health of many of the body's internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

Radiological Science Program

School of Health Professions 607 Lewis Hall (573) 884-2623

Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammography, bone densitometry, and quality management.

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri. This discipline provides preparation for leaders in the field by offering a

Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship in computerized tomography or magnetic resonance imaging, which will lead to a certificate of completion and eligibility to take the national certifying examination in that area.

Mission Statement:

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Respiratory Therapy Program

School of Health Professions 617 Lewis Hall (573) 882-9722

Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country's first baccalaureate degree programs in Respiratory Therapy. The University of Missouri's Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.

The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

Graduate

• MHS in Clinical and Diagnostic Sciences (p. 585)

Clinical and Diagnostic Sciences

School of Health Professions 409 Lewis Hall (573) 884-2994

Director: Moses Hdeib

The Master of Health Science in Clinical and Diagnostic Sciences is offered by the School of Health Professions, Department of Clinical and Diagnostic Sciences. The Clinical and Diagnostic Program (DMU) is a 35-40 hours per week, 52 weeks per academic year clinical education program.

Future Certification and Careers

Upon successfully completing the requirements of the DMU Program, MHS Graduates will be eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for registry in Abdomen, Obstetrics and Gynecology, Vascular Technology and Cardiac Ultrasound.

Financial Aid

Please contact the financial aid office. Some programs require an application and extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

BHS in Clinical and Diagnostic Sciences

Degree Program Description

For this degree program, students must choose an emphasis area: Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiography, and Respiratory Therapy. Each emphasis area prepares graduates for critical diagnostic and disease management roles that are highly technical and primarily situated in acute care environments. These nationally accredited entry-to-professional practice programs emphasize experiential learning in a wide variety of clinical sites that are highly relevant to current workforce demands. Refer to the degree program descriptions for the emphasis areas for more details.

Major Program Requirements

Please refer to the emphasis area pages for degree requirements: Clinical Laboratory Science (p. 578), Diagnostic Medical Ultrasound (p. 580), Nuclear Medicine (p. 581), Radiography (p. 582), Respiratory Therapy (p. 583).

Semester Plan

Please refer to the emphasis area pages for semester plans: Clinical Laboratory Science (p. 578), Diagnostic Medical Ultrasound (p. 580), Nuclear Medicine (p. 581), Radiography (p. 582), Respiratory Therapy (p. 583).

BHS in Clinical and Diagnostic Sciences with Emphasis in Clinical Laboratory Science

Degree Program Description

Clinical laboratory scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators -- and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient's diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists. The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, and 11 months in the clinical phase of the CLS program. The clinical year begins during the third week of May, with 13 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska's Medical Center in Omaha. After the initial 13 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three clinical sites. which include the University of Missouri Hospital and Clinics, Boyce and Bynum Pathology Laboratories, and Harry S. Truman Memorial Veteran's Hospital. Students graduate with a Bachelor of Health Science degree in Clinical and Diagnostic Sciences with emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center. Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), All courses listed below require a grade of C-or better for the CLS program. In addition to the degree requirements below, the CLS program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the prerequisites and prepare for the program application. The application process is competitive, and meeting minimum criteria does not guarantee admission. There are a limited number of clinical positions

are available. A minimum 2.5 cumulative in addition to a math/science course G.P.A. are required to be considered for acceptance.

NOTE: Third Year - Summer to be completed in Omaha.

BHS in Clinical and Diagnostic Sciences with Emphasis in Diagnostic Medical Ultrasound

Degree Program Description

Ultrasonography, commonly called sonography, is a diagnostic medical procedure that uses high-frequency sound waves to produce dynamic visual images of organs, tissues, or blood flow inside the body. This type of procedure is often referred to as a sonogram or ultrasound scan. Ultrasonography can be used to examine many parts of the body, such as the abdomen, breasts, female reproductive system, superficial structures, prostate, heart, and blood vessels. Ultrasonography can record capture size, function, structure and any pathological lesions with real time tomographic images in 2D, 3D. The professionals who perform these procedures are known as sonographers or ultrasound technologists. There are several areas of specialization in the field of ultrasound: Abdomen, Obstetrics/Gynecology, Echocardiography, and Vascular technology. The Diagnostic Medical Sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Major Program Requirements

The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Students must complete the courses below with a grade of C or higher to earn the BHS in Clinical and Diagnostic Science with an emphasis in Diagnostic Medical Ultrasound, in addition to degree and University requirements (p. 33), including University general education (p. 34) requirements. In addition to the degree requirements below, the Diagnostic Medical Ultrasound program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the pre-requisites and prepare for the program application.

Program Pre-requisite

ENGLSH 1000	Exposition and Argumentation	3
PSYCH 1000	General Psychology	3
COMMUN 1200	Public Speaking	3
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory	5
or BIO_SC 1500	Introduction to Biological Systems with Laboratory	
CHEM 1320	College Chemistry I	4
PHYSCS 1210	College Physics I	4
CDS 2190	Medical Terminology	3
PHIL 2440	Medical Ethics Clinical Ethics	3
or HLTH_SCI 4480	Clinical Ethics	

Total Credits		126
DMU 4993	Ultrasound Clinical II	8
DMU 4944	Vascular Ultrasound Clinical IV	7
DMU 4943	Ultrasound Clinical III	6
DMU 4941	Ultrasound Clinical I	7
DMU 4332	Vascular Ultrasound	4
DMU 4330	Vascular Ultrasound Lab	3
DMU 4326	Vascular Ultrasound Physics, Instrumentation and Hemodynamics	3
DMU 4325	Ultrasound Clinical Pharmacology and Contrast Agents	3
DMU 4322	Superficial Organs Ultrasound	3
DMU 4320	Obstetrics Ultrasound	3
DMU 4318	Gynecology Ultrasound	3
DMU 4315	Ultrasound Instrumentation	3
DMU 4314	Abdominal Ultrasound	5
DMU 4313	Ultrasound Physics	3
DMU 4312	Sectional Anatomy	3
DMU 4311	Pathological Images of Ultrasound	3
DMU 4309	Normal Ultrasound Clinical	5
DMU 4234	Clinical Pathophysiology	3
DMU 4001	Topics in Diagnostic Medical Ultrasound	3
Major Core Requirements		
HLTH_SCI 3900W	Introduction to The Research Process and Evidence Base - Writing Intensive	3
DMU 1000	Introduction to Diagnostic Medical Ultrasound	1
or ESC_PS 4170	Introduction to Applied Statistics	
STAT 1200	Introductory Statistical Reasoning	3
MATH 1100	College Algebra	3
MPP 3202	Elements of Physiology	5
PTH_AS 2201 & PTH_AS 2203	Human Anatomy Lecture and Human Anatomy Laboratory	5

Professional Certification

Upon successfully completing the requirements of the program, BHS graduates are eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for certification in Abdomen, Obstetrics and Gynecology and Vascular Technology.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR
PSYCH 1000	3 DMU 1000	1
MATH 1100	3 ENGLSH 1000	3
HIST 1100, 1200, or POL_SC 1100	3 SOCIOL 1000	3
CHEM 1320	4 BIO_SC 1010 & BIO_SC 1020	5
	Humanities	3
	13	15

Second Year			
Fall	CR Spring	CR Summer	CR
COMMUN 1200	3 CDS 2190	3 DMU 4312	3
PHYSCS 1210	4 MPP 3202	5 DMU 4313	3

BHS in Clinical and Diagnostic Sciences with Emphasis in Nuclear Medicine

Degree Program Description

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to produce images, treat diseases and to analyze biologic specimens. The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

Major Program Requirements

Students must complete the courses below with a grade of C or higher to earn the BHS in Clinical and Diagnostic Science with an emphasis in Nuclear Medicine, in addition to degree and University requirements (p. 33), including University general education (p. 34) requirements. In addition to the degree requirements below, the Nuclear Medicine program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the prerequisites and prepare for the program application.

Program Pre-Requisites		
ENGLSH 1000	Expedition and Assumentation	2
	Exposition and Argumentation	3
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology	5
G 2.0_00 1020	and General Biology Laboratory (or	
	BIO_SC 1500)	
COMMUN 1200	Public Speaking	3
MATH 1100	College Algebra	3

BHS in Clinical and Diagnostic Sciences with Emphasis in Radiography

Degree Program Description

Radiologic technologists are highly skilled medical imaging professionals who work closely with physicians to perform procedures used to diagnose, monitor, and treat disease. They provide patient services using a variety of imaging modalities such as general x-ray, magnetic resonance imaging (MRI), computerized axial tomography (CT-

scan), cardiovascular-interventional technology, mammography, bone densitometry, and quality management. Students finish their general education requirements and program prerequisites (biology, chemistry, anatomy, physiology, medical terminology, and statistics) during their freshman and sophomore years. The professional phase of the program begins summer semester between years two and three of undergraduate study, and consists of six consecutive semesters of classroom courses integrated with clinical experiences at several facilities in Columbia, MO. The program places an emphasis on active learning and provides many opportunities to develop skills needed for future education and career advancement. Upon graduation students are well-prepared to sit for the national registry exam in general diagnostic imaging. An advanced imaging clinical externship is available to students who wish to gain competency and become registered in MRI or CT. Graduates may work in a variety of settings including hospitals, clinics, imaging centers, mobile services, research centers, and industry as staff technologists, specialty technologists, supervisors, managers, applications specialists, researchers, or educators. Hospital settings give technologists an opportunity to choose working hours around the clock, throughout the entire 7-day week and may require on-call hours.

Major Program Requirements

Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology 20 North Wacker Drive, Suite 2850 Chicago, Illinois 60606-3182 (312) 704-5300 mail@jrcert.org

Students transferring from other institutions should contact the program director to identify appropriate pre-requisite courses for admission. All pre-requisite courses require a grade of C- or higher, and students must make a separate application to begin the professional phase and earn a BHS in Clinical and Diagnostic Science with an emphasis in Radiography. Students must complete pre-requisite courses in addition to major, degree and University requirements (p. 33), including University general education requirements (p. 34).

Program Pre-Requisites

BHS in Clinical and Diagnostic Sciences with Emphasis in Respiratory Therapy

Degree Program Description

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician. The twoyear, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain in Columbia. The MU RT program has a satellite campus at Mercy Hospital in St. Louis, Missouri. Accreditation of the program is granted by the Commission on Accreditation for Respiratory Care (CoARC) www.coarc.com (http://www.coarc.com). Published outcomes for all CoARC accredited programs are listed by state at: www.coarc.com/Students/Programmatic-Outcome-Data.aspx (https://www.coarc.com/Students/Programmatic-Outcome-Data.aspx)

Major Program Requirements

Students must complete the courses below with a minimum grade of C-or higher for admission to the program, and a separate application is required for the professional phase of the program. Students transferring from other institutions should contact the program director to identify appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements to earn the BHS in Clinical and Diagnostic Science with an emphasis in Respiratory Therapy.

⁺ Course is taught solely on the internet.

Program Pre-requisites		
RS_THR 1000	Introduction to Respiratory Therapy (Optional)	1
COMMUN 1200	Public Speaking	3
MATH 1100	College Algebra	3

MHS in Clinical and Diagnostic Sciences

Degree Requirements

Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

Admission Contact Information
Dr. Moses Hdeib hdeibm@health.missouri.edu
406 Lewis Hall
Columbia, MO 65211
(573) 884-2994

Admission Criteria

Deadline for spring entrance: December 1

- Minimum TOEFL scores:
 The minimum TOEFL score for the Diagnostic Medical Ultrasound

 Program is 100 in the new scoring model. This is equivalent to a
- paper-based score of 600. Test of Written English (TWE) 4.5

 Minimum GRE score: check with Program Director of Graduate
- Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

Required Application Materials

To the Graduate School:

- · All required Graduate School documents
- GRE scores

To the Diagnostic Medical Ultrasound Program:

- Departmental Application
- Transcripts

Communication Science and Disorders

Stacy Wagovich, Chair School of Health Professions 301 Lewis Hall (573) 884-2940 mucsd@health.missouri.edu

Advising Contact

Jill S. Diener or Lindsey Hagglund (573) 882-8011

Communication Science and Disorders includes the study of normal language, speech, and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master's or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS degree (p. 587).

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology, and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders.

Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation, and voice problems. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master's and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master's degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master's degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master's degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master's degree, which is the entry-level degree for speech-language pathologists, typically takes two years beyond the undergraduate degree. Additional prerequisite coursework is required for students with undergraduate degrees outside the field. Students wishing to pursue a career in audiology will need to attend a program that offers a clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the State. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master's thesis option is available to students interested in conducting research.

Funding

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

BHS in Communication Science and Disorders

Degree Program Description

Communication Science and Disorders (CSD) includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. The CSD major is the first step in preparing for careers in the professions of speech-language pathology and audiology. Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language, and they plan and carry out the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments. The CSD undergraduate curriculum fully prepares students for graduate study in either of these fields. (The professions of speech-language pathology and audiology require masters or doctoral degrees.) The CSD undergraduate coursework provides students with a broad understanding of the scientific bases of speech, language, and hearing, the different types of communication disorders, and the types of diagnostic and therapeutic methods utilized in the field. Undergraduate students in the CSD department at MU benefit from a low student-faculty ratio, practical clinical experience in our language preschool, our accent modification program, and our research labs led by outstanding faculty, and a wellestablished student organization.

Major Program Requirements

Students are required to apply to the Communication Science and Disorders major. Applications for admission into the BHS program are considered once a year, and they must be submitted by February 1 of the student's sophomore year. (Note: Later applications will be considered if open seats remain in the upcoming junior class.) In most cases, applicants will have completed at least 42 hours of college credit before applying, and students who are admitted will have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are strongly recommended. However, meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program. A grade of C- or higher is required in the program and major core requirements.

Students must complete the following course requirements, as well as university (p. 33) and general education requirements for graduation with a bachelor's degree from the School of Health Professions and the University of Missouri:

Program Requirements

-		
COMMUN 1200	Public Speaking	3
ENGLSH 1000	Exposition and Argumentation	3
or ENGLSH 1000H	Honors Exposition English

Total Credits: 120

MHS in Communication Science and Disorders

Plan of Study

MHS candidates are required to complete a minimum of 48 semester credit hours in graduate-level courses with grades of B- or higher. No fewer than 24 credit hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 credit hours in clinical practicum courses may be counted toward the 48-hour requirement. Additional credit hours are required to meet clinical practicum requirements for certification and licensure in the field.

Thesis Option

The student may choose the thesis option for the master's degree; work toward the thesis may count for up to six semester hours of credit.

Prerequisite Coursework

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in CSD. Any prospective applicant with an undergraduate degree in a major field other than Communication Science and Disorders should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the CSD Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

Examination

During the final semester of course work, we expect master's degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program's online Graduate Student Handbook for additional information.

Admission Contact Information

Nick Anagnostis mucsd@missouri.edu 301 Lewis Hall; Columbia, MO 65211 (573) 884-6085

Admission Criteria

Deadline for Summer entrance (required for all applicants): February 1

- Minimum Undergraduate GPA: 3.0 (on last 60 credit hours of course work)
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100*	600

- * Minimum TOEFL (iBT) score of 100, with minimum score of 28 on speaking
- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1000 (preferred)	
On or After August 1, 2011	300 (preferred)	

Required Application Materials

All applicants to the MHS program in Communication Science and Disorders with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) at csdcas.liaisoncas.org/csdcasstudents/. The CSDCAS Applicant Portal Link will open on August 2, 2018 to begin accepting applications for the 2019-20 academic year. Additional information about the application process may be found on the Communication Science and Disorders MHS Application (https://healthprofessions.missouri.edu/communication-science-and-disorders/degrees/master-of-health-science-csd/#application-process) web page, which includes the correct institution code for submitting GRE scores to CSDCAS.

Personal interviews may be requested.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU Graduate School's online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.

MHS in Communication Science and Disorders with Emphasis in Speech-Language Pathology

The Master of Health Science (MHS) degree program prepares students for professional practice in speech-language pathology. Students in this program receive a strong academic and clinical background in current theory and application in the field of communication disorders from faculty who are committed to excellence in teaching and who are involved in clinical and basic research. Candidates for the MHS degree must complete a minimum of 48 credit hours of graduate coursework plus at least 375 hours of clinical practicum that is supervised by certified clinical faculty. In addition to the MU Speech and Hearing Clinic, the city of Columbia and surrounding communities in mid-Missouri provide for a wide range of clinical practicum opportunities as well as a diverse client population. Students who wish to also may pursue clinical practicum experiences in other geographical locations during their final semester in the program. A thesis option also is available for students interested in research and/or further study toward the Doctor of Philosophy degree.

The MHS degree in CSD typically takes students two full years to complete if their baccalaureate degree is in communication science and disorders. If their undergraduate study was in another field, the degree program requires at a minimum 30 additional credit/semester hours of prerequisite coursework. This coursework may be completed through any college or university that offers an undergraduate degree in CSD and must include courses in both basic communication sciences and some communication disorders. It is recommended that the student have their prerequisite coursework approved by the Department's graduate program director prior to application to the MHS degree program. Applicants do not have to complete all prerequisite coursework before applying to, or beginning, the MHS program; however, they must be, at a minimum, in the process of doing so. All students must have successfully completed a baccalaureate degree (in some field) before beginning the MHS program in Communication Science and Disorders. For more information, contact the Department at mucsd@health.missouri.edu.

MHS graduates are required to meet all academic and clinical requirements for the Certificate of Clinical Competence (CCC) awarded by the American Speech-Language Hearing Association (ASHA). A passing score of 162 on the PRAXIS II Speech-Language Pathology examination is required for graduation from the MHS program in CSD. In addition to serving as the comprehensive examination for masters candidates in CSD, the PRAXIS II also is required for the Certificate of Clinical Competence, for Missouri professional licensure, and for Missouri school certification as a speech language specialist. For well over 20 years, 100% of all graduates from MU's CSD program have passed this national exam and our mean and median scores are significantly higher than the national averages. In addition, graduates of the program have enjoyed excellent job opportunities upon graduation, with many having more than one job offer before finishing their masters program.

The CSD MHS program at MU is relatively small and selective. Students benefit from a low student-faculty ratio, close supervision in the MU Speech and Hearing Clinic, and a challenging yet supportive learning

environment. Faculty in CSD are easily accessible, and strong student-faculty relationships are easily developed.

The CSD department welcomes all visitors interested in meeting our faculty and students and touring our facilities. If you would like to visit, we recommend that you schedule an appointment by e-mailing us at mucsd@health.missouri.edu.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Communication Science and Disorders (https://gradstudies.missouri.edu/degreecategory/communication-science-and-disorders) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

Health Science

R. Hogan, Chair School of Health Professions 501 Clark Hall (573) 882-8422 hoganr@health.missouri.edu

The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the health science program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including public health, psychology, sociology, medical anthropology, education, and social work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, and access to healthcare. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS in Health Science concurrently with the Doctor of Physical Therapy (p. 779) if they have been admitted through the Department of Physical Therapy's early admission program option. Students who choose to pursue this option are strongly encouraged to work with their advisor to ensure completion of degree requirements.

Faculty

Associate Professor A. Frech, E. Schatz*, M. Teti*, N. Cheak-Zamora* Associate Clinical Professor R. Hogan

Associate Teaching Professor B. Blackburn, K. Flynn Peters, M.

Kuhnert, C. Orbann, D. Ruggeri, L. Saffran

Assistant Professor C. Altman, H. Choi, W. Majee

Assistant Teaching Professor R. Bowman, M. Vetter-Smith, J.

Wintemberg

Instructor D. Hume*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Health Science (p. 590)
 - with emphasis in Health & Wellness Services (p. 591)
 - with emphasis in Leadership & Policy (p. 592)
 - with emphasis in Pre-Professional (p. 593)
 - with emphasis in Rehabilitation Sciences (p. 595)

The Department of Health Sciences' BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the Health Science degree program may also be qualified to enter either graduate or professional health science programs such as Occupational Therapy, Physical Therapy, Health Administration and Public Health. The Health Science program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS). Students who start at the University of Missouri or declare the health science degree in Fall 2016 or later must declare an emphasis area upon declaring the major. Students in the Mizzou Online program will not be required to declare an emphasis area, though declaring an emphasis area may be an option depending on the student's interests and background.

Departmental Requirements

Courses may be delivered using traditional or distance delivery methods. The Health Science degree program credits must include a minimum of 120 university-level credit hours, including: general education (p. 34) coursework, core required courses that comprise a minimum of 20 credit hours, professional emphasis requirements, 18 hours of approved, required electives that complement the student's intended pathway.

Students are required to file a graduation plan for the Health Science degree by the time they have completed 60 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall and spring semesters. Students who transfer from another institution or another school/college at MU with 60 or more hours must file their graduation plan within the first semester of enrollment in the Health Science program.

Residency Requirement

There is a residency requirement for Health Science majors. Students must complete, at minimum, their last 30 hours of coursework for the degree as declared Health Science majors in the School of Health Professions. The 30 hour residency requirement applies to students who wish to declare an emphasis area, as well. Students must be in the Health Science major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students

transferring into the major during the semester will begin the following semester.

Admission to the BHS in Health Science

The BHS in Health Science Program does not require an application. Students may declare the major, and emphasis area, by indicating it on the MU admission application (for new students), completing a transfer of division form (for current MU students), or notifying their academic advisor of their intention to declare a Health Science major (for current SHP students). There is a 2.0 MU, cumulative and term GPA requirement to declare a major in Health Science. The cumulative GPA is calculated using all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Science program. Students who do not maintain the required 2.0 term and cumulative GPA will receive communication regarding probation or ineligible to re-enroll status. Students who fail to achieve the GPA requirement may continue in the program for two probationary semesters.

Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

BHS in Health Science

Degree Program Description

A Health Science major is for students who are interested in non-clinical health careers and for those interested in graduate or professional health science programs. Non-clinical health career options include medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates holding the BHS in Health Sciences may also be qualified to enter either graduate or professional health science programs, such as physical therapy, public health, chiropractic medicine, health informatics and hospital administration. On-campus, Health Science majors choose one of four sub-plans. These sub-plans include: Rehabilitation Sciences, for students pursuing physical therapy, occupational therapy, chiropractic, orthotics/prosthetics, and similar degrees; Pre-Professional, for students who are pre-medicine, dentistry, pharmacy, physician assistant studies, optometry and related graduate/professional programs that require an undergraduate degree; Leadership and Policy, for students who are interested in pursuing non-clinical pathways after graduation, through graduate programs in health administration or working in areas such as health informatics, sales, program coordination and support areas in healthcare; and Health and Wellness Services, for students who wish to pursue health promotion, wellness programming, non-profit work, applied behavioral analysis, as well as students who wish to pursue accelerated nursing after graduation with the health science degree. The health sciences curriculum includes courses in public health, health literacy, healthcare leadership and management, healthcare policy and funding, and clinical ethics. The capstone course sequence includes a required internship experience appropriate for the chosen sub-plan. Students may choose a health sciences study abroad experience approved by the Office of Experiential Learning to meet the internship requirement.

Major Program Requirements

- Students must have a 2.0 GPA, most recent fall or spring term, cumulative including all transfer credit, and MU GPA to declare the Health Science major.
- All required core and elective coursework for the BHS in Health Science program, including emphasis and approved health science elective courses, must be completed with a grade of C- or higher.
- If a student earns a deficient grade in a core required course for the Health Science major, they may repeat a core required course one time. If the second attempt is not a C- or higher, students are required to transition out of the major.
- Students must complete all university requirements, including general education (p. 34), and Departmental Requirements (p. 589), in addition the degree requirements below.

Capstone Requirement

The BHS in Health Science capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 is an internship that is approved by the Department of Health Sciences' Office of Experiential Learning. Students may find their own internship experience or work with the course instructor/internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:

- an internship at an agency, company, or corporation of their choice.
 For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from the Health Sciences Internship advisor;
- service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
- · an approved study abroad program

In addition to University of Missouri requirements, including University general education, the Health Science degree requires the following, each of which must be completed with a grade of C- or higher:

Program Requirements

ENGLSH 1000	Exposition and Argumentation (or equivalent)	3
or ENGLSH 1000H	Honors Exposition English	
MATH 1100	College Algebra	3-5
or MATH 1160	Precalculus Mathematics	
BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory	5
or BIO_SC 1500	Introduction to Biological Systems with Laboratory	
or BIO_SC 1500H	Introduction to Biological Systems with Laboratory Honors	
Physical Science course		1+
Behavioral Science course		1+

BHS in Health Science with Emphasis in Health & Wellness Services

Degree Program Description

The health and wellness services emphasis will prepare students for application to clinical or graduate programs in fields such as accelerated nursing, applied behavior analysis, or health education and promotion. The health and wellness services emphasis may also prepare students who have appropriate work experience as an undergraduate to work in fields such as health and human services, non-profit organizations, and corporate health promotion, and wellness programming. The health and wellness emphasis services area includes 20 hours of core required courses, professional emphasis requirements and required health science electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the health and wellness services emphasis include: approved study abroad, health promotion, physical fitness and nutritional services through WELLAWARE at Boone Hospital Center, Safe Kids Columbia, and Case Management at Lutheran Family and Children's Services.

Major Program Description

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Health and Wellness Services emphasis requires the following, each of which must be completed with a grade of C- or higher:

Program Requirements

ENGLSH 1000	Exposition and Argumentation	3

BHS in Health Science with Emphasis in Leadership & Policy

Degree Program Description

The leadership and policy emphasis in the health science major prepares students to enter careers in health administration, informatics, or sales. The leadership and policy emphasis may also prepare students for graduate studies in health administration, informatics, public health, policy or law. The leadership and policy emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships include health administration, health consultant, clinical analysis and strategic planning at RehabCare, Health Literacy Missouri, Institute for People, Place and Possibility, Tiger Institute and Cerner Corporation.

Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Leadership and

Policy emphasis requires the following, each of which must be completed with a grade of C- or higher:

Program Requirements

ENGLSH 1000	Exposition and Argumentation	3

BHS in Health Science with Emphasis in Pre-Professional

Degree Program Description

The pre-professional emphasis in the health science major prepares students to apply for graduate and professional programs in medicine, dentistry, pharmacy, physician assistant studies, optometry and related areas. The pre-professional emphasis may also prepare students who have appropriate work experience as an undergraduate to work for clinical research companies, medical or pharmaceutical sales or other non-clinical health careers that require a background in science and knowledge of health care. The pre-professional emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the pre-professional emphasis include: Missouri Telehealth Network, MedZou Community Health Center, PhysAssist, and Scribe America.

Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Pre-Professional emphasis requires the following, each of which must be completed with a grade of C- or higher:

Program Requirements

ENGLSH 1000	Exposition and Argumentation	3

BHS in Health Science with Emphasis in Rehabilitation Sciences

Degree Program Description

The rehabilitation science emphasis prepares students for application to graduate programs in fields such as occupational therapy, physical therapy, chiropractic, orthotics/prosthetics and similar degrees. The rehabilitation science emphasis may also prepare students who have appropriate work experience as an undergraduate to work as coaches for alternative community training organizations. The rehabilitation science emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the rehabilitation science emphasis include: Therapeutic Equine Center, MU Adaptive Gymnastics, MU Thompson Center for Autism and Neurodevelopmental Disorders, Mizzou Therapy Services, Wonderland Camp.

Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Rehabilitation Sciences emphasis requires the following, each of which must be completed with a grade of C- or higher:

Occupational Therapy

Department of Occupational Therapy School of Health Professions 801B Clark Hall Columbia, Missouri 65211 (573) 882-3988

Advising Contact

MUOT@health.missouri.edu

Scholarship Information Contact

https://healthprofessions.missouri.edu/student-services/scholarships/

Occupational therapists are skilled health professionals who provide services to individuals across the lifespan to maximize their independence in meaningful everyday activities. Occupational therapists use research, scientific evidence, and a holistic perspective to incorporate an individual's valued occupations into the intervention process.

The mission of the Department of Occupational Therapy is to improve the health and well-being of society by assisting people to optimize their participation in everyday life occupations.

We achieve this mission through the integration of our:

- Professional education of clinically innovative occupational therapists prepared to meet the dynamic occupational needs of people and communities across the lifespan;
- Steadfast commitment to service to our community and our profession;
- · Evidence-based practice; and
- Commitment to scholarship, discovery and clinical research to advance our profession.

To become a registered occupational therapist, an entry-level master's degree is required.

All applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

The Accreditation Council for Occupational Therapy Education (ACOTE) has mandated that the entry-level degree will move to the doctoral (OTD) level by 2027. The Department of Occupational Therapy is working with campus and state officials to plan for the transition to an OTD degree program. An exact date for the transition has not been approved.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, (301) 652-2682.

Faculty

Associate Teaching Professor C. Gateley**
Distinguished Professor W. Dunn**

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Pre-Occupational Therapy (p. 596)

The last cohort for BHS in Pre-OT will be graduating in 2019. No further cohorts will be accepted for a combined Master's program. Applicants will need to have a bachelor's degree by the start of the Summer semester that they would begin coursework.

Graduate

The Department of Occupational Therapy does not offer any graduate degrees. We do offer an accredited Masters of Occupational Therapy (MOT) at the professional level. Please see the Professional Occupational Therapy section (p. 777) in the catalog for more information.

BHS in Pre-Occupational Therapy

The Department of Occupational Therapy no longer offers an undergraduate degree program. The final cohort of students accepted into the previously combined bachelor's / master's program began coursework in Summer 2016 and completed undergraduate coursework in Fall 2017.

All applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

Physical Therapy

K. Gibson, Chair Department of Physical Therapy School of Health Professions 801 Clark Hall (573) 882-7103

Fax: (573) 884-8369

https://healthprofessions.missouri.edu/physical-therapy/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Pre-Professional Physical Therapy (p. 597)

Graduate

The Department of Physical Therapy does not offer any graduate-level degrees. We do offer Doctor of Physical Therapy at the professional level. Please see the Professional Physical Therapy section (p. 779) in the catalog for more information.

BHS in Pre-Professional Physical Therapy

Degree Program Description

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed. The University of Missouri offers a Doctor of Physical Therapy degree. This degree is granted to some students who gain Advanced Admission to the Doctor of Physical Therapy program. Students may not major in the BHS in Preprofessional Physical Therapy unless they have applied and been accepted for Advanced Admission to the Doctor of Physical Therapy program.

Major Program Requirements

Advanced Admission grants students the opportunity to apply to the DPT program during the junior year and enter the DPT program after completing 90 credit hours of college level coursework. Students who seek to gain early admission to the DPT program must complete a minimum of three years (six fall/spring semesters or 12 quarters of full-time enrollment) of residential coursework on a college campus prior to starting the DPT program. To be eligible to apply for advanced admission, students must have a 3.5 cumulative GPA. Students accepted for the early admission program must complete 90 credit hours, including University of Missouri requirements, University general education, and pre-requisite coursework prior to beginning the professional phase of the program. At the time of application, students may have up to three of the following courses to be completed, with no more than two planned for the spring semester: Statistics, Chemistry, Physics 1, Physics 2, Biology, Physiology, Medical Terminology and Anatomy*.

Pre-requiste Courses

ENGLSH 1000	Exposition and Argumentation ^	3
or ENGLSH 1000H	Honors Exposition English	
MATH 1100	College Algebra [^]	3-5
or MATH 1160	Precalculus Mathematics	
HLTH_SCI 3900W	Introduction to The Research Process and Evidence Base - Writing Intensive	3

Students must complete departmental requirements, including at least 6-8 hours of 3000/4000-level coursework in one of the following content areas: a) Biological/Physical Science, b) Social/Behavioral Science. (See suggested courses below.) #

ocience. (See suggested cot	iloco bolow.j

Public Health

Public health is an exciting field of work dedicated to protecting and improving the health and well-being of communities, particularly those seen as the most vulnerable. While a doctor treats people who are sick, public health practitioners try to prevent people from getting sick or hurt in the first place, and promote wellness by encouraging healthy behaviors. Examples of public health and an effective public health system surround us every day. Public Health graduates will contribute to an increasingly needed skilled public health workforce that will work on protecting our current and future public health. Public Health graduates can work in numerous sub-disciplines such as epidemiology or disease tracking, biostatistics, health education, environmental health, health policy, or disaster preparedness. For example, graduates may develop health education materials or health education curricula for communities, hospitals or health agencies. In positions at local health departments graduates may work in teams to track emerging diseases, develop and administer HIV testing programs, or identify and address health disparities. They also may work in industry or academia researching public health problems and solutions. Graduates also may help develop policy briefs for public health agencies, assist in the development and implementation of disaster management policies and plans, or track and address environmental public health concerns. The opportunities for rewarding careers in public health are as diverse as public health itself.

Faculty

Professor B. Beernsten*, M. Hosokawa*

Associate Professor T. Evans**, B. Houston*, J. McElroy*, P. Pithua**, J. Stemmle*. M. Yu**

Assistant Professor W. Majee*, S. Potochnick**,

Associate Teaching Professor S. Lee*, L. Saffran*, L. Schultz*

Associate Research Professor L. Tenkku-Lepper*

Assistant Adjunct Professor T. Rose*

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Public Health (p. 599)

The mission of the Bachelor of Health Science in Public Health is to teach students to advance public health knowledge, promote healthy behaviors and environments, address and eliminate health disparities, and prevent disease. We value:

- Health as a right, and strive to reduce or eliminate inequity and injustice that affects the health and dignity of all people;
- Diversity as a strength in our education, research, and work as the right thing to do and the best strategy to engage and help the communities we care about;
- Interdisciplinary collaboration as the key to creatively solving today's challenging health issues;
- · Critical thinking to forge new solutions.

Admission to the BHS in Public Health program requires:

- Successful completion of 60 hours (junior standing)
- Minimum of 2.75 GPA in first 60 hours
- Grade of B- or better in HLTH_SCI 3300
- · Grade of C or better in Statistics courses
- · Completed application packet
- Two recommendations (names and contact only)
- Commitment to the program's mission and core values

For more information please email

DHSPublicHealth@health.missouri.edu or contact Program Director, Dr. Michelle Teti (tetim@health.missouri.edu), with questions.

Graduate

- MPH in Public Health (p. 600)
 - with emphasis in Health Promotion and Policy (p. 601)
 - with emphasis in Veterinary Public Health (p. 601)
- Graduate Certificate in Public Health (p. 602)

Program Director: Lise Saffran

The MPH Program has two emphasis areas, Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, Social Work, and Veterinary Medicine; and graduate certificates in Public Health, Global Health, and Epidemiology. This public health coursework reflects the University of Missouri's strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, communication, and related fields.

802 Lewis Hall 573-884-6844 http://publichealth.missouri.edu/

BHS in Public Health

Degree Program Description

Public health includes activities needed to promote and protect the health of people and the communities where they live. While doctors treat people who are sick, the field of public health is organized around trying to prevent illness and injuries in the first place; and promote healthy behavior. People in the field of public health work to assure the conditions in which people can be healthy by tracking disease and outbreaks, preventing injuries, and studying how and why some people are more likely to suffer from poor health and health inequities than others. The many facets of public health include speaking out for laws or policies that promote smoke-free indoor air, school nutrition, and seat belts; collecting and disseminating education about how to stay healthy, and offering science-based solutions to health problems - among others.

The Bachelor of Health Science in Public Health degree prepares students for introductory careers in all core areas of public health, such as health education, epidemiology, health policy, and environmental health. The courses introduce students to key concepts, theories, problems, and solutions in public health, and also focus on the links between public health and social justice and human rights.

Major Program Requirements

Students are required to apply to the Bachelor of Health Science in Public Health major. Admission to the program requires: successful completion of 60 hours (junior standing), minimum of 2.75 GPA in first 60 hours, grade of B- or better in HLTH_SCI 3300, grade C or better in the required statistics course, completed application packet, two recommendations, and commitment to the program's mission and core values. Meeting the minimum criteria and declaring a major of pre-Public Health does not quarantee acceptance into the program.

Note: The Bachelor of Health Science in Public Health program is interested in applicants with a wide range of life experiences and skills. If you do not meet or only barely meet the set program eligibility (such as GPA) but are interested in the program, an optional statement of eligibility essay may be submitted. This optional essay must be submitted with your application materials and does not guarantee acceptance into the program. Please see the application materials for more details.

In addition to University of Missouri requirements, including University general education, the Bachelor of Health Science in Public Health degree requires the following:

Program Requirements

ENGLSH 1000	Exposition and Argumentation ^	3

MPH in Public Health

MPH Application and Admission Information

Admission Contact Information MPH Program (mumphprogram@missouri.edu) 802 Lewis Hall Columbia, MO 65211 573-884-6844

https://healthprofessions.missouri.edu/mph/

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri's strength in the health professions, social work, journalism,

public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

Degrees

The MPH is available in two emphasis areas:

- Health Promotion and Policy (http://publichealth.missouri.edu/ programs_health_promo_pol.php)
- Veterinary Public Health (http://publichealth.missouri.edu/ programs_vet_pub_health.php)

Four dual degrees are also offered:

- MPH/Doctor of Veterinary Medicine (http://publichealth.missouri.edu/ programs_mphdvm.php)
- MPH/Master of Public Affairs (http://publichealth.missouri.edu/ programs_mphmpa.php)
- MPH/Master of Arts, Journalism (http://publichealth.missouri.edu/ programs_mphma.php)
- MPH/Master of Social Work (http://ssw.missouri.edu/msw_dual.html)

Application Deadlines

• Fall semester: June 1

Spring semester: October 1Summer semester: April 1

- · International students*: May 1 (fall semester)
 - * International applicants will only be accepted for Fall Semester admission, unless the applicant is currently a University of Missouri (MU) student enrolled in another full-time program.

Admission Criteria

· Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

Required Application Materials

For more information to apply click here (https://healthprofessions.missouri.edu/mph/about/admission).

MPH in Public Health with Emphasis in Health Promotion and Policy

This program combines a thorough knowledge of behavior change theory and program planning and evaluation with valuable knowledge of how policy decisions are influenced and made. Particularly attractive to students with undergraduate degrees in psychology, social work, political science, communications and other related fields. For more information about this program, please visit: http://healthprofessions.missouri.edu/mph/mph-degree/emphasis-areas/

Required Courses

P_HLTH 7160	Interdisciplinary Perspectives in Global Health	3
P_HLTH 8420	Principles of Epidemiology	3
STAT 7020	Statistical Methods in the Health Sciences	3
P_HLTH 7952	Research Methods in Public Health	3

Graduate Certificate in Public Health

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission

Students wishing to pursue a Graduate Certificate in Public Health should complete the Office of Graduate Studies' online application (standardized test scores are not required). Certificate candidates must provide the MPH Program's Personal Data Sheet and official transcripts to the MPH Program.

About the Certificate

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- P HLTH 7150 Principles of Public Health
- P_HLTH 8150 Human Health and the Environment, P_HLTH 8920 Social and Behavioral Sciences in Public Health, or P_HLTH 8420 Principles of Epidemiology
- STAT 7020 Statistical Methods in Health Sciences
- · One approved elective

Applying to the Graduate Certificate Program

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here (https://healthprofessions.missouri.edu/mph/about/admission). (https://healthprofessions.missouri.edu/mph/about/admission)

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.2201-Gedt-Public Health.html.

Additional Minors and Certificates - Health Professions

There are no additional certificates or minors for the School of Health Professions at this time.

Mission

The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

History

A department of household economics was founded at MU in 1900 within the College of Agriculture. The initial one-year program was designed for young women who wished to learn proper management of the home. In 1906, the program expanded and a Bachelor of Science degree in Home Economics was added. The mission of the new program was to correlate work in art and physical, biological and social sciences with studies of home economics. Home Economics became a school within the College of Agriculture in 1960 and in 1973, the program became an independent college. The School of Social Work joined the college in 1988.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development. Every department provides experiential learning opportunities where students apply their knowledge in real-world situations.

College Level Requirements

All freshmen and transfer students entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences, or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life for individuals, families, and communities.

Academic Standing

A student whose term and cumulative grade point averages are 2.0 or higher is considered to be in Good Standing. (Note: The word "term" in these Regulations applies to semester, summer session, or intersession.) A student in Good Standing whose term grade point average falls below 2.0 is placed on scholastic probation. Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in Article II, Admissions, Advanced Standing, and Classification will enter on Scholastic Probation. A student on Scholastic Probation must establish a 2.0 cumulative grade point average within two successive terms: otherwise, he/she is Ineligible to Enroll. A student whose term grade point average falls below 1.0 is Ineligible to Enroll. A student who has been Ineligible to Enroll for a period of one year may apply to be readmitted by writing a letter to the HES Status and Appeals Committee

Programs

The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master's and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

- · Architectural Studies
- Human Development & Family Science
- Nutrition & Exercise Physiology
- · Personal Financial Planning
- Textile & Apparel Management
- · Social Work

The School of Social Work (http://ssw.missouri.edu), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to *both* the degree program of interest and to the Office of Graduate Studies. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College's online graduate degree programs, see Mizzou Online (http://online.missouri.edu).

Associate Professor B. Balakrishnan**
Assistant Professor L. Cole**
Associate Teaching Professor M. Goldschmidt*

Assistant Teaching Professor L. Bartlett, R. Walsh* Professor Emeritus R. Helmick*

Associate Professor Emeritus G. Hennigh, R. G. Phillips Assistant Professor Emerita P. Hildebrand

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Architectural Studies (p. 606)
 - with emphasis in Architectural Studies (p. 606)
 - with emphasis in Interior Design (p. 608)
- Minor in Architectural Studies (p. 609)

The Program

Connecting people and place / interior design and architecture

Our mission is to advance scholarship in making connections between people and place, and between interior design and architecture. Our work prepares graduates to become lifelong, problem-solving designers of the built environment

Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) sustainable products and practices, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program highlights the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

For professional development and career information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) and Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html).

Coursework

Coursework includes studios and coursework centering on the synthesis of functional, technological, aesthetic and symbolic attributes of interior design and architecture emphasizing physical environments that support human needs and aspirations.

Minor

Architectural Studies students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 753) for more information.

Students who are non-majors may receive a **Minor in Architectural Studies** with 15 credits.

Online Study

See the Department's web sites for online study: Online Study for Undergraduates (http://arch.missouri.edu/academics_online.html).

Admission to Professional Program Studio Sequence

Students apply for admission to the professional program studio sequence required for undergraduate majors. Portfolio review and applications are submitted in May of each year. In order to submit a portfolio for review, students must complete ARCHST 1100, ARCHST 1200, and ART_DRAW 1050. More information about portfolio review and the application process can be found at the department website (http://arch.missouri.edu/academics_ugadmit.html).

Laptop Computer Requirements

A laptop computer is required when admitted to the professional program studio sequence. See department website (http://arch.missouri.edu/resources_computing.html) for recommended specifications.

Graduate

- MA in Architectural Studies (p. 610)
 - with emphasis in Design with Digital Media (p. 610)
 - with emphasis in Environment and Behavior (p. 611)

MS in Architectural Studies (p. 611)

- with emphasis in Design with Digital Media (p. 612)
- with emphasis in Environment and Behavior (p. 612)

The College offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 632).

Program Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu) 142A Stanley Hall Columbia, MO 65211 573-882-3169 http://arch.missouri.edu/index.html

The Program

For both the MA and MS, the student's program of study must include a minimum of 30 hours of graduate credit beyond the bachelor's degree (or its equivalent). Fifteen of the 30-hour minimum must be selected from courses numbered at 8000 or 9000 level; no more than 40% of the 30-hour credit requirement can be satisfied by Research, Readings and Problems coursework.

The MA is a non-thesis option culminating in a creative project. The MS culminates in a thesis meeting University thesis requirements (http://gradstudies.missouri.edu/academics/thesis-dissertation/process).

In consultation with one's graduate advisor, each student is required to enroll in selected "core" courses appropriate to her/his degree program. The academic program should be established in consultation with one's advisor.

Professional Opportunities

Career opportunities for master's and doctoral graduates of the Department and College include leadership positions in design and consulting practices in industry, government and education; and academic and administrative positions in higher education and research.

The MA degree leads to career opportunities in design firms, computer graphic enterprises, retail establishments, corporate institutions and consultancy. Graduates contribute their skill to design of commercial, institutional, corporate and health care facilities, as well as residential

settings. They collaborate with related design professionals providing solutions to social and environmental problems.

Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

See Career Information for Graduate Students (http://arch.missouri.edu/resources_careers.html) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Online Study

On-campus and distance-learners are taught by the same accomplished professors. This is a fully *integrated model* of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education:

- Master of Arts (http://arch.missouri.edu/ academics_masters.html#page_MA) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/ academics_ebs.html) and Design with Digital Media (http:// arch.missouri.edu/academics_ddm.html).
- Master of Science (http://arch.missouri.edu/ academics_masters.html#page_MS) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/ academics_ebs.html) and Design with Digital Media (http:// arch.missouri.edu/academics_ddm.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in HES and in the concentration* areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Design Research Concentration (http://arch.missouri.edu/ academics_DesignResearch.html)* as stand-alone coursework or as part of a masters or doctorate.
- Stand-alone courses for non-degree (http://gradschool.missouri.edu/ admissions/eligibility-process/non-degree-applicants) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.
- * concentrations will not appear on diplomas or transcripts

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule.
 Synchronous courses will include real-time discussion during arranged weekly class periods.
- · Semester-based or self-paced online.

See MizzouOnline (http://online.missouri.edu/course-search) for online offerings open for registration.

Architectural Studies Graduate Degrees

Graduate students select one of two areas of emphasis: 1) Environment and Behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees OR 2) Design with Digital Media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Design Research Concentration

The Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) is developed for

- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc.
 who conduct research for creative product development in industry --Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

Graduate Program Requirements

The academic program should be developed in consultation with an advisor. See MU Graduate Studies (http://gradstudies.missouri.edu) website for guidelines and requirements regarding course work and role of committee. Students are required to self-report academic performance, degree program milestones and related achievements in scholarship, research and creative work on an annual basis. Students complete an annual review. See department Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) for details.

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the department's needs and candidate's background. See Financial FAQs (http://arch.missouri.edu/academics_faqgrad.html) on department web site.

BS in Architectural Studies

Degree Program Description

Architectural Studies promotes connections between people and place, and between interior design and architecture with the intention of preparing graduates to become lifelong designers of the built environment. Students in this program conduct systematic inquiry into the design process, sustainable products and practices, the interaction between people and the built environment, and digital technologies. The program highlights research as it advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good. Following the freshman year students must submit a portfolio of their work for acceptance into the professional phase of the program.

Major Program Requirements

The BS in Architectural Studies connects interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BS is offered with two emphasis area options: Interior Design and Architectural Studies. Both emphasis areas focus on the development of environmental designs for human living, work, and leisure. The Interior Design emphasis results in a terminal bachelor's degree accredited by the Council of Interior Design Accreditation (CIDA). The Architectural Studies emphasis is a pre-architecture bachelor's

degree or pre-professional option and students continue their education with the M Arch to become practicing architects.

Some courses in the Professional Program area double count for General Education (p. 34) requirements. See degree information at the emphasis level.

Semester Plan

The BS in Architectural Studies has emphasis areas in Architectural Studies (p. 606), and Interior Design (p. 608). Please see the individual emphasis area pages for degree requirements and admissions information.

Major and Career Exploration

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http:// career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs, visit:
 - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
 - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

BS in Architectural Studies with Emphasis in Architectural Studies

Missouri residents may benefit from the Reciprocity Agreement with the University of Kansas. Out-of-State tuition can be waived for Missouri residents when enrolled in the M Arch program as a first professional architecture degree.

Degree Program Description

The Architectural Studies emphasis is a four-year, professional baccalaureate program often referred to as a Pre-Architecture program. The architectural studies emphasis mission is to prepare students for success in entry-level jobs in the design and construction industry and also to prepare students for advanced study in architecture M Arch (Masters of Architecture) programs. See Opportunity for Employment (http://arch.missouri.edu/academics_arch.html), Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html). Students benefit from the enriched academic research environment and the emphasis on the thinking and making of physical environments that address the needs and aspirations of people. The program strives to blur the boundaries between architecture and interior design by

stressing the inside experience of people in buildings. Students interested in becoming a licensed architect continue their education by completing in other architectural programs. Alumni are admitted to many highly ranked graduate programs throughout the U.S. With coursework being part of a CIDA (http://accredit-id.org) Accredited Interior Design Program, pre-architecture students may be eligible for the NCIDQ (https://www.cidq.org) examination upon graduation. For more information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. See Architectural Studies web page for more highlights (http://arch.missouri.edu/home_welcome.html) of program.

Major Program Requirements

Coursework

Students complete University of Missouri general education coursework that includes physics and calculus. Professional design coursework is in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes architecture that support human needs and their aspirations. See Studio Description (http://arch.missouri.edu/academics_arch.html) on the department website for more information.

Application for the Professional Program

After completing three required classes of Drafting (ARCHST 1200), Visual Design (ARCHST 1100), and Drawing (ART_DRAW 1050) during the first year, students apply for admission to the studio sequence. Applications are made at the end of the spring semester of the first year granting permission to enroll in Studio I. The application form is available at the department's web site. (http://arch.missouri.edu/academics_ugadmit.html)

Grade requirements

The University requires the following courses to have a grade of C- or above: English 1000, ArchSt 4323 Sustainable Technologies satisfying Math Reasoning Proficiency, ArchSt 1600 Fundamentals of Environmental Design and ArchSt 3600 Environmental Analysis meeting Writing Intensive requirements, and ArchSt 4815 Construction Documents and BIM satisfying the capstone experience.

BS in Architectural Studies with **Emphasis** in Interior Design

Degree Program Description

The Interior Design emphasis is a four-year, professional baccalaureate program accredited by the Council for Interior Design Accreditation (CIDA). The interior design program's mission is to prepare students for success in entry-level interior design practice and advanced study.

Core competencies protect human health, safety, and welfare through the design of interior environments. Our educational philosophy is grounded in the values of creating sustainable and meaningful interior spaces to integrate aesthetic quality and compassion for the human condition. The NCIDQ definition (https://www.cidq.org) clarifies the scope of the services and tasks of the profession. Curriculum incorporates signature characteristics of interior design such as furniture, fixtures, and equipment, color, and interior materiality. The program benefits from its enriched academic research environment with outstanding faculty. Emphasizing the thinking and making of spaces, our interior design program stresses the inside of buildings and those experiences that help to create peoples' individual meaning in life. For more information on professional advancement and examples of opportunities see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. Also see postgraduate placements at Spotlight on Alumni (http://arch.missouri.edu/ alumni.html). See Architectural Studies web page for highlights (http:// arch.missouri.edu/home_welcome.html) of program.

Major Program Requirements Coursework

Students complete University of Missouri general education coursework and professional interior design coursework in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes of interior design that support human needs and their aspirations. See Studio Description (http://arch.missouri.edu/academics_id.html) on the department website for more information.

Application for Professional Program

After completing the three required classes of Drafting (ARCHST 1200), Visual Design (ARCHST 1100), and Drawing (ART_DRAW 1050) during the first year, students apply for admission to the studio sequence and submit work from these classes in their design portfolio. Applications are made at the end of the spring semester granting permission to enroll in Studio I. The application form is available at the department's web site (http://arch.missouri.edu/academics_ugadmit.html).

Total Credits: 125

The University requires the following courses to have a grade of C-or above: ENGLSH 1000, ARCHST 4323 Sustainable Technologies and Systems satisfying Math Reasoning Proficiency, ARCHST 1600W Fundamentals of Environmental Design - Writing Intensive and ARCHST 3600W Environmental Analysis - Writing Intensive meeting Writing Intensive requirements, and ARCHST 4815 Construction Documents and Building Information Modeling Studio satisfying the capstone experience.

Minor in Architectural Studies

A Minor in Architectural Studies is comprised of 15 credit hours, including ARCHST 1600W Fundamentals of Environmental Design - Writing Intensive or ARCHST 2620 People, Places and Design and selection of additional coursework from the list below.

ARCHST 1600W	Fundamentals of Environmental Design - Writing Intensive	3
or ARCHST 2620	People, Places and Design	
Electives		12
Select from the following:		
ARCHST 1100	Visual Design	3
ARCHST 1200	Architectural Drafting and Working Drawings	3
ARCHST 2100	Understanding Architecture and the American City	3
ARCHST 2220	Introduction to CAD	3
ARCHST 2310	Building Systems	3
ARCHST 2315	Introduction to Building Systems Laboratory	1
ARCHST 2316	Advanced Building Systems Lab	2
ARCHST 2323	Sustainable Building Design Fundamentals	3
ARCHST 2620	People, Places and Design	3
ARCHST 3100	Color and Light	3
ARCHST 4320	Materials, Methods and Products	3
ARCHST 4323	Sustainable Technologies and Systems	3
ARCHST 4411	Study Abroad in Architectural History	1-3
ARCHST 4430	Guiding Design with Historic Preservation	3
ARCHST 4435	History of the Designed Environment to 1750	3
ARCHST 4440	Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution	3
ARCHST 4630	Shaping Human Settlements	3
ARCHST 4700	Place-Making in Community Design	3
ARCHST 4961	Design Research and Service Design	3
ARCHST 4962	Information Visualization and Visual Analytics	3
ARCHST 4964	Design Thinking and Creative Process	3

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

Online Minor in Architectural Studies

Complete the **Apply for HES Minor form** (http://hes.missouri.edu/ students_minorapp.php). See Online Study and Degrees (http:// arch.missouri.edu/academics_online.html) in Architectural Studies for a listing of online courses currently open for registration.

Online and Resident General Education Courses

Courses meeting MU General Education (http://generaleducation.missouri.edu/courses) requirements (e.g., Humanities, Behavioral Science, and Social Science) are indicated.

MA in Architectural Studies

Program Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu) 137 Stanley Hall Columbia, MO 65211 573-882-3169 http://arch.missouri.edu

Master of Art

The creative, project-based MA plan of study is preparation for advanced careers in the design professions and higher education. The non-thesis project is conducted in one or two areas: (1) environment and behavior or (2) design with digital media. The MA project is an in-depth investigation of a design problem culminating in a design solution or visual research presentation.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Design Research Concentration

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc.
 who conduct research for creative product development in industry -Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on department web site. Concentrations do not appear on diplomas or transcripts.

Admission Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu) 137 Stanley Hall; Columbia, MO 65211 (573) 882-7224

Admission Criteria

Fall deadline: January 15

Minimum GPA: 3.0

Minimum TOEFL scores: The Department adopts minimum campus language requirements (http://gradstudies.missouri.edu/admissions/eligibility-process/international/language-requirements.php#English) as described by the Office of Graduate Studies.

Internet-based test (iBT) Effective July 1, 2015 must have score of 80 Paper-based test (PBT) Effective July 1, 2015 must have score of 550

Required Application Materials

See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admission requirements.

Apply online to the Office of Graduate Studies (http://gradstudies.missouri.edu).

MA in Architectural Studies with Emphasis in Design with Digital Media

Program Contact

Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html)
137 Stanley Hall
Columbia, MO 65211
573-882-3169
http://arch.missouri.edu

The Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and trans-disciplinary exploration in the digital arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the digital media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to the MA degree.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- · Building Simulation

· Human-computer interaction aspects of digital tools for design

See resources in our immersive visualization lab, the **ilab** (http://arch.missouri.edu/resources_ilab.html), and the **ilab web site.** (http://arch.missouri.edu/ilab)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media, Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html), for course content and research proposals. Also see the Department's website (http://arch.missouri.edu) and the Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

Admissions

Applicants are required to meet the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

MA in Architectural Studies with Emphasis in Environment and Behavior

Program Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu) 137 Stanley Hall Columbia, MO 65211 573-882-3169 http://arch.missouri.edu

The Environment and Behavior focus is on the multifaceted relationship between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines.

A design project leads to the MA degree.

Focus areas in environment and behavior include:

- · Health and Well-Being
- Sustainable Deign
- Design Education
- · Social and Cultural Bases of Design
- Place Attachment
- Environments for Learning
- · History of the Designed Environment
- · Analysis of Building Types
- Aesthetics of Building Types
- Inclusive Design/Accessibility
- · Environment and Aging

- · Housing and Neighborhood Design
- · Programming, Design and Post-Occupancy Evaluation

Contact Dr. Bimal Balakrishnan (http://arch.missouri.edu/faculty_balakrishnan.html) for more information. Also see the Department web site (http://arch.missouri.edu) and the Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

Admissions

Applicants are required to meet the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

MS in Architectural Studies

Admissions Contact

Dr. Bimal Balakrishnan (balakrishnanb@missouri.edu) 137 Stanley Hall Columbia, MO 65211 573-882-3169 http://arch.missouri.edu

Master of Science

The MS may be a research-based study or a design and research-based professional review design project. The MS culminates in a thesis meeting University thesis requirements. The MS plan of study is in preparation for advanced professional practice or preparation for the doctoral degree.

Research is conducted in one of two emphasis areas: (1) environment and behavior or (2) design with digital media. Within each of these emphasis areas, specific course work is chosen on the basis of subject matter and the type of research method selected: quantitative, qualitative or a combination of both.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Design Research Concentration

The Design Research Concentration can be applied toward the program of study. The concentration is of interest to:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc.
 who conduct research for creative product development in industry -Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

For more information, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on the department's web site.

Admission Criteria

Fall deadline: January 15 Minimum GPA: 3.0 Minimum TOEFL scores:

Internet-based test (iBT)

Paper-based test (PBT)

Effective July 1, 2015 must have score of 80

Effective July 1, 2015 must have score of 550

Required Application Materials

See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admission requirements.

Apply online to the Office of Graduate Studies (http://gradstudies.missouri.edu).

MS in Architectural Studies with Emphasis in Design with Digital Media

Advising/Admission Contact

Tammy Conrad 201 Gwynn Hall (573) 882-1144 conradt@missouri.edu

A registered dietitian (RD) or registered dietitian nutritionist (RDN) has completed education and training established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) (http://www.eatrightacend.org/ACEND). In order to be eligible to become a RD/RDN, one must complete required coursework and supervised practice from an ACEND accredited dietetics program and pass the national Registration Examination for Dietitians. The RD/RDN holds a minimum of a bachelors degree. In 2024 candidates must have a masters degree in order to take the national Registration Examination for Dietitians. Students who complete the Coordinated Program in Dietetics at Mizzou will meet the requirement to take the national exam.

The department offers a Bachelor of Human Environmental Sciences in Nutritional Sciences with an emphasis in Nutrition and Foods, followed by entry into the Masters of Science in Dietetics.

Faculty

Professor K.L. Fritsche**, C. D. Hardin**, P. S. Hinton**, J. A. Kanaley**, E. J. Parks**

Associate Professor S. Ball**, S. Gable**, C. A. Peterson**, R. S. Rector**, V. Vieira-Potter**

Assistant Professor J. Limberg*, J. Padilla**, Assistant Research Professor K. Keller **Teaching Assistant Professor** J. Bean*, L. Hudson*, M. Raedeke*, D. Smith

Joint Faculty M. J. Petris**, L. Pulakat**

Adjunct Instructor J. B. Mann, T. Roberts, D. Showers, M. Stevens, Extension Faculty J. Britt-Rankin*, C. Gabel, S. Mills-Gray Professor Emeritus D. E. Brigham*, R. P. Dowdy*, L. Hillman*, P. M. Landhuis*, M. McDonald, B. L. O'Dell, T. R. Thomas*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

The department of Nutrition and Exercise Physiology offers a bachelors degree in BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 638). Only students who successfully complete prerequisites, have been admitted to the Coordinated Program and completed all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor's degree. The completion of this bachelor's degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor's degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program's fifth year master's program.

Application requirements to the CP are posted each year on the department's webpage at http://ns.missouri.edu/. Applications are due in January. To be eligible to apply, the applicants must have a minimum 3.2 GPA and have completed or be able to complete the first four semesters of courses listed under the course requirements for nutrition and foods (http://nep.missouri.edu/dietetics.html). The student must be enrolled in or already have completed NEP 2340 and BIOCHM 3630 at the time the CP application is submitted. Students must achieve a final course grade of B- or better in both, or equivalent transfer course approved by faulty. Failure to meet the criteria may result in forfeiture of a space in the Coordinated Program. Accepted Students must also successfully pass background checks, a drug screen and submit the requireded health records prior to starting the program.

Graduate

• MS in Dietetics (p. 614)

This degree is a non-thesis Master of Science Coordinated Program in Dietetics which offers a concentration in Medical Nutrition Therapy. In our coordinated program both the didactic coursework and field work/ supervised practice experience are conducted simultaneously. It is a combined BS/MS program with application and acceptance occurring at the undergraduate level . It is not a stand-alone master's program, nor does it offer a didactic only program.

The master's degree is only for students who have been accepted into the Coordinated Program in Dietetics. See BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 638) for application information and criteria to apply.

After acceptance to the program, students must successfully complete 2 years of coursework at the undergraduate level, at that time they will receive their bachelor's degree in Nutritional Science with an emphasis in Nutrition and Foods. If all requirements for the program are met, the student will transition seamlessly into the graduate program. Requirements for continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

Upon completion of their final year in the program, students will receive a Masters in Dietetics. At that time, they will have completed all coursework and supervised practice within the Coordinated Program. Both are needed in order to receive their verification statement. In addition, both the BS and MS must be conferred as evidenced by their MU transcripts to be eligible to receive the verification statement. This statement is required for students to be eligible to take the National Registration Examination for Dietitians.

MS in Dietetics

Degree Requirements

The Coordinated Program in Dietetics requires a minimum of 30 hours of graduate courses in the program. Students must maintain a 3.0 GPA.

Sample Plan of Study

The following courses are required for this degree. Changes in course requirements may occur, as the program is required to meet the accreditation standards.

First Year			
Fall	CR Spring	CR	
BIO_SC 1500 or 1010 <i>and</i> 1020	5 ENGLSH 1000	3	
GN_HES 1100	1 CHEM 1320	4	
MATH 1100	3 HLTH_SCI 1000	3	
PSYCH 1000	3 Hist. or Pol Sc	3	
HES Foundation Course (recommend HDFS 1600 OR 1610)	3 Humanities (recommend PHIL 1150 or PHIL 2440)	3	
	15	16	
Second Year			
Fall	CR Spring	CR	
CHEM 2030	3 BIOCHM 3630 (B- or better required)	3	
CHEM 2130	2 CDS 2190	3	
MPP 3202	5 COMMUN 1200	3	
NEP 2380	3 NEP 1995	3	
HES Foundation Course (recommend FINPLN 2183)	3 NEP 2340 (B- or better required)	3	
	16	15	
Third Year			
Fall	CR Spring	CR Summer	CR
F_S 4310	4 MANGMT 3000	3 ESC_PS 4170	3
NEP 3360	2 NEP 2450	3 NEP 3400	1
NEP 4340	3 NEP 3290	1 NEP 3590	1
NEP 4360	3 NEP 3390	2	
NEP 4590	3 NEP 4280	3	

	Supporting Elective	3	
	15	15	5
Fourth Year			
Fall	CR Spring	CR	
MPP 4204	5 PTH_AS 2201	3	
NEP 4290	2 NEP 3370	3	
NEP 4950	2 NEP 4370	3	
Supporting Elective	3 NEP 4951	1	
Humanities/WI	3 NEP 8340	3	
	15	13	
Fifth Year			
Fall	CR Spring	CR	
ESC_PS 7200	3 Professional Development (NEP 7390 effective Spring 2019)	1	
HMI 7430	3 Medical Nutrition Therapy III (NEP 8380 course proposal pending)	2	
NEP 7380	3 Practice of Dietetics SPE (NEP 8975 course proposal pending)	10	
NEP 7381	4		
NEP 7385	1		
	14	13	

Total Credits: 152

Thesis/Non-Thesis Requirements

This is a professional program and will not require a Thesis, but will require a comprehensive exam.

Admissions

This degree is only for students accepted into the Coordinated Program in Dietetics and who have completed their first two years in the program. These students will have earned a bachelors degree in Nutritional Sciences with an emphasis in Nutrition and Foods. Application information and criteria on how to apply can be found at http://nep.missouri.edu/nutrition_foods.html for application information and criteria.

Requirements for program continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu).

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in exercise physiology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Exercise Physiology (p. 615)

About the Program

The Exercise Physiology PhD program is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students receive training in laboratory research, seminar preparation, scientific writing, problem solving and

grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantship's are available on a competitive basis. This degree prepares students for careers in academia, industry or the public sector.

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

PhD in Exercise Physiology

Degree Requirements

Students previous coursework must include biology, chemistry, anatomy, physiology and exercise physiology to be considered. It is also advantagous to have organic chemistry, biochemistry and some nutrition.

The PhD program in Exercise Physiology requires 85 hours beyond the bachelor's degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes 15 hours in exercise physiology, plus coursework in physiology, nutrition and biochemistry. Research requirements include NEP 7500 (9 hours of research projects) and NEP 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on an external grant proposal and co-authoring two manuscripts. NEP 8850 Advanced Exercise Physiologyis used as your competency course a grade of B or better is required. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Masters courses may be transferred from other institutions (30 hours maximum) may count toward the doctoral program at the discretion of the student's committee (3 members in dept., 1 member outstide).

Sample Plan of Study

Because students in the PhD program are from a wide variety of disciplines, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encouraged to work out their plan of study with their advisor.

Exercise Science (Major Field)

NEP 7001	Topics in Nutritional Science and Exercise Physiology (Exercise Endocrinology *)	1-99

Qualifying Process

NEP 8850 Advanced Exercise Physiology is used as your competency course and the student must pass with the grade of B or better. If the student comes in with a master's course similar to NEP 8850, then another course can be used as the competency course and will be approved by the committee and graduate director (e.g. NEP 8870 Exercise Metabolism).

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidates doctoral program committee, must embody the results of original and significant investigation and must be the candidates own work.

All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Deadline for Fall entrance: Dec 30

Minimum TOEFL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
After Aug. 1, 2011	150	150	3.5

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (http://nep.missouri.edu/grad_admission.html) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied.

Exercise and Physiology Program Applicants must have a 3.00 undergraduate GPA, a 3.5 graduate GPA and meet the minimum GRE scores to be admitted (GRE scores must be within the last 5 years). TOEFL scores are required from international applicants. Specific information can be found on the department website:http://ns.missouri.edu/grad_admission.html

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

Undergraduate

- BS in Human Development and Family Science (p. 617)
 - with emphasis in Child Development and Education (p. 618)
 - with emphasis in Child Life Specialist (p. 619)
 - with emphasis in Early Childhood Education in a Mobile Society (p. 620)
 - with emphasis in Family and Consumer Sciences Education (p. 621)
 - with emphasis in Family and Lifespan Development (p. 621)

The Department of Human Development and Family Science (HDFS) offers a BS in Human Development and Family Studies, which combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields. Students in the HDFS major must select one of the emphasis areas listed above. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Graduate

While MU does not offer graduate degrees specifically in human development and family science, the University does offer graduate degrees in human development and family studies (p. 623), as well as opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

BS in Human Development and Family Science

Degree Program Description

The Human Development and Family Science program is developed from a base of human development and family science courses. It is essential for the student working with children, adolescents or adults to understand and to be able to maximize the resources offered by the family. It is equally important for the student concerned with the quality of family life to recognize the intricate spiral of changing needs in the growing individual. Students must choose an emphasis area.

Major Program Requirements

Majors in all of the emphasis areas in HDFS must complete the core courses below. Requirements for each emphasis area are on the page for that emphasis area.

Grade of 2.0 (C) or better required in these core classes:

Major Program Requirements		
H_D_FS 1600	Foundations of Family Science	3
H_D_FS 2200	Research Methods in Human Development and Family Science ¹	3
H_D_FS 2300	Multicultural Study of Children and Families	3
H_D_FS 2400W	Principles of Human Development - Writing Intensive	4

H_D_FS 3150W

Child Development 4-8 (Early Childhood)
- Writing Intensive

Statistics should be taken prior to H_D_FS 2200.

Child Development Laboratory Courses such as H_D_FS 3500, H_D_FS 3700, and H_D_FS 4971 have prerequisites and require the consent of the instructor. Students must have full HDFS status. Because enrollment is limited, students must see the HDFS advisor to be placed on the waiting list a minimum of two semesters before anticipated enrollment. Students in Family and Lifespan Development may substitute another practicum experience with consent of department advisor.

In addition to the required courses, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate.

Background Checks, Health Screenings and Other Required Elements:

It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program, and prior to beginning any practical or clinical education experience, students are required to:

- · pass multiple criminal background checks
- · pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- · provide proof of health insurance coverage
- · provide proof of required immunizations
- · provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.

Semester Plan

The BS in Human Development and Family Science has emphasis areas in Child Development and Education (p. 618), Child Life Specialist (p. 619), Early Childhood Education in a Mobile Society (p. 620), Family and Consumer Sciences Education (p. 621), and Family and Lifespan Development (p. 621). Please see the individual emphasis area pages for semester plans specific to the emphasis area.

BS in Human Development and Family Science with Emphasis in Child Development and Education

Degree Program Description

The Child Development and Education emphasis provides instruction and experiences to help students gain competence in understanding, guiding, and teaching young children. Coursework includes hands-on learning through the Child Development Lab, a full-day, full-year teachertraining lab school located on the MU campus. Graduates are prepared for positions of responsibility and leadership in public and private nursery

schools, child care centers, infant-care programs, after-school programs, and other educational and social service facilities for children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below. Students must achieve a grade of C (2.0) in all HDFS courses in order to graduate with an HDFS major.

BS in Human Development and Family Science with Emphasis in Child Life Specialist

Degree Program Description

The Child Life Specialist emphasis area prepares graduates to provide for the socioemotional needs, and support the optimum growth and development of children and their families in a variety of health care settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand psychosocial needs, and provide tools to help them minimize psychological trauma. Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences. In addition to a 100-hour practicum experience (selection is on a competitive, spaceavailable basis) at MU's Children's Hospital, the student's last semester is spent off-campus completing a 14 to 16 week clinical internship in a

pediatric hospital setting. Students who successfully complete the degree program are prepared to take the Child Life Professional Certification Exam presented by the Child Life Certification Committee.

Major Program Requirements

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the Child Life Professional Certification Examination to obtain the CCLS credential. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any clinical education experience in child life.

Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may result in dismissal from the child life degree program in HDFS. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 33), including general education (p. 34), **in addition to** the degree requirements below. All courses in sections A-B below are required. Students must achieve a grade of C (2.0) in all HDFS courses in order to graduate with an HDFS major.

- Students are admitted to H_D_FS 4130 on a competitive, space-available basis. Interview applications are considered the semester before the student wishes to take H_D_FS 4130. Student must have attained a 3.2 CUM GPA to be eligible to interview, in addition to completing coursework requirements. See advisor for more information.
- Students are admitted to H_D_FS 4993 after successful completion of H_D_FS 4130 (grade of 3.0/B or higher). Students must be selected by hospitals outside of Columbia through a student-initiated competitive application process. All other coursework must be completed prior to beginning the clinical internship.
- Should be completed prior to end of sophomore year.
- Statistics should be taken prior to H_D_FS 2200.

BS in Human Development and Family Science with Emphasis in Early Childhood Education in a Mobile Society

Degree Program Descpription

This online bachelor's of science degree prepares students to work in the field of early childhood education. This program emphasizes the following areas: Child development, growth, and learning; Early education curricula and frameworks; Learning activities, technology use, and other experiences for young children; Family and community influences on children; Challenges facing families in today's world; Assessment of children and environments; Professional and ethical standards; Handson experiences and clinical practice. Upon completion of the program, students are qualified to work in various early education and care settings serving children from birth through eight years in a wide variety of community and military settings, including early education centers and preschools, family and home care settings, Head Start and Early Head Start programs, and before/after school programs.

Major Program Requirements

The program is offered by Human Development and Family Science faculty in conjunction with other university partners as part of the Great Plains IDEA. Interested applicants will apply for admission to this program through the undergraduate admissions office at the University of Missouri and to the Department of Human Development and Family Science. Courses will be taught by University of Missouri faculty and by scholars from other Great Plains IDEA institutions, including Iowa State University, Michigan State University, Oklahoma State University, South Dakota State University, Texas Tech University, and University of Nebraska-Lincoln. Your degree will be awarded by the University of Missouri.

Applying

To be admitted, you must already have completed at least 30 credits general education requirements earning at least a 2.5 grade point average (GPA). These hours must include a Human Lifespan Development course or equivalent.

For information about applying to this program, visit Mizzou Online (http://online.missouri.edu/degreeprograms/human-environmental-sciences/early-childhood-in-mobile-society/bachelors).

Contact Information

Please contact the Human Environmental Sciences Student Services office at HESstudentservices@missouri.edu or Ehren Oncken, the undergraduate enrollment counselor at Mizzou Online, at (800) 609-3727, with questions about this program.

BS in Human Development and Family Science with Emphasis in Family and Consumer Sciences Education

Degree Program Descrption

Family and Consumer Sciences Education emphasis, prepares students to teach family and consumer sciences from birth to grade 12 in public schools. Students take required coursework in nutrition, child development, interpersonal relationships, personal finance, interior design, consumer behavior and courses from the College of Education required to become a certified teacher for middle school or high school.

Major Program Requirements

This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

Semester Plan

There is not a semester plan built for this emphasis area.

BS in Human Development and Family Science with Emphasis in Family and Lifespan Development

Degree Program Description

In the Family and Lifespan Development emphasis, students become familiar with theory and research about families and individuals across the lifespan. Coursework focuses on bio-psycho-social development, family functioning, and interpersonal relationships in relevant settings such as at home, in child care, at school, and in the work place. Diversity is emphasized through examining multicultural families and diverse family structures and processes, and variations in individual development and relationships associated with such factors as gender, race, ethnicity, social class and health status. Opportunities are available for the practical application of theory and research in working with individuals, families, schools, and communities.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

H_D_FS 4700	Children and Families in Poverty (if not taken as a required course - see requirements in HDFS above)	3
H_D_FS 4720	Child and Family Advocacy	3

H_D_FS 4001	Topics in Human Development and	1-6
	Family Science	

In addition, students may select up to 6 hours of advisor-approved courses from related disciplines such as Anthropology, Black Studies, Communication Studies, Educational, School and Counseling Psychology, Psychology, Sociology, and Women's and Gender Studies. (0-6 credits). The student must obtain academic advisor approval prior to enrolling in these courses.

Students may plan a program of study which will help prepare them for earning the **Certified Family Life Educator (CFLE)** credential from the National Council on Family Relations. Consultation with the student's academic advisor is recommended to determine the current requirements for this credential.

- * H_D_FS 1600 must be taken before H_D_FS 2300 or any 3000/4000-level H_D_FS course.
- Statistics should be taken prior to HDFS 2200.
- Cannot be completed until successful completion of H_D_FS core courses and H_D_FS 3430, H_D_FS 3440 and 12 credit hours from H_D_FS 4610, H_D_FS 4620, H_D_FS 4630, H_D_FS 4640 and H_D_FS 4700 or consent of instructor. 3 credit hours of these 3000/4000-level courses can be concurrent with H_D_FS 4970.

Semester Plan

H_D_FS 4640

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http:// career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs,
 - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
 - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

- Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Minor in Human Development and Family Studies (p. 624)

While MU does not offer undergraduate degrees specifically in human development and family studies, the University does offer undergraduate degrees in human development and family science (p. 617), as well as opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MA in Human Development and Family Studies (p. 625)
 - with emphasis in Early Childhood Development (p. 626)
 - · with emphasis in Family and Community Services (Great Plains IDEA) (p. 627)
 - with emphasis in Family Studies (p. 627)
 - · with emphasis in Gerontology (p. 628)
 - with emphasis in Lifespan Development (p. 628)
 - with emphasis in Youth Development (p. 629)
- MS in Human Development and Family Studies (p. 629)
 - with emphasis in Early Childhood Development (p. 630)
 - · with emphasis in Family and Community Services (Great Plains IDEA) (p. 631)

Director of Graduate Studies

Ashlie Lester 411 Gentry Hall 573-882-1301 http://hdfs.missouri.edu/

The College of Human Environmental Sciences also offer a PhD in Human and Environmental Sciences with emphasis in Human Development and Family Studies (p. 633). They also offer Graduate Certificates in the following related areas: Youth Development Specialist (p. 665), Youth Development Program Management and Evaluation (p. 665) and Gerontology (p. 665).

The Department of Human Development and Family Science offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Selected in 2002 and again in 2007 as the Most Outstanding Graduate Department on campus, we have a nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. Our department houses former journal editors as well as a past president of the National Council of Family Relations.

We have a well-established mentoring program, which begins as soon as the student is accepted into HDFS. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Since 2000, our program has placed more faculty into research extensive family studies departments than any other program in the U.S. We also prepare PhDs and master's students for applied careers in administration, program evaluation, and program development. Our alumni have positions with universities and colleges in the United States, Canada, and Korea. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define diversity and multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including, but not limited to race, ethnicity, socioeconomic status, age, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department

All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master's Degrees

The Department of Human Development and Family Science offers Master of Arts (http://catalog.missouri.edu/undergraduategraduate/collegeofhumanenvironmentalsciences/humandevelopmentandfamilystudies/ma-humandevelopment-family-studies) (applied emphasis) and Master of Science (http://catalog.missouri.edu/undergraduategraduate/collegeofhumanenvironmentalsciences/humandevelopmentandfamilystudies/ms-human-development-familystudies) (research emphasis; on-campus only) degrees. The MA and

MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Master's Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

• Family Studies: 36 hours

· Child Life: 30 (fast track) or 36 hours

Early Childhood: 36 hoursLife Span: 36 hours

Gerontology: 36 hours

Youth Development: 36 hours

Family and Community Services: 36 hoursDual MSorMA/JD: approximately 113 hours

About the Online Certificate Programs

The Department of Human Development and Family Science offers three online graduate certificates with specialization in youth development, youth development program management and evaluation and gerontology.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest (p. 662).

Minor in Human Development and Family Studies

Undergraduate students interested in obtaining a minor in HDFS should fill out the **online application**, located on the College of Human Environmental Sciences website.

Students must meet the minor requirements in place at the time of application, thus the application should be submitted when they begin taking courses for the minor in HDFS, and before all of the required courses are complete.

To earn a minor in HDFS, an undergraduate student must successfully complete 15-16 credit hours of coursework, as indicated in the two groups listed below.

REQUIRED COURSES

Students must successfully complete all 3 of the following courses:

H_D_FS 1600 Foundations of Family Science

H_D_FS 2300	Multicultural Study of Children and Families	3
H_D_FS 2400	Principles of Human Development ¹	3-4
or H_D_FS 2400W	Principles of Human Development - Writing Inte	ensive
Total Credits		9-10

CHOOSE TWO COURSES FROM THE LIST BELOW

Students must choose and successfully complete 2 courses from the list below: ²

H_D_FS 1610	Intimate Relationships and Marriage	3
H_D_FS 3050	Child Development: Birth to 3 (Infant/ Toddler)	3
H_D_FS 3150W	Child Development 4-8 (Early Childhood) - Writing Intensive	3
H_D_FS 3430	Adolescence and Young Adulthood	3
H_D_FS 3440	Adulthood and Aging	3
H_D_FS 4610	Stress and Resilience in Families	3
H_D_FS 4620	Family Interaction	3
H_D_FS 4630	The Process of Divorce	3
H_D_FS 4640	Interpersonal Relationships	3
H_D_FS 4700	Children and Families in Poverty	3
H_D_FS 4740	Parent-Child Relations Over the Life Course	3
Total Credits		6

TOTAL CREDITS FOR MINOR IN HDFS: 15-16

Students seeking to earn a minor in HDFS must earn the minimum of a C (2.0) grade in each course selected for the minor – no exceptions. Pass/fail graded courses will not be accepted.

- ¹ HDFS 2400 is offered in two different formats writing intensive (4 credits), and non-writing intensive (3 credits); either format will fulfill the requirements of the Minor in HDFS.
- ² Some courses on this list may require specific pre-requisites and/or instructor consent. Please see the Enrollment Information and Course Description in myZou for more information.

A total of 6 hours of transfer credit from other colleges or universities outside of the University of Missouri – Columbia will be accepted for the minor in HDFS, provided the transfer courses are a direct equivalent to MU HDFS courses.

A minor must be completed and awarded at the same time as the MU undergraduate degree (i.e., minors cannot be claimed after graduation). Once an HDFS minor is awarded, a student cannot return to MU to complete a second undergraduate major in HDFS.

Students cannot earn a major and a minor in HDFS.

MA in Human Development and Family Studies

Admission Contact Information Ashlie Lester lestera@missouri.edu 411 Gentry; Columbia, MO 65211 573-882-1301

Admission Criteria for Campus Programs

Fall deadline: December 15

Spring deadline: November 1

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
61	500
Effective July 1, 2015 must have	Effective July 1, 2015 must have
score of 80	score of 550

Minimum GRE scores:

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	50th percentile	50th percentile	50th percentile
On or After August 1, 2011	50th percentile	50th percentile	50th percentile

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
 Required Application Materials for Campus Programs (submitted online via the online application system)
- · Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- · GRE score (and TOEFL score for international applicants)
- Personal statement
- · Résumé or Curriculum Vitae
- Official Transcripts

Admission Criteria for Online Programs

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

submit online via the online application system (https://applygrad.missouri.edu/apply)

- Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- · Personal statement
- · Résumé or Curriculum Vitae
- Official Transcripts

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

• Family Studies: 36 hours

. Child Life: 30 (fast track) or 36 hours

· Early Childhood: 36 hours

Life Span: 36 hours
Gerontology: 36 hours

• Youth Development: 36 hours

• Family and Community Services: 36 hours

· Dual MSorMA/JD: approximately 113 hours Research

Master's of Arts students may complete a comprehensive exam, an internship H_D_FS 8972 for up to six credit hours, or, for on-campus students only, a project (H_D_FS 8090), for up to six credit hours. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student's advisor and approved by the student's faculty committee. Students completing the comprehensive exam option must take additional elective course credit. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters' Degree Completion

Students working toward the master's degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

Background Checks, Health Screenings and Other Required Elements:

It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program and prior to beginning any practical or clinical education experience, students are required to:

- · pass multiple criminal background checks
- · pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- · provide proof of health insurance coverage
- provide proof of required immunizations
- provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.

MA in Human Development and Family Studies with Emphasis in Early Childhood Development

The Early Childhood Development program is planned for students who wish to focus their professional preparation on children as they develop, influence, and are influenced by a variety of environments.

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate

admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

MA in Human Development and Family Studies with Emphasis in Family and Community Services (Great Plains IDEA)

The mission of the Human Development and Family Studies Master's degree emphasis in Family and Community Sciences may be summed up in three words – **Understand, Deliver, Manage**. The goal of the new Family and Community Services online MA option in Human Development and Family Studies is to create alumni capable of **Understanding family**, interpersonal, and community dynamics in order to help individuals and their families through education, resource management, and effective service **delivery**. In addition, graduates of this degree option will acquire knowledge and skills in program and agency management.

The Family and Community Services MA emphasis consists of 36 credit hours, including the 10 core courses shown below. For the remaining 6 credits students may choose from: (a) 6 credits of electives and a capstone examination, (b) 3 credits of electives and a 3 credit internship, or (c) 6 credits of an internship. Elective courses will be offered annually. Exams and internships will include an independently produced paper and an oral examination by the student's MA committee.

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both Office of Graduate Studies and the degree program to which you've applied.

5. Independent effort (3-6 hours)

H_D_FS 8090	Research in Human Development and Family Science
H_D_FS 8972	Internship in Human Development and Family Science
or MISC 8999	Graduate Examination*

* No credit offered for the exam.

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

MA in Human Development and Family Studies with Emphasis in Youth Development

An estimated 17,000 organizations (e.g., 4-H, Boys and Girls Clubs, Boys Scouts and Girls Scouts) currently serve more than 30 million young people, and national trends are moving away from focusing on problems and behavior correction, instead favoring a positive approach that focuses on developing the strengths of youth. The 36 credit master's degree program (MA) consists of 9 required core courses (25 credits), 5-11 credits of electives, and either a comprehensive exam or an internship experience totaling 2-6 credits. Core courses offered within the program include eight 3-credit courses and a 1-credit professional-development seminar.

Required:

•		
H_D_FS 7231	Foundations of Youth Development	1
H_D_FS 8234	Adolescents and their Families	3
H_D_FS 8235	Administration and Program Management	3
H_D_FS 8236	Federal and State Policies that Impact Youth Development	3
H_D_FS 8237	Youth Cultures and the Cultures of Youth	3
H_D_FS 8238	Program Design, Implementation and Evaluation	3
Comprehenisve Exam		
OR		
H_D_FS 8972	Internship in Human Development and Family Science	2-6
Suggested Electives*:		
H_D_FS 7001	Topics in Human Development and Family Science (Substance Use)	3
H_D_FS 7001	Topics in Human Development and Family Science (Global Perspectives)	3

* Or Any Advisor-Approved Course

NOTE: Up to 6 credits can be transferred from other graduate programs if the courses are deemed relevant by your advisor.

For admission requirements, refer to the Office of Graduate Studies website for the minimum qualifications for the degree program (https://gradstudies.missouri.edu/degreecategory/human-development-family-studies) and Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Admission Criteria for Campus Programs

Fall deadline: December 15 Spring deadline: November 1 Minimum TOEFL scores:

Internet-based test (iBT)Paper-based test (PBT)61 Effective July 1, 2015 must have500 Effective July 1, 2015 mustscore of 80have score of 550

• Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	50th percentile	50th percentile
On or After August 1, 2011	50th percentile	50th percentile

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
 Required Application Materials for Campus Programs (submitted online via the online application system)
- · Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- · Personal statement
- Résumé or Curriculum Vitae
- Official Transcripts

Admission Criteria for Online Programs

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

submit online via the online application system (https://applygrad.missouri.edu/apply)

- Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors).
- · Personal statement
- Résumé or Curriculum Vitae
- Official Transcripts

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

- · Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours

Early Childhood: 36 hoursLife Span: 36 hoursGerontology: 36 hours

• Youth Development: 36 hours

• Family and Community Services: 36 hours

• Dual MSorMA/JD: approximately 113 hours Research

Master's of Science students must complete a thesis (H_D_FS 9090). Students who wish to pursue the thesis must petition the department's graduate faculty for approval. The thesis requires testing a hypothesis or exploring a research question. Student will submit and orally defend the thesis to their committee. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master's students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student's advisor and approved by the student's faculty committee. Students who wish to pursue the thesis option must petition the department's graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters' Degree Completion

Students working toward the master's degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

MS in Human Development and Family Studies with Emphasis in Early Childhood Development

The Early Childhood Development program is planned for students who wish to focus their professional preparation on children as they develop, influence, and are influenced by a variety of environments.

Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application

deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

Human Environmental Sciences

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subjectmatter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Faculty

Professor L. Ganong**, J. Ispa**, B. Schwarz**, R. B Tofle**
Millsap Professor G. Carlo**

Associate Professor D. Rudy**, D. L. Sharpe**

Assistant Professor B. Balakrishnan**, S. Killoren**, L. Manfra**, C. Proulx**, R. Ravert**, R. Yao*

Assistant Teaching Professor M. Goldschmidt*, S. L. Green-Ivey, F. Palermo*

Assistant Research Professor M. Herzog*

Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- PhD in Human Environmental Sciences (p. 632)
 - with emphasis in Architectural Studies (p. 632)
 - with emphasis in Human Development and Family Studies (p. 633)
 - with emphasis in Personal Financial Planning (p. 634)
 - with emphasis in Textile and Apparel Management (p. 635)

Director of Graduate Studies: Jung Ha-Brookshire

137 Stanley Hall (573) 882-7224

PhD in Human Environmental Sciences

Students are required to pick an emphasis area to obtain the PhD in Human Environmental Sciences. Please see the individual emphasis degree requirement pages (p. 632) for more information.

PhD in Human Environmental Sciences with Emphasis in Architectural Studies

The Program

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills needed to conduct substantive, innovative, and original research that contributes to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

Both faculty and students interact within this framework to develop an enhanced understanding of how specialized research contributes to the definition and evolution of an improved theoretical and methodological basis for architectural studies.

Doctoral study in Architectural Studies, College of Human Environmental Sciences, is research-based and expands knowledge in the "major" areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation.

Students will choose a "supportive cognate area" which is intended to reinforce the development of an understanding of the discipline. Supporting cognate area courses are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents.

A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc.
 who conduct research for creative product development in industry -Healthcare IT companies, Engineering etc.
- Business and market professionals to advance understanding of design research for marketing.

The course work for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on Department website.

Also see the Department website for additional information: Master Programs (http://arch.missouri.edu/academics_masters.html),

Environment and Behavior (http://arch.missouri.edu/academics_ebs.html), Design with Digital Media (http://arch.missouri.edu/academics_ddm.html), Online Study (http://arch.missouri.edu/academics_online2.html), Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Degree Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. Coursework from the Design Research concentration can be applied to the program of study. The doctoral program committee provides departmental approval of the student's plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

- Prepare the student for research or scholarly investigation in the chosen field of study.
- Satisfy the credit-hour and residency requirement of the department.
- Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
- Satisfy the Graduate School's requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends to the vice provost/dean, as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination.

The research-based plan of study leads to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — Environment and Behavioral studies (http://arch.missouri.edu/academics_ebs.html) or Design with Digital Media (http://arch.missouri.edu/academics_ddm.html). Specific course work is chosen based on subject matter and the type of research method selected—quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee.

In order to pass the examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

- It demonstrates authority in the candidate's field and shows evidence of command of knowledge in relevant fields;
- It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
- It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
- It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
- It is a careful, rigorous and sustained piece of work demonstrating that a research "apprenticeship" is complete and the holder should be admitted to the community of scholars in the discipline.

Admissions

Dr. Ruth Tofle (tofler@missouri.edu) 142C Stanley Hall; Columbia, MO 65211 573-882-6035

Admission Criteria

Fall deadline: January 15 Minimum GPA: 3.0

Minimum TOEFL scores:

Internet-based test (iBT) Effective July 1, 2015 must have score of 80 Paper-based test (PBT) Effective July 1, 2015 must have score of 550

Required Application Materials

See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admissions criteria. Apply online at the Office of Graduate Studies (http://gradstudies.missouri.edu).

PhD in Human Environmental Sciences with Emphasis in Human Development and Family Studies

Admission Contact Information Ashlie Lester (lestera@missouri.edu) 411 Gentry Columbia, MO 65211 573-882-1301

The Department of Human Development and Family Science emphasis in the Human Environmental Sciences PhD degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

Admission Criteria

Fall deadline: December 15 Spring deadline: November 1

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)	
61 Effective July 1, 2015 must have	, ,	
score of 80	have score of 550	

• Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	50th percentile	50th percentile
On or After August 1, 2011	50th percentile	50th percentile

- Some exceptions are made.
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials

Submit via the apply yourself system

- · Application form
- 3 letters of recommendation from people who can speak to applicant's potential to do graduate work (e.g., professors, advisors)
- GRE score (and TOEFL score for international applicants)
- · Personal statement
- · Résumé or Curriculum Vitae
- · Official Transcripts

Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master's degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an inhouse written and oral examination over

- 1. theory, methods, and statistics,
- 2. the student's area of specialization and core content, and
- 3. the student's collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student's dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master's degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate's department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

College of Human Environmental Sciences 239 Stanley Hall 573-882-9343 http://pfp.missouri.edu/

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

Application Deadlines

Fall deadline: February 1 Spring deadline: October 1

Adjunct Instructor J. B. Mann, T. Roberts, D. Showers, M. Stevens, Extension Faculty J. Britt-Rankin*, C. Gabel, S. Mills-Gray Professor Emeritus D. E. Brigham*, R. P. Dowdy*, L. Hillman*, P. M. Landhuis*, M. McDonald, B. L. O'Dell, T. R. Thomas*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Nutrition and Exercise Physiology (p. 636)
 - with emphasis in Human Physiology and Translational Sciences (p. 637)
 - with emphasis in Nutrition and Foods (p. 638)
 - with emphasis in Physical Activity, Nutrition and Human Performance (p. 639)

The mission of the Department of Nutrition and Exercise Physiology at the University of Missouri is to improve the health of Missourians and the larger population through research, teaching, and outreach related to nutrition and physical activity. We strive to be a diverse set of leaders, innovators, and educators who promote improved human health through our focus on nutrition and physical activity.

The department has a long tradition of education excellence and is the only department on campus that spans three colleges (School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources). This unique configuration poises and challenges us to be a model of interdisciplinary research and education on campus. We hold the honor of being the longest standing Coordinated Programs in Dietetics in the country and the only one in the state of Missouri; it also holds the designation of the first combined 5 year bachelors and master's degree. We have recently been recognized as a partner with **Exercise is Medicine® on Campus** (EIM-OC), a global health initiative managed by the American College of Sports Medicine (ACSM).

Our faculty is nationally-recognized for their contributions to the fields of nutrition and exercise. Students in our programs are prepared for a wide variety of career paths in the healthcare/medical fields, corporate and commercial industries, government and non-profit sectors, and graduate programs. Typical areas our students are found in, are: Medicine (allopathic and osteopathic), Dentistry and Pharmacy, Physicians Assistants, Registered Dietitian Nutritionists, Exercise Physiologist, Physical Therapy, Occupational Therapy, cardiac rehab, wellness resource centers, and community health programs. Students who major in Nutrition and Exercise Physiology may choose from three emphasis areas:

- Human Physiology and Translational Sciences (previously Nutritional Sciences)
- Nutrition and Foods/Master's in Dietetics

 Physical Activity, Nutrition and Human Performance (previously Nutrition and Fitness)

Students majoring in NEP are exposed to a strong science base including biology, chemistry, biochemistry, physics, anatomy, physiology, kinesiology, exercise science/exercise physiology, and human nutrition. In addition, they must take a set of core courses for each emphasis area and complete the required general education requirements for the University of Missouri. Specific GPA requirements and/or grades are required in each area. This information can be found on our department website: http://nep.missouri.edu

Students who want to explore the major can take

- NEP 1034 Introduction to Human Nutrition
- NEP 1340 Introduction to Exercise and Fitness
- NEP 1485 Career Exploration in Exercise Science
- NEP 2380 Diet Therapy for Health Professionals.

Two minors are available:

- Nutritional Sciences (http://ns.missouri.edu/minors.html) (intended for students majoring in food science, biological sciences, biochemistry, health sciences, or related fields)
- Wellness (http://ns.missouri.edu/minors.html) (intended for both nonscience and science students interested in coursework focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices)

Graduate

- MS in Nutrition and Exercise Physiology (p. 641)
 - with emphasis in Exercise Physiology (p. 641)
 - with emphasis in Nutritional Sciences (p. 642)

BS in Nutrition and Exercise Physiology

Degree Program Description

The BS in Nutrition and Exercise Physiology offers three different paths, each with a different focus. All three areas use a science based approach; integrating human physiology, chemistry, biology, biochemistry, and social/psychological sciences to study the influences of nutrition and physical activity on human health and disease. All students within these areas are exposed to significant opportunities for undergraduate research, student organizations, study abroad, hands on internships and field work as well as interaction with nationally recognized faculty in their chosen fields. Students majoring in our emphasis areas will be well prepared for health-related careers in numerous fields such as: Registered Dietitian Nutritionist (RDN), medicine, dentistry, pharmacy, physician's assistant, physical therapy, occupational therapy, or for employment in fitness assessment, lifestyle intervention, cardiac rehab, education, health and wellness, exercise supervision and program administration and several different certifications. They are also prepared for graduate study in biomedical/translational sciences, exercise physiology and numerous other fields.

Major Program Requirements

The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 637), Nutrition and Foods (p. 638), and Physical Activity, Nutrition

and Human Performance (p. 639). All degree requirements are listed at the emphasis level. A student must choose an emphasis area for this degree.

Semester Plan

The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 637), Nutrition and Foods (p. 638), and Physical Activity, Nutrition and Human Performance (p. 639). Please refer to the emphasis area for semester plans. A student must choose an emphasis area for this degree.

BS in Nutrition and Exercise Physiology with Emphasis in Human Physiology and Translational Sciences

Degree Program Description

This degree program is highly multidisciplinary, integrating human physiology, nutrition, pathophysiology, pharmacology, biochemistry, organic chemistry, biology, sociology/psychology, and related areas to gain both a broad and a deep understanding of the determinants of human health and disease. Due to the department's unique configuration (only department on campus that spans three colleges - School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources), students in this program have access to many researchers and resources represented from each unit. Students selecting this area of study will be well-prepared for health-related careers such as Medicine (allopathic and osteopathic), Dentistry, Pharmacy, Physician's Assistant, as well as for graduate study in Biomedical/Translational Sciences.

The department also offers significant opportunities for undergraduate research, including an opportunity to apply for paid undergraduate research internship (http://ns.missouri.edu/ug_summerintern.html) opportunities that span the academic year.

Major Program Requirements

To transfer into the nutrition and exercise physiology program after their first semester on campus, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one <u>required</u> biology, chemistry, physics, or biochemistry course or one <u>required</u> NEP course. All NEP courses require a grade of C or higher.

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Science Foundation

BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods

Degree Program Description

The emphasis in Nutrition and Foods prepares students to integrate and apply the principles of the biomedical sciences and food and nutrition sciences to design and manage effective nutrition programs in a variety of settings. Nutrition and Exercise Physiology with emphasis in Nutrition and Foods is a five- year BS-MS program. Nutrition and Foods is the first step to acceptance into the Professional Coordinated Program in Dietetics.

The Coordinated Program in Dietetics (http://nep.missouri.edu/dietetics.html) (CP) at the University of Missouri has a rich tradition. Established in 1972, it is the only coordinated program in the state of Missouri and is among the oldest accredited coordinated programs in the United States. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics and is approved for accreditation through 2024.

The Coordinated Program in Dietetics prepares students to become **Registered Dietitian/Nutritionists** (RD/N). RDNs specialize in applied nutrition and work in a variety of practice settings, such as hospitals and clinics, schools, business and industry, private practice, and public health clinics. Upon completion of the program, students are eligible to take the national Registered Examination for Dietitians (RD Exam). The four-year pass rate for first-time test takers is 98%.

During the first two years of the curriculum, students develop a foundation in science and general education. This is followed by a three year course of study devoted to professional courses and supervised practice (fieldwork). The Dietetics program is a **five year program** where students complete:

- A Bachelor of Science (Nutrition and Foods)
- A Master of Science (Dietetics)
- All supervised practice (fieldwork) necessary to meet the requirements to take the Registration Examination for Dietitians (RD Exam)
- A verification statement providing proof of completion will be provided after the graduate degree is awarded

Major Program Requirements

This is a professional and competitive program that requires acceptance to the Coordinated Program in Dietetics to complete the degree. Admission is limited to a maximum of 20 students per year. Students who successfully complete prerequisites, have been admitted to the Coordinated Program in Dietetics and complete all university and College of Human Environmental Sciences requirements, including general education in addition to the degree requirements listed below will earn their degree in Nutrition and Exercise Physiology with emphasis in Nutrition and Foods.

The completion of this bachelor's degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification state is given after completion of only the bachelor's degree. Students who receive this degree emphasis, are in good academic standing and meet program requirements will transition seamlessly to the Coordinated Program's fifth year master's program.

Admission Requirements:

- Students must have applied and be admitted to the University of Missouri
- A CUM GPA of 3.2 or higher is required to apply (MU and transfer courses will be considered)
- Completed or enrolled in courses listed on the 1st 4 semesters of the sample plan
- Completed or enrolled in NEP 2340 and BIOCHM 3630 (or approved equivalent course) at time of application. Grade of B- or higher is required or slot may be forfeited
- If admitted, student must successfully pass all background checks, drug screening, and required health records prior to start of program
- Submit an application (due in January), required application materials are posted each year on the department's webpage (http://ns.missouri.edu).
- · Participate in an interview with admissions committee

BS in Nutrition and Exercise Physiology with Emphasis in Physical Activity, Nutrition and Human Performance

Degree Program Description

**This emphasis has recently undergone a name change to better describe the focus; it was previously known as Nutrition and Fitness.

This program is for students with a passion for health and wellness, evidence-based science, helping other people, and learning how and

why physical activity and nutrition impact human performance. Students earning this degree are well-prepared for employment opportunities that include fitness assessment, lifestyle intervention education, health and wellness, exercise supervision and program administration in schools, businesses and hospitals, health education, and promotion and entry-level positions in cardiac and pulmonary or spine rehab. This is a rapidly expanding area with opportunities in corporate and commercial industries, government, and non-profit sectors.

Graduates of this program are qualified to sit for the following certifications without any additional courses or education beyond our core requirements: ACSM Certified Exercise Physiologist (ACSM EP-C), ACSM Certified Personal Trainer (ACSM CPT), ACSM Certified Group Exercise Instructor (ACSM GEI), NSCA Certified Personal Trainer, NSCA Certified Strength & Conditioning Coach, ACE Certified Personal Trainer.

In addition to the job opportunities listed above, past graduates of this area have continued their studies in a variety of areas such as graduate school for Exercise Science/Physiology, Kinesiology, Physical Therapy, Occupational Therapy, Physician's Assistant, Chiropractic, Nursing, or applied to Medical, Dental, and Pharmacy school.

Major Program Requirements

Nutrition and Exercise Physiology with emphasis in Physical Activity, Nutrition, and Human Performance does not require an application or have a pre-program status. Students may declare the major and emphasis area by indicating it when they apply to MU and transition directly into the program. After the first semester at MU, students must have a minimum of a 2.0 GPA (term and CUM) to declare the program. The student will need to complete a transfer of division form or if a current student in another program within the department or college of HES, notify their advisor and/or HES Student Services of their wishes. There are specific grade requirements for most courses within the emphasis, these are outlined on the degree requirement sheet and noted on the degree audit.

C or higher: BIO_SC 1010/BIO_SC 1020 or BIO_SC 1500, MPP 3202 or BIO_SC 3700, PTH_AS 2201(or the equivalent). All NEP courses (unless noted below)

C- or higher: CHEM 1320, CHEM 2030 or CHEM 2100, NEP 3850W

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Science Foundation

BIO_SC 1010 & BIO_SC 1020	General Principles and Concepts of Biology and General Biology Laboratory	5
or BIO_SC 1500	Introduction to Biological Systems with Laboratory	
BIOCHM 3630	General Biochemistry	3
CHEM 1320	College Chemistry I	4
CHEM 2030	Survey of Organic Chemistry	3
CHEM 2130	Organic Laboratory I (recommended)	2

MS in Nutrition and Exercise Physiology

The MS is Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 642) and in Exercise Physiology (p. 641) for degree information.

MS in Nutrition and Exercise Physiology with Emphasis in Exercise Physiology

About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/ or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

Degree Requirements

Students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. Students should indicate their preference on their application to the program. The course curriculum will be the same for both options. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor's degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 641) or view the information on the programs website: http://ns.missouri.edu/exphyma.html.

Prerequisites courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy and Physiology of Exercise. Biochemistry, Organic Chemistry and Nutrition are recommended.

Required Graduate Courses

Required Graduate Cours	es	
ESC_PS 8850	Quantitative Foundations in Educational Research	3
NEP 7500	Research in Nutritional Sciences and Exercise Physiology (mandatory for thesis track; optional for internship track)	3
NEP 8001	Topics in Nutritional Sciences and Exercise Physiology (Cardiovascular Disease and Exercsie)	3
NEP 8087	Masters Seminar in Nutritional Sciences and Exercise Physiology	1
NEP 8090	Masters Research in Nutritional Sciences and Exercise Physiology	4
or NEP 8095	Internship in Exercise Physiology	
NEP 8125	Preventive and Therapeutic Exercise Physiology	3
NEP 8850	Advanced Exercise Physiology	3
NEP 8860	Exercise Endocrinology	3
Must take a minimum of 2	of the following courses:	
NEP 7340	Human Nutrition II Lecture (biochem. prereq.)	3
NEP 8030	Etiology of Obesity	3
NEP 8870/MPP 9431	Exercise Metabolism	3
V_BSCI 9435	Molecular Exercise Biology	3
Suggested Electives (other	classes may be accepted)	
NEP 7200	Sports Performance and Conditioning	3
NEP 7970	Sports Nutrition	2
NEP 7500	Research in Nutritional Sciences and Exercise Physiology	3
NEP 8340	Nutrition in Human Health	3
BIOCHM 7270	Biochemistry	3
Salast to give 26 hours total		

Select to give 36 hours total

Thesis/Non-Thesis Requirements

1. Internship Option

This option is oriented toward improving a practitioner's professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student's knowledge in the theoretical aspects of exercise physiology.

They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the some

preparation for credentialing from organizations including the American College of Sports Medicine (ASCM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions. The program of study can be complimented with a certificate of public health: https://healthprofessions.missouri.edu/mph/mph-degree/certificates/graduate-certificate-public-health/

2. Thesis Option

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student's progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student's own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Exercise Physiology Program Applicants must have a 3.0 undergraduate GPA and competitive GRE scores to apply. GRE scores are required to be within the last 5 years. TOEFL scores are required from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, biochemistry and organic chemistry, but not required. Courses should be taken at an accredited institution.

Applications to our graduate programs should be **submitted by December 30th**. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited

Minimum TOFEL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
On or after Aug, 1, 2011	150	150	3.5

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

MS in Nutrition and Exercise Physiology with Emphasis in Nutritional Sciences

About the Program

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor's degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student's own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

AN_SCI 9442	Vitamins and Minerals	4
BIOCHM 7270 & BIOCHM 7272	Biochemistry and Biochemistry	6
NEP 7340	Human Nutrition II Lecture	3
NEP 8087	Masters Seminar in Nutritional Sciences and Exercise Physiology	1
NEP 8090	Masters Research in Nutritional Sciences and Exercise Physiology	4
NEP 8310	Nutritional Biochemistry of Lipids	3
NEP 8340	Nutrition in Human Health	3
Statistics		6
Total Credits		30

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option.

Students earning this degree must provide a written thesis, based upon original research, that is student's own work and that demonstrates a capacity for research and independent thought. In addition, the graduate

student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP[®] certification examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial advising in our Office for Financial Success, and to conduct research with a purpose.

- Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Personal Financial Planning (p. 644)
 - · with emphasis in Financial Counseling (p. 645)
 - with emphasis in Personal Financial Management Services (p. 646)
 - with emphasis in Personal Financial Planning (p. 647)
- Certificate in Personal Financial Planning (p. 648)
- Minor in Personal Financial Management Services (p. 648)

The program leading to the BS in Personal Financial Planning offers designated emphasis areas in personal financial planning, personal financial management services, and financial counseling.

PERSONAL FINANCIAL PLANNING

PFP allows graduates to sit for the comprehensive CFP[®] examination to earn the right to use the CFP[®] designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client—centered financial management advice.

To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better, in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

PERSONAL FINANCIAL MANAGEMENT SERVICES

PFMS is a degree option that prepares students to work with individuals and families in a wide range of financial service occupations, from insurance, investments, or banking to financial counseling, education, or a social change occupation. This degree program gives graduates a broad understanding of household financial management. Many students choose to complement this degree with a minor in business, economics, social work, or other related program.

To be admitted to the Personal Financial Management Services emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.0, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Management Services emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

FINANCIAL COUNSELING

Financial Counseling brings together a sound knowledge of personal finance with a solid background in counseling, utilizing the expertise of our colleagues in the School of Social Work and the Department

of Human Development and Family Science. Besides preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops the tools a financial professional needs to help address the human issues often accompanying financial problems. In addition, graduates may take the exam that leads to earning the Accredited Financial Counselor (AFC) designation, which is offered through the Association for Financial Counseling and Planning Education (AFCPE) (http://www.afcpe.org).

To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

MINOR

The Minor in Personal Financial Management Services is intended for students interested in course work focused on empowering them to make more informed decisions related to lifelong personal finance choices.

UNDERGRADUATE CERTIFICATE PROGRAM

An undergraduate certificate in Personal Financial Planning was approved by the Missouri Coordinating Board for Higher Education and the Certified Financial Planner Board of Standards, Inc. Those who complete the certificate are eligible to sit for the CERTIFIED FINANCIAL PLANNER™ certification exam, upon graduation with a bachelor's degree. This program must have a University of Missouri cumulative GPA of at least a 2.5 upon application.

Students who want to explore the major can take FINPLN 2083 Financial Planning Careers and FINPLN 2183 Personal and Family Finance.

Graduate

- MS in Personal Financial Planning (p. 649)
 - with emphasis in Consumer and Family Economics (p. 649)
 - with emphasis in Personal Financial Planning (p. 650)
- Certificate in Personal Financial Planning (p. 650)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Personal Financial Planning (p. 634).

Program Information

Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to

evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students' programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information

Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master's Degree.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid

If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website (http://pfp.missouri.edu) or contact the director of graduates studies, Rui Yao (http://pfp.missouri.edu/faculty_yao.html) for details.

Faculty Areas of Study

We conduct research pertaining to financial issues of individuals, families and households. Our research is highly applied and provides practical implications to researchers, financial planning professionals and policy makers on helping individuals, families and households make better financial decisions, improve their financial well-being, and reach their financial goals. Specifically, our research focuses on the following areas:

- · Behavioral finance
- Risk management
- Investment
- · Retirement and later-life financial issues
- Financial literacy and education

BS in Personal Financial Planning

Degree Program Description

The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP[®] certification examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial advising in our Office for Financial Success, and to conduct research with a purpose.

Major Program Requirements

The BS in Personal Financial Planning offers three emphasis areas: Personal Financial Planning, Financial Counseling, and Personal

Financial Management Services. Professional program requirements are listed at the emphasis level.

Semester Plan

The BS in Personal Financial Planning has emphasis areas in Financial Counseling (p. 645), Personal Financial Management Services (p. 646), and Personal Financial Planning (p. 647). Please see the individual emphasis area pages for degree requirements and admissions information.

BS in Personal Financial Planning with Emphasis in Financial Counseling

Degree Program Description

The Financial Counseling emphasis brings together a sound knowledge of personal finance with a solid background in counseling. Courses cover personal finance, social work, and human development and family science. In addition to preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops tools needed to help address the human issues often accompanying financial problems. Students may prepare for the Certified Retirement Counselor (CRC) or Certified Retirement Administrator (CRA) designation, or take the exam that leads to earning the Accredited Financial Counselor (http://afcpe.org) (AFC) designation.

Major Program Requirements Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis areas must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

BS in Personal Financial Planning with Emphasis in Personal Financial Managment Services

Degree Program Description

Personal Financial Management Services prepares students to work with individuals and families in a wide range of financial service occupations from insurance, investments, or banking, to financial counseling, education, or a social change occupation. This degree program gives graduates a broad understanding of household financial management. Many students choose to complement this degree with a minor in business, economics, social work, or other related program. Students may prepare for the Certified Retirement Counselor® (CRC®) or Certified Retirement Administrator® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor (http://afcpe.org)® (AFC®) designation.

Major Program Requirements Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Personal Financial Management Services emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.0, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Management Services emphasis areas must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

Major and Career Exploration

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in Academic Exploration and Advising Services (AEAS) (http://aeas.missouri.edu) by calling (573)884-9700.
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http:// career.missouri.edu) in the lower level of the Student Success Center. No appointment is necessary to explore career options with one of our staff members.
- If you would like information about MU majors and degree programs, visit:
 - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 18) page in the catalog,
 - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 32) in the catalog.

BS in Personal Financial Planning with Emphasis in Personal Financial Planning

Degree Program Description

The Personal Financial Planning degree program is registered with the Certified Financial Planner Board of Standards, Inc. (https://www.cfp.net) allowing graduates to sit for the comprehensive CFP[®] examination to earn the right to use the CFP[®] designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts

within which clients make financial decisions. Graduates excel in providing client–centered financial management advice. Students may prepare for the Certified Retirement Counselor® (CRC®) or Certified Retirement Administrator (http://afcpe.org)® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor® (AFC®) designation. Graduates are employed as financial planners, private wealth manager, investment strategist, employee benefits advisor, retirement benefits administrator, insurance specialist, financial counselor, compliance officer, client service manager, trust & estate administrator, Extension agents, and consultants or counselors in financial, social, educational, legal, and government agencies.

Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP[®] marks.

Major Program Requirements Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better, in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

Total Required Credits		16

* Requires a grade of C (2.0) or higher.

The Personal Financial Management Services minor is available to undergraduate students from any other college at Mizzou. Students earning a BS in any Personal Financial Planning emphasis areas are not eligible for the Personal Financial Management Services minor. At least 7 of the 16 hours must be taken from the MU Personal Financial Planning department. FINPLN 2183 must be taken for Math Reasoning Proficiency credit.

MS in Personal Financial Planning

Degree Information

Resident Master of Science (thesis option)

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master's thesis.

Five-Year Bachelor of Science/Master of Science Option

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards' education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Coursework encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

Applied Master of Science (non-thesis option)

The Applied Master of Science is a 36-hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner's understanding of the various factors that can affect and enhance a client's financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning.

 This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA (https:// www.gpidea.org) degree option also requires 36 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.

Application Deadlines

Fall deadline: February 1 Spring deadline: October 1

*Exceptions will be considered on a case by case basis

Admission Criteria

• English Language Requirements (for ESL applicants only):

Internet-based test (iBT)	Paper-based test (PBT)
80	550

We also accept IELTS scores

Item	Score
International English Language	6.5
Testing System (IELTS)	

• Minimum GPA: 3.0 in last 60 hours

Required Application Materials

To the Office of Graduate Studies:

- All required Graduate Studies documents
- 3 letters of recommendation
- · GRE or GMAT scores
- · Statement of Purpose
- · Official transcripts
- Résumé

MS in Personal Financial Planning with Emphasis in Consumer and Family Economics

Degree Requirements

Please review the **Resident Research and Policy Master's Degree Program Handbook** or the **Resident Applied Master's Degree Program Handbook**. (http://pfp.missouri.edu/documents/graduate/
Applied_MS_handbook.pdf)

Sample Plan of Study

Each student's plan of study will vary to some degree, depending on the specific program and the student's background, needs, and career plans. Please review the Resident Research and Policy Master's Degree Program Handbook or the Resident Applied Master's Degree Program Handbook.

Thesis/Non-Thesis Track

The resident Research and Policy Master of Science track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree.

Acceptance to this program requires GRE or GMAT scores that meet department standards. This program requires a minimum of 30 hours to complete.

Download the Resident Research and Policy Master's Degree Program Handbook.

The resident **Applied Master of Science** is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation.

Acceptance to this program requires GRE or GMAT scores that meet department standards. The Applied Master's program is a non-thesis 36-hour program. This program is registered with the Certified Financial Planner Board of Standards, Inc. and is designed to prepare students to sit for the CFP® exam.

Download the Resident Applied Master's Degree Program Handbook.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (https://gradstudies.missouri.edu/degreecategory/personal-financial-planning) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MS in Personal Financial Planning With Emphasis in Personal Financial Planning

Degree Requirements

Please review the **Resident Research and Policy Master's Degree Program Handbook** (http://pfp.missouri.edu/documents/graduate/

Graduate Certificate in Personal Financial Planning

Director of Graduate Studies

Rui Yao (yaor@missouri.edu), PhD, CFP[®] 239 Stanley Hall Columbia, MO 65211 573-882-9343 http://pfp.missouri.edu/

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor's degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard's education requirement, which is one of four requirements leading to approval to use the CFP[®] designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP[®] code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Courses Required for the Applied Master's Degree and the Graduate Certificate in Personal Financial Planning:

FINPLN 7382	Financial Planning: Risk Management	3
FINPLN 7383	Financial Planning: Investment Management	3
FINPLN 7187	Financial Planning: Tax Planning	3
FINPLN 7386	Financial Planning: Employee Benefits and Retirement Planning	3
FINPLN 7393	Financial Planning: Estate and Gift Planning	3
FINPLN 7389	Financial Planning: Capstone	3

Elective Courses

Since the Personal Financial Planning Certificate is a registered program under the oversight of a professional organization granting a professional designation, all courses are required. Electives may be taken as part of the Applied Master of Science (non-thesis options), the Master of Science (thesis option) and the doctoral programs.

Undergraduate

- BSW in Social Work (p. 652)
- Minor in Social Work-Gerontology (p. 654)

The Bachelor of Social Work (BSW) Program is a professional program that prepares you for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. The program provides an educational experience that prepares graduates for a diverse range of career choices and pathways.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers. BSW graduates are eligible for accelerated, Advanced Standing status in Master of Social Work degree programs.

Departmental Honors

Candidates for Departmental Honors must be students who are admitted to the professional BSW program and members of the MU Honors College in good standing. Student must submit a proposal for approval for Social Work Honors and successfully complete SOC_WK 4971H Advanced Study for Social Work Honors.

Career Opportunities

Jobs in social work are expected to grow much faster over the next decade. Through social work's unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will complete a practicum in a social service agency that includes 400 hours of supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional program if they meet the following criteria:

- Completion of at least 42 credits (second semester sophomore status) by the application deadline and
- Completion of at least 55 credits completed before the beginning of the first semester (fall) of the BSW foundation curriculum
- 3. Minimum 2.5 cumulative GPA required
- Completion of required liberal arts prerequisite courses with minimum grades in "C" range or higher.
 - Anthropology (ANTHRO 1300, ANTHRO 1350, ANTHRO 2030 recommended)
 - BIO SC 1010
 - · College Algebra
 - COMMUN 1200
 - Economics (macro or micro)
 - ENGLSH 1000

 - Philosophy (PHIL 1000, PHIL 1100, or PHIL 1200 recommended)
 - PSYCH 1000
 - SOCIOL 1000 or RU_SOC 1000
- 5. Submission of BSW professional pogram application, including personal statement response to provided questions and 3 professional references (academic and work-related) is necessary for consideration by early deadline of February 15 or rolling admission deadline of May 15.

Students wanting to explore social work as a major may take the following exploratory courses:

SOC_WK 1110	Introduction to the Social Work Major	1
SOC_WK 1115	Social Welfare and Social Work (Highly Recommended)	3
SOC_WK 1200	Criminal Justice	3
SOC_WK 2000W	Exploration in Social and Economic Justice - Writing Intensive	3
SOC_WK 2220W	Human Behavior and the Environment - Writing Intensive	3

Graduate

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri's premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri's tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

BSW in Social Work

Degree Program Description

The Bachelor of Social Work (BSW) Program is a professional program that prepares students for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential

treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Degree Core Requirements

Fnalish	Composition	(grades must be	in the	"C" ran	ae or higher)

- SOC_WK 2220W, SOC_WK 2000W, SOC_WK 4951W, SOC_WK 4952W SOC_WK 4770W are all required courses. No additional courses are required for the Writing Intensive (WI) requirement toward graduation.
- Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.
- One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.

- Exploration of Power, Privilege & Oppression: Social Work BSW majors are required to take SOC_WK 2000W to count for three (3) credit hours of the six (6) credit hours requirement. Students should select one additional course (that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, religious studies, human development and family science, black studies, and women and gender studies. Students are urged to check with their advisor before selecting courses.
- In addition to the above liberal arts requirements and the 50-credit Professional BSW Core (inclusive of SOC_WK 2220W), students select electives to reach the total credit requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

Capstone Requirements

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field PracticumUndergraduate Field Practicum and SOC_WK 4970 Senior Professional SeminarSenior Professional Seminar to complete their capstone requirement. Please note: As a student, if you have acquired any criminal background history which includes misdemeanors or felony charges your choices of placements may be affected. In an effort to assist you we strongly encourage you to make an appointment with the Director of the Undergraduate Program to assist in facilitating options for your completion of educational requirements.

Basic Skills Credit Limitations

No more than 4 credits may be taken from "skills" courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

First Year		
Fall	CR Spring	CR

Minor in Social Work-Gerontology

The Undergraduate Gerontology Minor is designed to provide students with entry level knowledge about older adults, the aging process, and applied skills for aging-related practice. The minor will give participants expanded knowledge in providing services to older adults and their families. Students who complete the Gerontology Minor come from a variety of undergraduate programs, in order to augment their studies with an in-depth focus on older adults. The field of Gerontology is interdisciplinary by nature and rapidly expanding, therefore jobs are available in just about every sector of our economy. The Gerontology Minor complements diversity by offering coursework from several academic units on campus.

Students who apply and complete the Gerontology Minor will

- Build a firm understanding of the aging process, including biological, cognitive, psychological, and social processes that occur across late adulthood.
- Become critically able to analyze social problems that exist, which affect older adults in today's society.
- Gain knowledge of the U.S. health care system, with emphasis on health policy affecting older adults.
- Ability to develop assessment and intervention skills to work with older adults and their families in the interdisciplinary settings.

Students who complete the Gerontology Minor are uniquely positioned for employment opportunities in the aging field after graduation.

Red	uired	Courses

SOC_WK 4480	Helping Strategies with Older Persons	3
SOC_WK 4395	Death, Grief and Loss	3
H_D_FS 3440	Adulthood and Aging	3
Take two of the following:		
HLTH_SCI 4420	Health Literacy and Behavioral Compliance	3
HLTH_SCI 4300	Health Care in the United States	3
SOCIOL 4210	Aging and the Life Course	3

Admission Requirements:

A student must be admitted to the University of Missouri with a declared academic major. To obtain the Gerontology Minor he/she must complete the minimum 15 credit hours as outlined above from the two designated areas.

Students must have a 2.5 minimum GPA to apply for and earn the minor. A minimum grade of "C-" in "required" or "optional" coursework is needed to qualify for the minor.

MSW in Social Work

Admission Contact Information

Crystal Null (nullc@missouri.edu) 725 Clark Hall; Columbia, MO 65211 573-884-9385

http://ssw.missouri.edu/msw.html

The University of Missouri's Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Application Deadlines

Fall deadline: January 15 Spring deadline: September 15

Admission Criteria

- Minimum GPA: 3.0.
- Bachelor's degree from an accredited college or university with the applicant's undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Test Portion	Total Minimum Score
Listening	22
Reading	21
Writing	23
Speaking	26

Minimum IELTS scores:

Test Portion	Total Minimum Score
Listening	6.5
Reading	6.5
Writing	6
Speaking	8

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be "pending successful completion of the approved statistics class".

Note: Priority admission deadline for On-campus and Online, Regular Standing Applicants and Online, Advanced Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. An applicant qualifies for Advanced Standing admission if they have a bachelor's degree in Social Work earned within the last seven (7) years. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until April 15.

Note: Priority admission deadline for On-campus, Advanced Standing applicants: September 15. An applicant qualifies for Advanced Standing admission if they have a bachelor's degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant that applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.

Read more about Regular vs. Advanced Standing below.

Required Application Materials

To the Office of Graduate Studies:

· All required Graduate Studies documents

To the MSW Program:

- Personal statement (see department instruction)
- Résumé/CV
- Three letters of reference from persons who can address the applicant's intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
- Unofficial transcripts
- Advanced standing students only: the most recent copy of your field evaluation (see department instruction)

Plans of Study

Preparation for professional leadership encompasses two major components:

Foundation

Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

Foundation Courses

SOC_WK 7000	Professional Social Work Practice	1
SOC_WK 7710	Social Policy and Service Delivery in Social Work	3
SOC_WK 7720	Foundations of Human Behavior	3
SOC_WK 7730	Social Work Skills	3
SOC_WK 7740	Large Group Theory	2
SOC_WK 7760	Social Justice Seminar	2
SOC_WK 7952	Research Methods in Social Work	3
SOC_WK 7971	Graduate Field Practicum I	4

Concentrations

The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

Concentration Courses: Clinical

Advanced Clinical Selective (choose 1 from those offered) *		3
Elective (must be graduate le	evel) *	3
Elective (must be graduate le	evel) *	3
Elective (must be graduate le	evel) ⁺	3
SOC_WK 7770	Strategies of Clinical Social Work Intervention	3
SOC_WK 7780	Fundamentals of Social Work Administration	3
SOC_WK 7820	DSM V and Psychopathology: A Social Work Perspective	3
SOC_WK 8953	Evaluative Research in Social Work	3
SOC_WK 8970	Professional Practice Seminar I	3
SOC_WK 8971	Graduate Field Practicum II	12

- * Elective and clinical selective courses offered will vary from year to year.
- The third elective course is only required for regular standing students.

Policy, Planning and Administration in Human Services: includes intervention strategies that effect change at the organizational, interagency, community, and societal levels to advance social and economic justice for consumers of social and human services and to empower practitioners within those agencies.

Concentration Courses: Policy, Planning & Administration

Elective (must be graduate level) *		3
Elective (must be graduate I	evel) *	3
Elective (must be graduate I	evel) +	3
SOC_WK 7780	Fundamentals of Social Work Administration	3
SOC_WK 7820	DSM V and Psychopathology: A Social Work Perspective	3
SOC_WK 7920	Advanced Foundations of Human Behavior for Administrators	3
SOC_WK 8350	Management of a Social Agency	3
SOC_WK 8953	Evaluative Research in Social Work	3
SOC_WK 8970	Professional Practice Seminar I	3
SOC_WK 8971	Graduate Field Practicum II	12

- * Elective courses offered will vary from year to year.
- The third elective course is only required for regular standing students.

Course Format

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration and elective courses are offered online through Canvas, a learning management system licensed to the University of Missouri for online courses.

The Online MSW program is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Canvas with the exception of the practicum, which requires 680 hours of supervised work at an approved agency.

Regular Standing: Non-Social-Work Bachelor's

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time and part-time students to the regular 60-credit hour program at the beginning of the fall semester only.

Advanced Standing: Bachelor's in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted in fall semester (full-time or part-time study). On-campus students admitted to the Advanced Standing Program are admitted in the spring session. Online students admitted to the Regular and Advanced Standing Programs are admitted for fall semester (part-time).

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular

Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

PhD in Social Work

Admission Contact Information

Program Contact: Shannon Mezzanotte (mezzanottes@missouri.edu) 724 Clark Hall; Columbia, MO 65211 573-884-1438

PhD Program Director: Dr. Mansoo Yu (yuma@missouri.edu) 720 Clark Hall; Columbia, MO 65211 573-882-4363

PhD Program Website: http://ssw.missouri.edu/phd.html

About the Program

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria

Admission deadline: Midnight January 15

- · Minimum GPA: 3.0; 3.5 in graduate study
- Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
80	550

- An MSW or related master's is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
- Minimum of two years post-master's practice experience encouraged.

Note: These criteria are used flexibly to assess the applicant's potential for study and research in this program.

Required Application Materials

To the Office of Graduate Studies:

• All required Office of Graduate Studies documents

To the Director of the Doctoral Program in Social Work (via the office of graduate studies online application system):

- Cover letter
- Three letters of recommendation
- CV
- · Writing proficiency sample
- · Personal statement
- A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

Plan of Study

The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master's degrees. The curriculum consists of a minimum of 55 post MSW semester credit hours or, for applicants without an MSW, 67 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master's program as part of their graduate training as well as a stand-alone certificate to graduate level clinical MSW practitioners and graduate level policy and administration MSW practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton's theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW's or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that

respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a population group and obtaining specialty training with population/services needing graduate level social workers.

A current MSW student can conveniently earn the Gerontological Social Work Graduate Certificate while completing their MSW. Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements for regular standing students in the clinical track, no additional coursework is required for these students. Regular standing students in the PP&A track and advanced standing students in the clinical track will be taking one additional course which will increase their credit hour requirement by 3 hours and advanced standing students in the PP&A track will be taking two additional courses which will increase their credit hour requirement by 6 hours.

The Gerontological SW Grad Certificate consists of 12 credit hours.

Required Courses		6
SOC_WK 7480	Helping Strategies with Older Persons	
SOC_WK 8240	Social Policy for Older Adults	
Choose one:		3
Clinical Selective		
SOC_WK 7490	Family Treatment	
SOC_WK 8050	Resiliency and Solution-Focused Practice	
Policy, Planning & Administrative students choose:		
SOC_WK 8210	Disability Rights Advocacy	
Students will choose from a variety of acceptable interdisciplinary courses for fourth class		3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Erin Robinson at robinsonel@missouri.edu (galambosc@missouri.edu).

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/44.0701-Gedt-Gerontological_SW.html.

Graduate Certificate in Military Social Work

The Military Social Work Graduate certificate is not accepting applications at this time

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Military SW Grad Certificate consists of 12 credit hours.

Required courses

SOC_WK 7340	Military Culture (counts as elective)	3
SOC_WK 7485	Military Social Work (counts as elective)	3
SOC_WK 8060	Trauma Practice and Crisis Intervention (counts as a clinical selective)	3
Elective (choose one)		
SOC_WK 8210	Disability Rights Advocacy (counts as elective)	3
SOC_WK 7470	Organizational Issues in Social Work Practices in Child Welfare (counts as elective)	3

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with military personnel, veterans or their families. The Director of Field in conjunction with the Director of the Graduate Certificate in Military Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience. For additional information about the Graduate Certificate in Military Social Work, please contact Dr. Carol Snively at snivelyc@missouri.edu.

Faculty

Professor J. Ha-Brookshire**, P. S. Norum**
Associate Professor J. Parsons**
Assistant Professor K. Morris**, L. Zhao*
Instructor K. McBee-Black*, J. Mestres*
Professor Emeritus L. E. Wilson**
Associate Professor Emeritus B. Dillard*, J. H. Pry

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Textile and Apparel Management (p. 659)
- Minor in Textile and Apparel Management (p. 661)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM's award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through course work, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to be a top recruit for industry positions.

Students who major in Textile and Apparel Management may choose from the following tracks:

- · Apparel Marketing and Merchandising
- Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses. Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 33) including University general education (p. 34).

Students who want to explore Textile and Apparel Management may take the following classes:

T_A_M 1200	Basic Concepts of Apparel Design and Production	3
T_A_M 1300	Softgoods Retailing	3
T_A_M 2200	Science of Textiles	3
T_A_M 2400	Global Consumers	3

Graduate

- MA in Textile and Apparel Management (p. 661)
- MS in Textile and Apparel Management (p. 662)

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management (p. 635).

Director of Graduate Studies

Dr. Jung Ha-Brookshire 137 Stanley Hall Columbia, MO 65211 573-882-7317 http://tam.missouri.edu/

Graduate programs in textile and apparel management offer the following areas of study: apparel design; apparel product development; consumer behavior; global supply chain management; history; marketing; retailing; and merchandising.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry analysis, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

BS in Textile and Apparel Management

Degree Program Description

Textile & Apparel Management (TAM) is a program which focuses on the apparel and textile supply chain. The curriculum emphasizes leadership, the global supply chain, sustainability, creativity/innovation and technology. Students have access to state-of-the-art design and apparel technology labs. The Apparel Marketing and Merchandising track prepares students for careers in merchandising, buying, e-retailing, and retail management. The Apparel Product Development track prepares students for careers in technical and creative design, sourcing, and product development. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the skills they need for top industry positions.

Major Program Requirements

There are two tracks available in Textile and Apparel Management: Apparel Marketing and Merchandising, and Apparel Product Development. These tracks are designed to provide students with knowledge and skills necessary to excel in the global textile and apparel industry. Students majoring in TAM may not take departmental courses using the Pass/Fail grading option. In addition to college requirements, students must meet all University graduation requirements (p. 33) including University general education. Some courses in the Professional Program are allowed to double count for General Education requirements (p. 34). This program can be completed in 120 hours. The following courses are required of all students majoring in Textile and Apparel Management (TAM). (NOTE: Tracks do not appear on transcripts or diplomas.)

Core Requirements

T_A_M 1200	Basic Concepts of Apparel Design and Production	3
T_A_M 1300	Softgoods Retailing	3

- Certificate in Youth Development Specialist (p. 665)

Minor in Criminology/Criminal and Juvenile Justice

Minor Available To Obtain Beginning Fall 2018:

The Criminology/Criminal and Juvenile Justice minor is available for ALL students, regardless of major. The courses aim to have students develop an understanding of the criminal and juvenile justice system and criminal behaviors through a social justice lens. This lens allows students to recognize the impact of the justice system on vulnerable and marginalized populations and offers a critical reflection of the ways in which evidence-based intervention and sensible social policy can reduce criminal justice involvement. The School of Social Work and Arts and Science will offer experiential learning opportunities to apply skills within criminal and juvenile justice settings, with adviser approval, which will count towards the minor requirements.

A minimum of 18 hours, comprised of the courses below, is required to complete the minor. Students must have a 2.5 minimum GPA to apply for and earn the minor. Note that students must earn a grade of C- or higher in all courses and a maximum of 6 credit hours from transfer institutions may be applied toward the minor.

Required Courses

SOC_WK 2000	Exploration in Social and Economic Justice	3
or SOC_WK 2000W	Exploration in Social and Economic Justice - Writin Intensive	g
SOCIOL 3600	Criminology	3
Electives		
SOC_WK 4370	Delinquency, Corrections and Social Treatment	3
SOC_WK 4400	Domestic Violence	3
SOC_WK 4410	Law and Social Work Practice	3
SOCIOL 1650	Social Deviance	3
POL_SC 2100	State Government	3
POL_SC 2200	The Judicial Process	3
SOC_WK 1200	Criminal Justice	3
BL_STU 4303	Race, Class, Gender and U.S. Social Policy	3
SOCIOL 2200	Social Inequalities	3
HIST 4415	African Americans and American Justice	3
PSYCH 3860	Law and Psychological Science	3
WGST 3260	Themes in Gender, Law and Justice	3
PTH_AS 4220	Forensic Pathology and Death Investigation	2

For additional information see: http://ssw.missouri.edu/minor

Minor in Financial Literacy for Helping Professionals

The School of Social Work has collaborated with Personal Financial Planning department within the College of Human Environmental Sciences to develop a minor in Financial Literacy for Helping Professionals. As front line helping professionals encounter clients who face challenging economic situations, skills in addressing those challenges and knowledge of foundational personal finance information will aid in helping clients. Knowledge of predatory lending practices, social welfare policy designed to help the working and non-working poor, and tax strategies to enhance financial situations will be addressed. This minor hopes to embrace the imperative need to educate our graduates on the role of financial literacy for those professionals who will serve others.

Students who complete the financial literacy minor may not refer to themselves as BSW-level social workers upon graduation. Fifteen credits are required to complete the financial literacy minor.

Minor Requirements

FINPLN 2183	Personal and Family Finance *	3
FINPLN 3282	Financial Counseling *	3
FINPLN 4188	Community Agencies and Volunteerism (taught in spring semester only; students will need to attend a workshop in order to certify for IRS compliance)	3
SOC_WK 4750	Interaction Skills Workshop	3
Select one of the following:		
SOC_WK 2000	Exploration in Social and Economic Justice	3
or SOC_WK 2000W	Exploration in Social and Economic Justice - Writing Intensive	l

or SOC_WK 4710	Social Justice and Social Policy	
Total Credits		15

Completion of these two courses, as well as the proposed curriculum for the minor, will allow the student to sit for the Accredited Financial Counselor Exam.

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is necessary in order to attain this minor. This minor is available to students regardless of major.

The student must have an overall GPA requirement of a 2.5 to apply for the minor.

This minor is available to students regardless of academic major. A student must complete the application minor information and submit to Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) in Clark Hall for approval. The student must be graduating from a distinct discipline to be eligible for the minor. The minor will be added to the student's myZou record upon completion to be given simultaneously with the degree.

Support Process: The student may meet with the Director of Undergraduate Studies and the Student Service Coordinator (http://ssw.missouri.edu/faculty_freelin.html) for advising regarding the Financial Literacy for Helping Professionals minor.

Application for the Financial Literacy for Helping Professionals Minor

Minor in Nutritional Sciences

The minor in nutritional sciences is intended for students majoring in food science, biological sciences, biochemistry, health and exercise sciences or related fields. This minor would be a good choice for students looking at pre-med, pre-dental or Physician's Assistant programs.

Minor core requirements consist of a minimum of 15 hours of nutrition (not exercise/fitness) courses, including NEP 2340: Human Nutrition I, plus 12 hours from the list of approved nutrition courses. <u>Prerequisites apply to some classes and will be enforced</u>.

To apply for the nutrition minor, use the online application form (http://hes.missouri.edu/students_minorapp.php) available on the Human Environmental Sciences Student Services website: http://hes.missouri.edu/students_minorapp.php

Minor core requirements

•		
NEP 2340	Human Nutrition I (spring only)	3
Plus 1 course from the foll	owing list of approved nutrition courses:	3
NEP 1310	Food and Cultures of the World	
NEP 2222	Landscape of Obesity (spring only)	
NEP 4360	Nutritional Assessment (fall only)	
Plus 2 courses selected fro courses:	om the following list of approved nutrition	6
NEP 2380	Diet Therapy for Health Professionals	
NEP 4340	Human Nutrition II Lecture (fall only)	
NEP 4370	Nutrition Therapy I (spring only)	
Plus 1 course selected fro courses:	m the following list of approved nutrition	3
NEP 2450	Nutrition Throughout the Life Span (spring, summer)	

NEP 4590	Community Nutrition (fall only)	
Total Credits		15

Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 hours, comprised of the courses below, is required to complete the Social Justice minor. Students must have a 2.5 minimum GPA to apply for and earn the minor. Note that students must earn a grade of C- or higher in all courses and a maximum of 6 credit hours from transfer institutions may be applied toward the Social Justice minor.

Minor core requirements

willion core requirements		
SOC_WK 1115	Social Welfare and Social Work	3
SOC_WK 2000W	Exploration in Social and Economic Justice - Writing Intensive	3
SOC_WK 2220W	Human Behavior and the Environment - Writing Intensive	3
Social work electives		
Select two of the following:		6
SOC_WK 4101	Topics in Social Work	
SOC_WK 4330	Addiction Treatment and Prevention	
SOC_WK 4370	Delinquency, Corrections and Social Treatment	
SOC_WK 4390	Helping Strategies With Children and Adolescents	
SOC_WK 4395	Death, Grief and Loss	
SOC_WK 4400	Domestic Violence	
SOC_WK 4410	Law and Social Work Practice	
SOC_WK 4450	Professional Perspectives on Child Welfare Services in the 21st Century	
Total Credits		15

Minor in Wellness

The Wellness Minor is intended for both non-science and science students interested in coursework focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices.

Core requirements consist of a minimum of 15 hours of nutrition and exercise/fitness courses.

Required Courses

NEP 1034	Introduction to Human Nutrition	3
or NEP 2340	Human Nutrition I	
NEP 1340	Introduction to Exercise and Fitness	3

NEP 2450	Nutrition Throughout the Life Span (check prerequisites)	3
NEP 3450	Activity Throughout the Lifespan	3
Choose at least one of the following (to complete a total of 15 hours)		
NEP 2222	Landscape of Obesity	3
NEP 2380	Diet Therapy for Health Professionals	3
NEP 2460	Eating Disorders	2
NEP 3550	Corporate, Community, and Personal Fitness	3
NEP 4200	Sports Performance and Conditioning	3

To apply for the Wellness Minor, use the online application form (http://hes.missouri.edu/students_minorapp.php) available on the Human Environmental Sciences Student Services website.

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student's financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at http://www.gpidea.org/index.html? page=majorsDegreesCourses.html&anchor=programAnchor1.

About the School

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

Undergraduate

- Admissions (p. 666)
- Special Programs (p. 666)
- Academic Regulations (p. 667)
- Advising (p. 668)

- Senior Assessment Program (p. 668)
- Opportunities for Graduate Study on MU Campus (p. 672)

Admissions

Students admitted to the University of Missouri are eligible to pursue the Bachelor of Journalism degree. As students are nearing completion of pre-interest area requirements they will apply for admission to a Journalism interest area. This typically occurs during the third semester to begin the interest area in the fifth semester.

Admission to Upper-Division Interest Area

Students who complete 60 credits, maintain a minimum UM GPA of 3.0 and complete the necessary coursework are admitted to an interest area.

Students who meet the course requirements, but do not meet the minimum cumulative UM GPA of record of 3.0 must appeal for admission to an interest area. A Faculty Appeal Committee in each emphasis area will review applications for admission based on several criteria. Students in this situation will receive detailed instructions for submitting an appeal.

Transfer Credit

The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students should also contact an advisor to see how these courses would apply toward a degree at MU. The School of Journalism can accept up to six journalism credit hours from other accredited journalism programs or from Missouri colleges with which the School of Journalism has working agreements.

Current Missouri journalism students may not transfer journalism courses from other institutions. Many communications courses are also prohibited.

International Students

In addition to meeting the standards for admission to the university, students must meet the following English-language proficiency standards: Minimum Test of English as a Foreign Language (TOEFL) paper-based score of 550 or minimum TOEFL electronic score of 80 or International English Language Testing System (IELTS) band score of 6.5 with minimum section scores of 6.

Special Programs

The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU's best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

The Walter Williams Scholars Program

The highest-achieving applicants to the Missouri School of Journalism are designated Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school's founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri.

Qualifications: Incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of their high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. **Admission is by invitation only.**

Benefits:

- · Direct admission to the Missouri School of Journalism
- · Placement in a special Freshman Interest Group, space permitting
- · Assigned individual faculty mentor
- A \$1,000 scholarship for Missouri School of Journalism global programs (includes New York or Washington, D.C.) The scholarship can be used at any time before graduation
- Recognition at graduation
- Automatic admission to the accelerated BJ/MA program at the School
 of Journalism, which allows students to complete their graduate
 degree in one year rather than two. Admitted students can earn up to
 X credits that count toward both the BJ and MA programs. Admission
 is contingent upon the following criteria:
 - Maintenance of a 3.50 GPA in your journalism coursework and for your cumulative average, throughout you undergraduate career
 - Submission of a complete MA application at the completion of 75 credits, including payment of the application fee, and two (out of three) letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master's Application Checklist: http://journalism.missouri.edu/programs/masters/admissions/

To make the most of the program, the School encourages high-ability students to apply to the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible.

Academic Regulations

Dual-Degrees

To receive two bachelor's degrees, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the additional academic unit.

Credit Restrictions

Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Capstone Course

All students must complete a capstone course during their last 45 hours of study. Each interest area provides a course(s) to fulfill this university requirement.

Independent Study

Mizzou Online offers a variety of online courses that can be taken selfpaced. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 4 hours per semester of online self-paced courses. Enrolling in more than 4 hours per semester requires approval from an academic advisor.

Standards for Academic Performance

The School of Journalism is a challenging and rigorous environment in which students are expected to maintain high standards of academic achievement. In general, the faculty expects each student to maintain a GPA of 3.0 or higher to be considered in good standing. The academic standing guidelines are categorized by completed credit hours. Each category has a specific requirement to ensure students are making progress to achieving a 3.0 GPA and progressing toward timely degree completion. The credit hour classifications include University of Missouri courses, transfer courses, advanced placement credit and other credits by examination. While the credit hours from all of these sources are included in the following categories, only the grades in courses completed in the University of Missouri system will be computed for GPA purposes.

Probation

Probation indicates a student is struggling to meet expectations.

Students placed on probation are required to meet with their advisor frequently during the upcoming semester. During these meetings students will be assessed to determine which types of intervention are needed to return to good academic standing.

Removal from probation occurs when journalism major course, term and cumulative GPAs are all 2.0 or higher.

Dismissal

Students who are dismissed are having significant challenges in meeting expectations. Students are encouraged to seek admission to another academic college at the University at Missouri to regain eligibility for course enrollment.

Students can appeal to return to the School of Journalism when their GPA returns to a minimum of 3.0.

First Time Freshmen

Probation: GPA is between 0.50 - 1.99

First semester freshman journalism students are placed on final probation when their first term GPA is between 0.50 and 1.99. They regain good standing when their term and cumulative GPAs are 2.0 or higher.

Dismissal: GPA is below 0.50

First semester freshman journalism students are dismissed and become ineligible to enroll for a minimum of one semester when their first term GPA is below 0.50

All Students

Academic Progress

Students who have completed one semester at MU who do not meet the following standards will be dismissed from the School of Journalism and will not be permitted to re-enroll in a minimum of one semester:

• 0-29 credit hours

Students must maintain a cumulative MU GPA of at least 2.5.

• 30-69 credit hours

Students must maintain a cumulative MU GPA of at least 2.75.

• 70 credit hours

Students with 70 or more credit hours who have not been admitted to their interest area.

Readmission

A student who has been dismissed and declared ineligible to enroll may be readmitted only on the approval of the dean of the school or college in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student, after readmission, again becomes ineligible to re-enroll, their ineligibility normally is considered permanent.

Minimum Grade in Journalism Courses

Students must repeat any required journalism course in which they do not earn a grade of C- or higher. A student who fails to achieve a C- or better during the second attempt will be permanently dismissed from the School of Journalism for lack of acceptable progress.

Students may be readmitted only with the consent of the faculty chair of the student's interest area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

Satisfactory/Unsatisfactory Courses

Students have the option to enroll in courses on a satisfactory/ unsatisfactory basis instead of a traditional letter grade basis. A maximum of one non-journalism course per semester may be taken on a satisfactory/unsatisfactory basis. A satisfactory grade is defined as equivalent to the letter grade of C- or higher.

Journalism courses are not usually graded on a satisfactory/ unsatisfactory basis. If a required course, or a course being used to satisfy a specific requirement, is taken in this manner the School of Journalism will compute it in the GPA as a "C."

Excessive Incomplete Grades

A student may be placed on probation, suspended or dismissed for excessive incompletes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. The time limit will not exceed one calendar year from the scheduled completion of the course and may be of shorter duration. The associate dean also may place limitations on the number of additional credits hours in which the student may enroll until the incomplete grades are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students should be familiar with the Code of Ethics of the Society of Professional Journalists and adhere to its restrictions. Students are expected to observe strict honesty in academic programs and as representatives of school-related media. Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in any assigned work, that student may be subject to a failing grade from the instructor and such disciplinary action as may be necessary under university regulations.

Non-Journalism Majors

Students from other divisions with junior or higher standing may take nonlaboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools or colleges admitted to journalism courses are expected to meet the course prerequisites and grade point averages required of students in the School of Journalism.

Advising

Students are expected to seek the advice of an academic advisor in the selection of courses and semester planning. Students are encouraged to seek advice from the faculty for career counseling and specific journalism related issues.

The university provides degree audits for students to track completion of degree requirements. Students are responsible for enrolling in an appropriate schedule of courses each semester; however, students are encouraged to consult with their advisor when necessary. The responsibility for meeting admission and graduation requirements rests with the student.

Senior Assessment Program

In accordance with the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC) and University of Missouri rules, the Missouri School of Journalism has provided continuous assessment of all graduating seniors since 1994.

The School of Journalism uses both direct and indirect measures of student learning to provide faculty and administrators with information to improve how and what students learn in their major. One key component has been the feedback of external reviewers who have substantial experience in the areas being evaluated. The professionals conduct one-on-one interviews with students, critique portfolios and evaluate other relevant evidence of student learning and preparation for their chosen fields. Assessment information is regularly used to guide curriculum decisions and inform teaching and learning practices.

The components of the senior assessment program are as follows:

Each May and December the School conducts a comprehensive exit survey of all graduating seniors. The goal is to determine student attitudes and the degree to which the program emphasizes the values and competencies defined by the School and the Accrediting Council on Education in Journalism and Mass Communication. The student exit survey is conducted in the two weeks prior to graduation. The survey also provides the School with initial data about graduates' career placement and destination plans.

Student Outcomes Survey

The School conducts an outcomes survey of all graduating seniors. The survey opens two-three weeks prior to graduation and gathers information for a full year, following a student's successful completion of their degree. The survey provides the School with initial data about graduates' career placement and destination plans.

Student Exit Exam

Students complete an exit exam to measure student knowledge related to ACEJMC core values and competencies. Students take the 26-question exam in their required capstone courses.

Emphasis Area Reviews

Each emphasis area sets its own learning objectives and a timeline for review of student work during students' final semester. Emphasis area reviews typically require students to produce a portfolio that encompasses a sampling of their best professional work whether from journalism courses, extra-curricular activities, internships or other work experience. All emphasis area reviews rely on external reviewers and industry professionals to assess student learning and advise on methods for improving the program.

Convergence:

Graduating seniors complete a **digital portfolio** with a home page, resume, links to best work and evidence of proficiency in more than one area of journalism. Portfolio completion is required in students' capstone class and portfolios are evaluated by external reviewers.

Convergence Journalism Learning Goals

- Convergence faculty endorse the ACEJMC professional values and competencies that prepare convergence students to work in a diverse global and domestic society.
- Convergence faculty provide a curriculum that embraces traditional
 journalistic values while employing new technology and strategies
 to create original multimedia content for targeted audiences. By
 design, the core curriculum focuses on providing students with
 hands-on experiences to operate in deadline-driven and collaborative
 environments. Through convergence interest areas and electives,
 students gain increased understanding and skill in one area of
 specialization.

Successful graduates should be able to:

- Pitch a story idea or creative concept to a supervisor, future employer, or potentia investor
- Understand, articulate and employ traditional journalistic values in telling a story
- Write effectively for multiple audiences
- Demonstrate proficiency in more than one content production technique (e.g. audio, video, text, photojournalism, data visualization)
- Demonstrate mastery in one area of specialization (data visualization, reporting for radio, television, print or digital outlets, producing for traditional, online, mobile or social media platforms, photojournalism, etc)
- Use digital tools and techniques to produce targeted content for distribution on all relevant platforms
- Engage users through effective application of social media and audience analytics.

Through their capstone experience undergraduate students will:

- Demonstrate their ability to use a quantitative or qualitative research method for the purpose of studying a specific objective on a team project
- Design and deliver an effective project presentation
- Identify their personal brand and effectively present themselves to a
 potential employer in person and through an online portfolio.

Magazine:

Graduating seniors complete a **digital portfolio** that includes a resume and clips. Each portfolio is reviewed by an evaluator who completes an assessment scorecard, which is returned to the student. External reviewers include magazine industry professionals who provide individual

feedback to students and overall comments to the magazine faculty as a whole

Magazine Journalism Learning Goals

 The magazine program/emphasis area is designed for students interested in reporting, writing, editing, designing or publishing magazines, both in print and digital platforms.

As a result of their experience in the magazine emphasis area students or graduate models should know or apply:

- A context for skills development. Graduates should have a thorough appreciation for and understanding of the role of the media.
 Graduates must understand the history and cultural environment in which they will be applying those skills.
- A grasp of professional ethics. Graduates should understand that
 their choice of a career has made them beneficiaries of a public trust.
 They should have a sober appreciation of the power they wield and
 be sensitive to the influence of publicity on the lives of subjects.
- Different concepts, theories and research methods. They should be able to think critically, creatively and independently and be able to assess the work they and fellow journalists produce for quality, accuracy, fairness and tone.
- An understanding of diversity including gender, race, ethnicity, sexual orientation and other areas. Such knowledge is indispensable in serving our audiences and communities. Graduates should seek and appreciate diverse perspectives and experiences.
- Current tools and technologies appropriate for the magazine, publication or media outlet in which they work. They should also demonstrate agility in adjusting to the ever-changing nature of the industry.

Successful magazine graduates should be able to do the following:

- Report, research and gather information through primary and secondary sources as well as demonstrate solid interviewing skills and news judgment.
- Write correctly and clearly stories of varied scope, length and style.
- Excel in all aspects of editing from collaborating with members
 of the staff or team to story pitching and issue planning, making
 assignments, editing stories on both macro and micro levels, fact
 checking, packaging and production. Editing also includes audio,
 video and other multimedia.
- Understand basic design principles and the importance of layout, presentation and packaging in storytelling.
- Consider the numerous ways to present stories, including but not limited to audio, video, charts or infographics. Explore avenues for stories to find audiences, including but not limited to social media and using data from digital analytics.
- Serve the interests of the reader, maintain a magazine brand and understand aspects of publishing including audience, circulation, advertising, printing and distribution.

Photojournalism:

Graduating seniors submit **digital portfolios** containing work completed in the last two years of their course work. Portfolios contain primarily students' visual reporting (still photography, video and multimedia) as well as reporting samples, editing samples and design samples, if the student has taken design courses. Students also participate in a 45-minute, one-on-one interview with a visiting professional.

Interviews allow for an assessment of a student's readiness to enter the job market and provide a forum for students' personal comments about their educational experience. Assessors use a scorecard to grade student work, with copies provided to each student and photojournalism faculty.

Photojournalism Learning Goals

Students in the Photojournalism undergraduate emphasis area or the graduate models should know or be able to apply:

- Advanced knowledge of photojournalism to produce story telling visual reportage and editing techniques for print and digital platforms
- Ethical and legal considerations in visual newsgathering and dissemination
- Knowledge of and ability to gather information through interviewing, records research and statistical analysis
- How journalism has influenced, and will continue to influence, the world
- The role of journalism in a multicultural democracy, and visual communication informs citizenry
- Understanding of the interplay between social media and traditional media and its uses and relevance in today's news landscape.

In addition, photojournalism students should be able to:

- Analyze, synthesize and present information under the pressure of deadline
- Gather and disseminate news within ethical guidelines, and in the public interest
- Construct news and information in creative and original ways that avoid any hint of plagiarism
- Be transparent in all journalistic functions and develop decision--# making capabilities that withstand public scrutiny
- Understanding how to create news hierarchies through editing, design and presentation
- Develop visual literacy and technical skills to enhance the presentation and delivery of news across all forms of print and digital platforms
- Foster diversity and societal understanding through newsgathering and dissemination

Print and Digital:

Graduating seniors submit a **digital portfolio** that includes at least 10 samples of their work; an essay describing an ethical dilemma faced during the course of practicing journalism at a school-affiliated publication or during an internship; and a resume. The work must include one sample of multimedia. Students are then matched with outside professionals, based on their career interests. (public affairs reporting, sports, infographics, copy editing, designing, etc.) The professionals review the material and spend about a half-hour with the student by phone or video conferencing. They then complete a student assessment scorecard. The chair reviews the scorecards and sends them to the faculty along with any observations about themes or trends.

Print and Digital News Learning Goals

• The goals for students in the Print and Digital News group conform to the ACEJMC's core competencies.

Students in the Print and Digital News undergraduate emphasis area or the graduate models should be able to:

- Analyze, synthesize and present information under the pressure of deadline
- Gather and disseminate news within ethical guidelines, and in the public interest
- Construct news and information in creative and original ways that avoid any hint of plagiarism
- Be transparent in all journalistic functions and develop decisionmaking capabilities that withstand public scrutiny
- Understand how to create news hierarchies through editing, design and presentation
- Understand audiences and foster conversation within and among them
- Develop visual literacy and technical skills to enhance the presentation and delivery of news across all forms of print and digital platforms
- Foster diversity and societal understanding through news gathering and dissemination

Radio-Television:

Graduating seniors complete **digital portfolios** that include their resumes, written work and video clips. News executives from major television companies representing approximately 400 television newsrooms across the country visit campus to conduct one-on-one interviews and portfolio evaluations with each student. Evaluators provide verbal critiques to students and written assessment and commentary to faculty.

Radio-Television Journalism Learning Goals

Students in the Radio-Television undergraduate emphasis area or the graduate models should be able to:

- Research for story or newscast by applying internet tools, background information, and using in-person interviews
- Gather facts by using a wide range of diverse sources, established sources that lead to new sources and techniques that yield or reveal extraordinary information
- Write using conversational language, short sentences and techniques specific to video and sound
- Produce video using basic techniques of video composition such as sequences, lighting and matched action
- Tell stories using various angles and techniques to emphasize important and timely elements in a story
- · Recognize ethical issues and how to avoid sensationalism
- Use news judgment to determine the relative value of stories in a digitally-driven 24-hour news cycle

Strategic Communication:

Students **interview** with at least one working professional in the field who assesses the student's **resume** and **portfolio**, along with overall career readiness. During these one-on-one interviews of all strategic communication students, assessors ask students to describe their experiences in the School and in Strategic Communication.

Strategic Communication Learning Goals

 The Strategic Communication emphasis area fosters theory and practice in nine specialties and teaches the linkages among those specialties. Interest areas are Account Management, Art Direction, Copywriting, Digital Strategy, Media Planning, Public Relations, Research, Sports and Entertainment promotion, and Video

Storytelling. All specialty areas share common learning goals and competencies.

Students in the Strategic Communication undergraduate emphasis area or the graduate models will have the knowledge and ability to:

- Understand and conduct high level and ethically executed primary and secondary research using both qualitative and quantitative methods
- Think critically about the potential ethical implications of persuasion in media
- Communicate in ways that are respectful and inclusive with regard to people's ethnicity, disabilities, gender, religion, country of origin, or sexual orientation
- Write and use images and video to communicate clearly, effectively, and ethically on a range of strategic communication media platforms
- Effectively use current technology in Strategic Communication and in their specialty areas
- Apply ethical and legal principles governing communication in a free society and understand the historical origins of such principles and practices
- Engage in strategic thinking in addressing opportunities and problems in strategic communication practice
- Work in effective teams in classes and for fee-paying clients (Mojo Ad and AdZou capstones)

Students in individual specialties have additional specific goals:

Account Management

Professionals in Account Management lead and manage a brand's strategic communication planning and execution. They may have this role in agencies, not-for-profits, government, and corporations.

Graduates will have the ability to:

- Conduct and/or apply research to client opportunities and problems
- Manage the relationships among all of the stakeholders in a strategic communication initiative
- Manage and assist in the development and presentation of audience insights

Art Direction

Art directors, graphic artists, and visual designers communicate using visual elements, and deploy their work through print, digital, visual, and experiential means.

Graduates will have the ability to:

- Use the power of visuals to communicate quickly and effectively following principles of good design
- Understand the importance of strategy in developing visual communication
- Apply the current terminology and tools of art direction

Copywriting

Copywriters create persuasive messages for multiple platforms that are targeted toward specific audiences and have the power to break through cluttered media environments.

Graduates will have the ability to:

- Develop messages that are on strategy and creative
- · Communicate benefits versus product or service features

· Work with designers developing effective messaging

Digital Strategy

Digital strategists use research, analytics, and online metrics in planning and executing campaigns and complementing larger initiatives.

Graduates will have the ability to:

- Use research, analytics, mobile, social, and emerging digital tools
- Develop digital promotions that synchronize with larger strategic campaign tactics and objectives
- · Apply high-level technological skills to problem solving

Research

Researchers in strategic communication have strong expertise in understanding consumer psychology and behavior of target audiences.

Graduates will have the ability to:

- Apply the rules and requirements of social scientific and marketing research
- Understand and select optimal theories and methodologies for different research questions
- Properly evaluate ethical issues in conducting research on human subjects

Media Planning

Media planners use research and analysis in determining where, when and how often a brand will deploy strategies and tactics in communicating with target audiences.

Graduates will have the ability to:

- Utilize the latest analysis techniques to creating strategies and evaluative criteria
- Identify optimal combinations of media tactics to achieve best results at the lowest cost
- Identify ethical issues related to privacy, behavioral targeting, location-based marketing, etc.

Public Relations

Public relations practitioners utilize a range of strategies and tactics including the "PESO" approach: Paid, Earned, Shared/Social, and Owned. They not only use traditional publicity tactics through news and other media, but also DTC, social media, and other approaches.

Graduates will have the ability to:

- Understand the strategic mix promotions and PR's role in that mix
- Understand and advise regarding other PR functions including events, risk and crisis communication, and internal communication
- Identify the range of stakeholders PR professionals may work with including employees, vendors, financial communities, government and policymakers, and opinion leaders

Sports and Entertainment Promotion

Specialists in sports and entertainment promotion work in several areas. This includes sports organizations and teams as well as music, film, theater, television, cable, and other entertainment properties.

Graduates will have the ability to:

 Understand the unique characteristics of different sports and entertainment brands

- Strategically deploy brand benefits through sports and entertainment venues, tie-ins, and other tactics
- Target audience segments for appropriate sports and entertainment related campaigns

Video Storytelling

Video storytellers design and create video content for a wide range of media platforms and devices. They craft such videos using strategies to increase brand visibility and sales through search, sharing, and mobile applications.

Graduates will have the ability to:

- · Create brand videos that contribute to overall campaign strategies
- · Plan, shoot, and edit high quality videos
- Quickly produce accurate, engaging, and informative stories aimed at target audiences

ACEJMC Learning Goals and Outcomes:

The School strongly adheres to the learning competencies and values defined by the **Accrediting Council on Education in Journalism and Mass Communication** which states that irrespective of a student's particular specialization all graduates should be able to:

- understand and apply the principles and laws of freedom of speech
 and press for the country in which the institution that invites ACEJMC
 is located, as well as receive instruction in and understand the range
 of systems of freedom of expression around the world, including the
 right to dissent, to monitor and criticize power, and to assemble and
 petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- · think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- · apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Opportunities for Graduate Study on MU Campus

The accelerated bachelor/master degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The new program will allow students to apply and begin their

master's program in the senior year of undergraduate program. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master's degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student's skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Graduate

About Our Graduate Programs

The University of Missouri's School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, hightech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Office of Graduate Studies. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.

Journalism

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter

Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

Undergraduate

- BJ in Journalism (p. 675)
 - with emphasis in Convergence Journalism (p. 677)
 - with emphasis in Magazine Journalism (p. 679)
 - with emphasis in Photojournalism (p. 681)
 - with emphasis in Print and Digital News (p. 682)
 - with emphasis in Radio-Television (p. 684)
 - with emphasis in Strategic Communication (p. 685)
- Minor in Journalism (p. 687)

Undergraduate students in the School of Journalism pursue their degrees in one of six Emphasis Areas approved by the University Board of Curators and the Missouri Coordinating Board of Higher Education. These are Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News, Radio-Television Journalism, and Strategic Communication. Degrees are awarded only in one of those six areas.

Each Emphasis Area, however, has separate tracks that permit students to prepare for employment in more specialized fields. These are called Interest Areas, and students select from more than 30 choices among these. Interest Areas do not appear on transcripts or diplomas, although the transcript coursework should provide evidence of competency in the appropriate area.

Administratively, the School of Journalism is divided into Faculties, not Departments as in most other Schools and Colleges at MU. For administrative purposes, all Interest Areas are assigned to one of those Faculties except for two International Interest Areas, which are administered by the School of Journalism's Global Programs Office. International programs, however, merely indicate an international interest. The degree is still awarded under the appropriate Emphasis Area.

To ensure maximum flexibility for students, the School also offers an Individually Designed Interest Area. Working with three faculty members, and with the approval of the associate dean for undergraduate studies, a student can design his or her program by selecting from the School's robust offerings of more than 100 courses. Students who pursue this option must do so within accrediting guidelines and within one of the six approved Emphasis Areas.

Students who desire more information on a particular program should see an Academic Advisor or seek out a member of the supervising Faculty, which is indicated following the description of the Interest Area.

Students interested in one of the international programs should seek out an advisor in the Global Programs Office. Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School's Faculties as indicated.

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. *Cum laude* requires 3.5, *magna cum laude* 3.7, and *summa cum laude* 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a

letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who cannot find a match with one of the existing Interest Areas may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Students are not able to tailor an Interest Area in Strategic Communication due to the large volume of enrollment. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area's Goal

16

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

Journalism or Non-Journalism Electives (6 Non-Journalism Credits)

6

In consultation with the faculty mentor, the student should choose a minimum of six non-journalism credits that complement the program's objectives. For example, if a student were to design a program in some aspect of entrepreneurial journalism, six or more credits in business courses might be desirable. In the absence of relevant courses for the targeted interest area, these credits become general electives for students.

Capstone

3

Students pursuing this interest area should choose from among the School's available capstone courses to find one that best meets the model's objectives. In the absence of a clear choice, JOURN 4990: Journalism and Democracy, is recommended. Students also are required to complete an upper-division Writing Intensive (WI) course. Some capstones carry WI designation. Others may be found in the journalism curriculum or outside the school.

Approval Procedure

Students who wish to construct a special interest area must submit a program proposal form before completing 70 total credits. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must gain approval of the tailored program from the associate dean before beginning the program.

Total Credits for the Degree and their Breakdown

Students pursuing a tailored program must complete 120 credits to include:

- Completion of all Pre-Interest courses
- 44-48 journalism credits
- minimum of 72 non-journalism credits

Graduate

Master's Programs

There are two options available for Master's Programs in Journalism. Students who wish to pursue a traditional on-campus experience, should refer to the MA in Journalism page (p. 687). The above emphasis areas are not available for on-campus students. Students may also wish to pursue the online Master's program. Online students have the option of obtaining an MA in Journalism with any of the emphasis areas listed above.

About Journalism's Graduate Degree Programs

The Missouri School of Journalism awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively. The master's and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master's program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate several major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients through our two student-run advertising agencies, MOJO Ad and Adzou. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, Brussels and Barcelona where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 692).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. These include the Columbia *Missourian*, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service; KOMU-TV, an NBC affiliate; KBIA-FM, a National Public Radio station; MOJO Ad and Adzou advertising agencies; and Vox magazine, a weekly city magazine.

All provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, located on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP's interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew's 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.

The American Society of News Editors focuses on leadership development and journalism-related issues. Founded in 1922 as a nonprofit professional organization, ASNE promotes fair, principled journalism, defends and protects First Amendment rights, and fights for freedom of information and open government.

Founded in 2003 with a generous gift from the Donald. W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

Special Events

Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society

Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding

An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available.

BJ in Journalism

6

Degree Program Description

Students can focus on journalism or strategic communication. Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Strategic communication involves learning the principles and practice of all communication designed to create a desired response from a given audience in advertising, public relations, digital and social media.

Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism or strategic communication. For this degree program, students must choose an emphasis area. Refer to the degree program descriptions for the emphasis areas for more details.

Major Program Requirements

The Bachelor of Journalism degree requires 120 credits.

To obtain the Bachelor of Journalism degree, a student must:

- · Complete all Pre-Interest area requirements
- · Be admitted to an interest area within the school
- · Complete all interest area requirements
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all Journalism courses
- Complete all University graduation requirements (p. 33), including University General Education (p. 34) requirements

Major Core Requirements

Required Courses:		19
JOURN 1010	Career Explorations in Journalism	1
JOURN 1100	Principles of American Journalism	3

Some courses are prohibited for the bachelor of journalism. See the list of course exceptions for more information. Students should consult with their assigned academic advisor if they have questions regarding courses in these areas.

Flexible Credits

Area 3

Students can take up to 4 additional credits of journalism (JOURN) electives and apply them to requirements in Area 4.

General Electives

Electives necessary to complete a minimum of 72 credits of nonjournalism classes and 120 total credits. Any course acceptable to the School of Journalism is allowed.

International Journalism Interest Area

The next generation of journalism students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri's international reputation and its international resources by placing under one umbrella the school's existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this interest area may take courses within any of the existing or prospective areas to complement their international interests. This degree is granted in the student's emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School's Global Programs Office. Interest Areas do not appear on Transcripts or Diplomas. Emphasis areas appear only on transcripts.

BJ in Journalism with Emphasis in Convergence Journalism

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Convergence Journalism. Convergence Journalism focuses on the multimedia and multi-platform storytelling through a converged core that includes reporting, editing and producing, and marketing of converged media. The curriculum includes focused study and hands-on experience within the interest areas of Convergence Photojournalism, Convergence Radio Reporting and Producing, Convergence Television Reporting, Emerging Media, Entrepreneurial Journalism, International Journalism, Multimedia Producing and Sports Journalism. Most pursue careers as Reporters, Anchors, Editors, and Producers.

Major Program Requirements

All Convergence Interest Areas teach multimedia storytelling by having students take the three core convergence classes, JOURN 4804 Convergence Reporting, JOURN 4806 Convergence Editing and Producing; and the capstone, JOURN 4992 Reporting, Editing and Marketing of Converged Media. Students are able to specialize by taking classes from selected requirements and electives.

Students must complete all university requirements, including general education, in addition to the degree requirements below.

Emerging Media Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear only on transcripts.

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This interest area is for the student who wants to learn and work with some of the latest developments in journalism. Classes in this area provide a wide range of opportunities from content creation and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in the intersection of journalism and digital technologies. *Administered by the Convergence Faculty*.

Emerging Media Interest A	rea Required Journalism Classes	18

JOURN 4974	Advanced Internet Applications for Radio/TV News	
Journalism Electives		7

Entrepreneurial Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

More and more of today's journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in journalism and what audiences want. They also will study the relative marketability of content. Students will learn the market value of their own work, how to build their own brands and how to market. Administered by the Convergence Faculty.

Entrepreneurial Journalism Interest Area Required Journalism Classes		15
JOURN 4444	Team-Based Mobile Device Application Development	3
JOURN 4804	Convergence Reporting	3

JOURN 4734	Journalism and Chaos: How to Understand and Cover 21st Century Business Models	
JOURN 4812	Online Audience Development	
Journalism Electives		10

Multimedia Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. Administered by the Convergence Faculty.

Multimedia Producing Inte	rest Area Required Journalism Classes	15

JOURN 4972	Photo and Visual Editing	
Journalism Electives		

Convergence Photojournalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. *Administered by the Convergence Faculty*.

BJ in Journalism with Emphasis in Magazine Journalism

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Magazine Journalism. Magazine Journalism focuses on the skills and strategies needed to excel in this industry. Students design, write, report, and public across multiple platforms, including tablets, the Web, print and social media. The curriculum includes focused study and hands-on experience within the interest areas of Arts and Culture, Design, International Journalism, Magazine Editing, Magazine Publishing and Management, Magazine Writing, and Science and Health Journalism. Most pursue careers as Magazine Editors, Publishers, and Writers.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Magazine Journalism Interest Areas Arts and Culture Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interdisciplinary interest area gives students the opportunity to expand their understanding of the arts as they develop critical thinking skills about society, culture and the media. Students are encouraged to see culture as a central part of the journalistic enterprise as they learn about art, music, theater, film, popular culture and critical reviewing. This is intended to lay the groundwork not only for careers in traditional and emerging forms of journalism but also for careers in arts organizations, museums, nonprofit agencies, cultural institutions and government programs. Administered by the Magazine Journalism Faculty.

Design Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area teaches students to tell stories using the tools of visual journalism. Critical thinking skills and application methods are studied and practiced in courses that cover design skills, management issues and theoretical frameworks. Through hands-on work in the Columbia Missourian and Vox Magazine newsrooms, students gain real-world experience that prepares them to organize information and be clear visual communicators. This interest area prepares students to be designers/art directors for publications in print, on the Web, and/or on other digital platforms. Administered by the Magazine Journalism and Print and Digital News Faculties.

Magazine Editing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

Students in this interest area gain hands-on experience in the skills and strategy needed to excel as part of a magazine staff: planning issues, pitching and editing stories, writing titles and sidebars, coordinating photography and art, working with designers, fact checking, proofreading and directing stories through all stages of print or online production. They also focus on the finer aspects of micro-editing: grammar, style, syntax and usage. Classes provide an analysis of the industry and study of innovative techniques and delivery platforms. This interest area is recommended for those who seek careers as editors in the magazine and book publishing industries. The lessons learned about pitching and magazine production are equally beneficial to magazine writers. Administered by the Magazine Journalism Faculty.

Magazine Publishing and Management Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area is directed to students who hope to become leaders in the field of magazine publishing and management. Course requirements and electives are designed to give an overview of all aspects of magazine publishing, both print and digital. Theoretical courses in law, business and management as applied to publications complement skills classes in reporting, writing, editing and design. Administered by the Magazine Journalism Faculty.

Magazine Writing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area is for students who want to be magazine writers. The foundation of longform or literary writing is solid reporting, and students must learn the basics of information gathering, interviewing and reporting first. From there, students will explore narrative storytelling tools: character, dialogue, voice, structure, scene construction, exposition, and detail and description. This interest area emphasizes revision and the analysis of contemporary magazine writing. Administered by the Magazine Journalism Faculty.

BJ in Journalism with Emphasis in Photojournalism

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Photojournalism. Photojournalism focuses on the history, theory and skills of photojournalism, including still and moving images as well as audio. Also, students will learn the principles and practices of visual editing and design for print and online. This emphasis area includes focused based study curriculum and hands-on practice within the areas of Photojournalism, International Journalism, and Visual Editing and Management. Photojournalists begin their careers working for newspapers, magazines, television stations, or freelance companies.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Photojournalism Interest Areas Photojournalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area educates students in the history, theory and skills of photojournalism, including still and moving images, as well as audio. Also covered are the principles and practice of visual editing and design for print and online. Photojournalism students learn to create truly integrated multimedia projects, incorporating audio, video and stills into compelling visual story-telling projects. The program's essential element remains understanding the power of image, and it embraces all the new technologies in presentation. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Photojournalism Faculty.

BJ in Journalism with Emphasis in Print and Digital News

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Print and Digital News. Students will learn and develop the skills and strategies needed to excel in this industry. In addition, students experience reporting and editing using text, audio, video and information graphics. This emphasis area includes focus study curriculum and hands-on experience through the interest areas of Business and Economics Journalism, Data Journalism, Design, International Journalism, Investigative Journalism, News Reporting, Science and Health Journalism, and Sports Journalism. Print and Digital News graduates pursue careers as News Reporters/Anchors, Business journalists, and Data journalists.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Print and Digital News Interest Areas Business and Economics Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. Administered by the Print and Digital News Faculty.

Sports Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism, magazine journalism, or print and digital news), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

Investigative Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required). Students will gain the skills to work in computer-assisted reporting or investigative reporting. Administered by the Convergence Journalism, Magazine Journalism and Print and Digital News faculties.

BJ in Journalism with Emphasis in Radio-Television

Degree Program Description

Journalism is the study of gathering, assessing, creating, and presenting of news and information through various mediums. Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Radio-Television. Radio-Television focuses on the principles and practices of broadcast-style editing, writing, reporting and videography for radio, television and online media. The curriculum includes focus study and hands-on practice in the interest areas of International Journalism, Investigative Journalism, Producing, Reporting and Anchoring, and Sports Journalism. Upon graduation, students pursue a career as Radio Personality, Reporter, Producer, or Anchor.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Radio-Television Producing Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area teaches students how to structure, write and build a newscast. Students will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

Radio-Television Investigative Journalism Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-television journalism. The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigate reporter or producer in radio or television news. Administered by the Radio-TV Faculty.

Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism. Within the degree program, students can choose an emphasis in Strategic Communication.

Strategic Communication is the study of principles and practices of all communication designed to create a desired response from a given audience. The curriculum includes focused study and handson experience within the interest areas of Account Management, Media Planning, Public Relations, Research, Sports Entertainment and Promotion, and Video Storytelling. Upon graduation, students pursue a career as an advertising manager, marketing manager, public relations specialists, and sports information director.

Major Program Requirements

Students must complete all university requirements (p. 33), including general education (p. 34), in addition to the degree requirements below.

Strategic Communication Interest Areas Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

This interest area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the interest areas of Account Management, Art Direction, Copywriting, Digital Advertising, Media Planning, Public Relations, Research, Sports Entertainment and Promotion, and Video Promotional Content and prepares students for careers in these nine areas. Crossover between these Interest Areas is permissible and encouraged. *Administered by the Strategic Communication Faculty*.

Strategic Communication Classes	Interest Area Required Journalism	12
JOURN 4200	Principles of Strategic Communication	3
JOURN 4204	Introduction to Strategic Writing and Design	3
JOURN 4952	Strategic Communication Research I	3

International Strategic Communication Interest Area

Note: Interest Areas do not appear on transcripts or diplomas. Emphasis areas appear on transcripts.

The next generation of strategic communication students must be equipped to work in a global environment. This interest area is designed to capitalize on Missouri's international reputation and its international resources by placing under one umbrella the school's existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. *This degree is overseen by the Strategic Communication Faculty but is administered by the school's Global Programs office*.

International Strategic (Journalism Classes	Communication Interest Area Required	12

Minor in Journalism

Journalism Minor Policies and Procedures

The School of Journalism's minor consists of 15 credit hours of journalism coursework. It is intended for students from other MU academic divisions who wish to broaden their understanding of the news media's role in society. Courses for the minor are similar to MU's broader liberal arts traditions and are not skills-oriented.

Admissions

All students are required to apply for the Journalism minor. To apply for a minor in Journalism, students must have completed 60 credit hours with a minimum UM system cumulative GPA of 3.0. An application form is available from the Minor Coordinator in the Journalism Student Services Office, 76 Gannett Hall.

Students pursuing a Journalism major are ineligible for the Journalism minor program.

Transfer students may use up to three credit hours of approved Journalism transfer credit toward a Journalism minor.

Courses

JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society is open to any student who is a non-journalism major in good academic standing. Pre-Journalism or Undeclared Journalism students who complete either JOURN 1100 Principles of American Journalism, JOURN 2000 Cross-Cultural Journalism, JOURN 2100 News or JOURN 2150 Fundamentals of Multimedia Journalism with a C- or better and then decide to minor within the School of Journalism must maintain a minimum cumulative GPA of 3.0 to be eligible to take additional 3000 or 4000 level Journalism courses. Students who decide to pursue the minor after completing JOURN 1100 are ineligible to take JOURN 1000. Journalism minors can take a maximum of 15 credit hours from the School of Journalism.

Select any combination from the following classes:

JOURN 1000	The News Media: Journalism and Advertising in a Democratic Society	3
or JOURN 1100	Principles of American Journalism	
JOURN 2000	Cross-Cultural Journalism *	3
JOURN 3000	History of American Journalism *	3
JOURN 4000	Communications Law *	3
Other eligible courses:		
JOURN 3510W	Think Global: Fundamentals of Globalization and Digital Technologies - Writing Intensive *	3
JOURN 4568	History of Photojournalism *	3
JOURN 4656	International News Media Systems *	3
JOURN 4658	International Journalism *	3

* Permission number required. Submit request to the Journalism Minor Coordinator.

Registration

Students are permitted to self-enroll in JOURN 1000. Other courses are offered on a space-available basis and after the early registration period has ended. Students are required to submit a course preference list to the Journalism Minor Coordinator. If space is available, a permission number to enroll will be provided.

Academic Status

Students are subject to probationary or suspension status as determined by the student's major division. Students must earn a minimum grade of C- in Journalism courses. Journalism courses may be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

The journalism minor is awarded after the student completes 15 journalism credits and maintains a 3.0 minimum UM system GPA at the time of graduation.

Fees

School of Journalism course fees are applied to all Journalism courses.

Advising

Journalism minors are not assigned a faculty advisor or academic advisor within the School of Journalism. Academic advising occurs in the division of each student's major. Students pursuing a Journalism minor are encouraged to consult with either the designated Minor Coordinator or with School of Journalism faculty on course-specific matters.

MA in Journalism

Admission Contact Information

Journalism Graduate Studies 179 Gannett Hall Columbia, MO 65211 573-882-4852

 ${\it Email: jourgraduatestudies@missouri.edu}$

On-Campus Master's Program: http://www.journalism.missouri.edu/ graduate/masters/

Online Master's Program: http://journalism.missouri.edu/programs/online/

About the Master of Arts

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media, mass communications and strategic communication; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism and strategic communication teaching and research; and combinations of the three.

Degree Options

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism and strategic communication.

Because the faculty periodically updates these models, students should visit the school's Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Accelerated Bachelor to Master Program

The accelerated bachelor to master's degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The new program will allow students to apply and begin their master's program in the senior year of undergraduate program. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master's degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student's skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Joint Journalism and Law Programs

The School of Journalism and the School of Law have created joint programs (http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-programs) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health

The School of Journalism and the program in Public Health have created a dual-degree option (p. 600) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Distance Learning

Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master's programs here http://journalism.missouri.edu/graduate/online/.

Master's Admission Criteria

On-Campus program deadlines: Fall deadline: January 1

Spring deadline: September 1

Online program deadlines: Fall deadline: July 1

Spring deadline: November 15 Summer deadline: April 15 • Minimum Academic IELTS scores:

Item	Score
Listening	
Reading	
Speaking	7.0
OVERALL Score	7.0

• Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
Speaking: 25	
Reading: 25	
Listening: 25	
100	600
Writing: 25	

· Suggested GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	1100 or better
On or After August 1, 2011	V: 153 or better; Q: 144-148 or better

- . Minimum GPA: 3.0 in last 60 hours
- · Accelerated Minimum GPA: 3.5 in last 45 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials

To the Graduate School

All required Graduate School documents

To the Journalism Master's Program:

Please upload the following application materials into the online Graduate School application in Slate:

- 3 essays as specified on Departmental application website
- Résume
- · Unofficial transcripts from all undergraduate institutions attended
- 3 letters of recommendation (use the online Graduate School application system)

Please submit official GRE scores to the School of Journalism using the GRE Department Code: 4503 and Institution Code: 6875.

Financial Aid from the Program

Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

Plan of Study

Two-year on-campus and online students are required to complete a minimum of 37 hours. Accelerated BJ-MA students complete a minimum of 30 hours. For all graduate students, at least half of the credit hours must be at the 8000-level. Specific course requirements vary depending on the option selected.

Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in JOURN 8190, Area Problem (for projects) or JOURN 8090, Research (for thesis). Students earn nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates programs in Washington D.C., New York City, Brussels, and Barcelona which is supervised by a full-time faculty member. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study

The degree must be earned within eight years of beginning the program.

MA in Journalism with Emphasis in Health Communication

Degree Requirements

The Health Communication emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006	Quantitative Research Methods in Journalism	3
or JOURN 8008	Qualitative Research Methods in Journalism	
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7000	Communications Law	3
JOURN 7256	Public Relations	3
JOURN 7268	Strategic Communication Practicum	3
JOURN 7416	Science, Health and Environmental Writing	3
JOURN 8020	Principles and Tools in Strategic Communication Planning	3
JOURN 8042	Health News and Promotion	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 MA Thesis Seminar, or JOURN 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degreecategory/journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Interactive Media

Degree Requirements

The Interactive Media emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be course from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's advisor, subject to approval of the associated dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000	Mass Media Seminar	3
JOURN 8006	Quantitative Research Methods in Journalism	3
or JOURN 8008	Qualitative Research Methods in Journalism	
JOURN 8070	Proseminar in Communications	1-3
JOURN 8080	Media Ethics	3

Emphasis Area Requirements

Students may select 15-17 hours of the following courses:

JOURN 7150	Using Infographics	1
JOURN 7256	Public Relations	3
JOURN 7262	Digital Strategy I	3
JOURN 7510	Visual Communications	2-3
JOURN 7700	Participatory Journalism	3

JOURN 7736	Changing Media Business Models	3
JOURN 8056	Theory of Mass Communication	3
JOURN 8058	Communication in Media Organizations	3

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degreecategory/journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Media Management

Degree Requirements

The Media Management emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's advisor, subject to approval of the associate dean for graduate

PhD in Journalism

Admission Contact Information

Kathy Appun-Hodges (hodgeske@missouri.edu) 179 C Gannett Hall Columbia, MO 65211 573-882-6194

http://www.journalism.missouri.edu/graduate/doctoral/

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria

Fall deadline: January 15

• Minimum Academic IELTS scores:

Item	Score
Listening	
Reading	
Writing	
Speaking	7.0
OVERALL Score	7.0

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
Speaking: 25	
100	600

• Typical successful applicant GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	1100
On or After August 1, 2011	V: 156+; Q: 146+

• Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass communication or a related field. A degree (bachelor's or master's) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master's program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are January 15 for fall entry. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials

Upload the following application materials into the Graduate School's online application system:

- · All required Graduate School documents
- · Statement of Doctoral Objectives
- Résumé
- An abstract of your master's thesis (or thesis proposal, if your thesis is not yet complete)
- Unofficial transcripts
- 3 letters of recommendation (use the online Graduate School application system)

Financial Aid from the Program

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the advisor and doctoral committee. Course selections are based on the intellectual requirements of the dissertation

and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master's or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Theory and Research I (JOURN 9000), and Professional Development (JOURN 9087) are required of all PhD students.

Qualifying Examination

Students are admitted to the PhD program in journalism when they have passed Doctoral Research Portfolio (qualifying examination), which must be taken the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Research Method Requirements

Students are expected to take a minimum of four research methods courses during the course of their doctoral coursework. These courses include three research methods courses from within journalism with at least one being an advanced research methods course. Students are also required to take at least one research methods course from a department other than journalism. At the discretion of the student's doctoral committee and the associate dean for graduate studies, students may substitute a course from outside the institution if it is deemed equivalent to a required research methods course offered within the school of journalism.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student's teaching skills will be evaluated in the first year of study, at which point planning for the student's future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student's fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student's ability and desire, students might teach a course independently during later semesters.

Additional Minors and Certificates - Journalism

Graduate Certificates

• Certificate in Interactive Media (p. 692)

Graduate Minors

 Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 692)

Graduate Certificate in Interactive Media

The Graduate Certificate in Interactive Media prepares early to midcareer professionals in the journalism and strategic communication fields to work in the rapidly changing newsrooms, media organizations, corporate communications offices and non-profit organizations. The certificate prepares students in the use of interactive, digital and social media. It provides insights into how people perceive and process digital messages. Students will investigate the psychological, social, ethical and legal issues regarding the roles and effects of digital news, advertising and public relations on society.

Objectives of certificate:

- Understanding the rapidly changing technology and role of analytics in journalism and strategic communication
- An understanding of the importance of audience engagement and development
- The skills to create an interactive media plan in their given organizations

The certificate consists of 15 hours divided over three core courses and two electives.

Required Courses

JOURN 7262	Digital Strategy I	3
JOURN 7462	Emerging Technologies in Journalism	3
JOURN 7700	Participatory Journalism	3
Electives		
JOURN 7252	Branded Strategic Storytelling	3
JOURN 7510	Visual Communications	3
JOURN 7812	Online Audience Development	3

Admissions

- Completed baccalaureate or advanced degree from a regionally accredited institution
- Minimum GPA of 3.00 on the last 60 credit hours of undergraduate education
- · Three letters of recommendation

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/09.0401-Gedt-Interactive_Media_Grad_Cert.html

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student's transcript.

Required Core Courses

LAW 5450 Conflict and Conflict Management

Electives

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability varies by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student's curricular needs.

General Electives

JOURN 7718	Law and the Justice System	3
JOURN 8046	Controls of Information	3
BUS_AD 7330	Business Law/Regulation	2-3
Electives - Track 1: Civil	Rights and International Law

School of Nursing

Administration

Roxanne McDaniel, Interim Dean Robin Harris, Associate Dean for Academic Affairs Vicki Conn, Associate Dean for Research

Student Advising Office

S235 Nursing School Bldg. (573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The MU Sinclair School of Nursing's BSN programs have the full approval of the Missouri State Board of Nursing (http://pr.mo.gov/nursing.asp). The Baccalaureate, Masters, and Doctor of Nursing Programs at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Undergraduate

- · Admissions (p. 694)
- Advising (p. 695)
- Health Care (p. 695)

Admissions

Traditional BSN Option

The freshman and sophomore years are designated as the "pre-nursing" years. The junior and senior years are designated as the "clinical nursing major" years. Pre-nursing students apply for admission to the clinical major during the last semester of general education and prerequisite coursework. Students are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. Please see the Nursing and/or Honor's College websites for eligibility information and application details.

Each student's application is reviewed systematically and considered holistically for each admission period. The School values MU's Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population. The School is also committed to rural health care and to educating nurses for practice in rural Missouri.

Clinical application and admission criteria include:

- Successful completion of all general education and prerequisite coursework prior to beginning clinical coursework;
- Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;
- Minimum cumulative grade-point average of 3.25 (on a 4.0 scale) for all college/university courses;
- Competitive grade-point average in nursing prerequisite courses;

- · Minimum GPA of 3.0 for any nursing prerequisite courses;
- Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
- · Evidence of motivation toward a nursing career

RN to BSN Option

The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 of higher and seek a bachelor's degree in nursing. RN to BSN courses are offered online.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

RN-MS(N) Nurse Educator Option

The RN to MS(N) Nurse Educator Option allows Associate Degree in Nursing or Diploma graduates to complete the RN to Baccalaureate of Science in Nursing (BSN) degree in addition to the Masters of Science (Nurse Educator) degree in an accelerated format.

Admission Requirements: RN-MS(N) - nurse educator

- A degree from a regionally accredited associate degree or diploma nursing program.
- A minimum GPA of 3.0 (4.0 grading scale) for the last 60 credit hours of college coursework.
- 3. Current licensure as a registered nurse.
- 4. Successful completion of all general education requirements must be completed prior to conferral of BSN degree, with the exception of ESC_PS 4170 Introduction to Applied Statistics, which must be completed prior to taking NURSE 4950 Nursing Theory and Research.
- 5. A personal interview upon request.
- International applicants must meet additional requirements as identified on the Sinclair School of Nursing web site under "Apply Today" in Master of Science – Nursing MS(N).

BSN Accelerated Option

The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:

- A baccalaureate or higher degree from an accredited college or university.
- Two letters of reference from individuals that can attest to the student's motivation and ability to complete a course of intensive study.
- Statement of career goals.
- Description of the applicant's view of nursing as a profession.
- · A personal interview.
- Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
- Completion of prerequisite courses with a minimum of a C or better.

- · Evidence of potential and motivation for nursing.
- Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students

Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

- Appropriate GPA for credit hours attempted, 3.25 cumulative GPA or higher
- · Approval from the associate dean's office

Transfer students must apply for admission through the MU Admissions Office.

International Students

In addition to the admission criteria described above, international students must meet the following criteria:

- Test of Written English (TWE) score of 4 or higher
- · Test of Spoken English (TSE) score of 50 or higher
- TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
- English Language Support Program Test taken with success

Advising

The academic advisor's office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care

Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at http://studenthealth.missouri.edu/.

Graduate

Nursing Graduate Programs

Sinclair School of Nursing S235 Sinclair School of Nursing Building 573-882-0277 http://nursing.missouri.edu/

Masters of Science (Nursing) and Masters of Science

The **Master of Science** degree programs prepares nurses with post baccalaureate or post graduate degrees for roles as nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership to meet the healthcare needs of its citizens of Missouri and beyond.

Doctor of Philosophy (PhD) Doctor of Nursing Practice

The **DNP** program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to *both* the degree program of interest and to the MU Graduate School.

All graduate programs are distance mediated, providing online coursework with minimal, short, intensive campus experiences at specific times during the program to augment learning opportunities and allow for individualized faculty evaluation of educational competencies. The PhD program also offers a residential on-campus option for International Students only.

Care Management

The Master's of Science in Care Management program is an *interdisciplinary degree* with an overarching goal to educate health care professionals to improve health outcomes, enhance care quality, and reduce health care costs. Graduates will provide care coordination to diverse people across the life span using care management principles and approaches that include facilitating delivery of health care to individuals/family, engagement of individuals/family in care plan design, and implementation resulting in high quality, high value, cost effective care using a collaborative, interdisciplinary approach.

Qualified applicants may have a bachelor's degree from *any health care discipline*. Enrollees will be required to successfully complete 33 graduate credits, which will include 240 hours of clinical practice, and a master's exam. The sequencing of courses builds on the students' unique perspectives and foundational knowledge of theory applications of care coordination, research principles, an understanding of basic physiology and pharmacology, and care management principles and skills. The clinical practica will allow students to apply these principles and skills in order to determine how care management practices are used within health care settings. Students will learn how to use the principles of quality improvement to evaluate the impact of care management on vulnerable populations of people, including those with multiple chronic conditions

This program supports preparation for national certification as a care manager through the American Nurses Credentialing Center, American Case Management Association, and the Commission for Case Manager Certification.

The Care Management Program will begin enrollment Fall 2019.

- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in care management, the University does offer baccalaureate opportunities in nursing (p. 697) and a number of related areas, both within the School of Nursing, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Care Management (p. 696)

MS in Care Management

Degree Requirements

A minimum of 33 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- · Successfully complete the Master's Exam
- Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage (http://nursing.missouri.edu/academic-programs/msn/areas-of-study).

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master's Exam (MS exam).

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook (http://nursing.missouri.edu/handbooks).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Care Management program (http://nursing.missouri.edu/academic-programs/msn/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in various states/. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Deadline for Fall entrance: April 1

Admission Contact Information

http://nursing.missouri.edu/ S235 School of Nursing Columbia, MO 65211 573-884-4705

Nursing

The traditional BSN option is designed for undergraduate students who plan to complete the degree in four years after graduating high school. As freshman and sophomores, nursing students are considered prenursing. Students typically are admitted to the clinical major during their junior and senior years. Other BSN options include the accelerated option (http://nursing.missouri.edu/academic-programs/accelerated-bsn) for students with a college degree and RN to BSN or RN-MS(N) option (http://nursing.missouri.edu/academic-programs/rn-to-bsn) for nurses with an associate's degree.

The Master of Science degree programs prepares nurses with post baccalaureate or post graduate degrees for roles as nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership.

The Doctor of Nursing Practice Degree (or practice doctorate) prepares post baccalaureate and post graduate students in a specific advanced nursing roles (clinical nurse specialist, family nurse practitioner, and leadership) at the highest level of nursing practice.

Our doctor of philosophy in nursing (PhD) program prepares clinical scholars, educators, and researchers for leadership roles in a variety of academic, industry, and healthcare settings. Because the knowledge and skills needed to produce excellent health-related research is not discipline specific, the PhD program does not require a prior degree in nursing. Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work.

Undergraduate

• BSN in Nursing (p. 699)

Academic Regulations

Credit by Examination

RN to BSN may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a

support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

 Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

Class	Semester	Credits	GPA
Freshman	1st semester	1-15 credits	3.0
Freshman	2nd semester	16-30 credits	3.25
Sophomore	3rd semester	31-45 credits	3.25
Sophomore	4th semester	46-60 credits	3.25

- Pre-nursing students with more than 60 credit hours must also have a minimum cumulative GPA of 3.0 or higher.
- A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, physiology, nursing courses and Writing Intensive courses. A grade of "C-" or better is required in algebra or statistics. A grade of "F" is unacceptable for any course.
- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.
- Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

- Progression into the next semester's nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester's courses.
- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.
- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires ap-proval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing
- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.

Pre-nursing Years

- Students who do not meet the requirements set forth in the
 progression criteria are placed on academic probation. They
 must attain the cumulative grade point average required for their
 classification, as outlined previously, within two semesters or they
 are ineligible to re-enroll in the School of Nursing, and must transfer
 divisions.
- A student whose semester GPA falls below 1.0 is ineligible to reenroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the
 established admissions procedure for all students and petition the
 Faculty Assembly Student Admissions and Progression Committee.
 Students who are readmitted are guided by the rules in operation for
 the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Valid CPR certificate
- · yearly TB tests
- · Hepatitis B series
- · School of Nursing medical form showing current immunizations
- Negative drug screen
- · Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- · Boone Hospital Center
- · Truman Veterans Hospital
- · Fulton State Hospital
- Mid-Missouri Mental health Center
- · Multiple county and city health departments
- · Long-term care facilities
- · Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

About the Sinclair School of Nursing

Sinclair School of Nursing S235 Sinclair School of Nursing Building 573-882-0277

http://nursing.missouri.edu/

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university's first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master's and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children's Hospital is located nearby. A variety of learning experiences also are available at other hospital and health and social service agencies in and around Columbia.

Career Opportunities

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates

of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

BSN in Nursing

Degree Program Description

The Bachelor of Science in Nursing (BSN) curriculum encompasses general, foundational and professional studies within a liberal-education perspective. The curriculum is driven by the belief that nursing theory has much to offer in the education of professional nurses and in improving the health and well-being of patient populations. Nursing knowledge is developmental in nature: each course is designed to build on knowledge and skills acquired in previous nursing and non-nursing courses. The BSN program is a four-year degree option. Freshman and sophomores are considered pre-nursing majors and are required to complete approximately 60 semester hours of general-education and prerequisite coursework. Students admitted to the clinical major must earn 60 additional credit hours to complete the degree. The school offers a diverse range of research projects that provide care to healthy and ill people of all ages. The Essig Clinical Simulation Learning Center in the school is where students practice technical skills and learn to manipulate various equipment in this simulated clinical setting.

Major Program Requirements

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- · Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Minimum of 120 credit hours
- Completion of all University graduation requirements (p. 33), including University general education requirements (p. 34)

NURSE 4200 or 4200W [^]	3-4 NURSE 4970W or 4970H	5
NURSE 4300	2	
NURSE 4470	5	
	15-16	12

Total Credits: 122-126

- * Denotes University General Education Requirements
- ^ Denotes Degree Program Requirements
- ** If taking a Foreign Language for humanities credit, you will complete the sequence of foreign language courses that could total 13 hours.

NOTE: Curriculum subject to change.

MS in Nursing

About

Students in the distance mediated Master's of Science program obtain advanced nursing preparation in one of two areas:

- Nursing Education (http://nursing.missouri.edu/academic-programs/ msn/areas-of-study)
- Leadership in Nursing and Healthcare Systems (http:// nursing.missouri.edu/academic-programs/msn/areas-of-study)

Degree Requirements

A minimum of 30 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- · Successfully complete the Master's Exam
- · Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage (http://nursing.missouri.edu/academic-programs/msn/areas-of-study).

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master's Exam (MS exam).

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook (http://nursing.missouri.edu/handbooks).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (http://nursing.missouri.edu/academic-programs/msn/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in various states/. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Deadline for Summer entrance: April 1

Admission Contact Information

http://nursing.missouri.edu/ S235 School of Nursing Columbia, MO 65211 573-884-4705

MS in Nursing with Emphasis in Leadership in Nursing and Health Care Systems

Degree Requirements

All students pursing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student's area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

Area of Study Information

For more information about the Leadership in Nursing and Health Care Systems emphasis, please see our website (http://nursing.missouri.edu).

Sample Plan of Study

This plan of study is for the post-baccalaureate, three-year plan. For more plans of study visit our website (http://nursing.missouri.edu).

First Year			
Fall	CR Spring	CR Summer	CR
NURSE 7100	3 NURSE 7150	3 NURSE 7110	3
NURSE 8820	4	Graduate Statistics required before admission (entering Summer)	
	7	3	3
Second Year			
Fall	CR Spring	CR Summer	CR
NURSE 8940	3 NURSE 8860 Organizations and Human Resource Management in Nursing (course to begin Spring 2016)	3 NURSE 8910	3
NURSE 8300	3		
	6	3	3
Third Year			
Fall	CR Spring	CR	
NURSE 8920 (60 clinical hours)	3 NURSE 8960 (180 hour practicum)	5	
	Master's Exam	No	
		credit	
	3	5	

Total Credits: 33

Thesis/Non-Thesis Requirements

In additional to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The

Master's Thesis (N8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://gradstudies.missouri.edu/degreecategory/nursing) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Nurse Educator

Degree Requirements

All students pursing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student's area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

Area of Study Information

For more information about the emphasis in Nursing Education please visit our website (http://nursing.missouri.edu).

Sample Plan of Study

The following sample plan of study is for the two-year program. For more sample plans of study, please visit our website (http://nursing.missouri.edu).

First Year			
Fall	CR Spring	CR Summer	CR
NURSE 7100	3 NURSE 8854	3 NURSE 7110	3
NURSE 7120	3 NURSE 7140	3.5 Graduate Statistics required before admission (entering Summer Year 1)	
NURSE 8300	3 NURSE 7150	3	
	9	9.5	3

NURSE 8940	3 Master's Exam		
	9.5	7	3

Total Credits: 41

Total Clinical Hours: 420

Thesis/Non-Thesis Requirements

In additional to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The Master's Thesis (N8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://gradstudies.missouri.edu/degreecategory/nursing) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

PhD in Nursing

About the PhD Program

The doctor of philosophy in nursing (PhD) program prepares clinical scholars, educators, and researchers for leadership roles in a variety of academic, industry, and healthcare settings. Because the knowledge and skills needed to produce excellent health-related research is not discipline specific, the PhD program does not require a prior degree in nursing. Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work.

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options. The PhD curriculum, program requirements, and program outcomes are the same whether you choose the Online PhD option or the International Residential Nursing PhD option. Only the method of course delivery varies. Additional details can be found on the Sinclair School of Nursing PhD Program Options webpage (http://nursing.missouri.edu/academic-programs/phd/program-options).

- Online PhD Program Option: PhD coursework may be accessed online through the Online PhD program option by learning over the World Wide Web using the Canvas learning management system. This option also requires a 5 Day On Campus visit (held the first week of the summer semester on the Columbia campus) the first summer of enrollment and 4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (http://nursing.missouri.edu/academic-programs/phd/on-campusdates)). Because the program is online, students are responsible for obtaining the required technology for successful participation in synchronous online courses (see Technology Requirements (http://nursing.missouri.edu/for-students/technology-requirements)). Additionally, students are responsible for all the costs associated with travel and housing for the On Campus Intensives;
- International Residential PhD Option: Through the International Residential PhD option, international students attend the MU campus

hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Online student cohort participates virtually via videoconferencing software. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 or J-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

Degree Requirements

MU requires a minimum of 72 credit hours, including 15 hours of 8000-9000 level coursework exclusive of readings, research, problems and independent study experiences, beyond the bachelor's degree for the PhD. The student's doctoral committee may recommend that up to 30 hours of post-baccalaureate graduate credit from a regionally accredited university be transferred toward the total hours required for the doctoral degree. With program approval, up to 6 hours of coursework for which professional credit was received may be counted toward the 72 credithour requirement. It is the responsibility of the doctoral committee to determine whether it is appropriate to transfer credit; however, the Office of Graduate Studies must make the final review of the transfer request to determine if the credit meets the minimum guidelines. Ultimately, the student's doctoral committee, in collaboration with the student, determines the student's plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research. Typical post-baccalaureate student takes ~77 credits. Typical post-master's student takes ~59. Typical post-clinical doctorate student takes ~48 credits. The PhD curriculum is divided into two categories:

- Foundational Core Minimum of 26-38 credit hours (theory analysis and development, statistics and measurement, qualitative and quantitative methods courses)
- Individualized Specialty Area Minimum of 27-39 credit hours of
 of research focus seminars, interdisciplinary collateral coursework
 (coursework taken outside the School of Nursing that helps to support
 the dissertation research topic), faculty mentored research practicum
 experiences, specialty area applied sciences including education or
 leadership courses, and dissertation research.

The PhD program at the MU SSON can be completed in three to five years of full time study, depending on whether the student entered as a post-baccalaureate or a post-graduate degree student. International Residential PhD students are required to be enrolled in full-time study. Part-time study also is available for students in the Online option.

Once the plan of study is completed, you prepare for your doctoral comprehensive examination, develop your research proposal, and begin your dissertation research project. The doctoral dissertation and its defense are the program's culmination and demonstrate your ability to identify and pursue research that meets the highest of professional standards.

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing PhD Curriculum webpage (http://nursing.missouri.edu/academic-programs/phd/curriculum).

Qualifying Process

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a graduate degree have completed the qualifying process.

Students admitted with a bachelor's degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor's prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BS-PhD students must earn at least a grade of B in the following:

- NURSE 7087 Leadership and Technology Institute
- NURSE 7010 Biostatistical Foundations for Health Researchers
- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- · Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of NURSE 8900 Research Practicum in Nursing with a member of their BS-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for NURSE 8900 by the BS-PhD Program Committee.

Comprehensive Examination Process

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across research focus areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the PhD comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student's PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student's selection during five consecutive days. The oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found in the MU School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/2017-18-PhD-Nursing-Handbook.pdf).

Dissertation Requirements

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate's doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate's own work.

Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- · Development of a dissertation proposal
- · Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- · Ethical conduct of the research project
- · Writing the doctoral dissertation
- · Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate's doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found in the MU Sinclair School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/PhD_Nursing_Handbook_2016-17.pdf).

Admissions

Students interested in the PhD program are encouraged to apply for admission as early as possible. All admitted students are required to start the PhD program during the summer semester.

Early Acceptance Deadline: January 1st Recommended for applicants desiring to be full-time students who are planning to apply for a competitive fellowship(s) and international residential PhD option applicants who need time to obtain a visa and move to Columbia, MO prior to classes starting in early June.

Regular Acceptance Deadline: March 1st

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD program (http://nursing.missouri.edu/academic-programs/phd/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

NOTE: Applicants who do not meet the minimum GPA requirements or do not have a cumulative GPA must submit acceptable scores on the Graduate Record Exam (GRE) and the exam must have been taken within the last 5 years.

DNP in Nursing

About

The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Adult-Gerontology Clinical Nurse Specialist, (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study) Family Nurse Practitioner (http://nursing.missouri.edu/academic-programs/dnp/

areas-of-study), Pediatric Nurse Practitioner (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study), Family Psychiatric & Mental Health Nurse Practitioner (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study) and Leadership and Innovation in Health Care (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study). Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Degree Requirements

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- · Current required immunizations
- · Satisfactory criminal background check
- · Satisfactory drug screen
- · Current CPR certification
- · Proof of undisciplined nursing licensure

DNP Program Requirements (http://nursing.missouri.edu/academic-programs/dnp/program-requirements) include completion of required coursework, clinical hours, and the DNP Scholarly Project. The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri. In addition, a minimum of 1000 faculty/preceptor supervised academic clinical hours must be completed. Post-master's students may transfer in clinical hours completed in their previous master's degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student's emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

Ultimately, the student, in collaboration with their academic advisor determines the student's plan of study, total credit hours, and clinical hours necessary to adequately prepare the student for the DNP degree.

The DNP Residency project is a faculty-guided scholarly experience that provides evidence of the student's critical thinking and ability to apply research principles through identification of a significant practice problem, systematic appraisal of relevant scientific literature and outcome data; design of cost-effective, evidence-based, therapeutic interventions or programs; successful implementation of the selected interventions or program, and comprehensive evaluation of specific, measurable, and appropriate outcomes. The project will reflect the culmination of knowledge and skills developed during the DNP program. DNP students must complete a DNP Residency Project, write a scholarly paper or executive summary, present an electronic poster to peers, committee members, and stakeholders, and defend the project results with their DNP Project Committee.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. Specific On-campus competency days are also required during the course of the program. For specific dates click on On Campus dates (http://nursing.missouri.edu/academic-programs/dnp/on-campus-dates). Further explanation of program requirements can be found on the DNP

Program Requirements (http://nursing.missouri.edu/academic-programs/dnp/program-requirements) web page.

DNP Curriculum

All students pursuing the DNP degree must complete a minimum of 72-74.5 credit hours of graduate coursework. Credit hours required vary depending upon the students' emphasis area. Up to 38 credit hours of previous graduate level credit hours from another institution may be accepted toward the total hours required for the DNP degree depending upon transcript review and applicability to the specific area of study. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

DNP Clinical Hours

All DNP students must complete a minimum of 1000 faculty/preceptor supervised academic clinical hours. Post-master's students may transfer in clinical hours completed in their previous master's degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student's emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

DNP Scholarly Project

The DNP Residency project is a faculty-guided scholarly experience that provides evidence of the student's critical thinking and ability to apply research principles through identification of a significant practice problem, systematic appraisal of relevant scientific literature and outcome data; design of cost-effective, evidence-based, therapeutic interventions or programs; successful implementation of the selected interventions or program, and comprehensive evaluation of specific, measurable, and appropriate outcomes. The project will reflect the culmination of knowledge and skills developed during the DNP program.

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study).

Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can be found the in the Sinclair School of Nursing DNP Student Handbook (http://nursing.missouri.edu/for-students/handbooks).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program (http://nursing.missouri.edu/academic-programs/dnp/apply)and the minimum requirements of the Office of Graduate Studies (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your

application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied.

*Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Application Deadlines: Once application materials have been processed through the online application system and after a preliminary review of academic credentials and applications materials, an interview will be arranged. The interview process will take place within weeks of the completed application being received. Student interviews may take place in person or via electronic means for distance students. Applicants will receive notification of their acceptance decision within two weeks. Students applications received after April 1 will be considered for the following academic year.

Preceptor required for clinical courses.

- Wursing Course Electives from which to choose:
 NURSE 8010 Family Dynamics and Intervention
 NURSE 8720 Symptom Management in Acute and Chronic Illness
 NURSE 8854 Teaching Strategies in Nursing
 NURSE 8864 Curriculum Development in Nursing
 NURSE 8820 Health Care Financial Management
 Additional interdisciplinary online elective choices can be found in the areas or geriatric care management, gerontology, grantsmanship, health ethics, health informatics, multicultural education, online education, public health, and youth development (see http://online.missouri.edu/degreeprograms/degrees.aspx).
- *** Reflects minimum required DNP clinical and project hours. Additional clinical hours may be required based on specialty and complexity of DNP clinical residency project.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing (http://nursing.missouri.edu/academic-programs/dnp/apply) and the minimum requirements of the Office of Graduate Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you've applied before official admission to the University of Missouri.

DNP in Nursing with Emphasis in Family Psychiatric and Mental Health Nurse Practitioner

Area of Study

Fore more information on Area of Study Information please see the Family Psychiatric & Mental Health Nurse Practitioner page (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study).

Sample Plan of Study

There are multiple plans of study for this emphasis area. Below a Sample Plan of Study for the post-baccalaureate, four year plan. For more Plans of Study, please visit our website (http://nursing.missouri.edu/academic-programs/dnp/areas-of-study).

Graduate Certificate in Participatory Health Research

Contact Information

Sinclair School of Nursing S235 Sinclair School of Nursing Building http://nursing.missouri.edu/

The Graduate Certificate in Participatory Health Research confirms the completion of graduate level training in the rationale, theoretical underpinnings, methods, and applications of community based participatory health research (CBPR) and patient centered outcomes research (PCOR). Community based participatory approaches are innovative methods that intersect with patient centered outcomes. When used together, CBPR and PCOR, there is significant potential for patient empowerment, enhancement of patient care, and improved population health outcomes. A collaborative effort between the Sinclair School of Nursing, Department of Family and Community Medicine, School of Social Work, and the Masters in Public Health program, individuals completing the Graduate Certificate in Participatory Health Research will gain highly valued skills necessary to conduct clinical research in partnership with a community. Participatory Health Research methods are ideal for addressing patient-centered questions related to informed choices, health outcomes, and quality of life. This graduate certificate is open to all health-related professions. These innovative types of research skills traditionally have not been included in health-related graduate program curricula.

Requirements for the Graduate Certificate in Participatory Health Research include a graduate level statistics course, three didactic courses, and one research practicum experience.

Courses for this program are online: no campus visits are required.

Required Coursework:

NURSE/F_C_MD 8425	Participatory Approaches for Health and Health Systems	3
NURSE 9080	DNP Residency Project	3
or NURSE 9710	Advanced Research Practicum	
or F_C_MD 8450	Research in Community Health

Graduate Minor in Health System Innovations

The minor is open to graduate students in the Sinclair School of Nursing as well as all students with graduate status who are interested in health care leadership. This minor is designed for those who have a desire to understand growing innovative trends, who want to learn how to integrate innovation into health system organizations, and who want to determine which innovative practices are financially viable to support health care institutions.

Students with graduate standing may select 9-12 credit hours from the designated courses listed below to be awarded the graduate minor in Health System Innovation.

- N8820 Healthcare Financial Management (4 credits)
- N8830 Informatics, Application and Innovation in Health Care Systems (3 credits)
- N8840 Nursing Leadership, Innovation, and Entrepreneurship (3 credits)
- N8860 Organizations & Human Resource Management in Nursing (3 credits)

Graduate Minor in Nursing Education

The Graduate Minor in Nursing Education is open to graduate students in the Sinclair School of Nursing as well as nurses interested in teaching in a school of nursing who are graduate students in other departments on campus (e.g. Health Education, Public Health, Health Management and Informatics, Human Development and Family Studies, etc.).

Graduate nursing students who already have a MS in Nursing Education or a Graduate Certificate in Nursing Education will not be eligible for a graduate minor in nursing education as their prior graduate coursework is substantively identical to the required courses.

The graduate minor in nursing education consists of a minimum of 10 graduate credit hours of nursing education coursework.

- NURSE 8854 Teaching Strategies in Nursing (3 credits)
- NURSE 8864 Curriculum Development in Nursing (3 credits)

After completion of the two core courses, students will complete a faculty supervised 4 credit teaching nursing practicum. Students may select from two practicum courses which best meet their learning needs and professional goals:

 NURSE 8950 Teaching Nursing Practicum (4 credits) or NURSE 8954 Distance-Mediated Teaching Nursing Practicum (4 credits).

These aforementioned courses also can be supplemented by problems courses.

For additional information, contact: Deidre D. Wipke-Tevis PhD, RN MU Sinclair School of Nursing email: wipketevisd@missouri.edu phone: 573-884-8441

Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.

Academic Medicine

A Master of Science in Academic Medicine (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

Faculty

Professor J. D. Campbell, E. Garrett*, L. A. Headrick, M. C. Hosokawa*, M. LeFevre*, D. R. Mehr*, D. Parker-Oliver*, E. Ringdahl*, W. Steinmann, J. Stevermer, D. C. Vinson*, H. A. Williamson*, S. C. Zweig*

Associate Professor J. Belden, D. Cravens*, K. Everett*, A. B. Fitzsimmons, K. Y. Kane*, J. Kapp*, S. Kinkade*, K. Kochendorfer*, R. Koopman*, E. J. Lindbloom*, C. Reust*, D. Wen*, A. Whaley-Connell Assistant Professor K. Craig, D. Howenstine, P. Koopman, J. McElroy*, L. Morris, A. Swenson, S. Swensord, P. Tatum III*

Research Professor D. Oliver*
Associate Research Professor K. Hoffman*, R. L. Kruse*
Professor Emeritus R. L. Blake Jr.*, J. M. Colwill*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Academic Medicine, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MS in Academic Medicine (p. 711)

School of Medicine M224 Medical Sciences Building, DCO32.00 Columbia, MO 65212 573-884-7060 http://www.fcm.missouri.edu/

The Master of Science in Academic Medicine is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

MS in Academic Medicine

Plan of Study

The program has two options for study: Teaching/Administration and Research. The program requires completion of a minimum of 30 course hours with a grade of 3.0 (B) or better. Courses in the Master's degree are:

F_C_MD 8422	Clinical Research Methods I	3
STAT 7020	Statistical Methods in the Health Sciences	3
F_C_MD 8423	Clinical Research Methods II	3
F_C_MD 8420	Principles of Epidemiology	3
F_C_MD 8410	Principles and Practices in Medical Education	3
F_C_MD 8430	Applications of Evidence-Based Medicine I	3
F_C_MD 7310	The Health Care System	3
F_C_MD 8491	Field Experience in Family and Community Medicine	1-6
F_C_MD 8450	Research in Community Health	1-99

In addition there are a number of online elective courses that may be substituted upon approval of the faculty advisor.

Admissions

Admission Contact Information

Juliet Bedell, Bedelljc@health.missouri.edu, 573-884-2912 University of Missouri, School of Medicine Department of Family and Community Medicine MA303 Medical Sciences Building Columbia, MO 65212

The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

Application Deadline

This program accepts rolling admissions, so you can apply at any time. We recommend you submit your application at least six weeks before the beginning of the term in which you wish to start your course work.

Admission Criteria

- Board-certified or board-eligible physicians who have already received MD, DO, MBBS or equivalent degrees may apply. Typically, physicians have completed residency training in their primary specialty prior to enrollment, but current residents may apply with the permission of their program director.
- Physicians in clinical or academic fellowship programs (or both) are also welcome to apply. Prospective students with other doctoral and graduate degrees will also be considered.

- If English is not your native language, please submit a TOEFL (http://www.ets.org/toefl) score of at least 80 (internet-based test) or an IELTS (https://www.ielts.org) score of at least 6.5
- This program accepts rolling admissions, so you can apply at any time. We recommend you submit your application at least six weeks before the beginning of the term in which you wish to start your course work.

Required Application Materials

Submit the following via the online application (https://applygrad.missouri.edu/apply):

- Transcripts of all previous college or university education. Upload unofficial transcripts in your online application. If you are accepted, you will be asked to provide official transcripts
- Two letters of recommendation. In the online application, you
 will need to supply names and contact details of two professionals
 who can attest to your critical thinking, analytical and writing skills,
 demonstrating your potential as a graduate student and professional
- · Personal statement of research goals and interests
- · Curriculum vitae or résumé
- Verification from residency program or other relevant postgraduate training
- TOEFL or IELTS score reports for applicants whose native language is not English
- · A personal phone interview

Carefully follow the instructions on the Graduate Studies (https://applygrad.missouri.edu/apply) application site.

- Upload the above documents in the online application site. Use the following information to complete your application:
 - a. Application type: Master's Program
 - b. Degree/Delivery: Masters- Distance (Online/Remote Site/etc.)
 - c. Academic Program: Academic Medicine-Distance (MS)
 - d. TOEFL or IELTS scores: Institution Code 6875 (if applicable)

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

American Law

American Law - MU School of Law 206 Hulston Hall

University of Missouri Columbia, MO 65211

Phone: (573) 882-2020; Fax: (573) 882-3343

Email: mulawcdr@missouri.edu Web site: http://law.missouri.edu/llm

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar

exam, for U.S. law practice, or to work with U.S. clients in the students' home countries or with foreign clients doing business in the U.S.

Faculty

Professor R. Gely*, J. Lande*, R. Uphoff* Associate Professor C. Conklin*, D. Crouch*, S.I. Strong* Adjunct Assistant Professor J. Levin*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in American Law. The University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options.

Graduate

• LLM in American Law (p. 712)

About the American Law Program

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students' home countries or with foreign clients doing business in the U.S.

Create new opportunities for both LL.M. and J.D. students.

LLM in American Law

Graduates of the LL.M. in American Law program should:

- Possesses substantial knowledge of the legal system in the United
 States
- Possesses substantial knowledge in legal analysis and reasoning, legal research, problem solving, and oral communication as practiced in the U.S. legal community
- Understand the goals, structure, values, rules, and responsibilities
 of the U.S. legal profession and conduct their legal practice in a
 professional and ethical manner
- Possesses the lawyering skills generally regarded as necessary for effective and responsible participation in the U.S. legal profession
- Possesses substantial knowledge in areas of the law considered to be foundational for admission to the bar, and for the practice of law in the United States

The LL.M. in American Law is a 24 credit hour program. There will be three core required courses - Overview of the U.S. Legal System, Legal Research and Writing, and Professional Responsibility. Elective courses will be selected from the existing J.D. or LL.M. curriculum. This will provide flexibility for students to customize study in any number of fields in the law school such as intellectual property, commercial law, international law, tax, environmental law, and employment law.

Program open only to international students who have their first degree in law from an institution outside the U.S.

Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- · biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

Biomedical Sciences Area Program Degrees

- MS in Biomedical Sciences with emphasis in Biomedical Sciences (p. 714)
- PhD in Biomedical Sciences (p. 718)

Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

- MS in Biomedical Sciences with emphasis in Comparative Medicine (post DVM degree only) (p. 715)
- MS in Biomedical Sciences with emphasis in Pathobiology (p. 716)
- MS in Biomedical Sciences with emphasis in Veterinary Medicine and Surgery (p. 716)
- MS in Biomedical Sciences with emphasis in Veterinary Sciences (p. 717)

An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

- The Biomedical Sciences Area Program offers a master's program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.
- The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are

 (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 748).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student's graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master's degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation.

Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate's MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

• Fall deadline: January 15

• Spring deadline: September 15

Summer deadline: Not Applicable

• Minimum TOEFL scores:

Internet-based test (iBT)

Paper-based test (PBT)

100

600

• Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	100 3.5
On or After August 1, 2011	300 3.5

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master's program.

Required Application Materials

To the Graduate School:

· All required Graduate School documents

To the Biomedical Sciences MS Program:

- · Program-specific application
- · Letter of intent
- · GRE scores
- · Copy of transcripts
- 3 letters of recommendation

MS Degree Requirements

To attain the master's degree, 30 hours of graduate credit must be completed; 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses); and 6 to 9 hours of 8090 Research. A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree. In additional to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

Evaluation

The master's candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master's program committee. The master's candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master's program committee.

Length of Study

The time limit for the master's degree is five years after initiating the program.

MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)

Admission Contact Information

Director of Graduate Studies Craig Franklin, DVM, PhD Discovery Ridge Bldg Rm N128 4011 Discovery Drive Columbia, MO 65201 573-882-6623 http://cmp.missouri.edu/

About This Degree

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Alternatively, trainees with experience in laboratory animal medicine, comparative pathology or related disciplines may begin research training at the time of admission. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, molecular biology, mouse biology, genetics, microbiota, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers and IDEXX-Bioresearch, an internationally known research animal diagnostic laboratory.

Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

Class Size & Resources

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

Admission Criteria

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- · Meet standards for admission to the Graduate School

Required Application Material

To the Graduate School:

• All required Graduate School documents

To the CMP Postdoctoral MS Program:

• For combined residency/degree positions, the CMP uses the Veterinary Internship & Residency Matching Program

Degree Requirements

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/ or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined with the student's advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

Written Scholarly Work

The MS degree requires the completion of a significant first author manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort.

Residency

For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:

- clinical medicine and animal resource management in the Office of Animal Resources (OAR)
- colony management, diagnostic, comparative and research pathology in the Mutant Mouse Regional Resource Center (MMRRC) and Rat Resource and Research Center (RRRC)

Moving to a PhD Program

Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the **Pathobiology Area Program**.

MS in Biomedical Science with Emphasis in Pathobiology

Contact: Marie Schlup College of Veterinary Medicine

schlupm@missouri.edu

http://vpbio.missouri.edu/training_programs.html

Director of Graduate Studies: Catherine Vogelweid

About the Program

The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the

Department of Veterinary Pathobiology. The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master's thesis while others require preparation of a publishable manuscript.

PhD in Pathobiology

For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to **Pathobiology Area Program** in this catalog.

Admission Criteria

Fall deadline: no deadline
Spring deadline: no deadline
Summer deadline: no deadline

- · GRE scores required
- Undergraduate GPA of last 60 credits of undergraduate work: 3.0
- · Designated faculty mentor
- Professional students with a DVM degree may be eligible to waive the GRE

International Applicants:

Minimum TOEFL score:

Internet-based test (iBT) Paper-based test (PBT)
80 550

Required Application Materials

To the Office of Graduate Studies:

• All required Graduate Admissions documents

To the Veterinary Pathobiology Program:

- GRE scores
- · Official Transcripts
- Letter of support from mentor
- CV
- · Statement of Purpose
- 3 letters of recommendation (can be submitted through the Office of Graduate Studies' online application as well)

MS in Biomedical Science with Emphasis in Veterinary Medicine and Surgery

Contact: Connie Sievert
College of Veterinary Medicine

Department of Veterinary Medicine and Surgery

A-384 Clydesdale Hall

573-882-1807

http://www.cvm.missouri.edu/VMS/index.htm

Director of Graduate Studies: Leah Cohn

About the Program

The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the

master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. In addition, faculty within the department offer supervision for doctoral and postdoctoral study and research. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine.

Types of Study

The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas.

Resources and Facilities

Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website http://www.cvm.missouri.edu/VMS/index.htm

Admission Criteria

Fall deadline: n/a

- · Completion of a bachelor's or professional degree
- Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
- Identification of funding (with advice of mentor) for the period of research and study
- Minimum TOEFL score (when appropriate):

Internet-based test (iBT)	Paper-based test (PBT)
80	550

Minimum GRE score: 292; 146 in verbal and 146 in quantitative.
 Minimum scores should be considered as guidelines not a guarantee of admission.

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Office of Graduate Studies:

· All required Graduate Admissions documents

To the Veterinary Medicine and Surgery Emphasis Program:

· GRE scores

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding

packages. Check the program Web site or ask the program contact for details

Degree Requirements

Advisors and the Advisory Committee

Formulating a plan of study is the joint responsibility of the student, the advisor and the student's advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major advisor and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Publications

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.

MS in Biomedical Sciences with Emphasis in Veterinary Sciences

Advising and Support Services:

Director: C.B. Chastain, DVM, MS, DACVIM, Professor Administrative Assistant: June Kelly, Administrative Associate I Mizzou Online Advisor: Kelly Ross, Admissions and Recruitment Advisor, Mizzou Online

Degree Requirements

- Completion of all graduate work attempted at MU with a GPA of 3.0 or better.
- A minimum of 30 semester hours of graduate course credit, including at least 15 hours of graded, 8000-level course work. No more than 40% of the 30-hour credit requirement can be satisfied be Research, Readings, and Problem Courses.
- As part of their program of study during their enrollment in the
 Veterinary Medicine and Surgery (VMS) graduate degree program,
 graduate students must receive a passing grade from an approved
 graduate-level experimental design or statistics course. Following
 a request by the student's major advisor, this requirement may
 be waived by the departmental graduate studies committee for
 those students who have successfully completed a similar course
 previously.
- All VMS graduate students must submit a report of progress and plans regarding their degree program to the Departmental Graduate committee by April 30 of each year they are enrolled in the program. This report must be derived from the outcome of at least one annual meeting of their graduate degree committee and must be signed by their major advisor. The Annual Review of Graduate Student Progress will be used by students and committees to satisfy these requirements.
- The Departmental Graduate committee will review all reports and will schedule meetings with students and their advisors if deficiencies

are noted. Failure to comply may result in disqualification of the student. The major advisor will be disqualified from receiving internal discretionary grant funds during the following calendar year.

- Completion of a thesis describing original investigative research completed by the candidate. Detailed guidelines for preparation of the thesis are available through the Graduate School.
- Documentation of a passing evaluation on the defense of the thesis work by an examination committee (make-up of the committee is described in the graduate catalog) as well as demonstration of mastery of the fundamental principles of the work included in the course of study for the degree.
- The candidate must be enrolled at MU in the semester when their thesis work is defended.
- The master's degree must be completed within eight years of enrollment from the time the student is accepted into the degree program.

Sample Plan of Study

Thesis/Non-Thesis Requirements Admissions

PhD in Biomedical Sciences

Director of Graduate Studies Dr. Douglas Bowles Biomedical Sciences Area Program W111 Veterinary Medicine Building 1600 Rollins Road Columbia, MO 65211 573-882-7305 http://biomed.missouri.edu/

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through

the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology. The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details

Admission Criteria

Fall deadline: December 15
Spring deadline: September 15
Summer deadline: Not Applicable
Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	600

. Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1000	3.5
On or After August 1, 2011	300	3.5

- Minimum GPA: 3.0
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed:

15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:

- physiology (10 credit hours)
- biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
- multidisciplinary approaches to biomedical research (2 credit hours)
- departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

- · molecular biology
- · cellular biology
- · integrative biology

Rate and Quality of PhD Progress

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/

her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student's doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

One Hospital Drive, MA204, DC018.00

Columbia, MO 65212

From Particles to Populations

The University of Missouri Institute for Clinical and Translational Science transforms discoveries made in laboratories across MU into community-based products, services and practices for the state and nation. The institute (ICATS) is the focal point of MU's efforts to develop clinical and translational science programs that improve health through better research, education and public service.

Few universities share MU's potential for saving lives through research. With more than 1,000 biomedical scientists and engineers — all on one campus — MU focuses its research on the deadliest diseases, such as cancer and cardiovascular disease, and the most vulnerable patients, including children and the elderly

Faculty

Faculty for Clinical Translational Sciences teach across multiple disciplines. A complete listing of faculty can be found here (p. 1488).

Undergraduate

While MU does not offer undergraduate degrees specifically in Clinical and Translational Science program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Clinical and Translational Science (p. 719)

PhD in Clinical and Translational Science

This degree program is not currently accepting applications at this time.

Data Science and Analytics

Data science is a rapidly blossoming field of study and career with a highly multidisciplinary characteristic. The confluence of *big data*, massively powerful cloud computing platforms, and need of businesses from all sectors to leverage their data repositories has created a highgrowth environment and demand for data scientists. Data scientists routinely leverage tools and techniques from computer science, information systems, advanced statistics, and machine learning. To satisfy the growing need for data scientist who can transform large collections of data into actionable decision making products for their employers, we are proposing the Master of Science in Data Science and Analytics.

This multidisciplinary Data Science and Analytics (DSA) degree program will consist of 34-credit hours of learning in the online and mixed mode format in which students will visit campus one time each academic year for an intensive on site learning experience.

The academic program will consist of 19 credit hours of core, fundamental data science courses; followed by 9 credits of emphasis area specific courses and 6 credits of industry relevant case studies and capstone project courses.

Data Science is an emerging discipline that, by its nature, integrates traditional disciplines. The proposed degree program will leverage prior investments in the computing disciplines across campuses and colleges within each campus. The MU Informatics Institute will coordinate this collaborative degree program by leveraging existing courses from Computer Science, Journalism, and Information Science & Learning Technologies Departments to deliver the various core and emphasis area course. Existing courses will be adapted to the online format, and new courses that are properly focused and structured for the DSA program will be developed.

Faculty

Associate Professor S. Goggins
Assistant Research Professor G. Scott

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Data Science and Analytics, the University does offer baccalaureate opportunities in a number of related areas.

A listing of current degree programs can be found here (p. 18).

Graduate

- MS in Data Science and Analytics (p. 720)
 - with emphasis in Biotechnology (p. 720)
 - with emphasis in High Performance Computing (p. 720)
 - with emphasis in Strategic Communications and Data Journalism (p. 721)
 - with emphasis in Human Centered Science Design (p. 721)

• Graduate Certificate in Data Science and Analytics (p. 721)

MS in Data Science and Analytics

Graduates will be able to individually acquire and stage large data sets, design and conduct experiments, and analyze results for complex data analytical problems using their foundational and specialized data science tools and techniques; taking a problem from conceptualization stage through to the production of data-derived business intelligence.

The special skills the graduating students will acquire or possess include:

- Real-world experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.
- A clear understanding of the ethics and security mechanisms required to safeguard large-scale data collections that contain sensitive and critical information.
- A comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.
- A solid foundational understanding of database systems, database design, and information retrieval; allowing exploitation of a broad spectrum of data repositories and streaming data systems.
- A demonstrated ability to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods. Students will be able to convey the meanings behind specific data analysis techniques to audiences of various technical knowledge.
- Training in the latest data analytic methods and tools; including fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built (machine learning, pattern recognition, data mining, etc.).
- Specialized, advanced training in a chosen Emphasis Area, such as biotechnology, high-performance computing, strategic communications, human centered data science design, etc.

All students will take "Core Courses" that will provide a foundation of knowledge and an introduction to state-of-the-art technology in Big Data, database design, data ethics, and visualization of high dimensional and high-volume data.

To understand real-world Big Data issues in context, students will select three courses in an emphasis area. These elective courses will support in-depth analyses and training on data analytic techniques, issues, and problems students will face within a given Emphasis area. Students will take a Case Study course to gain hands-on experience with large data sets and use the relevant technology and techniques. A Capstone project will enable students to refine and demonstrate knowledge and skills learned throughout the program. Both courses will provide students with mentoring from faculty, as well as insight from industry partners.

Total credits required for graduation: 34

Total Credits: 34

MS in Data Science and Analytics with Emphasis in Biotechnology

In addition to the core program objectives (p. 720), graduates of the Masters of Science in Data Science and Analytics who pursue the Biotechnology emphasis area will achieve the following educational objectives:

- Possess an in depth understanding of the data analytics needs in biotechnology industry and healthcare systems in the US and worldwide;
- Have the ability to practice their analytic skill sets to applications in agriculture, human medicine, and health information systems in genomics, proteomics, phonemics, and electronic medical records;
- Be able to present and interpret their data analytic results with actionable plans in biotech and healthcare industry.

Emphasis area courses:

High-throughput Biomedical Data Analysis (course still in development)

Genomics (course still in development)

Biomedical Information Mining and Interpretation (course still in development)

MS in Data Science and Analytics with Emphasis in High Performance Computing

In addition to the core program objectives (p. 720), graduates of the Masters of Science in Data Science and Analytics who pursue the High Performance Computing (HPC) emphasis area will achieve the following educational objectives, in addition to the core program objectives while becoming immersed in Big Data computational ecosystems.

- Students will have an in depth understanding of the state-of-the-art technologies which enable big data analytics and high performance computing; such that they can successfully investigate the data and analytical needs, then guide the decision making process on deployments into HPC infrastructure.
- Students will acquire knowledge to exploit cloud-based computing infrastructure, including virtualization, distributed architectures, ondemand resource scaling, container technology, and other cloudbased computing concepts in support of Big Data management, processing, and analytics.
- Students will have a thorough understanding of advanced technologies and techniques in Big Data analytics, which facilitate

the extraction of new data intelligence using state-of-the-art, leading analytical platforms.

 Students will gain a solid understanding of techniques for exploiting advanced co--processing hardware, including graphics processing units (GPU) and many-core units (e.g., Intel Phi) to achieve cost effective, massively parallel data analytics.

Emphasis area courses:

DATA_SCI 8614	Data Analytics from Applied Machine Learning	3
DATA_SCI 8635	Cloud Computing for Data Analytics	3
DATA_SCI 8750	Parallel Computing for Data Science	3

MS in Data Science and Analytics with Emphasis in Human Centered Science Design

In addition to the core program objectives (p. 720), graduates of the Masters of Science in Data Science and Analytics who pursue the Human Centered Science Design emphasis area will achieve the following educational objectives:

- Students will develop a deep understanding of the theoretical foundations and hands-on experience necessary to understand the strengths and limitations of different analytical methods.
- Combines both the technical (databases, social networking, data mining, and text mining) and social (economic, ethical, policy, and political) aspects of data analytics.
- Students will build an understanding of the complex interplay between the decisions made during the collection, curation, and transformation steps in the information lifecycle, and their impact on the analytical methods that should be employed.

Emphasis Area courses:

DATA_SCI 8654	Advanced Visualization and	3
	Communication I	
DATA_SCI 8656	Advanced Visualization and	3
	Communication II	

MS in Data Science and Analytics with Emphasis in Strategic Communications and Data Journalism

In addition to the core program objectives (p. 720), graduates of the Masters of Science in Data Science and Analytics who pursue the Strategic Communication and Data Journalism emphasis area will achieve the following educational objectives:

- Students will have in-depth capabilities and understanding of big data management, including gathering and interpreting customer and viewer behavior patterns and developing strategies to enhance marketing objectives for organizations and clients.
- Students will have highly marketable skills in analyzing media markets and will be able to develop sophisticated methodologies to optimize usage of apps, social networks, and other technologies for media businesses and brands.

- Students will be able to apply their analytic skills to understanding and optimizing patterns of search, programmatic advertising buying and behavioral targeting.
- Students will have a deep understanding of issues of privacy and ethics in obtaining and utilizing data from a broad range of sources.
- Students will be able to obtain and analyze publicly available data in a variety of structured and unstructured formats. As such, they will develop an understanding of open-records laws and how to effectively use them.
- Students will develop the skills necessary to work as a data journalist for a news organization.
- As data journalism and data science /analytics are constantly evolving, students will develop strategies that enable them to continue to learn on the job.
- Students will develop an understanding of their audiences and how to best communicate with them.

Emphasis area courses:		9
DATA_SCI 7263	Digital Strategy II	3
DATA_SCI 7637	Streaming Social Media Data	3
	Management and Analysis	

Data Journalism (course under development)

Graduate Certificate in Data Science and Analytics

The objective of the Graduate Certificate in Data Science and Analytics is to enable students from multiple difference graduate programs at the University of Missouri to receive education and training in the emerging field of Data Science. Data science skills are increasingly necessary for all fields of advanced study due to the emergence of large scale data and the incumbent challenges across academia and industry.

At the conclusion of the Graduate Certificate in Data Science and Analytics, students will:

- Have experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.
- Have a comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.
- Be able to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods.
- Understand the fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built.

A total of 15 credit hours of coursework is required.

Required coursework:		12
DATA_SCI 7600	Introduction to Data Science and Analytics	3
DATA_SCI 8610	Statistical and Mathematical Foundations for Data Analytics	3
DATA_SCI 8620	Database and Analytics	3
DATA_SCI 8650	Big Data Visualization	3
Data Science Elective		3

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/11.9999-Gedt-DSA.html

Dispute Resolution

Contact Information

Rafael Gely, James E. Campbell Missouri Endowed Professor of Law and Director of the Center for the Study of Dispute Resolution James Levin, Associate Director of the Center for the Study of Dispute Resolution

Email: mulawcdr@missouri.edu Web site: http://law.missouri.edu/llm

Dispute Resolution Field

DR professionals work in many different areas. To illustrate, the Association for Conflict Resolution has sections dealing with commercial, community, consumer, court, criminal justice, education, environmental / public policy, family, health care, international, ombudsman, online disputes, organizational conflict management, spirituality, training, and workplace issues.

Faculty

Professor R. Gely*, J. Lande*, I. Lee*, R. Uphoff* Associate Professor C. Conklin*, D. Crouch*, S. I. Strong* Adjunct Assistant Professor J. Levin*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• LLM in Dispute Resolution (p. 722)

About the Dispute Resolution Program

Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work

influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements

Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

- Applicants may be admitted without a JD degree if they have a bachelor's degree and substantial experience in dispute resolution.
- Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
- Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Program of Study

The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

Required Courses

LAW 6905	LLM Arbitration Seminar	3
LAW 6930	LL.M. Major Research Project	3
LAW 6935	Dispute System Design	3
LAW 6945	Non-Binding Methods of Dispute Resolution	3
Possible Electives		12
LAW 5450	Conflict and Conflict Management	
LAW 5485	Cross-Cultural Dispute Resolution	
LAW 5537	Emotional Intelligence in Law	
LAW 6920	LL.M. Externship	
LAW 6925	LL.M. Independent Study	
LAW 5770	Mediation Clinic	
LAW 6950	Practicum on Dispute Resolution Training and Education	
PUB_AF 8610	Group Dynamics and Conflict Resolution	
PUB_AF 8620	Organizational Analysis and Change	

PUB_AF 8630	Organizational Change in a Community and Global Context
PUB_AF 8160	Organizational Dynamics and Leadership
THEATR 4240	Theory and Practice of Theatre of the Oppressed

Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- · Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- · Governmental Processes
- Healthcare
- · International Law
- · Normative Theory and Diversity
- Tax
- Trial Practice

Genetics Area Program

Genetics Area Program 241 Engineering West Columbia, MO 65211 573-882-9007 877-GENE-PHD (877-436-3743) http://www.gap.missouri.edu/ Email: gap@missouri.edu

The Genetics Area Program (GAP) is an interdisciplinary Ph.D. program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU.

The curriculum provides broad, individualized training tailored to your career objectives.

Faculty

Professor S. Alexander**, K. L. Bennett**, J. A. Birchler**, A. K. Chatterjee*, G. Davis**, D. Duan**, D. W. Emerich**, W. R. Folk**, J. Gorski, T. J. Guilfoyle**, J. P. Gustafson*, M. Hannink**, G. Hazelbauer**, M. L. Katz**, M. Liscum**, C. Lorson**, D. B. Lubahn**, B. A. McClure**, K. J. Newton**, H. Nguyen**, D. J. Pintel**, J. E. Schoelz*, R. D. Semlitsch**, D. Setzer*, D. A. Sleper*, G. Stacey**, J. J. Tanner**, J. Taylor**, J. C. Walker**, H. Zaghouani**

Curators' Professor R. M. Roberts**

Associate Professor E. A. Bryda**, D. Burke, J. F. Cannon**, A. Chandrasekhar**, G. L. Davis**, C. Franklin**, W. Gassmann**, M. W. Golomb**, L. J. Holland**, T. P. Holtsford*, G. S. Johnson*, T. Kazic**, M. Kirk**, D. R. Lee**, M. E. Martin*, B. Peculis**, C. L. Phillips**, C. Tan, T. Zars**, S. Zhang**

Assistant Professor M. Garcia**, S. Sarafianos Adjunct Professor H. B. Krishnan* Adjunct Associate Professor M. D. McMullen** Adjunct Assistant Professor S. Flint-Garcia** Research Professor G. Hagen*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in the genetics area program, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• PhD in Genetics Area Program (p. 723)

About the Program

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease.

The Genetics Area Program (GAP) is an interdisciplinary PhD program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

Genetics graduate students play a major role in the research programs of our life sciences departments. Students spend approximately twelve weeks in three different laboratories during their first year. This promotes diversity in techniques learned, and it encourages students to meet and work with faculty members in the associated departments. This scientific interaction helps our students choose a lab in which to complete the degree.

As part of the degree, students will spend a semester teaching or assisting with a course in the Genetics curriculum that is relevant to their career goals.

A genetics seminar series is organized and conducted by the graduate students to promote research interest and encourage scientific communication. Speakers include prominent researchers from universities throughout the country, as well as MU faculty. An annual retreat brings faculty and students together to share research results and techniques.

Genetics graduates leave MU with a strong scientific background, excellent laboratory skills and interpersonal communication abilities.

PhD in Genetics Area Program

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding

packages. Check the program website or ask the program contact for details.

Application Deadline

Fall deadline: January 15

Admission Criteria

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
93	580

• Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1100	4.5
On or after August 1, 2011	302	4.5

- · Minimum GPA: 3.0 in last 60 hours
- · Bachelor's degree
- One or more courses in each of the following: organic chemistry, biochemistry, mathematics (calculus and statistics), physics, introductory genetics
- · Research experience highly desirable
- · Broad background in biology

Note: Deficiencies in the subjects listed can be remedied after admission.

Required Application Materials

To the Graduate School:

· All required Graduate School documents

To the Genetics Area Program:

Genetics Area Program application (download form from website)

- GRE scores
- TOEFL scores (international applicants)
- 3 letters of recommendation (use provided form)
- · Personal statement

Degree Completion Requirements

The minimum requirements for the PhD degree are:

- advanced courses in genetics, biochemistry and molecular biology
- regular participation in the genetics area seminar program
- successful completion of a comprehensive examination
- at least one semester of teaching in a genetics course
- 3 seminar presentations
- · research, dissertation and oral defense

These are beyond the Graduate School's requirements. Others are determined in consultation between the student and faculty advisor.

Health Administration

Eduardo J. Simoes, Chair and Dr. Stuart Wesbury Distinguished Professor in Health Management and Informatics CE749, CS&E Building (573) 882-6179 Sue A. Boren, Director of Academic Programs and Associate Professor CE743, CS&E Building (573) 882-1492

Contact Information

Department of Health Management and Informatics

Graduate level academic programs at MU in the area of Health

Administration are offered through the Department of Health Management and Informatics (HMI) in the School of Medicine.

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems.

HMI advances the health of Missouri's communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for healthand education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics and Bioinformatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format available)
- Graduate Certificate in Informatics for Public Health (100% online)

Residential Master of Health Administration students may also pursue a dual MBA, MS in Industrial Engineering, MPA, or JD degree. Some students choose to complete an additional Master's degree, such as the MPH, concurrently with the MHA degree.

Faculty

Professor E. J. Simoes**

Associate Professor S. A. Boren**, J. Kapp**, N. Khatri**, M. Popescu**, I. Yoo**

Assistant Professor C. Deroche*, T. Joshi**, A. Zohrabian** Associate Professional Practice Professor W. Wells*

Associate Teaching Professor W. Phillips**

Assistant Research Professor M. S. Kim**, A. Mosa**, G. F. Petroski*, L. Sheets*, I. Zachary**

Assistant Teaching Professor P. Alafaireet**, B. Hensel*
Clinical Instructor D. Moxley*
Adjunct Professor G. Sill*

Adjunct Associate Research Professor J. Jackson-Thompson**

Adjunct Assistant

Professor K. Bopp*, D. Nelson*, C. Schmaltz* **Adjunct Clinical Instructor** M. Harris*

Adjunct Instructor K. Clements*, J. Kaplan*, M. Johnson Moxley*, R. Sommer*, T. Weatherford*

Professors Emeriti G. D. Brown*, L. L. Hicks**, D. Wakefield**

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

Undergraduate students who are eligible for dual enrollment may, with permission, register for Graduate-level HMI courses. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in health administration, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

• MHA in Health Administration (p. 725)

About the Master of Health Administration

The graduate program in Health Administration prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.

The residential and executive master's degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health administration.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master's degree format is a traditional oncampus residential program, the executive master's degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Both executive and residential students may pursue the MHA degree jointly with the MS in Health Informatics degree. Residential students may also pursue a dual MBA, MS in Industrial Engineering, MPA or JD degree, or complete an additional Master's degree, such as the MPH, concurrently with the MHA program.

MHA in Health Administration

About the MHA

The HMI Deptartment's MHA degree is designed for students from a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and advisor, and in all cases, the intent is to tailor the degree program to the student's interests. The goal of the graduate program in health administration is to prepare professionals for leadership roles in health care. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

Degree Requirements

The residential MHA degree requires a total of 54 credit hours, which includes 39 hours of core coursework, three credit hours earned for a required 12-week summer internship, a three-credit hour capstone group management project, and nine credit hours of professional electives. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master's degree.

The professional elective requirement, which comprises three courses, allows MHA students the opportunity to concentrate in a particular area of study if they choose. They may take courses in health informatics or health ethics within the HMI Department, pursue graduate certificates in areas such as health informatics, public health, or geriatric care management, or complement their MHA coursework with classes in business administration, public administration, industrial engineering and public health, to name a few.

MHA students must complete a 12-week administrative internship at an approved integrated managed care system, group practice, hospital or other healthcare organization under the guidance of a qualified preceptor

(often a HMI alumnus/a). The internship is designed to incorporate the academic training students receive in their first year of the master's degree with practical applications within the host site. The students receive hands-on exposure to health care management in a real-world environment and experience first-hand the dynamics of a career in health care. The intern should have the opportunity to observe their mentor and other professionals in the work environment, as well as opportunities to discuss their experiences.

Specific general skills to be developed include:

- Leadership
- Strategic decision making
- Project management
- Teamwork

HMI's executive-in-residence works individually with students to place them at internship sites. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

Required Courses

HMI 7410	Introduction to the US Health Care System	3
HMI 7430	Introduction to Health Informatics	3
HMI 7471	Introduction to Accounting and Finance in Health Care (HMI 7471 Introduction to Accounting and Finance in Health Care)	3
HMI 8453	Executive Management Studies	3
HMI 8460	Administration of Health Care Organizations	3
HMI 8461	Managing Human Resources in Health Care Organizations	3
HMI 8470	Strategic Planning and Marketing for Health Care Organizations	3
HMI 8472	Financial Management for Health Care Organizations	3
HMI 8524	Health Economics	3
HMI 8544	Managerial Epidemiology (Population Health Management)	3
HMI 8571	Decision Support in Health Care Systems	3
HMI 8573	Decision Making for Health Care Organizations	3
HMI 8574	Health Care Law	3
HMI 8575	Health Policy and Politics	3
HMI 8689	Field Experience in Health Management and Informatics	3

Students must complete nine credit hours of professional electives

Students must satisfy a pre-requisites in microeconomics

Sample Plan of Study

First Year			
Fall	CR Spring	CR Summer	CR

Total Credits: 45

Thesis/Non-Thesis Requirement

- improvement of patient experience of wait times in the Orthopaedic Clinic at the Missouri Orthopaedic Institute
- surgical site infection reduction informed by NSQIP resources for UMHC
- · system-wide urinary catheter reduction for UMHC
- improving screening and follow-up for students with substance use and/or mood disorders at MU Student Health

Financial Aid

Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department's website at: http://hmi.missouri.edu/prospective/financial_aid.html.

Executive MHA Degree

In addition to the residential (on-campus) MHA, the degree is offered in an alternative format to healthcare professionals who have significant clinical or administrative experience in health care. HMI accepts an executive MHA cohort to begin in January of each year. The Executive MHA combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study, and requires 42 credit hours of health services management coursework. Students are required to complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MHA, please visit http://hmi.missouri.edu/prospective/emha_description.html, or call: (573) 884-0698.

Admissions Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHA program (http:// hmi.missouri.edu/prospective/admissions_criteria.html) and the minimum requirements of the Office of Graduate Studies (https:// gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the degree program to which you've applied and the Office of Graduate Studies.

HMI Admissions Information

Deadline for Fall entrance: Rolling; priority deadline is March 1

A minimum of a baccalaureate degree from an accredited institution

Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	603

· Minimum Academics IELTS scores:

Item	Score
OVERALL	7.5

• Minimum GRE Scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	50th percentile
On or After August 1, 2011	50th percentile

 In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores.

Required Application Materials

Master's program applicants should apply online through the **Office of Graduate Studies application system** (http://gradschool.missouri.edu/admissions/apply). When completing the online application, you will have an opportunity to upload/attach additional documents. Please include the following documents:

- · an updated résumé or curriculum vitae;
- a personal essay that:
 - · outlines your professional plans and career objectives;
 - explains how you became interested in health services management/health informatics and how your prior training and experience would help your career;
 - includes specific issues and problems in health care you consider challenging and why;
 - indicates if you intend to apply to the traditional (residential) oncampus degree program or the distance education (executive) format

Other required documents:

- Official transcripts of all coursework from all colleges, technical schools and/or universities attended
- Three letters of recommendation (submitted through the Graduate School application system (https://applygrad.missouri.edu/apply))
- Official GRE/GMAT score report (Residential Students only)

You may also be required to submit other documentation and in some cases complete prerequisite courses. Below is a checklist to help make sure your application is complete:

- · Request to re-enroll form (for previously admitted students only)
- Application for Change of Degree form (for students already enrolled in a Master's degree or Graduate Certificate program)
- Letter of support from your employer (Executive Students only)
- Official TOEFL report (for international applicants only have official results sent to us: institution code is 6875, our department code is 25 - minimum score of 100 on the Internet-based exam required)
- Prerequisites links to information about prerequisites for each degree program are available at http://hmi.missouri.edu/prospective/ rmha_description.html

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri's communities, the nation, and international partners by:

- Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
- Providing professional health management and informatics education and fostering lifelong learning;
- Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
- Developing innovative commercial products and services for healthand education-related application

Degrees & Certificates Offered

The HMI Department offers the following degrees and graduate certificate programs:

- Master of Health Administration (executive and residential cohort)
- Master of Science in Health Informatics and Bioinformatics (executive and residential cohort)
- Dual Master of Health Administration and Master of Science in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Informatics (executive and residential cohort)
- Graduate Certificate in Health Ethics (100% online format available)
- · Graduate Certificate in Informatics for Public Health

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

HMI offers two health informatics and bioinformatics courses that are cross-leveled: HMI 4420/HMI 7420 Fundamentals of Bioinformatics and HMI 4440/HMI 7440 Health Information Technology. Undergraduate students may enroll in the 4000-level sections of these classes for Undergraduate credit. Undergraduate students who are eligible for dual enrollment may, with permission, take courses through HMI for Graduate credit. For more information on dual enrollment, please see http://registrar.missouri.edu/policies-procedures/dual-enrollment.php.

While MU does not offer undergraduate degrees specifically in Health Informatics, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

 - with emphasis in Health Informatics (p. 730)
- Graduate Certificate in Health Informatics (p. 730)

About the Master of Science in Health Informatics and Bioinformatics

The Master of Science in Health Informatics and Bioinformatics program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master's degree prepares students for careers in developing and evaluating clinical information systems, data and knowledge management, decision support, and doctoral study in health informatics. The executive master's degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of

information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master's degree format is a traditional oncampus residential program, the executive master's degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

MS in Health Informatics and Bioinformatics

Degree Requirements

The residential MS in Health Informatics (MSHI) curriculum requires 36 credit hours of course work, which include foundational coursework in health information technology as well as health administration. Prior coursework in computer science is not required. Residential MSHI students have the option to complete a 12-week internship during the summer following their first year, although it is not required for the degree. HMI's executive-in-residence will work with HI students who wish to complete an internship to find an appropriate placement. For a list of recent internship placements, please see http://hmi.missouri.edu/prospective/educational_partners.html.

The MSHI curriculum integrates learning across computer science, health informatics, and health administration, and also develops students' research interests. Those with excellent academic records are encouraged to pursue a PhD degree in Informatics. Students must maintain a minimum 3.0 cumulative MU graduate grade point average to earn the Master's degree. Individuals with three or more years of professional experience are encouraged to apply for admission to the Executive MSHI cohort (please see information below).

Required Courses

HMI 7410	Introduction to the US Health Care System	3
HMI 7430	Introduction to Health Informatics	3
HMI 7440	Health Information Technology	3
HMI 8435	Information Security, Evaluation and Policy	3
HMI 8437	Data Warehousing and Data/Text Mining for Health Care	3
HMI 8441	Biomedical and Health Vocabularies and Ontologies	3
HMI 8443	Enterprise Information and Solutions Architecture for Strategic Healthcare Operations	3
HMI 8571	Decision Support in Health Care Systems	3

HMI 8550	Health Data Analytics	3
HMI 8610	Consumer Health Informatics	3
HMI 8870	Knowledge Representation in Biology and Medicine	3
HMI 8090	Thesis Research in Health Management and Informatics	3

* If a student chooses to complete an internship, s/he must register for HMI 8689 Field Experience in Health Management and Informatics and must abide by all internship program requirements.

Thesis/Non-Thesis Requirement

Residential MSHI students have the option to complete a formal Master's thesis to be submitted to the Office of Graduate Studies. Students who choose not to complete a thesis must complete a substantial independent research project. All MSHI students must present their thesis or independent research during their oral comprehensive examination in their final semester.

Financial Aid

Further information about costs, financial aid, and external scholarship opportunities is available on the HMI Department's website at: http://hmi.missouri.edu/prospective/financial_aid.html.

Executive MSHI Program

In addition to the residential (on-campus) mode, the MSHI degree is offered in an alternative format for professionals who have significant experience in health informatics. HMI accepts an Executive MSHI cohort to begin in January of each year. The executive MSHI combines three on-campus weekend sessions per semester with independent study and online interaction in an innovative two-year course of study, and requires 33 credit hours of health informatics coursework. Students must complete a substantial independent research project, which they present during their oral comprehensive examination in their final semester. For additional information about the Executive MSHI degree, please visit http://hmi.missouri.edu/prospective/emshi_description.html or call (573) 884-0698.

Informatics PhD Program

MU also offers a PhD in Informatics with emphasis in Health Informatics through the MU Informatics Institute (http://muii.missouri.edu).

Admissions Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSHI program (http://hmi.missouri.edu/prospective/admissions_criteria.html) and the minimum requirements of the Office of Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the degree program to which you've applied and the Office of Graduate Studies.

HMI Admissions Information

Deadline for Fall entrance: Rolling; Priority deadline March 1

A minimum of a baccalaureate degree from an accredited institution

Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
100	603

• Minimum Academic IELTS scores:

Item	Score
OVERALL	7.5

Minimum GRE Scores:

When did you take the GRE?	Verbal + Quantitative
Prior to August 1, 2011	50th percentile
On or After August 1, 2011	50th percentile

 In lieu of GRE, minimum GMAT score: 50th percentile. HMI also accepts LSAT and MCAT scores. GRE scores are not required for applicants to the Executive cohort.

Required Application Materials

Master's program applicants should apply online through the **Office of Graduate Studies application system** (http://gradschool.missouri.edu/admissions/apply). When completing the online application, you will have an opportunity to upload/attach additional documents. Please include the following documents:

- an updated résumé or curriculum vitae;
- a personal essay that:
 - · outlines your professional plans and career objectives;
 - explains how you became interested in health services management/health informatics and how your prior training and experience would help your career;
 - includes specific issues and problems in health care you consider challenging and why;
 - indicates if you intend to apply to the traditional (residential) oncampus degree program or the distance education (executive) format

Other required documents:

- Official transcripts of all coursework from all colleges, technical schools and/or universities attended
- Three letters of recommendation (submitted through the Graduate School application system (http://gradschool.missouri.edu/ admissions/apply))
- Official GRE/GMAT score report (Residential Students only)

You may also be required to submit other documentation and in some cases complete prerequisite courses. Below is a checklist to help make sure your application is complete:

- Request to re-enroll form (for previously admitted students only)
- Application for Change of Degree form (for students already enrolled in a Master's degree or Graduate Certificate program)
- Letter of support from your employer (Executive Students only)
- Official TOEFL report (for international applicants only have official results sent to us: institution code is 6875, our department code is 25 - minimum score of 100 on the Internet-based exam required)
- Prerequisites links to information about prerequisites for each degree program are available at http://hmi.missouri.edu/prospective/ rmha_description.html

Graduate Certificate in Health Informatics

About the Graduate Certificate in Health Informatics

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for students, physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students may pursue the HI Certificate in either the residential or executive format. Students who wish to pursue only the HI Certificate must apply to the HMI Department and the Office of Graduate Studies for admission to the Graduate Certificate program. Students currently enrolled in a non-HMI Graduate program also need to formally apply for the Certificate. Students enrolled in the MHA degree program may earn a HI Certificate concurrently with their Master's degree.

The HI Certificate requires the completion of four courses (12 credit hours total). All students must complete HMI 7430 Introduction to Health Informatics, and may choose any three other health informatics courses

to fulfill the remaining nine hours. Students will choose their courses in consultation with the HMI academic advisor.

HMI 7430	Introduction to Health Informatics	3
HMI 7440	Health Information Technology	3
HMI 7566	Health Informatics Ethics	3
HMI 8435	Information Security, Evaluation and Policy	3
HMI 8437	Data Warehousing and Data/Text Mining for Health Care	3
HMI 8441	Biomedical and Health Vocabularies and Ontologies	3
HMI 8443	Enterprise Information and Solutions Architecture for Strategic Healthcare Operations	3
HMI 8478	Knowledge Management in Health Care	3
HMI 8550	Health Data Analytics	3
HMI 8571	Decision Support in Health Care Systems	3
HMI 8610	Consumer Health Informatics	3
HMI 8870	Knowledge Representation in Biology and Medicine	3

Informatics

Academic doctoral programs at MU in the area of Informatics are coordinated through the Informatics Institute.

muiigraduateprogram@missouri.edu 241 Naka Hall Columbia, MO 65211-2060 573-882-9007 http://muii.missouri.edu/

About the Informatics Institute (MUII)

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 17 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & Sciences; Education; Engineering; Veterinary Medicine; School of Health Professions; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress skill sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program

assures broad exposure to the field and fosters new insights and innovative research concepts.

- Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in informatics, the University does offer baccalaureate opportunities in a number of related areas. Many successful informatics students have received bachelor's degrees in Geography, Computer Science, Statistics, Business, Biology, and Biochemistry before starting their doctorate.

In addition, MUII offers several service courses designed for upperlevel undergraduates and master's students to expose students to the fundamentals of bioinformatics.

Graduate

- PhD in Informatics (p. 732)
 - · with emphasis in Bioinformatics (p. 733)
 - with emphasis in Health Informatics (p. 734)

Emphasis Areas & Concentration Areas

MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics (https://muii.missouri.edu). In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics.

Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student's knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and

Policy with Focus on Informatics, please visit the MPH program website (http://publichealth.missouri.edu/.html).

Resources and Facilities

To support the Big Data research and training programs of Informatics Institute, in 2014 the institute secured a National Science Foundation Major Research Instrumentation (MRI) grant to acquire high performance computing (HPC) equipment for data-intensive applications with hybrid cloud computing needs. The equipment (\$880,000) is comprised of 89 nodes: (i) 56 16-core CPU nodes, each with 128 GB RAM, (ii) 2 high-memory nodes, each equipped with 4 8-core CPUs and 1TB RAM (one node)/512GB RAM (one node), (iii) 15 K20 nodes, each equipped with an Nvidia K20 (Kepler) 2,496-core GPU, 2 six-core Xeon E5 processors and 64 GB RAM, (iv) 15 Xeon Phi nodes, each equipped with an Intel Xeon Phi 5110P coprocessor, 2 six-core Xeon E5 processors and 64 GB RAM, and (v) a head node for the cluster. The basic CPU nodes allow supporting traditional MPI, MapReduce, and Spark applications; high-memory nodes are currently required by next generation sequence analyses, and hybrid (Nvidia K20 and Intel Xeon Phi) nodes accommodate existing and new informatics applications accelerated on many-core devices. Intel Phi coprocessors particularly satisfy the requirements of users that need to port existing applications written with traditional parallel programming models (such as OpenMP, MPI and Intel TBB) to many-core processors, without investing the significant development time required for implementation in environments such as CUDA and OpenCL.

Faculty Areas of Research Interest

Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page (https://muii.missouri.edu/people). (http://muii.missouri.edu/people/faculty.php)

Internal Funding

Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute's website (https://muii.missouri.edu).

PhD in Informatics

Admission Contact Information

Admission Criteria

Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15th.

- Preferred GPA: 3.3 out of 4.0
- Preferred GRE scores*:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1200	3.5-4.0
On or After August1, 2011	309	3.5-4.0

- or a preferred GMAT score of 570
- Preferred TOEFL or IELTS scores:

Internet-based test (iBT)	Paper-based test (PBT)
90	577
Item	Score

Minimum IELTS Score

Sufficient background and training to pursue advanced degree in informatics

All Required Documents

Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

- 1. Curriculum Vitae
- Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
- 3. GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
- 4. TOEFL/ELTS scores for international applicants, if required.
- Three letters of recommendation from faculty or supervisors who can evaluate the applicant's credentials and potential to become successful in the area of informatics.
- Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (https://muii.missouri.edu) or the Emphasis in Bioinformatics (p. 733) and Emphasis in Health Informatics (p. 734) for complete details:

- · Students must take required and area courses
- Students must pass a qualifying examination
- · Students must present at least one institutional seminar annually
- Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame

- Students must pass a comprehensive examination at least 7 months before their scheduled defense
- Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics
- To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

Exceptional Funding Opportunities -Biomedical Big Data Science Pre-doctoral Training

Funded by NIH T32 (2016-2021)

MU Informatics Institute (MUII) is recruiting SIX top-notch trainees to pursue PhD degree in Informatics through an interdisciplinary training team. Students from basic sciences, life sciences, medicine, and computing disciplines are welcome to apply. Our unique training includes: (1) personalized training modules from core courses of the MS degree in Data Science and Analytics program, Big Data courses from Computer Science, and biomedical informatics courses from MUII, which will expose trainees to the basic concepts, ethics, and working knowledge in Big Data Science; (2) a problem-based learning curriculum in predoctoral-level Big Data-related courses, such as Mining Massive Data Sets for Biomedical Applications, designed to foster a team science approach to problem-solving; (3) a student-driven journal club/seminar series, in which students are offered opportunities to present research, pose questions, and receive feedback from peers and mentors. Our interdisciplinary components include (1) required tri-lab rotations to introduce students to animal/veterinary medical research, human medical research, computing/statistical methodologies, and health communications; (2) development of rigorous and reproducible opensource Big Data analytics tools, which will be assessed by the One Health research community after arduous testing; and (3) creation of an Individual Development Plan based on each trainee's background and career goal prior to joining the program. These positions are open to permanent residents and US citizens only. Women and minority students are encouraged to apply.

Please contact the project director Dr. Chi-Ren Shyu at ShyuC@missouri.edu (shyuc@missouri.edu) for inquiries.

To provide the maximum flexibility and facilitate interdisciplinary study, students will complete their program of study by selecting an additional 15 credits hours of electives from a list of Area Courses found on the MUII website (http://muii.missouri.edu/current_students/program_of_study.php).

in Informatics

Qualifying Exam Process

INFOINST 9090

Students are expected to take the qualifying exam by the end of their third semester in the program. The exam will be based on their previous coursework, lab rotation experience, and one-page research statement. For more information on qualifying exam procedures, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Comprehensive Exam Process

The comprehensive exam consists of two parts - the written portion, comprised of an R01 research proposal, and the oral exam. For more information on the comprehensive exam process, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Dissertation Defense Process

The doctoral dissertation defense must be scheduled no sooner than seven months after successful completion of the comprehensive exam. The dissertation must be written on an informatics subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation, and must be the

candidate's own work. Please refer to the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf) for additional information.

Exceptional Funding Opportunities -Biomedical Big Data Science Pre-doctoral Training

Funded by NIH T32 (2016-2021)

MU Informatics Institute (MUII) is recruiting SIX top-notch trainees to pursue PhD degree in Informatics through an interdisciplinary training team. Students from basic sciences, life sciences, medicine, and computing disciplines are welcome to apply. Our unique training includes: (1) personalized training modules from core courses of the MS degree in Data Science and Analytics program, Big Data courses from Computer Science, and biomedical informatics courses from MUII, which will expose trainees to the basic concepts, ethics, and working knowledge in Big Data Science; (2) a problem-based learning curriculum in predoctoral-level Big Data-related courses, such as Mining Massive Data Sets for Biomedical Applications, designed to foster a team science approach to problem-solving; (3) a student-driven journal club/seminar series, in which students are offered opportunities to present research, pose questions, and receive feedback from peers and mentors. Our interdisciplinary components include (1) required tri-lab rotations to introduce students to animal/veterinary medical research, human medical research, computing/statistical methodologies, and health communications; (2) development of rigorous and reproducible opensource Big Data analytics tools, which will be assessed by the One Health research community after arduous testing; and (3) creation of an Individual Development Plan based on each trainee's background and career goal prior to joining the program. These positions are open to permanent residents and US citizens only. Women and minority students are encouraged to apply.

Please contact the project director Dr. Chi-Ren Shyu at ShyuC@missouri.edu (shyuc@missouri.edu) for inquiries.

PhD in Informatics with Emphasis in Health Informatics

Admission Contact Information

MUII Staff (mailto: muiiadmissions@missouri.edu)

241 Engineering Building West Columbia, MO 65211-2060

Phone: 573-882-9007 FAX: 573-884-8709

Informatics Institute (MUII) website: http://muii.missouri.edu/

Admission Criteria

Fall deadline: The deadline for Fall admission is March 1. However, to be considered for departmental and Graduate School fellowships and assistantships, applications should be submitted by January 15.

- Preferred GPA: 3.3 out of 4.0
- Preferred GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011	1200	3.5-4.0
On or After August 1, 2011	309	3.5-4.0

- * or a preferred GMAT score of 570
- · Preferred TOEFL or IELTS scores

Internet-based test (iBT)	Paper-based test (PBT)
90	577
Item	Score
Minimum IELTS Score	6.0

All Required Documents

Students are required to send ALL required application materials through the Office of Graduate Studies on-line application system. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

- 1. Curriculum Vitae
- 2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
- GRE/GMAT scores. Use institution code 6875. The departmental code is not required.
- 4. TOEFL/ELTS scores for international applicants, if required.
- Three letters of recommendation from faculty or supervisors who can evaluate the applicant's credentials and potential to become successful in the area of informatics.
- Scanned copies of transcripts from each college and university attended. If accepted, applicants will be required to have official copies of their transcripts sent directly from the institution to the Office of Graduate Studies.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site: (https://muii.missouri.edu)

- Students must take required and area courses.
- Students must pass a qualifying examination.
- · Students must present at least one institutional seminar annually.
- Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame.
- Students must pass a comprehensive examination at least 7 months before their scheduled defense.
- Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.

• To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.

Coursework Requirements

All students must have at least 72 credit hours at the graduate level, of which 15 credits must be at the 8000-level not including research, problems, lab rotations, or seminar. Transferring credits will be at the recommendation of the student's doctoral committee and the approval of the MUII Curriculum Committee.

REQUIRED COURSES - HEALTH INFORMATICS EMPHASIS AREA

INFOINST 7002	Introduction to Informatics	3
INFOINST 7430	Introduction to Health Informatics	3
REQUIRED METHODS CO	URSES (9 Credit Minimum)	
INFOINST 8810	Research Methods in Informatics	3
STAT 7510	Applied Statistical Models I	3
Students must choose one a doctoral committee approva	additional 3-credit methods course with I.	
LAB ROTATIONS AND SEMINAR		
INFOINST 8087	Seminar in Informatics (Must be enrolled each semester)	0.5-1
INFOINST 8088	Lab Rotations in Informatics	2
RESEARCH		
INFOINST 8090	Dissertation (pre-candidacy) Research in Informatics	1-99
INFOINST 9090	Dissertation (post-candidacy) Research in Informatics	1-99

To provide the maximum flexibility and facilitate interdisciplinary study, students will complete their program of study by selecting an additional 15 credits hours of electives from a list of Area Courses found on the MUII website (https://muii.missouri.edu).

Qualifying Exam Process

Students are expected to take the qualifying exam by the end of their third semester in the program. The exam will be based on their previous coursework, lab rotation experience, and one-page research statement. For more information on qualifying exam procedures, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Comprehensive Exam Process

The comprehensive exam consists of two parts - the written portion, comprised of an R01 research proposal, and the oral exam. For more information on the comprehensive exam process, please see the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf).

Dissertation Defense Process

The doctoral dissertation defense must be scheduled no sooner than seven months after successful completion of the comprehensive exam. The dissertation must be written on an informatics subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation, and must be the candidate's own work. Please refer to the MUII student handbook (https://muii-wh-prod.missouri.edu/wp-content/uploads/2017/05/MUII_Graduate_Student_Handbook_Fall2016.pdf) for additional information.

Exceptional Funding Opportunities - Biomedical Big Data Science Pre-doctoral Training

Funded by NIH T32 (2016-2021)

Medical Pharmacology and Physiology

Pharmacology and Physiology School of Medicine MA415 Medical Sciences Building 573-882-4957

 ${\tt https://medicine.missouri.edu/departments/medical-pharmacology-physiology/about}$

The joining of these two disciplines provides a powerful way to address modern questions of biology.

The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

Professor F. Booth**, D. Bowles**, G. Davis**, M. Davis, K. Dellsperger**, N. Dietz, W. Durante**, W. Fay**, K. Gruber*, C. Hardin, E. Hasser**, M. Hill**, L. Holland**, V. Huxley**, T. Hwang**, J. Ibdah, K. Kattesh, R. Korthuis**, M. H. Laughlin*, K. McDonald**, G. Meininger**, M. Milanick**, L. Pulakat, S. Segal**, S. Shukla**, J. Sowers**, R. Terjung**

Associate Professor V. Demarco*, P. Fadel**, K. Gillis**, S. Halenda*, M. James-Kracke*, J. Lever**, R. Lim**, L. Martinez-Lemus**, A. Parrish**, P. Wilden**

Assistant Professor C. Baines, T. Domeier*, M. Krenz**, L. Polo-Parada**, J. Smith, G. Sowa**, M. Thakkar**

Professor Emeritus E. Blaine*, E. L. Forker*, L. Forte*, R. Freeman*, T. Hurley*, A. Jones*, H. D. Kim*, M. Rovetto**, R. Russell*, J. Turner, R. Walkenbach*, W. Wosilait*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Medical Pharmacology and Physiology (p. 737)
- PhD in Medical Pharmacology and Physiology (p. 738)

Monica Elliott

School of Medicine

MA415 Medical Sciences Building

573-882-4957

 ${\tt https://medicine.missouri.edu/departments/medical-pharmacology-physiology/about}$

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.

Areas of Study

Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research

The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships

Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the 21st Century. The cooperative research atmosphere encourages staff and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

Teaching Experience

In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students' presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

Financial Aid from the Program

Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campuswide Life Science Program available on a competitive basis through nominations by the Department.

Deadlines for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

MS in Medical Pharmacology and **Physiology**

Admission Contact Information

Monica Elliott MA415 Medical Sciences Bldg, DCO63.00 Columbia, MO 65211 573-882-4957

Application Deadlines

Fall deadline: January 7 Spring deadline: September 15

Admission Criteria

· Minimum TOEFL scores:

Internet-based test (iBT)

Paper-based test (PBT)

score of 80

61 Effective July 1, 2015 must have 500 Effective July 1, 2015 must have score of 550

- Minimum IELTS overall academic score: 5.5
- . Minimum GPA: 3.0 in the last 60 hours
- · Bachelor's degree in chemistry, biology, pharmacy or related areas from an accredited college
- · Background in biology and chemistry and an understanding of mathematics and physics
- · Course work in biochemistry and physiology is highly recommended
- · Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master's degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials

To the Graduate School:

· All required Graduate School documents

To the Medical Pharmacology & Physiology Program:

- · Departmental application
- · Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student's academic capability.
- Official GRE & TOEFL scores

Degree Requirements

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master's thesis. Candidates also must comply with other regulations governing master's degrees.

Length of Study

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

Plan of Study

The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students also will be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

Qualifying Examination Policy

The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

Choosing a Track and Mentor

The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

Comprehensive Examination

All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student's dissertation research area.

Dissertation

Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

Oral Defense

Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

Length of Study

The doctoral program normally requires four to five years beyond the baccalaureate degree.

Microbiology

School of Medicine

M616 Medical Sciences Building

(573) 882-8152

 ${\tt https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program}$

The Department of Molecular Microbiology and Immunology (MMI) at the University of Missouri School of Medicine has three primary missions:

to foster cutting-edge research on biomedically relevant problems in microbiology, immunology, and virology; to educate strong, independent research scientists; and to provide knowledge-based service to the state, nation and international communities.

Molecular Microbiology and Immunology has a long history of providing graduate and postgraduate education in basic principles of microbiology and immunology, as well as research training opportunities in the laboratories of established scientists with diverse research interests. Faculty expansion has provided new curricular offers with flexibility for personalized scholarly pursuits built in. The breadth of research training includes faculty laboratories in the School of Medicine (http://medicine.missouri.edu), the Bond Life Sciences Center (http://bondlsc.missouri.edu) and the College of Veterinary Medicine (http://vetmed.missouri.edu).

The Department of Molecular Microbiology & Immunology, in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (PhD) degree. Strong scientific interactions among faculty from these and other academic units across campus illustrate the importance of scientific collaborations not only in meeting the research challenges in microbiology and immunology, but also in providing a strong academic environment for the training of the next generation of scientists and educators in these disciplines. The faculty in this training program have achieved international recognition for their scientific contributions and expertise, with their research efforts published in top tier research journals and funded through stringent peer-reviewed federal grants. Many of these investigators serve on scientific review committees for these funding agencies.

This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, virology, pathogenesis, immunology and host-parasite interactions. MMI offers under the program name of Molecular Pathogenesis and Therapeutics Graduate Program (MPT):

- PhD in Microbiology (Medicine)
- Cooperative Degrees: MD/ PhD in Microbiology (Medicine)

Faculty

Molecular Microbiology and Immunology

Professor D.H. Burke, D. Duan, M.C. Johnson, M. A. McIntosh, M. L. Misfeldt, D. J. Pintel, H. Zaghouani

Associate Professor M. R. Baldwin, J. F. Cannon, M. A. Daniels, A. G.Schrum, E. Teixeiro-Pernas

Assistant Professor H. Guo,

Professor Emerita/Emeritus K. L. Bennett, H. Braley-Mullen, R. A. Finkelstein, H. S. Goldberg, D. R. Lee, K. S. Wise

Assistant Research Professor D. Chance, Y. Lai, M.J. Lange, K. Singh **Assistant Teaching Professor** J. L. Furrer

Adjunct Professor S. Sarafianos

Veterinary Pathobiology

Professor C. R. Brown, B. T. Beerntsen, E. C. Bryda, M. J. Calcutt, C. L. Franklin, C. L. Lorson, B. K. Ray, G. C. Stewart, R. W. Stich Associate Professor D. M. Anderson, G. Zhang Assistant Professor J. Amos-Landgraf, A. Franz, J. Skyberg

Jointly appointed to Molecular Microbiology and Immunology

Professor D. Cornelison

Associate Professor D. Gil Pagés, B. Hahm, G. Li, S. C. McKarns Assistant Professor P. B. Brown

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While the University of Missouri does not offer an undergraduate degree specifically in molecular microbiology and immunology, undergraduates are able to take basic courses offered by Molecular Microbiology and Immunology in the areas of microbiology, immunology and virology. MU does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges within, including courses offered through Biological Sciences, Biochemistry, Pre-Med, Nursing, and Health Professions. The course catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Microbiology (p. 740)
- PhD in Microbiology (p. 740)

School of Medicine

M616 Medical Sciences Building

(573) 882-8152

https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program

The Departments of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program, Molecular Pathogenesis and Therapeutics Graduate Program (MPT), leading to the Doctor of Philosophy (Ph.D.) degree. The Molecular Pathogenesis and Therapeutics Graduate Program is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology, pathogenesis, and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

Faculty Research

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics, therapeutics, and virology.

Research Facilities and Resources

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI and VPB. Critical to the Molecular Pathogenesis and Therapeutics Graduate Program interests in infectious diseases, pathogenesis, therapeutics, and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Molecular Pathogenesis and Therapeutics Graduate Program's partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (https://medicine.missouri.edu/ departments/molecular-microbiology-immunology/graduate-program) for additional information on MMI's access to state of the art facilities.

Career Opportunities

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

Research and Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out a research project through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their studies.

If you are interested in a the Molecular Pathogenesis Graduate Program, please see the "Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificate (p. 18)" page for the Ph.D. in Microbiology.

MS in Microbiology

Admission to the MPT program to pursue a M.S. degree is not an option, as students are accepted with the intent that they will fulfill the PhD requirements. Only under unforeseen circumstances such as illness, a change in academic interest, or other personal reason, is a student allowed to transfer to the M.S. degree. Requirements are the same as for doctoral candidates, although successful completion of a comprehensive examination is not a requirement for the Master's candidate. Students opting for a M.S. degree, must complete a research project and write and defend a Master's thesis in front of their Master's committee. The Master's Committee should consist of at least three faculty members including the mentor. At least two of the faculty member should be from the MPT Graduate Program and at least one faculty member from outside of the advisor's primary department.

For additional graduate degree information please visit our website at: https://medicine.missouri.edu/departments/molecular-microbiology-immunology/graduate-program or Phd in Microbiology (p. 740).

PhD in Microbiology (MED)

Program Overview

The Molecular Pathogenesis and Therapeutic Graduate Program (MPT) was collaboratively designed by the Department of Molecular Microbiology & Immunology (MMI) and the Department of Veterinary Pathobiology (VPB). The MPT Program offers comprehensive graduate-level training leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbial pathogenesis, virology, immunology and host-parasite interactions. Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in the academic, government and private sectors.

Graduate students entering into the program should be highly motivated toward a career in research in microbiology. They must have, as a minimum, a baccalaureate degree with an undergraduate record showing superior performance in introductory and advanced coursework in prerequisite subjects (biology, chemistry, physics, and mathematics). They must have taken the Graduate Record Examination and should have superior scores. Additionally, international applicants will require demonstration of English fluency via TOEFL scores. Letters of recommendation from individuals who are qualified to judge should clearly indicate aptitude for, and dedication to, a career in science.

The MMI and VPB Departments are central components of an eminent, interdisciplinary campus program in molecular biology and life sciences, which also involves molecular biologists in Biochemistry and Biological Sciences as well as many other University departments. Campus core facilities provide cell culture and immunology services, DNA sequence analysis, transcriptional analysis, protein structural analysis, transgenic animals, protein expression, proteomics, electron microscopy and molecular cytology.

Program Degree Options

The Doctor of Philosophy (Ph.D.) Degree

The program involves (i) a course of study which includes required and elective course work, (ii) participation in programmatic seminars and journal clubs, (iii) training in teaching through participation in laboratory courses for undergraduates, (iv) a comprehensive examination designed to evaluate a student's ability to propose and experimentally evaluate a significant scientific question, and (v) the successful completion of a creative and original scholarly research project.

Degree Options

Ph.D. Degree

On average, the graduate degree program will require four to six years of full-time effort, although this may vary depending on the ability and previous experience of the individual student. A Master of Science Degree is not a prerequisite for the Ph.D. degree.

Dual Degree

A program leading to the combined Ph.D. /M.D. degrees can be designed for students who are admitted to the Medical School and to the MPT Graduate Program. It is anticipated that these students will fulfill their first two years of Medical School academic requirements before entering the MPT Graduate Program for the research- oriented Ph.D. degree. All coursework, TA responsibilities, rotations, comprehensive

examination and research requirements are the same as for any other graduate student. Dual degree students will be encouraged to complete research rotations during the summer semesters of their two years of medical curriculum so that a dissertation research project can be initiated immediately upon entering the Ph.D. program. Typically, clinical requirements for the M.D. will be completed after fulfillment of the requirements for the Ph.D.

Degree Requirements

All students in the program are supported by a stipend (currently \$25,000 per year) plus tuition costs and basic medical insurance.

Laboratory Rotations

All new graduate students admitted into the MPT Graduate program are required to complete three laboratory rotations starting in the Fall semester and concluding in mid-January before the Spring semester begins. Students will meet with the Director of Graduate Studies prior to each rotation to determine the appropriate laboratory and rotation advisor. Laboratory rotations expose graduate students to research activities within the Program and to the experimental laboratory environment in which they will evolve. Prior to finishing the third laboratory rotation the graduate student selects a mentor based on mutual agreement between the student and the mentor. Once the mentor has been selected, the student will perform his or her doctoral research under the guidance of the mentor in his/her laboratory.

Laboratory Rotation Schedule

The MPT Graduate Student Laboratory Rotation Program represents a vehicle to introduce the research laboratory to incoming students and to stimulate a direct interaction between students, faculty and other program personnel. The program is designed to expose students as quickly as possible to research activities within the Program and to the experimental laboratory environment in which they will evolve.

Laboratory rotations will approximately adhere to the following schedule*:

- Summer Research Experience** Start of Summer semester (usually 1st Monday June 4th) - July 27th
- 1st Rotation August 20th September 28th
- · 2nd Rotation October 1st November 9th
- 3rd Rotation November 12th January 11th (this allows limited time off for holidays and final exams)

*These dates will change from year to year depending on the start date of the Fall semester and will be set by the Director of Graduate Studies

**With permission of Director of Graduate Studies, Executive Committee, and Department Chairs

Students who wish to enter the program early at the beginning of the summer semester preceding their first academic semester may do so, if financial resources are available.** However, this will be considered a "summer research experience" with one of the faculty members but not an official rotation. This summer research experience should begin no earlier than June 1 and no later than the first day of the Summer semester, and should end on August 15th. This student will still be required to perform three rotations with different faculty advisors, starting in the fall. The student would then be able to select one of those advisors including the "summer research experience" advisor as his or her doctoral advisor. Students engaging in the "summer research experience" will register for 4 credit hrs. of MICROB 9085 Problems (Rotations) for the

summer semester and will need to be on campus by the beginning of the MU summer semester (usually first Monday in June).

Required Courses for Graduate Students in Program

- Fall semester, 1st year (all required):
 - MICROB 7303 Fundamental Virology (2 credit hrs.)
 - MICROB 7304 Immunology (3 credit hrs.)
 - MICROB 7404 Foundations in Bacteriology and Pathogenesis (3 credit hrs.)
 - MICROB 8050 Graduate Student Survival Skills (1 credit hr.)
- Three of the following courses (only one of these may be an approved elective)
 - MICROB 9404 Advanced Bacterial Pathogenesis (4 credit hrs.; offered Spring of odd years only)
 - MICROB 9407 Advanced Immunology (4 credit hrs.; offered Spring semesters of even years only)
 - MICROB 9432 Molecular Biology II (4 credit hrs.; offered every Spring semester)
 - MICROB 9449 Infection and Immunity (4 credit hrs.; offered every Fall semester)
 - MICROB 9001 Topics in Microbiology (4 credit hrs.; every other Spring semester of odd years offering as Advanced Virology)
- Approved 8/9000 current literature-based elective (3-4 credit hrs.) 8000/9000-level electives: The DGS and the Curriculum Committee must approve these courses. They should also be approved by the student's doctoral committee (examples of courses still needing approval are given below):
 - V_PBIO 8436 Pathogenic Mechanisms in Veterinary Pathobiology (3 hours)
 - BIO_SC 8320 Developmental Genetics (3 hours)
 - BIO_SC 8440 Integrative Neuroscience I (3 hours)
 - BIO_SC 8442 Integrative Neuroscience II (3 hours)
 - MPP 9426 Transmembrane Signaling (4 hours)
 - MPP 9435 Molecular Exercise Biology (3 hours)
- V_PBIO 8641 Introduction to Research Ethics (1 credit hr.; every Spring semester)
- MICROB 9087 Seminar in Microbiology (required to take this 4 times: 2nd-5th years) (1 credit hr.; every Spring semester)
- MICROB 9403 Advanced Medical Microbiology (credit for teaching) (2 credit hrs.; every semester)

Other duties

- Act as a teaching assistant (TA) in MICROB 2800 or MICROB 3200 for two semesters (to be completed during the first two years, but not during the Fall semester of the first year).
- Attend Program seminars (any invited speakers and student seminars) on Wednesdays at 1:15 pm usually in Monsanto Auditorium in the Bond LSC; attendance will be taken; enroll in MICROB 9087 Seminar in Microbiology for 1 credit hr. in the Spring semesters of years 2-5. You will need to give a seminar during those years; course grade will be determined by attendance and your presentation.
- English-Language Proficiency Requirements for International Students

Any graduate student who completed primary and secondary education (equivalent of K-12 in the U.S.) in a country where

English is not the primary language is required by the state of Missouri law to be assessed for English language proficiency. The Speaking Proficiency English Assessment Kit (SPEAK) test is conducted through the Office of Graduate Studies. International graduate students must receive a level 2 or higher on their language assessment to meet the requirements to TA. If they receive a score below 2 additional courses may be recommended for the student to increase their language skills before their English language is reassessed.

ONITA training is offered during the week preceding the Fall and Spring semester. The training is required for all new international graduate students before the first semester of teaching or assisting with teaching at MU.

Credit Hour Requirements:

The Graduate School requires 72 hours of advanced study to be completed for the Ph.D. degree. A minimum of 15 hours of 8000-9000 level course work, not including MICROB 9085 Problems in Microbiology and MICROB 9090 Research in Microbiology. A maximum of four hours of MICROB 9087 Seminar in Microbiology can count toward this requirement.

Full-time Student Enrollment

Graduate student full-time enrollment statues pre-comprehensive exam:

• 9 credit hours for fall and spring, 4 credit hours for summer.

Graduate student full-time enrollment statues post-comprehensive exam:

• 2 credit hours for fall and spring, 1 credit hour for summer.

Requirements for Qualifying and Comprehensive Exam

Each student will be required to master two phases of the curriculum, qualifying and advanced, designed to achieve the educational objectives described above. The MPT Graduate Program Curriculum Committee makes decisions regarding additions or changes to the basic curriculum. Due to the changing environment in this field of research, the MPT Graduate Program curriculum may be subject to change.

Qualifying Phase

A required basic series of courses are designed to establish a foundation in bacteriology and pathogenesis (MICROB 7404), virology (MICROB 7303), and immunology (MICROB 7304).

Advanced Phase

It is expected that combinations of advanced courses in molecular biology of eukaryotes (MICROB 9432), immunology (MICROB 9407), virology MICROB 9001), infection and immunity (MICROB 9449), and bacterial pathogenesis (MICROB 9404) will comprise the core curriculum, although alternative courses may be prescribed by the MPT Curriculum Committee and by Doctoral committees based upon individual student needs. Satisfactory performance is defined as a grade of B or above in these 8000/9000 level courses. Unsatisfactory performance(s) must be corrected according to the recommendations of the Graduate Student Advisory Committee. Such recommendations may include retaking the course(s), additional examinations, or dismissal from the Graduate Program.

Goals and Purpose of Qualifying and Comprehensive Exams Qualifying Exam

The goal of this exam is to determine whether the student is qualified to enroll in advanced graduate courses as well as intellectually prepared to perform research in this program. Passage of the four fundamental required courses implemented in Fall 2013 will constitute passage of the qualifying exam. The guidelines for this process are covered in greater detail in Section VI of our MPT Graduate Student Handbook (https://medicine.missouri.edu/sites/default/files/MPT_GRADUATE_HANDBOOK_20141.pdf).

Comprehension Exam

The purpose of the comprehensive exam is to certify that the student has sufficient scientific knowledge (from the course work) and research insight to advance to candidacy for the Ph.D. This knowledge and insight are examined in this program through the student writing and orally defending an NIH-style research grant proposal. This examination will be administered at the end of the fall semester of the third year. The guidelines for this process are covered in greater detail in Section VII of the MPT Graduate Student Handbook (https://medicine.missouri.edu/sites/default/files/MPT_GRADUATE_HANDBOOK_20141.pdf). (https://medicine.missouri.edu/file/mpt_graduate_handbook_20141-1-pdf)

PhD Dissertation Guidelines

The final educational requirement for the Ph.D. degree is the written and oral presentation of a novel and creative piece of scholarly research that represents new information and significantly advances knowledge in that field of research. The dissertation project must be approved by the student's doctoral committee and should demonstrate the student's scientific maturity and ability to write in a scholarly fashion. At the completion of the dissertation research, the student will present his/her research findings in a public seminar for program faculty and personnel and will defend the project before his/her doctoral committee. The project will be detailed in a formal written thesis that conforms to Office of Graduate Studies guidelines with respect to format. Approval of the scientific content of the thesis is the responsibility of each doctoral committee and requires the signature of each committee member, with no more than one dissenting or abstaining vote. The evaluation will consider the following guidelines with respect to thesis content.

- a. Introduction The manuscript should describe pertinent background material that establishes the foundation for the overall thesis proposed as well as the specific research questions being addressed and the significance of this project with respect to the field.
- b. **Materials and Methods** The thesis should describe in detail the experimental protocols used in the study; where applicable, references to published protocols should be made, but modifications to such procedures should be defined. The methods may be presented as a component of each Results chapter, or may be combined into a single, separate chapter.
- c. Results Presentation of the data accumulated during the study that is relevant to the thesis being examined and the conclusions reached. The data should be presented in chapter format, with each chapter devoted to particular questions relative to the overall thesis. Since students are encouraged to publish their work during their graduate studies, these chapters may represent those publications (however, the student must be responsible for the writing and presentation of this work in the thesis).

d. **Discussion** – While each chapter presenting research data may contain a discussion of those specific data, the thesis should be concluded with a summary discussion that presents the student's overall conclusions about the study and the relevance of this work to the field as a whole. This summary provides the student an opportunity for knowledgeable speculation as to the significance of the work and its impact on the field.

Program of Study

The program involves satisfactory completion of a minimum of 72 hours of graduate study as well as completion of original research and a thesis, which demonstrates research competence. Of the 72 hours graduate credit, 15 hours must be in courses numbered 8000/9000 (excluding research and problems courses, but including up to 4 credit hours of seminar courses).

Admissions

Admission Contact Information

Jana Clark
Department of Molecular Microbiology and Immunology
M616 Medical Science Building
Columbia, MO 65212
573-882-3938
mmi@missouri.edu

The Molecular Pathogenesis and Therapeutics Graduate Program (MPT) is offered through the Departments of Microbiology and Immunology in the School of Medicine and Veterinary Pathobiology in the College of Veterinary Medicine. This graduate training program is designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline

Fall deadline: January 10

Admission Criteria

• Minimum TOEFL scores:

Internet-based test (iBT)	Paper-based test (PBT)
92	580
Academic International English Language Testing System (IELTS)	
6.5	

• Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
On or After August 1, 2011 (No	300	3.0
more than 5 years old)		

- Minimum GPA: 3.0
- · Bachelor's degree from an accredited college or university

 Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials

To the Office of Graduate Studies:

- All required Office of Graduate Studies (https:// gradstudies.missouri.edu/admissions) documents
- TOEFL score (if international applicant)
- 3 letters of recommendation from individuals competent to comment on the applicant's potential for graduate research and course
- · GRE scores
- Personal statement and research experience
- · Copy of TOEFL scores (if international applicant)

Research and Teaching Assistantships

Students in the doctoral program are awarded research assistantships, (currently at \$25,000). Research assistants work with faculty members to obtain practical experience in carrying out a research project through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements

To be accepted for candidacy into the MPT PhD program, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines of immunology, molecular biology and microbial pathogenesis. Under the guidance of a doctoral program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Interdisciplinary courses in biochemistry, molecular and cellular biology and genetics provide breadth and balance in the program and enhance the student's research abilities. In addition, the PhD program consists of the following:

- · Practical experience in teaching
- Successful completion of a comprehensive examination that tests the student's ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

University of Missouri Graduate School Application:

Applications should be submitted through the University (https://gradstudies.missouri.edu/admissions/eligibility-process) of Missouri, Office of Research and Graduate Studies (https://gradstudies.missouri.edu/admissions/eligibility-process). Applicants will not be registered with the University of Missouri, Office of Research and Graduate Studies until they have completed the graduate school application and paid the graduate school application fee.

Applicants who are in the United States and reviewed favorably by the Graduate Admissions Committee will be invited to visit the University of Missouri for an interview for which the program defrays expenses. This

visit provides an excellent opportunity for the prospective student to meet the faculty members, talk and interact with our current students, view the University of Missouri-Columbia and the Molecular Pathogenesis and Therapeutics Graduate Program, and experience Columbia, Missouri.

All application materials are filed alphabetically under the family name as indicated by the applicant on the International Student Application form. It is important that all supporting documents use the same name and spelling as the International Student Application so they can be quickly matched up to complete the application file.

Neuroscience

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders. For more information about the Neuroscience Program, application materials, and contact information, go to http://neuroscience.missouri.edu.

Faculty

Professor B. Bartholomew, D. Beversdorf, A. Chandrasekhar, J. Coates, D. Cornelison, N. Cowan, S. Frey, D. Geary, C. Gerhardt, K. Gillis, M. Hannink, C. Heesch, T. C. Hwang, P. Jen, M. Katz, J. Kerns, M. Kirk, C. Lorson, A. McClellan, C. McCrae, S. Nair, D. O'Brien, M. Pettris, T. Schachtman, H. Schatten, S. Shukla, J. Schul, G. Sun, G. Weisman, T. Zars, B. Zhang

Associate Professor K. Aldridge, S. Christ, K. Cummings, S. Ding, M. Garcia, Z. Gu, S. Hackley, J. Johnson, D. Kline, G. Kracke, J. Maruniak, D. Miller, L. Reneker, D. Schulz, M. Thakkar, M. Will

Assistant Professor C. Hagan, T. Lever, L. Milescu, M. Milescu, N. Nichols, I. Ozden

Assistant Research Professor C. Cirstea, R. Whiting

Associate Teaching Professor C. Kuehl-Kovarik

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees. ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in neuroscience, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

- MS in Neuroscience (p. 745)
- PhD in Neuroscience (p. 745)
- Graduate Certificate in Neuroscience (p. 745)

About the Program

One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website: https://neuroscience.missouri.edu/faculty

Career Opportunities

MU's Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study

Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details

MS in Neuroscience

Admission Criteria

Fall deadline: December 15Minimum TOEFL scores:

Graduate Certificate in Neuroscience

The purpose of this certificate is to provide formal recognition to post baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/26.1501-Gedt-Neuroscience.html

Graduate

• PhD in Nutrition Area Program (p. 746)

PhD in Nutrition Area Program

About the Program

The Nutrition Area Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and the MU Nutritional Center for Health (MUNCH).

Nutrition is, by definition, an applied and multi-disciplinary science that integrates other disciplines such as biochemistry, physiology, biology, psychology, sociology, and economics. A primary research focus in the department of Nutrition and Exercise Physiology is the role of diet in the prevention and treatment of chronic diseases that are prevalent in the United States today: obesity, the metabolic syndrome, diabetes, immune disorders, neurodegenerative diseases, and osteoporosis. Specific dietary components being studied for their role in human health

include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids, and nutraceuticals. Another important research area is the determinants of eating behavior, including neuro-psychological, sociologic, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

Degree Requirements

Required Co

AN_SCI 9442	Vitamins and Minerals	4
BIOCHM 7270	Biochemistry	3

STAT 8310	Data Analysis I	3
SOCIOL 7120	Social Statistics	3
SOCIOL 8130	Advanced Social Statistics	3

A total of 72 hours beyond the bachelor's degree, including but not limited to courses from the emphasis areas are required; courses from the Masters degree may be counted at the discretion of the student's committee. At least 15 of the 72 hours must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take suggested courses from the following emphasis areas: Human/Clinical Nutrition, Public Health Nutrition, Behavioral Science, Food Science and Biochemistry/Cell Physiology. A list of possible courses that fall within these areas can be found on the department website: http://ns.missouri.edu/graduate_phd.html .

Sample Plan of Study

Because students in the PhD program are from a wide variety of circumstances, and pursue the PhD at different paces, a sample plan of study is not easily produced. Students are encourage to work out their plan of study with their advisor.

Qualifying Process

Nutritional Sciences Program Applicants must pass a Qualifying Exam before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.

Comprehensive Examination Process

A doctoral student must successfully complete the comprehensive examination within a period of three (3) years beginning with the first semester of enrollment as a PhD student. In addition, the program for the doctoral degree must be completed within three (3) years of passing the comprehensive examination. Time spent in the armed services will not count toward the six (6)-year limit (See Graduate School Active Duty Policy). For any extension of either of these time limitations, the student must petition their faculty advisor/mentor and the academic program's director of graduate studies in writing during the semester prior to reaching the time limitation. The director of graduate studies will notify the advisor in writing of the decision. The two sections of the examination must be completed within one month. A report of this decision (pdf) (http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf), carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

Dissertation Requirements

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate's own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Nutritional Sciences (http://nep.missouri.edu/graduate_phd.html)_and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Nutritional Area Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants.

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Minimum TOEFL Scores

Internet-based test (iBT)	Paper-based test (PBT)
100	600

Minimum GRE Scores

When did you take the GRE?	Verbal	Quantitative	Analytical
Prior to August 1, 2011	500	500	3.5
On or After August 1, 2011	150	150	3.5

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

Pathobiology Area Program

College of Veterinary Medicine 201 Connaway Hall Columbia, MO 65211 573-882-6550

About the Pathobiology Area Program

The Pathobiology Area Program is university-wide and staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 716), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Associate Research Professor: M. Lorson*, A. Stoker**

Assistant Research Professor: A. Ericsson**, H. Men*, M. Shababi*

Professor Emeritus: C.A. Carson*, S. Casteel*, W. Fales*

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Director of Graduate Studies:

About the Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 716), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

Career Preparation

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today's most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad

scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisors, committee members, facilities and equipment for doctoral candidates.

A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

Facilities and Resources

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

Areas of Study

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology, DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

Admission Criteria

Fall deadline: no deadlineSpring deadline: no deadline

• Summer deadline: no deadline

· GRE scores required

• Minimum undergraduate GPA for last 60 credits: 3.0

• Designated faculty mentor

 Professional students with a DVM degree may be eligible to waive the GRE.

International applicants:

Minimum TOEFL scores:

Internet-based test (iBT) Paper-based test (PBT)
80 550

Required Application Materials

To the Graduate School:

All required Office of Graduate Studies Admissions documents

To the Pathobiology Area Program:

3 letters of recommendation GRE scores (required) Mentor letter of support

Plan of Study

Most of the student's program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student's mentor/committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements

Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology

The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, and/or biology.

Research experience at the undergraduate and/or master's level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (http://vpbio.missouri.edu/AreaProgramFaculty.html).

For additional information regarding mentorship in the Department of Pathology and Anatomical Sciences program, please contact:

Application Deadline

Fall entrance: Inquire with Director of Graduate Studies

Admission Criteria

- Admission to candidacy in the master's program is limited to those who hold at least a baccalaureate degree from an accredited college or university.
- Preference will be given to students with a college GPA of 3.5 or higher
- Minimum GRE scores:

When did you take the GRE?	Verbal + Quantitative	Analytical
Prior to August 1, 2011		N/A
On or After August 1, 2011	325	N/A

Required Application Materials to the Graduate School:

· All required Graduate School documents

Degree Completion Requirements

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Admission to candidacy in the master's program is limited to those who hold at least a baccalaureate degree from an accredited college or university.

Preference will be given to students with a college GPA of 3.5 or higher, GRE scores (verbal + analytical) over 325, and strong letters of recommendation.

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives.

Social Work/Public Health

The dual degree program in Social Work and Public Health is a combination of the MSW in Social Work and the MPH in Public Health.

Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://

publichealth.missouri.edu) (MPH) with an emphasis in Health Promotion and Policy (http://publichealth.missouri.edu/ programs_health_promo_pol.php). Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/ msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH) Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A]- 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session. Please see our sample plans of study (http://ssw.missouri.edu/msw_studyplans.html#dual).

Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. MPH students applying for the MSW program (http://ssw.missouri.edu/mswapp.html) must submit their MSW application no later than April 15th (http://ssw.missouri.edu/msw_deadlines.html#dual) of their first year of study but early application submission is encouraged. MSW students applying for the MPH program must submit their MPH application (http://publichealth.missouri.edu) by December 1st of their first year. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw/dualDegree.pdf).

The advisor for the MSW/MPH Dual Degree program participants will be a faculty member with a joint appointment in both the MSW and MPH Programs. If a faculty member with a joint appointment is not available for advising, the student will be appointed a separate advisor for both degree programs. In cases where student difficulties are experienced that require advisory services other than that available from the advisor, the School of Social Work's formal student advisory process will be followed.

Up to eight hours of transfer credit (http://ssw.missouri.edu/msw_coursecredit.html#dual) may be applied as follows: to one of the two degree programs, or divided between the two degree programs per the advisor(s) and program directors' decision. The eight hours of transfer credit will not be applied separately to each degree program.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs and will focus on the intersection of subject matter between social work and public health.

Faculty

Faculty for the Social Work/Public Health dual degree are housed in other departments.

Undergraduate

While MU does not offer undergraduate degrees specifically in social work/public health, the University does offer a dual graduate degree in the subject, as well as baccalaureate, master's and doctoral degree opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 18).

Graduate

 MSW/MPH in Social Work/Public Health with emphasis for Public Health in Health Promotion and Policy (p. 751)

The MSW/MPH in Social Work and Public Health will provide the student with solid preparation in each discipline, as well as a deeper understanding of the ways in which the two disciplines overlap through shared coursework. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care manager, health coach, patient advocate, counselor, or team leader.

Students will apply for admission separately to each program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MSW in Social Work program (https://gradstudies.missouri.edu/degreecategory/social-work), the requirements of the MPH in Public Health program (https://gradstudies.missouri.edu/degreecategory/public-health) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

- Minor in International Development (p. 763)

Certificate in Digital Global Studies

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today's highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the certificate includes two required core courses (honors eligible), two elective courses, and an experiential learning component. Below are the details on the required courses that have various crosslisted options. The core courses can be substituted with relevant courses from various disciplines.

Electives can be taken from a wide variety of courses offering a digital and/or global component. For more information: http://cdig.missouri.edu/undergraduate/.

The experiential learning component varies depending on the student's field of study and interest, but there should be an emphasis on global relations, cultural awareness, or media technology. This component could be study abroad, service learning, internship, etc. with an MU Center or an outside local, national or international organization. Volunteer work, internships and mission trips not associated with MU credit work are options also.

For additional information about the certificate, contact: Professor Monika Fischer, Certificate Director 458 Strickland Hall Columbia, MO 65211

E-mail: globalconnect@missouri.edu

Certificate in Environmental Studies

School of Natural Resources

124 Anheuser-Busch Natural Resources Bldg. (573) 882-7045

https://omd.missouri.edu/?q=env-st-cert/index

The Environmental Studies Certificate is 15 credit hours minimum of coursework focused on environmental topics. It is available to all MU majors, but because the certificate's goal is to create a complementary educational experience, it is recommended that students select coursework outside of their major.

There are two tracks for the certificate: Natural Dimensions for non-science majors and Social Dimensions for science majors. In general, students with majors in Business, Humanities, Journalism, Social or Behavioral Sciences, Mathematics, or non-science Education majors will pursue the Natural Dimensions track, while students with majors in Natural Sciences, Engineering, or science Education will purse the Social Dimensions track.

Certificate Requirements

- 6 hours of Natural or Social Dimension courses, which are listed below.
- 3 hours of ABM 2070W or NAT_R 2160
- 6 hours of upper level 2000+ environmental-focused courses. For course options, visit https://omd.missouri.edu/?q=env-st-cert/index.
- A minimum grade of C- is required for each course taken in the certificate. A minimum cumulative GPA in all certificate coursework is 2.0.

Natural Dimensions Track for Non-Science Majors (6 hours minimum)

Certificate in General Honors

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student's final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a "C" or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:

MU Honors College 211 Lowry Hall Columbia, MO 65211 phone: 573-882-3893 fax: 573-884-5700

email: umchonorscollege@missouri.edu website: http://honors.missouri.edu/contact

Minor in Entrepreneurship

The undergraduate minor in entrepreneurship is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises. It is available to students in the the College of Business (BUSI); the College of Human Environmental Sciences (HES); and the School of Journalism (JOURN).

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g. Arts and Sciences students).

The minor consists of **16 credit hours**. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses

in one of the pillars. Each of the academic units that offer the minor recommend a set of courses, which are referred to as tracks. Details on those tracks are below.

Graduate Certificate in Center for the Digital Globe

The Center for the Digital Globe graduate certificate is a 12 credit hour graduate certificate program established by the College of Business, School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) <u>OR</u> Graduate-Degree-Dependent Certificate (For students completing a graduate degree)

I. CDIG STAND-ALONE CERTIFICATE (For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplements the students' studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc. To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and

necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Stand-Alone Certificate:

Eligibility:

Prerequisite for the stand-alone certificate is a baccalaureate degree. Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDiG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDiG Graduate Certificate Program. Apply online (https://applygrad.missouri.edu/apply).

SPECIAL NOTE FOR LAW STUDENTS: No more than six non-Law credits may count toward the JD degree.

Credits required for the Stand-Alone Certificate:

At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8054). The course of work for graduate certificate students is more specifically described as:

- 1. 6 credits of graduate course work The courses taken to satisfy this requirement are those that have been approved by the Center's faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe's graduate courses web page http://cdig.missouri.edu/graduate/ for a list of approved courses that meet this requirement.
- 2. MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
- 3. JOURN 8054 Entrepreneurship and Media of the Future, 3 credits (offered Spring semester). This class will join graduate students in journalism and business with media entrepreneurs to develop business plans for real businesses that we expect will be launched at some point in the Summer and Fall of 2018 (of course, the course will finish in May, but some students may have the opportunity to continue working on these business models after the course has ended). In essence, the class will build to the semester-ending symposium organized by the Center for the Digital Globe (CDiG): the CDiG Spring Symposium on Building Business Models for the

Media of the Future (April 2018). At this CDiG Symposium, student groups and entrepreneurs will have a chance to present their plans to a panel of experts (and the audience) who will ask them tough questions about their plans. The CDiG Spring Symposium will be attended by MU students and faculty, will be open to all students and the general public, and will be watched *around the world* through the digital capabilities at RJI (Reynolds Journalism Institute). After the presentations, the judges will vote on the best student presentation. The winners (1st place, 2nd place, and 3rd place) will receive an award

 Grades - Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are MANGMT 8100 Exploring the Digital Globe and JOURN 8054 Entrepreneurship and Media of the Future. The two electives should be determined in consultation with the student's CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/certplan.pdf. The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student's approved degree program must be attached to the certificate application form when submitting it for the CDIG executive director's approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

II. CDIG GRADUATE DEGREE DEPENDENT CERTIFICATE (for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students' graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a *Change of Program Form* and be formally admitted to the certificate program. Print the *Change of Program Form* located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master's, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (MANGMT 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (JOURN 8054). The course of work for certificate students is more specifically described as:

- 1. 6 credits of graduate course work The courses taken to satisfy this requirement are those that have been approved by the Center's faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe's graduate courses page http://cdig.missouri.edu/graduate/ for a list of approved courses to meet this requirement.
- MANGMT 8100 Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare

them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

- 3. JOURN 8054 Entrepreneurship and Media of the Future, 3 credits (offered Spring semester). This class will join graduate students in journalism and business with media entrepreneurs to develop business plans for real businesses that we expect will be launched at some point in the Summer and Fall of 2018 (of course, the course will finish in May, but some students may have the opportunity to continue working on these business models after the course has ended). In essence, the class will build to the semester-ending symposium organized by the Center for the Digital Globe (CDiG): the CDiG Spring Symposium on Building Business Models for the Media of the Future (April 2018). At this CDiG Symposium, student groups and entrepreneurs will have a chance to present their plans to a panel of experts (and the audience) who will ask them tough questions about their plans. See the Center for the Digital Globe web site for further program details, including contact information, courses, affiliated faculty list, etc.: http://cdig.missouri.edu/graduate/.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/52.0208-Gedt-Center_Digital_Globe.html

Graduate Certificate in Community Processes

The Graduate Certificate in Community Processes offers graduate students and professionals a unique opportunity to develop expertise in how spatial and relational communities function in today's society: their processes for forming, for maintaining the community and for achieving community objectives. A vital part of the certificate is acquiring applied skills in community facilitation processes or community analytical processes.

For more information please contact:

Dr. Judith Stallmann 231 Gentry Hall phone: 573-882-6455

email: stallmannj@missouri.edu

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/44.0201-Gedt-Community_Processes.html

Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation Biology is an interdisciplinary science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation highery

To accomplish this goal, the program has 2 required components:

- Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http:// www.conservbio.missouri.edu/description.php) is available on the Conservation Biology website.
 - Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
 - M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
 - Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)
- Practical experience through an internship that falls outside your discipline
 - 160 hours of an internship exploring an area complementary to the student's conservation career goals

- Designed and completed under the guidance of a mentor other than your major advisor
- Results in a tangible product (e.g. paper, publication, presentation)

Graduate Certificate in Epidemiology

To allow prospective and current students to become competent in advanced aspects of epidemiological analysis such as assessing population groups and determining their priority health problems, empowering and mobilizing populations in a collaborative public health effort. Prerequisite courses: STAT 7020 and P_HLTH 7952.

Core Courses

P_HLTH 8420	Principles of Epidemiology	3
P_HLTH 8120	Applied Epidemiology in Community Assessment	3
P_HLTH 8001	Topics in Public Health (Data Analysis for Health Researchers)	3
Elective - choose one		
P_HLTH 8001	Topics in Public Health (Epidemiology of Vaccine - Preventable Diseases)	3
P_HLTH 8620	Emerging Zoonoses Diseases	3

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/26.1309-Gedt-Epidemiology.html

Graduate Certificate in Global Public Health

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience and may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health.

Required Courses:

P_HLTH 7150	Principles of Public Health	3
STAT 7020	Statistical Methods in the Health Sciences	3
P_HLTH 8420	Principles of Epidemiology	3
P_HLTH 8953	Evaluating Global Public Health Programs	3
Elective		3

For more information: mumphprogram@missouri.edu 573-884-6844

Federal Gainful Employment disclosure information for this Graduate Certificate is available at https://gradstudies.missouri.edu/fged/51.2201-Gedt-Global_Public_Health.html

Graduate Certificate in Health Ethics

The Health Ethics Certificate program is ideal for both students and working professionals such as physicians, nurses, healthcare administrators, and those serving on hospital ethics committees or considering such health ethics issues in their daily employment. The certificate program will help the learner develop an understanding of the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

The Department of Health Management and Informatics offers the Graduate Certificate in Health Ethics in partnership with the MU Center for Health Ethics. The Certificate may be completed entirely online or through articulation with residential Graduate and professional coursework. While there are multiple educational offerings that may result in certificate acquisition, students must complete a minimum of 12 credit hours from the below approved list:

Required Courses

HMI 7564	Health Ethics Theory	3
HMI 8565	Health Care Ethics	3
Elective Course Options		
HMI 7567	Health Organizational Ethics	3
HMI 7566	Health Informatics Ethics	3
HMI 8574	Health Care Law	3
HMI 8575	Health Policy and Politics	3
LAW 5615	Health Care Law: The Doctor-Patient Relationship	1-3
IN_MED 6515	Problems in Medical Ethics	5
HMI 8515	Problems in Medical Ethics and Clinical Ethics Consultation Practicum (Identical to IN_MED 6515. For non medical students.)	5

Graduate Certificate in Informatics for Public Health

The Graduate Certificate in Informatics for Public Health offers to further and meet the growing demand for professional education and development in the field of public health informatics. The certificate provides participants with basic knowledge of issues and application of informatics in areas of public health including surveillance, prevention,

preparedness, and health promotion, and competence in evaluating and discovering solutions for the current and future public health informatics challenges.

The Graduate Certificate in Informatics for Public Health is designed to serve as a stand-alone certificate program for non-degree seeking students, public health care professionals and as an additional option for Master of Science in Health Informatics students, Master of Public Health students, and other Graduate students. Courses taken for the certificate program are not intended to fulfill the requirements of any current Graduate degree at MU.

The Certificate program will launch in Fall 2018, with the first course - HMI 7431 Foundation of Public Health Informatics - offered. Please contact the HMI Department for further information about the certificate program and plan of study options.

Sample Plan of Study #1

Graduate Certificate in Life Science Innovation and Entrepreneurship

Overview

A certificate in Life Science Innovation and Entrepreneurship at the University of Missouri will broaden the training of graduate and professional students from the fields of business, engineering and medicine, among others. A collaborative program among MU's Trulaske College of Business, College of Engineering and School of Medicine, the program will prepare participants for a wider range of employment opportunities and provide core skills for entrepreneurial endeavors.

Interdisciplinary Curriculum

Through an interdisciplinary approach, the program will allow MU graduate and professional students to receive training to translate life science discoveries into products and services that will improve health. The program will require completion of three three-hour core curriculum courses designed to cover the life cycle of a translational science/ business venture, as well as elective courses for a total of 12 hours of course credit. The three-course sequence will be augmented by elective courses that round out the educational needs of particular students.

Program Objectives

- Know and understand the life sciences industry well enough to be familiar with terms, trends, issues, and industry culture in order to be able to recognize needs that may be commercially viable.
- Know and understand the three disciplines represented by the courses such that they are able to assess the commercial viability of a life sciences technological innovation.
- Know how to commercialize new life science discoveries into products and services to improve health in humans and/or animals.

Course Content

School of Medicine

- Nature of discovery
- · Protecting intellectual property
- · Reimbursement models in health care
- · Life science methods and research tools
- · Research with industry partners

College of Engineering

- · Identification of clinical needs
- · Concept screening and selection
- · Regulatory pathways and the FDA
- · Patents and intellectual property basics
- · Design and prototypes

Trulaske College of Business

- · Commercialization process
- Market assessment and competitive landscape
- Technology transfer, licensing, and startups
- · Sources of capital
- · Business plan and market strategy

Admission Requirements

The only prerequisite for the first course in the sequence will be good standing in a graduate/professional program or the consent of the instructor on a case-by-case basis.

Graduate Certificate in Society and Ecosystems - Interdisciplinary

Contact

Sandy Rikoon, Ph.D.

Coordinator Society and Ecosystems Program 200 A Gentry Hall
University of Missouri-Columbia
Columbia, MO 65211
Telephone: 573-882-0861
Email:rikoonj@missouri.edu

Goals

Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri's interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student's familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

- sustainable natural resource and environmental management and planning
- dynamic interactions between social, economic and ecological systems,
- quantitative-qualitative analysis of individual and social behavior,
- cultural interpretations of natural resource and environmental issues, and
- application of knowledge gained in the above areas to the evaluation of public policy.

Admission

Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum

Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses: a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student's first year. The primary objective of this course is to develop a student's appreciation

of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student's transcript.

Advisory Committee

The student's plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student's department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a masters student's advisory committee to be from different departments/units

Graduate Minor in Ancient Studies

Interdisciplinary Minor within the College of Arts and Science http://ancientstudies.missouri.edu/

About the Minor

The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter of the total courses from among a variety of courses designated by the participating departments.

A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

Associate Professor D. Hooley, S. Langdon, R. Marks, J. McGlew, A. Mori, L. Okamura, M. Rautman, D. Schenker, D. Trout, B. Wallach Assistant Professor N. DesRosiers, R. Foley, R. Gregory, D. Kelley Assistant Teaching Professor M. Barnes Professor Emeritus W. R. Biers, W. Bondeson, J. H. Kultge

Admissions

Ancient Studies Program Requirements

- Admission into one of the following graduate departments:
 Anthropology, Art History and Archaeology, Classical Studies,
 History, Philosophy or Religious Studies.
- Fulfillment of all the requirements of the major department. The master's degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master's level.
- 3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student's major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.
 - For the M.A. degree, a minimum of 9 hours from at least two departments.
 - b. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student's home department. These must include at least one course on the 7000-level in each of the two departments.

To the University

General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted for advisement by the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum

requirements of the Graduate School. Admission to the Graduate School is based on three considerations:

- an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MIJ.
- a grade point average of B or better in the last 60 hours of undergraduate courses, and
- · Official GRE results.

To the Ancient Studies Program

Candidates must have earned a bachelor's degree in an appropriate field; preference is usually given to students who intend to continue their work for a PhD. An application, including a completed MU Graduate School application form, transcript and GRE scores, should be made directly to the department in which the student wishes to study. It must be accompanied by three letters of recommendation concerning the student's academic ability, a copy of a recent term paper, and a short statement from the applicant that sets out professional goals and reasons for pursuing the Ancient Studies minor. Inquiries may be addressed to the directors of graduate studies at the appropriate department.

Financial Support

The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition to a stipend, University fellowships include exemption from resident and non-resident educational fees. Some individual departments also offer fellowships, scholarships and other financial assistance for graduate students, including teaching and research assistantships. For information concerning financial aid, write directly to the directors of graduate studies in the department to which you are applying. Financial aid deadlines are frequently earlier than the deadline for applications for admission.

In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.

Graduate Minor in College Teaching

Approximately 75 percent of faculty positions in the United States are at institutions where the importance of teaching and professional service is equal to or greater than the emphasis on research. The Minor in College Teaching, available to all MU graduate degree-seeking students, demonstrates your preparation as an effective teacher to potential employers.

The Minor in College Teaching (MICT) requires 9 credit hours. This includes a 3-hour core course, a teaching practicum, plus 3-6 elective hours. It is highly recommended that students enroll in ED_LPA 9456, but it is not a requirement.

Core Required Courses - students must complete one of the following:

ED_LPA 9448	College Teaching	3
AG_ED_LD 8350	College Teaching of Agriculture, Food	3
	and Natural Resources	

BIO_SC 8724	College Science Teaching	3
LTC 8724	College Science Teaching	3

Teaching Practicum

Students must complete a teaching practicum and portfolio, but do not have to officially register for a course in order to complete the requirement. Students opting to enroll in a course can choose from the options below.

Callaga Tanahing Drastiaun

Teaching Practicum - options for enrollment

AG_ED_LD 8995	College Teaching Practicum	3
ED_LPA 9481	Internship in Educational Leadership and Policy Analysis	1-99
H_D_FS 9100	Teaching Practicum	2-6
NURSE 8950	Teaching Nursing Practicum	4
PHIL 8210	Teaching of Philosophy I	1
SPC_ED 9940	Internship: College Teaching in Special Education	3
PSYCH 9910	Teaching of Psychology Practicum	1-99
Elective Courses		3-6
Teaching with Technology E	Elective Courses	
IS_LT 9467	Technology to Enhance Learning	3
IS_LT 9484	Teaching Online Courses	3
Disciplinary Teaching Election	ve Courses	
AG_ED_LD 8330	Advanced Methods of Teaching	3
AG_ED_LD 8350	College Teaching of Agriculture, Food and Natural Resources	3
AN_SCI 8725	Science Outreach: Public Understanding of Science	1-2
BIO_SC 8725	Science Outreach: Public Understanding of Science	1-2
LTC 8712	Inquiry and the Science Curriculum	3
LTC 8900	Seminar in Curriculum and Instruction	1-3
CLASS 7700	Advanced Study in the Teaching of the Classics	3
ESC_PS 7115	Human Learning	3
ESC_PS 8320	Advanced Human Learning	3
ESC_PS 8350	Cognition, Learning and Instruction	3
ED_LPA 9440	Race, Gender, and Ethnicity in Higher Education	3
ED_LPA 9442	Curriculum Philosophy and Development in Higher Education	3
ED_LPA 9447	College Student Culture and Environment	3
ED_LPA 9449	History of Higher Education in the United States	3
ED_LPA 9455	The Community College	3
ED_LPA 9456	The Professoriate	3
ED_LPA 9459	Comparative and International Education	3
IS_LT 9471	Instructional Systems Design	3
PHIL 8210	Teaching of Philosophy I	1
PHYSCS 8040	Study of Techniques of Teaching College Physics	1-3
PHYSCS 8350	Science Outreach: Public Understanding of Science	1-2

Graduate Minor in Gerontology Studies

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student's department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her advisor. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:

MU Interdisciplinary Center on Aging M245A Medical Sciences Building Columbia, MO 65212

phone: 573-884-3337 email: aging@missouri.edu

website: http://medicine2.missouri.edu/aging/education.html

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

- The student must be enrolled as a master's or PhD candidate in good standing at MU.
- A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student's advisor. A copy will be sent to the Graduate School.
- Once the student is admitted to the minor, s/he should seek
 advisement from the director and his/her advisor concerning which
 courses to take. The plan of study must be submitted to the Graduate
 School no later than the semester before graduation.
- 4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student's home department.
- Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language

- courses does not count toward the twelve hours of credit required for the minor.
- 6. When the required twelve hours of credit are completed from approved courses, the student's advisor should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student's orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.
- 7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Preapproved course options:

AAE 8430	International Agricultural Development Policy	3
ECONOM 7326	Economics of International Trade	3
ED_LPA 9459	Comparative and International Education	3
JOURN 7658	International Journalism	3
JOURN 7656	International News Media Systems	3

Honors College

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. The Honors College offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinary and experiential learning. The College fosters scholarly engagement through research opportunities, study abroad, internships, and other experiences that expand learning beyond the classroom. Students receive personalized advising through a team of professionally-trained advisors.

The Honors College gives honors students maximum flexibility to serve their individual interests. Honors courses, taught by many of the university's best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large research university.

Opportunities in the Honors College are described below.

Honors Curriculum

Honors courses offered through the Honors College include the following:

- Humanities Series. This series of historically-organized courses provides an interdisciplinary perspective on art history, literature, music, philosophy, and religion.
- Social and Behavioral Sciences Series. This series of thematicallybased courses provides an interdisciplinary perspective on the behavioral and social sciences, including cultural geography, economics, family studies, history, psychology, and sociology.
- Science Series. This series of thematically-based courses provides an interdisciplinary, hands-on laboratory approach to science for nonscience majors. It is designed to introduce students to the methods, range, and big ideas of science.
- Constitutional Democracy Series. These courses study the same texts and work through the same questions and concerns that the nation's early leaders and citizens engaged with during the years spanning from before the American Revolution through the aftermath of the War of 1812.
- Honors Discussion Groups and Seminars. These are small and informal courses typically focused on a special topic.
- Career Explorations Courses. These lower-level courses are designed to introduce students to different career choices in fields like journalism, medicine, health, nursing, and law.
- Honors Tutorials. These courses are informal discussion groups of 2-5 students and a faculty member. Tutorials focus on special topics that change from semester to semester, depending on which faculty members are offering them. They are based on the Oxfordstyle of learning, with heavy emphasis on conversation and in-depth investigation.
- Honors Independent Study Courses. These courses provide honors students with an opportunity to explore topics (typically of the

- student's choosing) with a faculty member. Credit is available for research, internships, and independent academic study.
- Honors Colloquia. These courses focus on interdisciplinary topics and typically adopt a more flexible and experimental approach to teaching.
- Honors Learning-by-Contract. This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors Learning-by-Contract, students must enter into a contractual agreement with a professor and gain approval from the director of the Honors College. Contract forms are available on our website (https://honors.missouri.edu/ courses/learning-by-contract). (https://honors.missouri.edu/courses)
- Honors Credit via Graduate Course Work. Honors students may earn credit toward the Honors Certificate by taking graduate-level classes. Graduate Course Work applications can be found on our website (https://honors.missouri.edu/courses). (https://honors.missouri.edu/ courses)
- Honors Credit via Study Abroad. Up to six hours of study abroad credit completed while a student at MU can be considered as honors credit. An application is required and it be found on our website. (https://honors.missouri.edu/courses)
- Honors Courses offered through individual departments. These include special topics courses and honors sections of regularlyoffered courses.
- Research and other independent-study types of courses, offered both through departments and the Honors College.

More information on honors courses can be found on the Honors College website. (http://honors.missouri.edu)

Special Programs and Services

Advising

The Honors College offers one-on-one academic advising for all honors students. Through its MedOpp office, it also offers specialized advising for students planning a career in medicine (allopathic medicine, osteopathic medicine, podiatry, and physician assistant), dentistry, or optometry. MedOpp advising provides students with a comprehensive program that includes a variety of services to guide students through the academic and application process necessary to become a health professional.

Honors Housing

The Honors Learning Community fosters a living and learning space that enriches intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri. Honors Freshman Interest Groups (FIGs) are available in a number of interest areas.

Honors College Admissions

Incoming Freshmen

Incoming freshmen may apply for admission and submit their application by the deadlines listed on our website. The criteria for admission are as follows:

- An ACT score of 31 (SAT 1420) AND either a top 15% class rank OR a high school Core or Enhanced Core GPA of 3.58
- An ACT score of 30 (SAT 1390) AND either a top 10% class rank OR a high school Core or Enhanced Core GPA of 3.74

 An ACT score of 29 (SAT 1350) AND either a top 5% class rank OR a high school Core or Enhanced Core GPA of 3.91

Incoming freshmen who do not meet both of the admission criteria are required to submit two essays as part of their application. Essays are evaluated on an individual basis. Specific information on the requirements for the essays can be found on the website (https://honors.missouri.edu/admission). (https://honors.missouri.edu/admission)

Transfer Students

Transfer Students are eligible to apply for admission to the Honors College if they have completed at least 12 credit hours of college credit at an accredited institution and have achieved a GPA of 3.7 or above. The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended. Students who meet these criteria must fill out an online application (https://honors.missouri.edu/admission) and submit a personal statement and proposed honors completion plan.

Current MU Students

Current students are eligible to apply for admission to the Honors College if they are an MU student who has completed at least 12 credit hours and achieved a cumulative MU GPA of 3.7 or higher. Students who meet these criteria must fill out an online application (https://honors.missouri.edu/admission) and submit a personal statement and proposed honors completion plan.

Program Requirements

Maintaining Honors Eligibility

GPA Requirement

To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students with a cumulative Mizzou GPA below 3.0 will be removed immediately.

Participation Requirement

Students are required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses and Honors Learning-by-Contract.

Honors Certificate Requirements

Students who complete 24 or more hours of courses for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 24 hours may include up to 6 hours of honors transfer credit, 6 hours of approved study abroad credit (form required), 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required). Students must achieve a minimum letter grade for each course: a C or better for regular honors classes or a B or better for Learning-by-Contract courses and Honors Credit via Graduate Course Work. Students must apply for the Honors Certificate by completing the application (https://honors.missouri.edu/graduating-with-honors/honors-certificate-application). (https://honors.missouri.edu/graduating-with-honors) In order to participate in the Honors Convocation, students must apply no later

than the end of the third week of classes in their final semester. For more information, see the Application for Graduation with the Honors Certificate (https://honors.missouri.edu/graduating-with-honors/honors-certificate-application). (https://honors.missouri.edu/graduating-with-honors)

University Honors Designation

Students who complete the Honors Certificate and a qualified departmental honors program (https://honors.missouri.edu/graduating-with-honors) will be eligible for this designation, which will be noted on their permanent transcript. See your departmental advisor for information about departmental honor programs.

Faculty

There are faculty from all disciplines who teach Honors College courses.

Professional

Professional programs are advanced studies in a professional or vocational field. While they have theoretical foundations, the primary purpose is the attainment of knowledge to apply in a professional practice. Students typically begin and end these programs with a cohort, taking a sequence of required courses that prepare them for professional careers.

Professional programs included in this section are those where a professional accrediting body provides oversight of curriculum and sets standards that must be met. For these professional degree programs successful completion is required to sit for licensure and/or certification exam that enables individuals to practice in the profession.

These academic programs are primarily focused on preparation for professional practice rather than scientific inquiry and therefore do not meet the criterion for Graduate Studies of requiring an original thesis or dissertation. The programs are included in the same "career" within the myZou system and courses are numbered 5000-6999. The post-bachelorette programs of Master of Occupational Therapy and Physical Therapy Doctorate are professional degrees are included in this section.

School of Law

203 Hulston Hall Columbia,MO 65211-4190 phone:573-882-6042 fax: 573-882-4984

Welcome to the University of Missouri School of Law's online catalog for the 2018-2019 academic year.

Information in this searchable, interactive catalog is current as of May 2018. The next catalog will be made available in May 2019. In the interim, changes to the law school curriculum will be made on our website (http://law.missouri.edu).

Use the search box above or click on the left hand menus to navigate through the catalog. There is also a PDF version available through the "Print Options" link above.

Broken links inside the law school's online catalog may be reported by contacting umclawweb@missouri.edu. (umclawweb@missouri.edu)

The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

Administration

- · Lyrissa Lidsky, Dean, Judge C.A. Leedy Professor of Law
- S. David Mitchell, Associate Dean for Academic Affairs and Associate Professor of Law
- Paul Litton, Associate Dean for Faculty Research and Development and R.B. Price Professor of Law
- Elisabeth E. Key, Assistant Dean for Career Development and Student Services
- Randy J. Diamond, Director of Library and Technology Resources and Professor of Legal Research
- Rafael Gely, Director of the Center for the Study of Dispute Resolution and James E. Campbell Missouri Endowed Professor of Law
- Dennis D. Crouch, Co-Director of the Center for Intellectual Property
 Entrepreneurship and Associate Professor of Law
- James Levin, Associate Director of the Center for the Study of Dispute Resolution, Co-Director of the Center for Intellectual Property & Entrepreneurship and Adjunct Professor of Law
- Alisha L. Rychnovsky, Manager of Business Administration
- · Casey Baker, Director of External Relations
- Michelle L. Heck. Director of Admissions and Financial Aid
- Joseph Swanegan, Assistant Executive Director of Advancement

Mission Statement

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the

field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

Academics

Known worldwide for its Center for the Study of Dispute Resolution, the School of Law's curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school's curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

Juris Doctor (JD)

Overview

The Juris Doctor (J.D.), or "law degree," is a three-year post-baccalaureate program. Students must complete 89 credit hours of law courses, roughly one-half of which are required courses.

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

- 1. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than 12 residency credits may be obtained in summer sessions.
- Has received a passing grade in all required courses, except required courses, which have been waived.
- Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and
- Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester's residency credit.]

Curriculum

Required Courses

First Year		
LAW 5010	Civil Procedure I	3
LAW 5015	Civil Procedure II	2
LAW 5020	Contracts I	3
LAW 5025	Contracts II	3
LAW 5035	Criminal Law	4
LAW 5050	Property	5
LAW 5070	Torts	5
LAW 5080	Legal Research and Writing	2
LAW 5085	Advocacy and Research	2
LAW 5090	Legal Reasoning (if assigned)	1
LAW 5095	Lawyering: Problem Solving and Dispute Resolution	2
Second Year		
LAW 5220	Constitutional Law	4
LAW 5260	Evidence	4
Second or Third Year		
LAW 5240	Criminal Procedure	3
LAW 5280	Professional Responsibility	3

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

- Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.
- 2. A "rigorous writing experience" means an experience that culminates in an individually authored paper of at least 20 pages (doublespaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.
- Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a "rigorous writing experience" in the individual case:
 - a. completion of any course designated as a writing course,
 - b. completion of a writing section attached to a traditional course,
 - c. completion of an independent research project under L5875 Research, or
 - d. membership on one of the journals of the University of Missouri School of Law.
- 4. A "designated writing course" is one in which all students complete a rigorous writing experience as defined in section (2) above and in which, in lieu of a final examination, a substantial portion of the final grade for the course is based on that writing.
- In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student's record.
- As stated in the Student Handbook, "[g]rading is done anonymously in all classes where it is possible." With the exception of Independent Research, if grading is to be done other than anonymously, the syllabus shall so state.

Professional Perspectives Requirement

- As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.
- 2. As law students at MU, you have a similar requirement.
- You MUST complete a certain number of Professional Perspective hours each year to be eligible to graduate from this law school.
- 4. Professional Perspective's hours are designed to further your legal knowledge by presenting you with information about current legal events from current practitioners, including judges, and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement.
- Matters counting for Professional Perspectives credit are broken into two categories:
 - a. <u>Professional Perspectives</u> are those programs that give students a new or different prospective on the law or its practice.
 - <u>Career Component</u> credits are those programs that give students information about career planning and placement.
 - Any program approved for credit will designate the category applicable to that program.
- Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend within the guidelines set out below.

- Many programs sponsored by the School of Law <u>automatically</u> qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.
- Programs sponsored by student or other groups <u>may</u> qualify for Professional Perspectives credit, but ONLY if an application for credit is filed **2 full business days** in advance of the event with the Associate Dean for Academic Affairs. Application forms are available in the Dean's Office.
- Every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.
- 10. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one's own or another's attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event
- 11. The Professional Perspectives requirement for each class of students is as follows:
 - a. For First Year Law Students:
 - i 1 Professional Perspective program in the fall semester;
 - ii 1 Career Component program in the fall semester;
 - iii 1 Professional Perspective program in the spring semester;
 - iv 1 Career Component program in the spring semester;
 - b. For Second and Third Year Law Students:
 - i 2 Programs each semester;
 - ii At least two of the programs during the year MUST be for general Professional Perspectives credit;
 - iii At least one program during the year MUST be for the Career Component credit.

Certificates & Emphasis

JD Certificates

- Graduate Certificate in Dispute Resolution (p. 771)
- Graduate Certificate in Electronic, Commercial and Intellectual Property Law (p. 772)
- Graduate Certificate in Taxation (p. 772)

JD Emphases

- Emphasis in Criminal Justice (p. 772)
- Emphasis in Tax Law (p. 772)

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in "real-life" situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in a variety of different areas: criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law, entrepreneurship, veterans' disability law, and the wrongly convicted. Additional details are available from the School of Law at http://law.missouri.edu/skills/.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged

in pro bono work. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/externships.html.

Graduate Certificate in Dispute Resolution

MU Certificate in Dispute Resolution

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today's lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation's leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today's legal environment.

Requirements

Students Graduating in 2016 or 2017

Students who enrolled at the law school for the first time <u>before</u> the Fall of 2015, can complete the Certificate in Dispute Resolution from the MU School of Law, by taking at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Students Graduating in 2018 or thereafter

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 12 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2 additional elective courses from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at http://www.law.missouri.edu/academics/certificates/resolution.html.

Federal Gainful Employment disclosure information for this Graduate Certificate is available at http://gradschool.missouri.edu/academics/programs/dispute-resolution-graduate-certificate/dispute-resolution-ge/Gedt.html

Graduate Certificate in Electronic, Commercial and Intellectual Property Law

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School (p. 768).

Graduate Certificate in Taxation

This certificate program is not currently offered. A variety of other certificates, concentrations and dual-degree programs are offered at the Law School. Information available at Additional Academic Programs (p. 772).

Juris Doctor with Emphasis in Criminal Justice

Criminal Justice Concentration

The Criminal Justice Concentration is designed for two groups of students: those who are considering beginning their legal careers as prosecutors or criminal defense counsel and those who may not have an express interest in criminal practice, but who are nonetheless seeking a course of study structured to provide training in the range of skills necessary to the practice of law in most substantive areas – particularly including legal analysis, factual investigation, counseling, negotiation and the persuasive arts employed in written and oral advocacy.

Additional details and a list of courses satisfying the Criminal Justice Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/criminal.html).

Juris Doctor with Emphasis in Tax Law

Tax Law Concentration

The Tax Law Concentration is designed to provide basic education in both general skills and subject-matter specific knowledge, and provide each participating student with an opportunity to bring the entire skill set to bear in a capstone experience designed to teach integrated legal problem-solving. Completion of a concentration should improve the overall preparedness of graduates by conferring entry-level competence to begin practicing law with appropriate supervision in the concentration's subject matter area or practice setting.

Additional details and a list of courses satisfying the Tax Law Concentration requirements are available from the School of Law here (http://www.law.missouri.edu/academics/certificates/tax.html).

Master of Laws (LLM)

The Master of Laws degrees are offered through a joint effort of the Office of Graduate Studies and the School of Law. For detailed information on these programs, consult the Dispute Resolution (p. 722) or American Law (p. 712) pages.

Additional Academic Programs - Law

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

Certificates

· Center for the Digital Globe (p. 772)

Dual/Concurrent Degrees

- Business Administration (Masters) (p. 772)
- Economics (Masters) (p. 772)
- Educational Leadership & Policy Analysis (Masters) (p. 773)
- Health Administration (Masters) (p. 773)
- Human Development & Family Studies (Masters) (p. 773)
- Journalism (Masters) (p. 773)
- Journalism (Doctorate) (p. 773)
- Library & Information Science (Masters) (p. 773)
- Public Affairs (Masters) (p. 773)

Certificates:

Center for the Digital Globe (Certificate)

The Center for the Digital Globe (http://cdig.missouri.edu) (CDiG), established by the College of Business, School of Journalism, School of Law, and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers an interdepartmental certificate to graduate students of the University of Missouri-Columbia. The certificate program supplements the students' graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization.

Dual/Concurrent Degrees: Business Administration (Masters)

Students completing the Law and Business course of study will be eligible to receive the JD degree from the School of Law and the MBA degree from the School of Business. This course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MBA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mba-business.shtml.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-economics.shtml.

Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education's Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-educational.shtml.

Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mha-health-admin.shtml.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master's degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both an MA degree in journalism and a J.D. degree in law. This program is especially suitable for students interested in enhancing their competencies, qualifications, and career options through the successful completion of two complementary professional programs. Although an MA degree in journalism normally requires two years of study, and a J.D. requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml.

Journalism (Doctorate)

The University of Missouri-Columbia School of Journalism and School of Law offer an integrated program for students seeking both a Ph.D. degree in journalism and a J.D. degree in law. Students should consider this program if they are interested in teaching or in senior-level practice or policy work in either of these fields, nationally or internationally. Although

a Ph.D. degree in journalism normally requires three years of study, and a J.D. requires three, students may be able to complete the full program in as few as five years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/phd-journalism.shtml.

Library & Information Science (Masters)

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mls-library.shtml.

Public Affairs (Masters)

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml.

School of Medicine

The MD degree is achieved after a four-year course of study. Please visit the School of Medicine website for information about the admissions process: http://medicine.missouri.edu/admissions/

The curriculum at the University of Missouri School of Medicine emphasizes clinical reasoning, self-directed learning, collaborative learning and early clinical experiences. It integrates the basic sciences and clinical reasoning. In years 1 and 2, emphasis is placed on small group learning with some lectures. Courses are not department or discipline based.

During the third year, seven core clerkships are required in family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, psychiatry, and surgery. It is during these core clerkships that students learn the fundamentals of good patient care, and faculty assess that students are competent upon completion of the clerkship. These clinical experiences must be under the supervision of Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. All students may take up to three core clerkships developed and approved by School of Medicine departments through the University of Missouri School of Medicine Rural Track Clerkship program.

During the fourth year, students must successfully pass a minimum of 30 weeks of elective rotations to meet graduation requirements including two four-week advanced clinical selectives, four four-week general electives, one two-week general elective and one four-week Advanced Biomedical Sciences course. A minimum of four courses must be taken under the supervision of Columbia-based School of Medicine faculty as follows:

Students must take one of the two required clinical selectives under the supervision of University of Missouri School of Medicine faculty or community faculty appointed through the School of Medicine. One of the required selectives must be a surgical selective, and one must be a medical selective. Certain clinical experiences, such as the Indian Health Service and designated rural community electives/selectives, are considered under the supervision of University of Missouri School of Medicine faculty and meet the requirement for one of the two clinical selectives. Many students will have completed the two-week elective requirement during the third year, coupled with the psychiatry clerkship. Students may have completed one of the four-week general elective requirements if they took the neurology clerkship during the third year.

General electives may be taken at sites approved by the department, the advisor and the Medical Education office. Students wishing to take courses at another medical school must comply with all application policies required by the host school.

All fourth-year medical students may apply to take rural electives (Bryant Scholars are required to complete one rural elective). Students wishing to take rural electives must be accepted through MU AHEC and be in good academic standing as determined by the Medical Education office.

One School, Two Campuses: The University of Missouri School of Medicine is comprised of two clinical campuses, Springfield and Columbia. Students will be assigned to either the Springfield clinical campus or the Columbia clinical campus for their third and fourth years. A lottery is held to determine assignments for the Springfield and Columbia clinical campuses. Preferences for location will be taken into consideration. Once the campus assignment is established, all of the clerkships will be completed on that campus. Electives and selectives may be taken on either campus and will be under the direction of

University of Missouri School of Medicine faculty. Electives, selectives and advanced biomedical sciences courses at the Springfield campus are considered equal to those in Columbia. Students may participate in the Rural Track program regardless of campus assignment.

For more information about the School of Medicine, call (573) 882-9219. http://medicine.missouri.edu

Patient Based Learning

First and Second Years

Years one and two consist of four nine-week blocks. Each block has two components: basic science/patient-based Learning (BSci/PBL) and introduction to patient care (IPC).

BSci/PBL

In this component, students work through one authentic clinical case each week in small groups with a faculty facilitator. The facilitator is not a content expert, but rather guides the group as they work through the case seeking a diagnosis and patient care plan. BSci/PBL cases guide learning and the application of basic science concepts in clinical scenarios. A few basic lectures and laboratory experiences teach concepts that supplement the cases. BSci/PBL features about ten hours of patient-based learning with about ten hours of traditional teaching such as lectures each week.

IPC

Themes change with each block and focus on clinical skills, including history taking and physical examination, psychosocial issues and increasing the students' understanding of epidemiology, diagnostic tests and psychopathology. The primary learning strategies also emphasize small-group learning with supporting lectures and laboratory experiences.

ACE (Ambulatory Care Experience)

ACE is required during blocks two through four of the first year and is elective during the second year. During the ACE experience, each student spends a half-day twice a month with a role-model faculty or community physician-preceptor.

Advanced Physical Diagnosis (APD)

APD is required during the second year. Students are assigned to a clinician mentor for the entire academic year. Times and frequency of meetings are at the discretion of the faculty member and the students; however, it is recommended that they meet at least twice each month. The emphasis of this APD experience is on history and physical exam skills and clinical reasoning. Successful completion of APD is required for advancing to the core clerkships.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all four years; addressing topics related to professional formation.

Independent Learning

Two half days each week are protected time for independent or studentdirected learning; no faculty-initiated activities may be scheduled.

M1 - Blocks 1, 2, 3, 4

MED_ID 5041	Structure and Function of the Human Body I	6
MED_ID 5042	Interviewing	3

MED_ID 5043	Structure and Function of the Human Body II	6
MED_ID 5044	Physical Examination	3
MED_ID 5045	Structure and Function of the Human Body III	6
MED_ID 5046	Psychosocial Aspects of Medicine	3
MED_ID 5047	Structure and Functions of the Human Body IV	6
MED_ID 5048	Clinical Epidemiology and Preventive Medicine	3
MED_ID 5051	Ambulatory Clinical Experience I	1

M2 - Blocks 5, 6, 7, 8

MED_ID 5551	Pathophysiology I	6
MED_ID 5552	Diagnostic Tests and Medical Decisions	3
MED_ID 5553	Pathophysiology II	6
MED_ID 5554	Psychopathology and Behavioral Medicine	3
MED_ID 5555	Pathophysiology III	6
MED_ID 5556	Clinical Practicum	3
MED_ID 5557	Pathophysiology IV	6
MED_ID 5558	Physician as a Person	3
MED_ID 5561	Advanced Physical Diagnosis I	1

Clerkships

Year three includes seven clerkships in family medicine, internal medicine, neurology, obstetrics and gynecology, pediatrics, psychiatry, and surgery. The neurology clerkship is four weeks long, the psychiatry clerkship is six weeks, and all others are eight weeks. Six of the seven core clerkships are required to be taken in the third year with one clerkship being deferred to the fourth year. During these core clerkships, students learn the fundamentals of good patient care, and faculty assesses student competencies. Clerkships must be supervised by Columbia-based School of Medicine faculty or community faculty appointed through the School of Medicine. Students may take up to three clerkships at designated community sites as part of the MU Rural Track Clerkship Program (http://www.muahec.missouri.edu/rural-track.php).

Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Family and Community Medicine Clerkship - F_C_MD 6001

Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices, and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, or nursing home settings, and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

Internal Medicine Clerkship - IN_MED 6002

Students spend eight weeks on the internal medicine inpatient service at University Hospital and Harry S. Truman Veterans Hospital, where they learn to care for adult patients with acute and chronic illnesses. Teaching emphasizes the principles of differential diagnosis and problem solving, as well as the integration of basic science information into the

art of patient care. Students also gain clinical experience in medical interviewing and physical examination.

Obstetrics/Gynecology Clerkship - OB_GYN 6004

Students rotate on the obstetric service, the gynecology service, and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.

Neurology Clerkship - NEUROL 6003

Students see patients with neurological disorders in the outpatient clinics, in hospital settings, and on consultation services.

Psychiatry Clerkship - PSCHTY 6005

Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings, and on consultation services.

Surgery Clerkship - SURGRY 6006

Emphasis is placed on the diagnosis and treatment of disorders requiring surgical intervention. Each student has a faculty mentor-advisor, attends faculty discussion sessions that cover objectives in the required textbooks, and takes call under the supervision of surgical residents. Students are assigned patients from all surgical specialties, participate in pre-operative examinations and evaluations, assist during surgical procedures, and follow the post-operative management process.

Patient-Centered Care Objective Structured Clinical Evaluation (PCC-OSCE)

A PCC-OSCE will be administered at the end of the third year to assess students' ability to provide patient-centered care. Successful completion is required for graduation.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small-group course. Faculty-facilitated small-group sessions occur throughout all four years, addressing topics related to professional formation.

Electives

The fourth year consists of two one-month advanced clinical selectives (sub-internships) in the core disciplines, four one-month general electives, one two-week general elective, and a one-month advanced biomedical science (ABS) course. One of the advanced selectives must be in a surgical area and one must be in a medical area. A minimum of four courses (including one advanced selective) must be taken under the supervision of Columbia-based School of Medicine faculty. Many students will have completed the two-week elective requirement during the third year, coupled with the psychiatry clerkship. Students may have completed one of the four-week general elective requirements if they took the neurology clerkship during the third year.

The fourth year consists of two groups of advanced selectives and general electives.

Advanced Clinical Selectives

Two advanced clinical selectives from the core disciplines of child health, family medicine, internal medicine, neurology, obstetrics and gynecology, psychiatry and surgery are required. Each selective is four weeks long. One must be in a surgical area and one must be in a medical area. Advanced clinical selectives build on the knowledge and skills acquired

during third-year core clerkships. Students are expected to assume more responsibility for patient care than in the core blocks.

Advanced Biomedical Sciences Selectives

The advanced biomedical science selectives revisit the biomedical sciences in the context of a patient, disease, diagnosis or problem. Four options are available. Students may:

- Search and analyze literature, integrate and evaluate data, produce a paper or presentation
- Conduct original research with mentors from the basic or clinical sciences.
- Attend a series of graduate-level lectures and discussions of current literature
- Function as co-tutors for PBL, attend tutor preparation sessions and write a PBL case

General Electives

Eighteen weeks of general electives are required. Off-site experiences are available but must be approved by the appropriate department.

For more information on fourth year course offerings, please refer to the **Clinical Rotation Catalog**. This catalog contains descriptions of all clinical rotations offered at the University of Missouri - Columbia School of Medicine, as well as information concerning enrollment for rotations.

Contemplating Medicine Patients, Self and Society (COMPASS)

This is a longitudinal small group course. Faculty facilitated small group sessions occur throughout all four years; addressing topics related to professional formation. Fourth year students complete a required COMPASS capstone assignment.

USMLE

The United States Medical Licensing Examination (USMLE) (http://www.usmle.org) is a three-step examination for medical licensure in the United States and is sponsored by the National Board of Medical Examiners® (NBME) (http://www.nbme.org) and the Federation of State Medical Boards (FSMB) (http://www.fsmb.org) . The USMLE assesses a physician's ability to apply knowledge, concepts, and principles, and to demonstrate fundamental patient-centered skills that are important in health and disease and that constitute the basis of safe and effective patient care.

All medical students are required to take Step 1 at the end of the second year of medical school and must pass it prior to beginning the fourth year.

All medical students are also required to pass Step 2 Clinical Knowledge (CK) and Step 2 Clinical Skills (CS) prior to graduation.

Step 3 is typically taken after the first year of residency.

Occupational Therapy

Department of Occupational Therapy School of Health Professions 801B Clark Hall Columbia, Missouri 65211 (573) 882-3988

Advising Contact

MUOT@health.missouri.edu

Scholarship Information Contact

https://healthprofessions.missouri.edu/student-services/scholarships/

Occupational therapists are skilled health professionals who provide services to individuals across the lifespan to maximize their independence in meaningful everyday activities. Occupational therapists use research, scientific evidence, and a holistic perspective to incorporate an individual's valued occupations into the intervention process.

The mission of the Department of Occupational Therapy is to improve the health and well-being of society by assisting people to optimize their participation in everyday life occupations.

We achieve this mission through the integration of our:

- Professional education of clinically innovative occupational therapists prepared to meet the dynamic occupational needs of people and communities across the lifespan;
- Steadfast commitment to service to our community and our profession;
- · Evidence-based practice; and
- Commitment to scholarship, discovery and clinical research to advance our profession.

To become a registered occupational therapist, an entry-level master's degree is required.

All applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.

The Accreditation Council for Occupational Therapy Education (ACOTE) has mandated that the entry-level degree will move to the doctoral (OTD) level by 2027. The Department of Occupational Therapy is working with campus and state officials to plan for the transition to an OTD degree program. An exact date for the transition has not been approved.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, (301) 652-2682.

Faculty

Assistant Clinical Professor T. Bolton*, W. Henderson*, W. Janes**, G. Pifer*

Associate Clinical Professor L. Lowery**
Associate Professor T. Wolf**
Associate Teaching Professor C. Gateley**
Distinguished Professor W. Dunn**

- * Graduate Faculty Member membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Occupational Therapy (MOT)

Department of Occupational Therapy School of Health Professions 801B Clark Hall, Columbia, MO 65211 (573) 882-3988; FAX (573) 884-2610 https://healthprofessions.missouri.edu/occupational-therapy/

The department will offer a 2-year post-baccalaureate entry professional program accepting applications July-January with coursework beginning

the following Summer. Applicants will need to have a bachelor's degree by the start of the Summer semester that they would begin coursework.

Professional courses are only offered to students enrolled in the program.

Professional courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements. Contact the Department of Occupational Therapy for more information regarding the degree.

Curriculum

https://healthprofessions.missouri.edu/occupational-therapy/degree-program/mot-curriculum/

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at https:// healthprofessions.missouri.edu/student-services/scholarships/ for scholarship information.

Curriculum

Requirements for Masters Degree in Occupational Therapy

The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. Prospective students will apply for entry into the program during their final year of undergraduate coursework or after they have completed a baccalaureate degree. However, in either case a baccalaureate degree must be completed prior to beginning coursework during the following summer semester. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.

- 20 hours of observation with a licensed Occupational Therapist
- · Completion of all required application materials
- Acceptance to program: The Department of Occupational Therapy admits a cohort of 44 students each year.

Required Application Materials

- Go to https://healthprofessions.missouri.edu/occupational-therapy/ about/admissions/ for departmental application forms (available July -Jan. 15)
- All applications will be submitted through the Occupational Therapy Centralized Application System (OTCAS (https://otcas.liaisoncas.com/applicant-ux/#/login))
- Observation Forms and supplemental fee

Physical Therapy

K. Gibson, Chair Department of Physical Therapy School of Health Professions 801 Clark Hall (573) 882-7103

Fax: (573) 884-8369

https://healthprofessions.missouri.edu/physical-therapy/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master's degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in preprofessional physical therapy upon completing one year of coursework in the physical therapy program.

Physical Therapy (DPT)

Physical Therapy Doctoral Degree Program School of Health Professions 801 Clark Hall 573-882-7103

573-884-8369 (fax)

073-004-0309 (lax)

https://healthprofessions.missouri.edu/physical-therapy/

Students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships during the professional phase of the program. Check the program website or ask the program contact for availability and details.

Curriculum

Degree Requirements

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program. Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.

Prerequisites for the Doctoral Degree

Note: The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor's degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

Regular admission applicants must have at least a 3.0 GPA in the core required courses and the cumulative GPA in the last 60+ credit hours.

Students who enter without a bachelor's degree must have satisfied general education and graduation requirements, including two Writing Intensive courses. These applicants must have at least a 3.5 cumulative GPA at the time of application.

On-campus interviews are required for admission to the professional program.

Applicants are notified of the selection committee's decision by December.

All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

Plan of Study

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years (including summer sessions), beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Graduates are eligible for licensure anywhere in the United States.

Admission Contact Information Beverly Denbigh School of Health Professions 801 Clark Hall 573-882-7103 573-884-8369 (fax)

Application and Admission Information

All applicants will apply to the Graduate Studies online admission process. Graduate School applications must be submitted and complete by September 30th.

The departmental application will be completed during the on-line admission process.

Students who are admitted without a degree will receive a bachelor's degree upon completion of the first year of the program.

Admission Criteria

Fall deadline: N/A

Summer deadline: September 30Minimum TOEFL scores:

Internet-based test (iBT) Area	iBT Score	Paper-based test (PBT) Area	PBT Score
Reading	17	Reading	52
Listening	17	Listening	52
Speaking	17	Speaking	N/A
Writing	17	Writing	17
TOTAL	80	TOTAL	550

• Minimum IELTS scores:

Item	Score
Reading	6
Listening	6
Speaking	6
Writing	6
Total Score	6.5

Minimum GPA: 3.0

Required Application Materials

To Graduate Studies:

- All required Office of Graduate Studies documents/application fee
- Departmental application/application fee
- 2 letters of recommendation as specified by the application instructions
- Curriculum Vitae (résumé) as specified by the application instructions
- Unofficial transcripts (year of application, summer grades must be recorded on transcript)
- GRE scores must be sent to MU, Institution Code R6875

College of Veterinary Medicine

The college was established in 1946. It offers a four-year professional program leading to the Doctor of Veterinary Medicine (DVM) degree. Applicants (http://cvm.missouri.edu/prospective-students) generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements

The Pre-Veterinary Medical Scholars and AgScholars programs (http://cvm.missouri.edu/prospective-students/early-acceptance-programs) provide early assurance of admission to the MU College of Veterinary Medicine upon satisfactory completion of undergraduate and program requirements. Students work with advisers in the college, and they observe veterinarians at work as part of the program. Students with a minimum ACT score of 30 or an equivalent SAT score are eligible to apply for the Pre-Vet Scholars Program. The required minimum ACT score for the AgScholars Program is 27 and applicants must have demonstrated experience in livestock production and health. Once at Mizzou, scholars must meet program minimum standards, including maintaining a 3.3 cumulative GPA. For more information, call the College of Veterinary Medicine at 573-884-3341.

In addition to the professional program, on-line biomedical science courses (http://biomedonline.missouri.edu/online-programs-for-graduate-veterinary-technicians-in-veterinary-biomedical-technology) available to undergraduate and graduate students are listed in this catalog. These can be used to fulfill the requirements of a Certificate in Biomedical Science, for a licensed veterinary technician to complete a baccalaureate degree or to earn a master's degree in biomedical sciences.

The college also provides diagnostic and patient care services for animals. The CVM has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. The college also offers post-graduate training to interns, residents in various specialties (http://www.vms.missouri.edu) and graduate students (http://cvmresearch.missouri.edu).

For more information about the College of Veterinary Medicine, call (573) 882-3768. http://cvm.missouri.edu

DVM in Veterinary Medicine

Overview

The DVM degree is achieved after a four-year course of study. Applicants generally have a B.S. or B.A. degree but can be admitted after completing prerequisite course requirements. http://cvm.missouri.edu/prospective-students/

At the University of Missouri, the first two years are largely spent in classrooms and laboratories with the second two years devoted primarily to clinical study in the Veterinary Health Center.

The curriculum at the MU College of Veterinary Medicine is designed to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs and with the background necessary for careers in regulatory medicine.

In the first two years, all students follow the same schedule, and courses must be successfully completed in sequence. In the final two years of the professional program, the student must successfully complete the required and elective clinical rotations to fulfill graduation requirements.

To receive the DVM degree, students must pass all courses. In addition to passing examinations, attendance and participation in all lectures, laboratories and clinical exercises is required. The doctor or veterinary medicine degree is awarded after successful completion of the professional program.

Curriculum

Objectives and Summary of the Professional Curriculum

The primary objective of the CVM curriculum is to provide students with the knowledge and technical skills necessary to be competent entry level veterinarians. We prepare our students for general veterinary practice, for entry into graduate or specialty training programs, or for careers in regulatory medicine. The overall objective of the first two years of the curriculum is to provide students with a solid foundation in

basic biomedical sciences. The courses in the preclinical professional curriculum include anatomy, physiology, cell and molecular biology, pathology, pharmacology, microbiology, virology, and toxicology. The fundamentals of the clinical disciplines are also taught during this time and include anesthesiology, clinical pathology, radiology, public health, medicine and surgery.

The organizational scheme of the professional curriculum differs from that of other schools in that the first two academic years are divided into eight-week instructional periods and our academic year runs from August through June. The students have a summer break between the first and second years and second and third years of instruction that is approximately seven weeks in duration. The overall objective of the clinical curriculum is to solidify basic knowledge and practice clinical skills in the VMTH, VMDL, and external preceptorships. This portion of the curriculum is organized into 12 clinical blocks that begin in October of the third year of professional instruction. These clinical blocks are six to eight weeks in duration and may be divided into 1, 2, or 3 clinical courses. The required clinical rotations are listed below and organized by duration:

Required Clinical Rotations

Full Block Rotations: Food Animal Medicine and Surgery; Equine Medicine and Surgery; Small Animal Community Practice and Shelter Medicine; Diagnostic Pathology and Special Species Medicine.

Third Block Rotations: Theriogenology; Ophthalmology; Small Animal Internal Medicine; Small Animal Emergency and Critical Care; Oncology; Soft Tissue Surgery; Orthopedic Surgery; Neurology and Neurosurgery

Half Block Rotations: Clinical Radiology; Clinical Anesthesia

Note that students are required to complete four credit hours (four weeks) of external evaluated preceptorships as part of the required curriculum. Students also select 10 credit hours of elective rotations (cardiology, nutrition, production medicine, special imaging, etc.). In addition to required and elective blocks, students are allotted two blocks as "free time." Most students utilize their free time to study for licensing examinations, complete preceptorships at practices, or interview with prospective employers. A total of 166 semester credit hours are required for graduation. Most students accumulate a higher number of credit hours as a result of enrollments in extra didactic or clinical elective courses.

VM-1 Required Courses (Instructional Periods 1-4)

Instructional Periods 1	and 2; August - December	
V_BSCI 5500	Veterinary Anatomy with Laboratory	4
V_BSCI 5502	Veterinary Microscopic Anatomy with Laboratory	3
V_BSCI 5504	Veterinary Physiology	5

Preceptorships

Missouri students are encouraged to use free blocks as preceptorships to increase exposure to veterinary practice and to meet the requirements of the Missouri Veterinary Medical Practice Act. The University of Missouri College of Veterinary Medicine does not have the authority to approve the use of student free block time or the veterinarians with whom they gain experience.

Available preceptorships may be found by contacting the Office for Student Affairs.

Preceptorship requirements and forms required by the Missouri State Veterinary Medical Board can be found at their website: http://pr.mo.gov/veterinarian.asp

The level of supervision required by preceptors is detailed at: http://pr.mo.gov/boards/veterinary/VetSupervisionChart.pdf

The Missouri State Veterinary Medical Board preceptorship form may be found at: http://pr.mo.gov/veterinarian-application-forms.asp

Licensing Examination Professional Licensing Information

In addition successfully completing a professional veterinary education, most states require state and national licensing examinations to meet requirements to practice. Please visit the National Board of Veterinary Medical Examiners (NBVME (http://www.nbvme.org)) and the American Association of Veterinary State Boards (AAVSB (http://www.aavsb.org)) websites for further information.

About MU

Our mission

As the only state-supported member of the Association of American Universities, Mizzou provides Missourians the benefits of a world-class education. MU's unique physical infrastructure and scholarly environment stimulate teaching, research, service and economic development on behalf of all citizens. Students work side by side with some of the world's best faculty to advance arts, humanities, sciences and professions. Scholarship and teaching are driven by a sense of public service and an obligation to produce and disseminate knowledge that improves the quality of life in the state, the nation and the world.

Mizzou, Missouri's Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students take advantage of various experiences in classrooms, residence hall learning communities, collaborative research opportunities and creative projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across a broad range of disciplines.

We improve the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our intellectual resources to improve the civic, economic and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Accreditation

The University of Missouri is accredited by the Higher Learning Commission. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

Important Facts

History

Founded in 1839, the University of Missouri was established in Columbia as the first public university west of the Mississippi River and the first in Thomas Jefferson's Louisiana Purchase territory. In 1870, the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually, that mission has expanded to include research, service and outreach enabling the state's citizens to benefit directly from the knowledge gained through university research. As Missouri's flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, in which students with shared academic interests live in the same residence hall and attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

- The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief, including the six Ionic Columns adorning Francis Quadrangle, the Memorial Union Tower honoring fallen soldiers and the MU Student Center completed in 2010.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden.
 The garden features more than 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers

consistently rank Columbia among the top cities in the nation for its excellent quality of life.

Alumni

With more than 317,000 living alumni, Mizzou's influence spans the globe. Notable graduates include Grammy Award-winning musician Sheryl Crow, Academy Award-winning actor Chris Cooper, Emmy Award-winning actor Jon Hamm, Peabody Award-winning journalist Jim Lehrer and Cy Young Award-winning pitcher Max Scherzer. Mizzou alumni succeed after graduation: 90.4 percent of MU graduates find successful career outcomes including employment, continued education and military service.

Notifications

All statements in this catalog are announcements of present policies only, and are subject to change without notice. They are not to be regarded as offers to contract. If you have questions or note errors or omissions, please contact the Office of the University Registrar (http:// registrar.missouri.edu). Below is additional information for items on which the University is required to make available.

Accommodations for Students with **Disabilities**

Bruce McKinney, President, Mizzou Alumni Association

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail disabilityservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at http://disabilityservices.missouri.edu. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

Complaint Resolution

The University of Missouri desires to resolve student grievances, complaints and concerns in an efficient, fair and amicable manner. For details on procedures to file a complaint, please refer to the section on Complaint Resolution at http://financialaid.missouri.edu/consumerinformation-disclosures/index.php.

Equity in Athletics Disclosure Act

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

Family Education Rights and Privacy Act (FERPA)

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student's name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to http://registrar.missouri.edu/ policies/ferpa.php.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See http:// registrar.missouri.edu/registration-adddrop/additional-authorizedaccess.php for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954. "Parent" means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities

for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan Vice Chancellor for Research ORAU Councilor for University of Missouri Monnie E. Champion ORAU Corporate Secretary (865-576-3306); or Visit the ORAU Home Page (http://www.orau.org)

State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that "all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET)." All MU undergraduate engineering bachelor's-level programs are so accredited. Applicants who receive advanced degrees in MU's engineering programs but who do not have a bachelor's degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor's degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

Veteran Access, Choice and Accountability Act of 2014, Section 702

The University is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state

tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

These new requirements will ensure that our Nation's recently discharged Veterans, and their eligible family members, will not have to bear the cost of out-of-state charges while using their well-deserved education benefits.

The following individuals shall be charged the in-state/in-district rate, or otherwise considered a resident, for tuition purposes:

- A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in the State of Missouri while attending a school located in the State of Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge from a period of active duty service of 90 days or more.
- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. §
 3319) who lives in the State of Missouri while attending a school
 located in the State of Missouri (regardless of his/her formal State
 of residence) and enrolls in the school within three years of the
 transferor's discharge from a period of active duty service of 90 days
 or more.
- A spouse or child using benefits under the Marine Gunnery Sergeant
 John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in
 the State of Missouri while attending a school located in the State of
 Missouri (regardless of his/her formal State of residence) and enrolls
 in the school within three years of the Service member's death in
 the line of duty following a period of active duty service of 90 days or
 more.
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

A Statement of Values

The University of Missouri, as the state's major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust. Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

Respect

Respect for one's self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

Responsibility

A sense of responsibility requires careful reflection on one's moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

Discovery

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.

Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other's successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

Undergraduate Academic Assessment Goals

All undergraduate students are required to participate in the University's processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students' undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University's learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student's chosen major fields of study. Toward that end, in addition to having every bachelor's degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.

MU graduates will be able to:

- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.

MU graduates will be able to:

• Communicate information to a variety of audiences and purposes.

- · Revise and edit their presentations to improve clarity and accuracy.
- · Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.

MU graduates will be able to:

- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- · Work collaboratively with others where appropriate.

Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.

MU graduates will be able to:

- · Engage in life-long learning.
- · Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

University General Education Assessment

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.

Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- · Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- · Faculty-developed exit examinations
- · Exit interviews University

University Organization

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two, 16-week semesters (fall and spring) and one, 8-week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

Academic Programs and Degree Structure

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.

Academic Policies

The academic rules and regulations of the University of Missouri are published online in the *Collected Rules and Regulations of the University of Missouri* and the *MU Faculty Council Academic Regulations* (http://facultycouncil.missouri.edu/handbook/intro.html). The following are selected policies and procedures. Many are summarized as a guide for students. Students needing additional information on academic regulations in specific colleges and schools may obtain this information from their deans' offices.

If a policy is only applicable to certain students and not all students, this is indicated with one of the following codes. Else the policy is applicable to all University of Missouri students.

- (G) policy applicable to Graduate students only
- (L) policy applicable to Law students only
- (U) policy applicable to Undergraduate students only
- (V) policy applicable to Veterinary Medicine students only

Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean's excuse or official absence. (See Satisfactory Academic Progress Policy for Financial Aid Eligibility (http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php)).

However, a student who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student's grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the Collected Rules and Regulations, Section 200.010, Standard of Conduct (http://www.umsystem.edu/ums/rules/ collected_rules/programs/ch200/200.010_standard_of_conduct), and Section 200.020, Rules of Procedures in Student Conduct Matters (http://www.umsystem.edu/ums/rules/collected_rules/programs/ ch200/200.020_rules_of_procedures_in_student_conduct_matters) for more specific details. (The Collected Rules are available on the University of Missouri System web site.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for investigation.

Academic Progress (G)

Measuring Graduate Student Progress Annual Requirement: Review of Graduate Student Progress

Since 2006, the Graduate School has required that all graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/research/creative achievements. Faculty mentors (advisors) are required to review their advisees' annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also reviews the students' annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

Graduate Student Progress System (gsps.missouri.edu)

The Graduate Student Progress System (GSPS) is a web-based reporting system where students document their progress toward degree completion. All graduate students (i.e., in all disciplines) are required to submit an annual progress report by starting/updating a GSPS record. Faculty members use the GSPS to review students' annual reports, assess their progress and provide feedback to the students.

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs.

Additional information on measuring graduate student progress is at http://gradschool.missouri.edu/policies/satisfactory-progress.php.

Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty advisor or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student's work toward a graduate degree.

For additional information on satisfactory progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of this policy manual (click here to go to that section), or go to the web page version of the catalog, found at http://gradschool.missouri.edu/academics/progress/probation-termination.php.

Extension and Appeals of Satisfactory Progress Infractions

The progress of each graduate student is evaluated annually by the student's advisor and/or director of graduate studies (DGS). The definition of "satisfactory progress" and procedures for its verification may vary among departments/programs. If a department/program has instituted timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this fact should be documented in written form and endorsed by the student's advisor and DGS.

Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the Graduate Policy Manual under Master's Degrees and Doctoral Degrees. They must submit required forms on time and maintain a grade point average of 3.0 or better. Furthermore, they must successfully undergo their departments' annual review processes.

Part-time students should file a timeline for successful degree completion with their departments and the Graduate School. This timeline should be endorsed by the director of graduate studies and a prospective advisor by the end of the first calendar year of admission into the department/ program. When these timelines conflict with time to degree guidelines laid out in the Graduate Policy Manual's sections on master's and doctoral degrees, they must receive the endorsement of the dean of the Graduate School.

Distinction Between Requests for Extension and Appeals

A "Request for an Extension" and an "Appeal" are distinct processes for dealing with problems related to "satisfactory progress." A "Request for Extension" is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The "Appeal Process" should be followed when a department/program has dismissed a student after the required probationary period.

Academic Progress (L)

Annual Review of Students' Progress (Applicable to LLM Students)

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of "satisfactory progress" in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements

for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve "satisfactory progress," students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program's appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php) can be found in the Graduate School Catalog on its web site.

Academic Renewal (U)

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

Eligibility

To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri-Columbia.
- · Students must either:

- be admitted as degree-seeking and have earned a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months; OR
- have attended as a non-degree-seeking student and have earned thereby a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months and subsequently have been admitted as degreeseeking by the University.

Conditions

Academic renewal is based on the following conditions:

- All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements.
 Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student's academic record.
- Renewal may be applied only to academic terms completed prior to the student's extended absence.
- · Students may be granted only one academic renewal.
- Students who choose academic renewal must meet the degree requirements of the University of Missouri undergraduate catalog at the time of their readmission.
- Degree requirements met during the dropped terms must be repeated.
- To be eligible for a degree, students must complete a minimum of 24 credits at the University of Missouri after the granting of academic renewal.

Procedures

- Students should discuss their desire to pursue academic renewal with an academic advisor in the college they wish to enter.
- Students should submit an application for academic renewal (http:// registrar.missouri.edu/policies-procedures/academic-renewal.php) to the Office of the University Registrar.
- For each term approved for academic renewal, a note will appear on the transcript.

Questions may be directed to the Office of the University Registrar, 125 Jesse Hall, (573) 882-7881.

Academic Standing

Academic performance is represented by academic standing, according to the *Faculty Handbook* (http://facultycouncil.missouri.edu/handbook), of which there are three levels: regular, academic probation, and ineligible to enroll. For the purposes of this policy, "term" may refer to a semester or summer term.

Regular Academic Standing

Students whose term and cumulative GPAs are 2.0 or higher are in regular academic standing.

Probation

Students in regular standing whose term GPA subsequently falls below 2.0, but is 1.0 or above are placed on probation. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in the *Faculty Handbook*, Article II, Admissions, Advanced Standing, and Classification will enter on scholastic probation and will have one semester in which to remove probation.

Ineligible to enroll

Students whose term GPA falls below 1.0 are ineligible to re-enroll. Students on probation must establish a 2.0 cumulative GPA within two successive terms of enrollment; otherwise they are ineligible to enroll.

In the application of the foregoing rules, the dean or faculty committee of the division concerned will determine how an incomplete grade in a course will be considered in determining a student's academic standing. A student who has been ineligible to enroll for a period of one year may be readmitted only upon the approval of the dean of the school or college in which the student desires to enroll. If a readmitted student again becomes ineligible to enroll, his or her ineligibility is normally considered permanent. These regulations are the prescribed minimal standards but do not limit the authority of the faculty of any school or college to adopt and enforce additional regulations affecting students enrolled therein.

Advanced Standing - Credit by Exam (U)

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at https://admissions.missouri.edu/apply-freshmen/college-credits/ The programs described below are used to award credit.

Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students' programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

You are eligible to earn CLEP credit if you have fewer than 90 hours of college credit. Credit can be applied only to a course in your program of study. In most cases, your scaled score must be higher than 50 to earn credit. Exceptions are noted below.

Credit is accepted by most individual schools and colleges but might not be considered by your specific degree program.

Visit the CLEP website (https://clep.collegeboard.org/about/score) to learn how to send your scores to Mizzou.

Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

MATH 1100	College Algebra	3
MATH 1140	Trigonometry	2
MATH 1160	Precalculus Mathematics	5
MATH 1360	Geometric Concepts	3
MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
Total Credits		23

To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services. (Also see the College of Arts and Science information on departmental exams (p. 138).)

International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See mathplacement.missouri.edu for more details)

Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

Application for Degree

Students should contact their academic unit *at least* a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does *not*

automatically anticipate or calculate who will be degree candidates each term.

Attendance (L)

Policies & Rules — Attendance

Law schools approved by the American Bar Association must adopt, publish and adhere to a written policy requiring regular class attendance. The rules below implement this requirement at MU, and were adopted by the faculty on January 23, 2015:

- 1. Class Attendance
 - a. Attendance is expected, in accordance with the ABA standards.
 - Administration of the attendance policy lies with the individual instructor for each course.
 - c. The individual instructor determines the number and nature of absences from each course for an excess of which sanctions may be imposed, as well as the sanctions which will be imposed, up to and including dismissal from the course.
 - d. If the instructor intends to attach a formal sanction (grade reduction or dismissal from the course) to inadequate attendance, he/she must announce to the class in writing at the beginning of the course what the rules governing attendance in that course will be, with appropriate provision for notice to late enrollers.
 - e. A student who is in danger of accumulating excessive absences must be given notice by the instructor in advance of the absence which will give rise to a significant sanction (major grade reduction or dismissal from the class).
- 2. Appeals
 - a. A student who is dropped from a course for excessive absences may meet with the Associate Dean for Academic Affairs and request reversal of the decision. A student may seek the assistance of the Student Bar Association in support of the request.
 - b. A final decision on the appeal rests in the discretion of the Dean.

Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

- Hearers receive no credit toward a degree and an H grade appears
 on the transcript. The credit received when auditing a course does
 not count toward your verification of full, half or less than half time
 enrollment status. This credit is not reported to the National Student
 Clearinghouse for enrollment verifications.
- Students pay standard fees (http://cashiers.missouri.edu) for the course(s).
- Students may not change their registration status (hearer vs. credit) after two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session.
- Check the academic calendar (http://registrar.missouri.edu/academiccalendar) for deadlines.
- Students who want to change their grading basis must go to the
 academic advising office before two weeks following the first day of
 classes in regular session or equivalent thereof in a shorter session.

- Students who fail to meet class requirements may be dropped from the course by their academic advising unit upon request of their instructor and with the dean's stamp.
- Normally, a hearer will attend the course on a regular basis; either the department or an individual instructor will stipulate the requirements for enrollment in a course as a hearer.

Catalog Editions (Which catalog applies to whom?)

These policies concern the application of the University of Missouri's graduation, divisional and departmental degree requirements. MU students' academic requirements for graduation are typically met as follows:

University general education and other University-wide policies:

- Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
- This policy applies to newly admitted freshmen as well as transfer students
- Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

- Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
- Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique "grandfathering" policies that apply to changes in their programs and that supersede this policy. Students should consult with an advisor in all cases.

Class Cancellation Guidelines

Refer to the the MU Faculty Council on University Policy regarding class cancellation guidelines (http://facultycouncil.missouri.edu/handbook/class-cancellation).

Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the "+" or "-" sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

The faculty of the division concerned will determine how the grade of
I in a course and a grade in a repeated course will be considered in
determining a student's academic standing. However, for financial aid
purposes the grade of I is not considered a completed course and a
repeated course will be counted as additional credits attempted.

 The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student's eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students' satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Computer Policies (L)

Acceptable Use Policy

- Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.
- Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
- Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
- MU is committed to privacy and will not routinely inspect the contents of your computer files.
- MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU's Acceptable Use Policy (http://www.umsystem.edu/ums/rules/collected_rules/facilities/ch110/110.005_acceptable_use_policy).

Law School Computer Lab Polices

- Limited Access to the Law School Computer Lab In order to
 use the computer lab you must be a current MU law student. Access
 to the computer lab is a privilege and is not transferable to non-law
 students. You may not let your family use the lab for any purpose.
- Computer Availability and Priority of Use Computers in back of the lab are available during regular library service hours on a firstcome, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
- Copyright and Licensing Restrictions The user is responsible
 for observing all copyright laws. The software and documentation
 made available in the lab is for use only in the lab and is not to be
 duplicated for use elsewhere. Duplicating a copyrighted program or
 documentation is illegal and is an Honor Code violation. Any use of
 computer-assisted legal research databases (Westlaw and Lexis) is
 for academic purposes only. Terms of use are governed by individual
 subscriber agreements for each system.
- Assumption of the Risk The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.

- Data Storage Users may not store their files on the hard drives of the individual workstations or on the law school's network. Users may not save their personal settings on individual workstations.
- Reporting Equipment Problems Report any PC or printer
 problem, such as paper jams, toner replacement, backed-up print
 jobs, etc. to the User Support Analyst, student lab assistant, or
 reference office. Do not attempt to fix any lab equipment on your own.
 Lab supplies (paper reams, toner etc.) are to be handled by staff only.
- Food, Drink and Tobacco are not allowed in the lab.
- Lab Phones and Help Desk Lab phones are for staff use only.
 Public telephones are available in the student area of the subplaza.

Failure to observe lab policies and directions from library staff regarding proper lab use may result in restriction or revocation of computer access, or in termination, academic probation, or prosecution under federal or state law.

Course Changes (V)

Any changes in course enrollments and/or number and dates of course offerings shall be initiated by the course coordinator and the appropriate chairman in consultation with the Associate Dean for Academic Affairs. (CVM Executive Committee, 1986)

Course Repeat Policy

The course repeat policy will not be applied automatically to a student's GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form (http://registrar.missouri.edu/policies-procedures/course-repeat.php) to the University Registrar's Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a "C-", "D+", "D", "D-", "F" or "WF", the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student's GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit from that course.

Students are strongly encouraged to visit with an advisor to determine whether re-enrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should be aware that repeating a course may have an impact on financial aid,

insurance, entrance to professional schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of "I".

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

Course-Load Rules (L)

The maximum number of hours permitted for a semester is 17, and seven for a summer session, unless the Associate Dean for Academic Affairs for good cause approves a heavier load. The minimum number of hours permitted for a semester in order to be considered a full-time student is 12. There is no minimum for the summer session.

Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of six hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed at "primary degree program-Law" with the University, you will be charged the same per credit hour rate for ANY non-law courses that applies to law courses (NOT the

undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

- These credits are taken on an Satisfactory/Unsatisfactory (S/U) basis.
 In addition, non-law courses are subject to the following regulations:
 - a. The course must be at the graduate level (numbered 7000-9999).
 - b. The course must be related to the student's study and future practice of law.
 - c. The semester hours of the non-law course will be counted in the student's total number for the semester, and the student may not (without permission) take any more than a combined total of sixteen hours in a regular semester, or seven in a Summer Session.
 - d. Students wishing to take a non-law course for law credit MUST request approval of the course in writing prior to enrolling in the course. The request should be given to the Associate Dean for Academic Affairs and include the following (using a form available in Room 203):
 - i Course name, number and instructor;
 - ii Statement of purpose for taking the course as related to (b) above.
 - iii Syllabus
 - e. Requests for the approval of below 7000-Level non-law courses within the guidelines given above must be referred to the Standards and Readmissions Committee. The Associate Dean for Academic Affairs may approve 7000-9999 level courses.
 - f. For purposes of calculating GPA, non-law course are treated as S/U courses.
- 2. Any petition for law school credit for non-law courses beyond a cumulative maximum total of six hours, shall be initially presented to the Associate Dean for Academic Affairs. If the student's request is declined, the student may then petition the Standards and Readmissions Committee. If the Committee declines the student's request, the student can petition the faculty.

Deficient Academic Performance (V)

Mid-course/rotation grade warnings must be issued to students if they are not achieving at least a "C" grade average. The notice should be copied to the Associate Dean for Academic Affairs.

A student who receives a grade of "F" in any required or elective course of the professional curriculum will be dismissed.

No more than 9 total semester credit hours of "D" grades may be accumulated prior to graduation. Greater than 9 semester credit hours of "D" grades will result in dismissal from the CVM. If readmitted, any subsequent "D" grades will again result in dismissal from the CVM.

NOTE: These regulations were adopted by faculty action August 4, 1983. They are subject to change by faculty action. *Revised in 1988, 2002, 2009, 2011 and 2012.*

Degrees, Diplomas and Certificates

The process for awarding Degrees, Diplomas and Certificates at the University of Missouri is governed by the Faculty Council. For a full listing

of this process please see *Article IX of the Faculty Handbook* (http://facultycouncil.missouri.edu/handbook/article-9.html).

Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of a disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised to contact the Associate Dean for Academic Affairs as soon as possible regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean for Academic Affairs as soon as possible. Early identification of disabilities is necessary to allow adequate time for an evaluation, to review supporting documentation and to coordinate required accommodations. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

Accommodation Process

To accommodate students with disabilities, the School of Law worked with the University's Disability Center to arrange the following accommodation process:

- A student who believes he/she has a disability that requires any accommodation should notify the Associate Dean for Academic Affairs.
- The Associate Dean for Academic Affairs will then refer that student to the Disability Center (http://disabilitycenter.missouri.edu), located at S5 Memorial Union.
- The Director of the Disability Center or a representative will meet with the student, request medical records and other information from the student. Please note that the Disability Center must first receive all necessary medical documentation from the student.
- The Disability Center will then decide what accommodations are necessary and appropriate to provide, if any, in light of the student's medical information and the student's course schedule, exams, and/ or graded exercises.
- The student will then forward the Disability Center's accommodation recommendations to the Associate Dean for Academic Affairs and to the Law School Registrar.
- The Associate Dean for Academic Affairs and the Registrar will work with the student to provide the accommodations that the Disability Center recommends.
- Any problems that arise should be brought to the attention of the Associate Dean for Academic Affairs and/or the Disability Center.

Academic Dismissal and Readmission

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought

to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean for Academic Affairs who will forward the request to the Law School's Standards and Readmissions Committee, which acts on the requests. For further information on the readmission process, please refer to the Policies and Honor Code section on School of Law website under Dismissal and Probation (http://catalog.missouri.edu/academicpolicies/dismissalandprobationl).

Bar Examination

Law students with disabilities who believe they will require accommodations in taking the bar examination (http://law.missouri.edu/current/examination) should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the Career Development Office or on the School of Law website. Many state boards of bar examiners will request that the law school provide information on accommodations provided during law school upon a written release from the student.

Career Services

The Career Development and Student Services Office provides assistance to all students and does not discriminate on the basis of disability. Students who believe that an employer working through Career Development and Student Services has discriminated on the basis of disability should bring their concerns to the attention of the Assistant Dean for Career Development and Student Services.

Grievances

If a student who requests accommodations from the School of Law believes that he/she has been discriminated against on the basis of his/her disability, the student should bring this matter to the attention of the Associate Dean for Academic Affairs, who will work the Disability Center to attempt to resolve the matter. The Associate Dean for Academic Affairs will communicate the decision to the student. If the student is dissatisfied with the decision, the student may file a grievance with the ADA Coordinator (http://ada.missouri.edu/complaints.php). Grievances filed with the ADA Coordinator must be in writing and must be filed within two weeks of the date the Associate Dean for Academic Affairs communicated the decision to the student.

Confidentiality

Information related to a student's disability is treated as confidential information under applicable federal, state and university laws.

Dismissal

A dean may at any time, and following such procedures as are reasonable, dismiss a student from a class or from a school or college for failure to perform academic duties.

In addition, the director of the Student Health Center (http://studenthealth.missouri.edu) has the authority to exclude a student from classes and other University exercises and activities because of exposure to a communicable or contagious disease, or to require a student to withdraw from the University at any time if the student has a medical

condition constituting a hazard to themselves, other students or the campus community.

Adapted from the Faculty Handbook. (http://facultycouncil.missouri.edu/handbook/article-3)

Dismissal and Probation (L)

A. Rules for Dismissal and Probation

- For purposes of this section (Policies & Rules Dismissal and Probation)
 - a. "First year" consists of that series of semesters or summer sessions, or both, at the end of which a student first receives grades in courses aggregating to not fewer than 31 hours.
 - "Semester" means either the fall or spring semester. The summer session is considered to be part of the next succeeding semester for the purpose of computing semester grade point averages.
- 2. A student is dismissed:
 - a. at the end of the student's
 - i first semester if the student's cumulative grade point average is equal to or less than 76.399; or
 - ii second semester if the student's semester grade point average is equal to or less than 76.399
 - iii first year if the student's cumulative grade point average is equal to or less than 76.399; or
 - at the end of any semester after the student's first year if the student's semester grade point average is equal to or less than 76.399; or
 - at the end of any semester during which the student has been on probation if the student's semester grade point average is equal to or less than 77.499; or
 - d. at the end of any semester during which the student has been on probation if the student's semester grade point average is
 - i not sufficient to raise his or her cumulative grade point average to an average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied; or
 - ii is less than the semester or cumulative grade point average which was imposed upon the student as a condition of probation or readmission;
 - e. at the end of any semester prior to the completion of the student's
 - i the student has received grades in at least two sessions; and
 - ii has received grades in at least 12 hours of coursework; and
 - iii has a cumulative grade point average of equal to or less than 76.399:
 - f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.
- 3. A student is placed or continued on probation:
 - a. at the end of the student's first year if the student's cumulative grade point average is greater than 76.399 but equal to or less than 77.499; or
 - at the end of any semester after the student's first year, if the student's semester grade point average is greater than 76.399 but equal to or less than 77.499; or

- c. a student who is on probation will remain on probation if the student's cumulative grade point average is equal to or less than 77.499, but the semester grade point average is sufficient to raise his or her cumulative grade point average to a cumulative grade point average greater than 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied.
- 4. Any first-year student who does not achieve a grade point average greater than 77.499 in the fall semester will be required to take the Legal Reasoning course during the second semester. Students who are required to take Legal Reasoning under this provision will drop one of their courses. The course to be dropped will be decided in consultation with the Associate Dean for Academic Affairs.
- A student ceases to be on probation at the end of a semester when the student's cumulative grade point average and semester grade point average are both greater than 77.499.
- 6. After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative grade point average is greater than 76.399. Thereafter, a student is in good standing when both the student's current semester and overall grade point average are greater than 77.499.

B. Rights of Students Petitioning for Readmission

Students who petition the Law School for readmission following academic dismissal have the following rights:

- 1. To be given fair notice of the time and place of the meeting.
- To submit any supporting written material to the Standards and Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
- To appear personally at the meeting and make a presentation of reasonable duration.
- 4. To be accompanied by a person of their own choosing.
- To be informed promptly following the meeting of the Committee's recommendation or decision, or the Faculty's decision.

C. Readmission Procedures

- 1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2 a 1
 - a. A student dismissed at the end of the student's first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. The student will be required to meet with the Standards and Readmissions Committee to evaluate his or her past academic performance. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student's dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Standards and Readmissions Committee may require readmitted students or students on probation to drop one or more of their courses.
 - b. A student dismissed at the end of the student's first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring

- semester. Such student may not attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show that the applicant's poor academic performance was the result of factors other than intellectual inability to perform satisfactory law school work and that these factors will not continue to impair the applicant's performance in the future. If the Standards and Readmissions Committee denies readmission for the spring semester, or if the student requests readmission as of the next fall semester, the student shall be readmitted for the following fall semester subject to the same conditions described in paragraph C.1.a above, or under such conditions as the Standards and Readmissions Committee may determine. If the student is readmitted for the spring semester, the student will be subject to the dismissal rules under paragraph A.2.a.ii and A.2.a.iii above, but shall not be subject to dismissal under paragraph A.2.c or A.2.d above.
- 2. Readmission Procedures for students dismissed at any time after the first semester
 - a. A student who has been dismissed may not attend classes unless the student has filed a written petition within the time limits indicated in the letter of dismissal issued by the School of Law.
 - b. To qualify for readmission, an applicant for readmission must show: (1) that the applicant's poor academic performance was the result of factors other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant's performance in the future; and (3) that there is a reasonable probability that the applicant's grade point average can be raised to the graduation level by the time 89 credits have been accumulated.
 - c. A petition for readmission by a student who has been dismissed shall be heard by the Standards and Readmissions Committee. A quorum of the Standards and Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Standards and Readmissions Committee's decision is favorable for readmission, or is unanimous against readmission, that decision shall be final and the student shall have no right of appeal to the Faculty at large. If the Standards and Readmissions Committee's decision is unfavorable against readmission, but not unanimous, the petition shall be referred to the Faculty at large for decision.
 - d. A student who petitions for readmission has the right to appear personally before the Standards and Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)
 - e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Standards and Readmissions Committee or the Faculty.
 - f. It is the policy of the Standards and Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore,

the readmission decision will not be delayed until summer grades are received.

D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action.

- 1. They will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.
- 2. Students placed on probation at the end of the fall semester of their first year will be required to take the course in Legal Reasoning (5090) (http://www.law.missouri.edu/academics/curriculum.html#5090) during the second semester. At its discretion, the Standards and Readmissions Committee may require such students to drop one or more of their courses.
- 3. Until such time as they achieve a cumulative grade point average greater than 77.499, they must maintain a semester grade point average as set out in the readmission action. If no semester grade point average was specified, the student must maintain a semester grade point average sufficient to raise the student's grade point average to a cumulative grade point average greater than 77.499 by the time the other requirements for graduation are completed.
- 4. Their schedule of courses must be approved by the Associate Dean for Academic Affairs, and the dropping of any course during the semester must also be approved by the Associate Dean for Academic Affairs. In general, students will be required to take required courses before electives and take graded courses rather than S/U or pass-fail courses.
- 5. During any session in which they are enrolled, they will not engage in any employment for compensation or spend a substantial amount of time on extra-curricular activities without the prior written approval of the Associate Dean for Academic Affairs. "Substantial amount of time on extra-curricular activities" is interpreted by the Standards and Readmissions Committee to include participation in any internal or external competition sponsored by the Board of Advocates as well as any position of leadership on any student board or organization.
- 6. Unless exempted by the Standards and Readmissions Committee, they are not allowed to take the following courses:
 - * Externship
 - * Independent Research
 - * Courses taught outside Law School for Law School credit (e.g. graduate courses)
 - * Courses taught by adjuncts
 - * Seminars, except students classified as third-year students
 - * Participation in any Study-Abroad Programs
 - * Clinics or clinic-related courses including: Criminal Prosecution Clinic, Clinical Skills, Entrepreneurship Clinic, Family Violence Clinic, Innocence Project, Legislative Practicum, Landlord/Tenant Practicum, Mediation Clinic, Veterans Clinic

PLEASE NOTE that the Committee cannot exempt students from prohibitions regarding courses that are imposed by external sources such as Supreme Court rule or ABA accreditation requirements.

Drug and Alcohol Policy

Drug Free Schools & Community Act

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of Missouri is required to establish a drug and alcohol prevention program for its students and employees. Following is a description of the University of Missouri-Columbia's program. A biennial review of this program will be done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the University's disciplinary sanctions are consistently enforced.

A reference listing of MU resources for alcohol and other drug educational preventions efforts, counseling, and referral are listed below. Please feel free to contact any of the offices listed for more information.

Standards of conduct

University of Missouri-Columbia regulations prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs by University students and their guests and for employees on University-owned or controlled property and at University-sponsored or supervised activities.

University Discipline

Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

Legal sanctions

Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to \$20,000 to imprisonment for terms up to and including life.

Health risks

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student Center or at www.wellness.missouri.edu.

Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)

Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

Marijuana

Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

Cocaine

Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, sever depression, paranoia,

psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

Nicotine

Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

Inhalants

Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause sever breathing failure and sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

Resources

Wellness Resource Center - (Campus Alcohol and Drug Abuse Prevention Office)

Alcohol and other drug abuse prevention programs, speakers, peer educators, and referral services and research. Provides educational brochures and other printed materials and houses a large resource library of books, brochures, videos and other materials on a variety of wellness issues including alcohol and other drugs of wellness. Provides BASICS (Brief Alcohol Screening Intervention for College Students) workshops and individual assessments for students caught in violation of alcohol or drug policies or individual sessions for students who would like their alcohol or drug us evaluated.

- MUSWA (MU Student Wellness Advocates): ADAPT (Alcohol and Drug Abuse Prevention Team)/PAWS (Peers Advocating Wellness solutions) and PASS (Peers Advocating Smoke-free Solutions)
- Sober In College (SIC): SIC is for students in recovery and students who want to live a sober lifestyle. Sponsors 12 step meetings.
- GAMMA (Greeks Advocating the Mature Management of Alcohol) is composed of Greek students who are interested in issues related to responsible alcohol use.
- Active Minds: Students working to de-stigmatize mental health issues and increase help seeking skills.

Counseling Center (http://counseling.missouri.edu) 573-882-6601

This center provides individual counseling, and group counseling. **Student Health Center** (http://studenthealth.missouri.edu) 573-882-7481

This center offers medical services and individual consultation.

University Police crime prevention unit (http://www.mupolice.com/cp) 573-884-7809

This unit provides alcohol- and drug-awareness presentations as well as printed and video resources.

Dual Enrollment

Dual Enrollment for Senior Undergraduates

Beginning Fall 2012, qualified undergraduate students will be eligible to enroll in up to 12 hours of graduate credit during the last 30 hours of their undergraduate program. The eligibility requirements are listed below.

Eligibility Requirement

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

- 1. Rank in the upper half of their class.
- 2. Have a B average in the most recent 45 semester hours of credit.
- 3. Be within 30 hours of completing graduation requirements for the first bachelor's degree.

Note: Graduate degree programs may establish their own policies with regard to enrollment in and the applicability of senior dual enrollment credits.

Dual enrollment forms (http://gradschool.missouri.edu/forms-downloads/repository/dual-enrollment.pdf) (PDF) must be completed and approved by the Graduate School prior to registering for the graduate level courses.

This program also is available to seniors in other Missouri colleges. Additional information may be obtained from the Graduate School.

Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU's Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to their bar persons with fewer than 14 semesters of university work or who did not have their bachelor's degree before entering law school.

Enrollment Requirements (G)

Enrollment Requirements for Master's and Educational Specialist Degree Candidates

After completing courses, students expecting to take examinations, present a thesis, manuscript, project, or portfolio must be enrolled when that activity occurs. If a master's and educational specialist candidate only needs to take exams or defend a thesis or project, the candidate can enroll for "Graduate Examination" hours in myZou. Registration in the "Graduate Examination" does not count toward enrollment certification. Students enrolled in the "Graduate Examination" would not be considered full-time or part-time. If students need to use the library or computers on campus, they should enroll in at least one hour of regular credit hour instead of "Graduate Examination".

Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term after the term in which the comprehensive exam was successfully completed. The continuous enrollment requirement is met by enrolling in 2 hours each spring and fall semester and 1 hour each summer semester.

Important Note on Graduate Examination Registration and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's financial aid status.

Important Note for International Students regarding Graduate Examination Registration and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student's visa status.

Examinations (U)

Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (http://registrar.missouri.edu/academiccalendar) on the University Registrar's website.

Credits by Examination

https://admissions.missouri.edu/apply-freshmen/college-credits/

Examinations (L)

Policies Related to Final Examinations

- The examination schedule is specified by the Associate Dean for Academic Affairs.
- All students should arrive and be settled in the examination room 15 minutes prior to the scheduled beginning of the examination.
- Arrivals after the examination begins should report immediately to Room 203 Hulston Hall.
- The Cover Page for examinations should include the following information:
 - a. Start of the Exam: Do not start <u>reading</u> (other than this cover page) or <u>writing</u> on scrap paper until the proctor starts the exam.
 - b. Exam Number: Write your exam number on the Cover Page
 - c. Length of Exam
 - d. Exam Mode
 - e. Materials
 - f. Number of Pages
 - g. Special Instructions
- 5. The "Instructions" page of any examination is reserved for all additional special instructions for the examination, and may include:
 - a. the length of the examination;
 - any special instructions for collaboration or material to be used during the examination;
 - any special instructions for turning in the examination or parts thereof; and
 - d. any other general instructions not a substantive part of the exam itself
- 6. Each student will have a different number on each examination. A three-part, perforated slip printed with a number on each of the three parts will be distributed to each student at the time of the examination. The student will complete each portion of the exam number slip and tear off the bottom part for his/her records. (If more than one bluebook is used for any one examination, the student will carefully number the extra book(s) with the assigned number.) At the end of the examination, students will turn in their bluebooks with the remaining two portions attached. The proctor collecting the examinations will remove the identifying second part to be retained in the office and the professor will receive the bluebook bearing only the examination number.
- 7. It is important for students to retain their portion of the number slip in order to review an examination or check grades when posted.
- 8. There must be an accounting of all copies of an examination. As a result, the person administering the exam will:
 - a. notify students to complete the exam slip on the front of the bluebook;
 - check the exam slips against the class roster at the conclusion of the exam (any portion of the exam slip that contains the student's name is removed by the law school staff before the exam is given to a faculty member); and
 - c. collect all copies of the examination itself -- all copies of the exam must be turned in with the exam answer.

- Examinations are scheduled in rooms that accommodate the taking of that examination. A list of the examination rooms is posted in various places in the law school prior to the last day of classes.
- 10. Examinations are distributed in the rooms scheduled and in no other rooms unless the exams are take-home exams, or a professor has made special arrangements for the administration of the exam.
- 11. Students may work on their examinations in assigned rooms only and in other designated areas in the law school. It is the responsibility of the student to return the completed examination to the place where it is to be picked up, at or before the time scheduled for the end of the examination.
- 12. A student who chooses to leave a designated examination room is responsible for returning their examination to the designated place at or prior to the end of the examination period.
- 13. Earplugs are permitted in any exam room.
- 14. The items below are NOT permitted in any examination room, unless SPECIFICALLY authorized by the instructions at the beginning of the written examination, or specifically permitted pursuant to the law school policy relative to exams on computer. The devices below should not be brought into the examination room. If they are, they MUST be turned in to the proctor PRIOR TO THE START OF THE EXAMINATION. The proctor will collect and keep any such device while the exam is being taken. The following items are prohibited:
 - a. Noise cancelling headphones;
 - b. Cellular phones or other communication devices;
 - Personal Digital Assistants (PDA) or any device having the characteristics of a PDA;
 - d. I-pads or other similar devices;
 - e. Laser Pointers;
 - f. Any device that allows for the recording of data, or the playing of recorded data, including, but not limited to iPods, MP3 players, CD players, DVD players, cassette players or recorders;
- 15. Smoking is NEVER permitted in any examination room.
- 16. Examinations are distributed by the proctor unless the professor elects to do so. Upon receipt of an examination, each student places his or her initials beside his or her name on the class roll. The proctor writes the time the examination begins and ends on the board in the room.
- 17. Students in the authorized examination rooms are given a 10-minute warning prior to the end of the examination period. The warning is given by the proctor unless the instructor elects to do so. Once the 10-minute warning is given, no student may leave the examination room. Students shall remain quietly seated.
- 18. The examination ends at the earliest of the following:
 - a. The time written on the board by the proctor or at the conclusion of the time designated on the examination. In some rooms, a law school staff member may say "Stop," but the failure to so indicate does not allow a student to continue to write after the time limit has expired. No writing whatsoever is permitted after the exam ends.
 - b. The time a student submits a written examination to the proctor collecting exams and leaves the immediate line of sight of that proctor. Whether such a student has left the immediate line of sight of the proctor is a question left to the discretion of the proctor, it being recognized that as more students turn in exams, the sight line of the proctor will be decreased.

- c. The time a student taking an exam on computer submits an exam and exits from the exam-writing software.
- 19. When the examination period ends, students who have not completed the examination early shall go to the place announced for examination pickup and hand to the proctor the examination, bluebooks and/or answer sheet and all scratch paper, used and unused. The material is checked at that time to be sure exam numbers are on each examination, bluebook and/or answer sheet and then placed in receptacles provided for that purpose. Students should not walk away until the proctor has confirmed they have all materials.
- 20. At the conclusion of each examination, each student again places his or her initials by his or her name on the class roll. The proctor checks to be sure all examinations and materials that should be returned are returned.

Externships (V)

Students from other colleges of veterinary medicine desiring an externship or participation in one or more instructional periods of the segmented curriculum must be accepted by the section/department involved. The University of Missouri will not provide insurance coverage for any externship.

Students from colleges with animal health technician training programs desiring an internship in the Veterinary Health Center will be considered upon proper application through the director of that program. They must be enrolled in and paying fees at their college, be evaluated by their director in consultation with the involved departmental unit during the externship period while allowing full utilization of their expertise in the hospitals' operations. http://www.vms.missouri.edu/vet_tech_int_prog.html (CVM Executive Committee, 1986)

Final Examination Week (V)

The College of Veterinary Medicine, University of Missouri, does not schedule "final examination week" for those courses included in the professional veterinary curriculum. Instead, classes will be scheduled through the last day of any regular session (term). Final grades will be submitted to the Dean's Office so they can be filed with the Office of Academic Affairs as specified in the faculty handbook, i.e.. "within 2 days, except Sunday, after the end of the examination period". The "end of the examination period" will be interpreted as the time and date when the "semester (or session) closes". (General Faculty meeting minutes, 10-9-73). Changes in examinations can be scheduled as outlined in the Student Handbook.

Full-time/Part-time Status

Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters are considered to be enrolled part time. Undergraduate students may not enroll in a program part time without the express permission of the academic advising unit of the school or college in which the student is, or plans to be, enrolled.

Undergraduate Students

 A full-time undergraduate student is enrolled in at least 12 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

- A three-quarters-time undergraduate student is enrolled in at least nine semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A half-time undergraduate student is enrolled in at least six semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

Graduate Students

- A full-time graduate student is enrolled in at least 9 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A three-quarters time graduate student is enrolled in at least 6 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.
- A half-time graduate student is enrolled in at least 4 semester hours during the fall and spring semesters, or an equivalent number of hours during the summer session.

Professional Students

- Law student 12 hours
- Medical student 14 hours
- Veterinary medicine student 12 hours

Policy Source: Faculty Council, Article VII (http://facultycouncil.missouri.edu/handbook/article-7.html)

Grades

GPA of Record

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of *S, U, H, W, NR*, or *I* are not included in determining the grade point average.

The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students' transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at http://registrar.missouri.edu/grades-calculators/gpa-calculator.php

Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they

will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, and S. Grades calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+ (3.3), B+ (3.00), B- (2.7), C+ (2.3), C+ (2.00), C- (1.7), D+ (1.3), D+ (1.00), D- (0.7), and D- (0.7), and D- (0.7), and D- (1.7), and D- (1.7), and D- (1.7), and D- (1.7), D- (1.7), and D- (1.7), and

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to mean a specific letter grade range. Hence, if a student must achieve a *C* in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the "C range," which would include the grade of *C*-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required "C average or better" on all courses is a "2.00 average or better."

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or add/drop form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A-/+, B-/+, C-/+, D-/+ or F for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D-/+ or F, and a grade of S for those reported A-/+, B-/+ or C-/+. Grades of S and U are not included in the computing of grade point averages.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on scholastic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- A+/-, B+/-, and C+/- grades are recorded on the transcript as an S.
 S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S.

- D+/- and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
- Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of *S* may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students' academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar's website at http://registrar.missouri.edu/academic-calendar/ for deadlines for each term.

How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean's

signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. **NOTE**: Refund dates are different from withdrawal dates. (See Withdrawal from the University section on the University Registrar's website: http://registrar.missouri.edu/policies-procedures/withdrawal-university.php.)

Grade Appeal

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student's work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student's work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting *I* grades to the University Registrar.

An I grade may be assigned only when:

- The completed portion of the student's work in the course is of passing quality AND
- 2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of *I* grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- · The name of the student
- · The course number, title and credits
- · Semester and year of enrollment
- · A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an *I* grade must complete the course requirements either:

- within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
- 2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the I and record a grade of F in classes graded A-F or a grade of U in classes graded S/U. Any student planning to graduate with an unresolved I grade should be aware that translation to an F could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student's graduation until all requirements for graduation are met.

Note:

- A grade of *l* is not figured into the grade point average.
- Students should not re-enroll in a course for which they have been assigned a grade of *I*.
- For further information, see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html).
- Exceptions to unresolved incomplete grades changing to an F are as follows:
 - · Courses taken for graduate level credit
 - Courses taken prior to Fall 2003
 - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of I and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Unassigned or Erroneous Grades

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

Note: Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a NR (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months NR will change to an F.

For graduate and professional students, the NR grade will remain on the transcript until a letter grade is submitted. If a letter grade is not submitted, an NR can remain on the student's record indefinitely and will not convert to an F.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

Grades & Credits (G)

Grading Scale

Graduate students' grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/-. Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member's evaluation of student performance and/or polices of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific program-matic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded to a graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student's grade point average.

S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as "graded on S/U basis only" in the online Schedule of Courses available through myZou.

Incompletes

An incomplete grade (I) may be recorded when the student's work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an "I" grade will require an accompanying letter of justification from the instructor. Although grades of "I" do not automatically convert to an "F" if not completed, academic programs or the instructor may establish conditions or regulations pertaining to "I" grades that are more stringent.

Unreported Grades: NR

When grades are not reported by the instructor, these "Blank Grades" will be recorded as "NR" (Not Recorded). The NR designation will remain on the student's transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student's record indefinitely and will not revert to an "F".

Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member's academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8090/9090 research (8990/9990

Research for Engineering students) is reserved for master's and doctoral degree students working on a thesis or dissertation.

Grade Point Average

A graduate student's grade point average is based on the student's entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. Note:Summer session is not counted as a semester.

GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to http://gradschool.missouri.edu/academics/progress/grading-credit.php.

Grades & Ranks (L)

Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.

When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following fall semester.

The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

Rules for Determining Class Levels

In order to register for courses, students are assigned a class level. The class levels are determined as follows:

- First Year Students: A student who has received 31 hours or fewer of law school grades;
- Second Year Students: A student who has between 32 and 56 (inclusive) hours of law school grades;
- Third Year Students: A student who has received more than 56 hours of law school grades;
- Law School Grades: As used herein, "law school grades" means grades counting towards credit at the School of Law. Failing grades do not count as "law school grades;"
- Effect of Summer School. The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student's class level will NOT therefore change at the end of summer school;

6. Exceptional Circumstances: In cases of students in unusual situations, including, for example, part-time or unusually heavy- or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

Computation of Grade Point Average (GPA)

Grade point averages are based only on law school courses taken at this school and only upon "graded courses." For the purpose of computing grade point averages, a "graded course" is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

- The "grade points" for a graded course are obtained by multiplying the numerical grade for the course by the number of credit hours for the course.
- The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of credit hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student's cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student's first, second and third years.

Course Repeat Policy

The School of Law's Standards and Readmissions Committee ("the Committee") has adopted the following course repeat policy:

- Students who petition the Committee for readmission may be required to repeat any or all courses previously completed;
- Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
- Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances;
- Students who fail a required course are required to repeat that course unless, in exceptional circumstances, repeating the course is waived.
- Students who fail a non-required course are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

Dean's List

A student qualifies for inclusion on the Dean's List with a semester average greater than 85.999.

Good Standing

After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative GPA is greater than 76.399.

Thereafter, a student is in "good standing" at the School of Law when both the student's current semester and overall GPA are greater than 77.499.

Grades and Grading

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and earn course credit. The grades of U and of 65 through 69 are failing grades and do not earn course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

Explanation of the Grading Scale (http://law.missouri.edu/students/pdf/gradingscale.pdf) (PDF)

Grades from myZou

Students may obtain their grades from MyZou. In addition to the student's PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7 percent of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12 percent of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

Order of the Coif

The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship, and whose achievements as students make them worthy

of this distinction. Selections are made after six semester grades and rankings have been determined. To be eligible for membership in the Order of the Coif students must complete 75 percent of their law studies in graded courses. Starting in 2014, transfer students will be considered as having completed their first year of law studies in graded courses for purposes of calculating the 75 percent of coursework in graded courses requirement.

Order of the Barristers

The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

Graduate Academic Minors (G)

Non-designated minors

Non-designated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student's plan of study; however, they are not listed on a student's transcript.

Obtaining approval for a minor

Both designated and non-designated minors must be approved by the student's major advisor, the student's academic program director of graduate studies, and the Office of Graduate Studies.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor. Designated minors are listed on a student's transcript.

Graduate Assistants and Fellows (G)

Graduate Assistantships

Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

Fellowships

Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

Assistantship and Fellowship Policies

The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School's website (http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php).

Graduate Certificates

A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student's official University of Missouri Transcript.

To accommodate a variety of learners' needs, MU offers two types of graduate certificate programs:

- Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program.
 Prospective students have an option to apply for graduate studyl as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.
- Degree-dependent graduate certificates are designed for degreeseeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

Federal Disclosure Requirements for Stand Alone Graduate Certificates "Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). those regulations also provide that institutions must disclose to prospective students certain information about the institution's Ge programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011."

Source: Federal Student Aid, see https://www.ed.gov/category/keyword/Gainful-Employment

At the University of Missouri, the Graduate School's Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

Certificate Admission Information

Stand-Alone Certificate Applicants.All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School's online application for admission and meet the Graduate Faculty Senate's minimum admission requirements for all programs.

Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate Studies' online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Advisor Form (pdf)should be completed to add a graduate certificate.

Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Office of Graduate Studies or University of Missouri.

Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as "certificate-seeking" graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program's site for certificate policy updates.

Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program's site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

Grievances (L)

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at http://www.aals.org/.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312)988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date on which the complaint is being filed; the name and address

of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school's action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

The complainant shall have the right to appeal this initial decision by filing an appeal with the Faculty Policy Committee. The appeal shall be filed in writing within 14 calendar days from the date on which the initial decision was issued. The appeal shall include the date in which the appeal is filed; the name and address of the complainant; a copy of the original complaint; a copy of the initial decision; and an explanation of the basis of the appeal. The Faculty Policy Committee will review the documents presented, and issue a decision in writing within 30 calendar days from receiving the appeal. The Faculty Policy Committee can sustain or reverse the initial decision. In cases where the initial decision is reversed, the Faculty Policy

Committee will direct the Associate Dean for Academic Affairs on what

corrective actions to take. The decision of the Faculty Policy Committee

shall be considered final and subject to no further review.

Holds

There are several types of holds, which are restrictions that may block registration. Students are notified through myZou if they have a hold. They should go to the location indicated in myZou to resolve the hold.

Policy Source: Academic Unit/Department

In some situations, it is important that records or holds preventing certain actions be maintained in student records across the four campuses in the University of Missouri System. For instance, if a student is sanctioned with University Dismissal, University Suspension, University Expulsion or other sanctions / agreements that extend beyond a given campus, a mechanism to enforce such agreements or sanctions is applied. (Click here for the policy (http://www.umsystem.edu/ums/rules/collected_rules/programs/ ch200/200.025_equity_resolution_process_for_resolving_complaints_of_haras resolving Financial Support Responsibilities

Honors Recognition (V)

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

G.P.A. 3.9-4.0 summa cum laude

G.P.A. 3.8-3.89 magna cum laude

G.P.A. 3.7-3.79 cum laude

(General Faculty meeting minutes, 10-10-74)

Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (http:// myzou.missouri.edu).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence

The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal

Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Advisor and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate advisor and the academic program's director of graduate studies to inform them of their intent, the reason requesting leave and the expected

Letters to the Office of Graduate Studies

After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the associate vice chancellor for graduate studies. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their advisor or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their

Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program's director of graduate studies and the Office of Graduate Studies so that the re-entry process can be initiated.

Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student advisor to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty (Voluntary or Involuntary)

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: **NOTE: Students must choose either option 1 or 2**

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law's existence and proof of its applicability to him/her. **Please note**: Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa "Code Section 261.9(1)"g" (https://www.iowacollegeaid.gov/content/postsecondary-registration-iowa-code-chapter-261b-additional-requirements/#codes)

Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

- That the official transcript indicate the courses from which he or she
 has withdrawn, the date of withdrawal and the reason for withdrawal.
 Students choosing this option will have their tuition and fee charges
 and their student financial aid eligibility calculated effective with their
 official withdrawal date.
- Or the student may request that all courses for that semester be expunged from the student's academic record. Students taking this option will receive a complete refund of all educational and incidental

fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an "Incomplete" grade.
- I to F policy: Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as "I" until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.
- NR to F Policy: Military duty will be exempted from the one -year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as "NR" indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

- Have the grade earned for the course and have the "Incomplete expunged from his or her official record
- 2. Have the "Incomplete" grade remain as the final grade with reason for the "Incomplete" noted on his or her official record

NOTE: No refunds will be given for option 2.

Residential life: Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

Financial Aid: The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

Scholarships: Scholarships may or may not be applicable upon the student's return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue an academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship

at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

Contact:

Office of the University Registrar 125 Jesse Hall The University of Missouri - Columbia Columbia, MO 65211

Office: (573) 882-7881 Fax: (573) 884-4530

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- · Forwarding Address
- Name, address and phone number of a contact or your representative
- · Your name as it is on MU records
- MU ID number
- · Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530

Re-admission of previously enrolled students

Undergraduate students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (http://admissions.missouri.edu/apply/re-admission) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking **graduate** students who are returning to MU after an absence of at least two semesters must complete a graduate studies reactivation form (PDF) (http://gradstudies.missouri.edu/forms-downloads) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (http://www.moga.mo.gov/mostatutes/stathtml/04100009481.html). This policy is implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.

MU Course Work Required

MU requires that 30 of a student's last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online. (NOTE: This policy has replaced the requirement for courses to be taken "in residence.")

Name Changes

Policy Related to Changing Preferred Names for Students at the University of Missouri

The student may use preferred first and middle names at Mizzou. Preferred first and middle names are used on class rosters, ID cards, transcripts and diplomas and other locations where the legal name is not required. The policy outlining the use of the name may be found at: The University of Missouri Office of the University Registrar Preferred Name Policy (https://www.umsystem.edu/ums/rules/collected_rules/information/ch180/180.040_student_preferred_name_policy)

The path to update a preferred name in myZou is: Student Center>Personal Information>Names>Add a New Name.

NOTE: The Human Resource computing system overrides ID card names. If students who are employed by MU wish to have a preferred name on ID cards, they need to contact their department MU HR officer. Students who have questions may contact the University Registrar.

Policy Related to Changing Names for Students at the University of Missouri

The student must submit one of the legal documents listed below under "Proof of legal change to new name."

The document submitted must have date of birth, a photograph and a signature. If you have multiple documents that prove your legal name change, please bring copies of the documents along with the name change form (http://registrar.missouri.edu/forms/name-change.pdf) to the Office of the University Registrar (http://registrar.missouri.edu/contact). (http://registrar.missouri.edu/contact)

Proof of legal change to new name:

- current, government-issued ID card such as a driver's license, military ID, passport
- 2. current, valid Social Security card with new name
- federally recognized Indian tribe's enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
- certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

NOTE: Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

Non-Degree Graduate Study (G)

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit toward a graduate degree. However, if the student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may

be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note:To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

Eligibility

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

International Student Eligibility

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

Financial Aid

Non-degree graduate students are not eligible to receive federal financial aid or veteran's benefits or to hold campus-sponsored assistant ships.

How to Apply for On-Campus Non-Degree Study

- Complete and submit the Graduate School Application (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp? id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf) will slow the application review process.
- Submit the application fee, (http://gradschool.missouri.edu/ admissions/eligibility-process/non-degree-applicants/applicationfee.php) which is \$55 (US) for domestic applicants and \$75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School's online application.
- Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any

- additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.
- Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study

If you are planning to take course work online or at a distance, please contact Mizzou Online (http://online.missouri.edu) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student's cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the associate vice chancellor for graduate studies. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student's term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from "Non-Degree" to "Degree-Seeking"

Non-degree graduate students who want to earn a graduate degree (master's, doctoral or educational specialist) must:

- Submit official scores, if required by the degree program of interest (http://gradschool.missouri.edu/academics/programs), from an appropriate graduate admission examination (GRE, GMAT, MAT).
 The scores must be sent directly from the examination service to Graduate Admissions, 210 Jesse Hall, Columbia, MO 65211.
- Meet Graduate School minimum admission requirements (http://gradschool.missouri.edu/admissions/eligibility-process).
- Apply directly to the degree program of interest using a Change of Degree form (PDF) (http://gradschool.missouri.edu/forms-downloads/ repository/change-degree.pdf).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school's representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the Associate Vice Chancellor for Graduate Studies to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.*

Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean's certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.*

* In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

- The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.
- Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.
- Only tuition required related to a student's assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.
- 4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

- An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.
 - Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.
- All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
 - a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student's enrollment, thus changing the assessment. This provision specifically excludes conditions or

- chronic illnesses that remain static and are known to the student at the time of enrollment.
- b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
- c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.
- 3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that has ended must be submitted on a separate form to the Revision of Records Committee, c/o the Office of the University Registrar, 130 Jesse Hall.
- Generally, grounds for consideration of an appeal will be restricted to those circumstances personally experienced by the enrolled student with whom the University has a direct relationship.
- Decisions will be rendered by the designated official of the Office of the University Registrar and will be based solely upon any and all pertinent written documentation.
- Notification of the status of the tuition appeal will be made in writing within 10 calendar days of receipt of the written appeal.

Appeal of the decision rendered by the Office of the University Registrar

- Upon written request a student may appeal the decision rendered by the Office of the University Registrar.
- A written appeal must be submitted to the Office of the University Registrar.
- The written appeal must request a review of the original decision and may contain additional written documentation to support the appeal.
- 4. The appeal will be reviewed by the same designated official. If the appeal information is sufficient to overturn the original decision, the designated Office of the University Registrar official can direct staff to issue a tuition refund or adjustment in accordance with appropriate fiscal procedures.
 - If denied within 10 calendar days of receipt, the information must be forwarded to the University Registrar. If the appeal is denied a second time by the University Registrar, it may be forwarded to the vice provost for enrollment management for further consideration, upon the student's request.

The decision rendered by the vice provost for enrollment management is the final University determination on the matter.

Refund of tuition and fees in the event of a student death

- When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:
 - Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
 - Any other debts owed to the University that occurred prior to the death of the student.
- 2. Any refund will be made payable to the student.
- If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

Residency (L)

The School of Law residency rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student's course load -- the number of hours a student enrolls in for a given semester -- and residency rules are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Most students attend law school for six semesters. However, some students plan to graduate after only five semesters by attending summer school. Students who plan to attend summer school for two years and graduate a semester early should visit with the Associate Dean for Academic Affairs concerning their summer course load requirements.

For residency purposes, a minimum load of twelve hours is required for a semester. Thus, each student generally needs at least 12 hours each semester to meet residency requirements. (NOTE: An average of 12 credits per semester is not sufficient to complete the 89 credit degree requirement.) For purposes of accelerated graduation, the law school's residency rules require students to take a minimum of five hours in one summer session and combine it with another summer session of no less

than seven hours. Two summer sessions of six hours each serve the same purpose. This approach gives students five semesters of at least 12 hours and two combined summers of 12 hours, which satisfies our residency requirements. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation.

A student may combine any summer hours with an appropriate number of hours in a regular semester in order to fulfill a 12-hour semester residency requirement if they should fall below 12 hours during a semester for some reason. Students completing more than 12 hours in a semester may not use surplus hours over 12 toward residency in any other session; hence the three surplus hours from a 15-hour semester cannot be added to a subsequent nine-hour semester to give residency for two semesters. On the other hand, a nine-hour semester can be combined with a three-hour summer session to give residence for one semester.

A student in their final semester only can take less than 12 hours provided that the number of credits being taken is sufficient to satisfy the remainder of the 89 credit degree requirement. In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

Revision of Records

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their advisor before appealing to the committee to verify that changes are warranted and will benefit the student.

For instructions for completing petition to the committee see Revision of Records (http://registrar.missouri.edu/policies-procedures/revision-records.php).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to revisionofrecords@missouri.edu.

Student Conduct (L)

The academic life of students at the School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at http://law.missouri.edu/current/policies-rules-student-conduct/.

Incidents involving bias or harassment can be reported through the Office of Civil Rights and Title IX. Information is available at http://missouri.edu/civil-rights-title-ix/.

Student Employment (L)

No student shall work more than 20 hours per week in a semester where she or he is enrolled as a full-time first-year law student (hereinafter the "1L 20-hour rule").

The 1L 20-hour rule does not apply to the period between semesters, or the summer (unless the student is enrolled in summer school full-time) or to any break during the semester (e.g., spring or Thanksgiving breaks).

Student Files (V)

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

- (I) Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.
- (2) Each student must provide proof of:
- a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).
- b. Identity. They must provide some identification which allows visual comparison of person's appearance with a photograph on an item such as a driver's license or student identification card.
- (3) If the above conditions are met and permission is granted, a student will be allowed to examine their entire student record. This must be affected only in an office occupied by one of the assistants in the Dean's Office.
- (4) Copies of any item in the student's folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.
- (5) A student must not, under any circumstances, be left alone with the folder.
- (6) A record will be placed in the student's folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee. 1986)

Student Level (U)

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

Class	Credits
Freshman	0 to 29 credits
Sophomore	30 to 59 credits
Junior	60 to 89 credits
Senior	90 or more credits

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.

Testing Out of Courses (V)
