

# Improving the Presentation of Quantitative Results in Political Science

John Kstellec and Andrew Gelman

Columbia University

February 12, 2009

Introduction

Practice in Political  
Science

Principles

Examples

Coefficients & standard  
errors

Graphs for methodological  
research

Age and voting

Peacekeeping

Sports fans

Multiple regression models

Conclusion

# Overview

- What do political scientists do?
- Why tables?
- Why graphs?
- Some basic principles
- A graphing template
- Some examples

Improving the  
Presentation of  
Quantitative  
Results in Political  
Science

John Kestellec and  
Andrew Gelman

Sports fans

Multiple regression models

Conclusion

# The use of tables vs. graphs in political science

Improving the  
Presentation of  
Quantitative  
Results in Political  
Science

John Kastellec and  
Andrew Gelman

- Examined 5 journals in 2006 (Kastellec and Leoni 2007)
- Coded tables/graphs, and purpose of each
- Overall: 150 tables, 89 graphs

Introduction

Practice in Political  
Science

Principles

Examples

Coefficients & standard  
errors

Graphs for methodological  
research

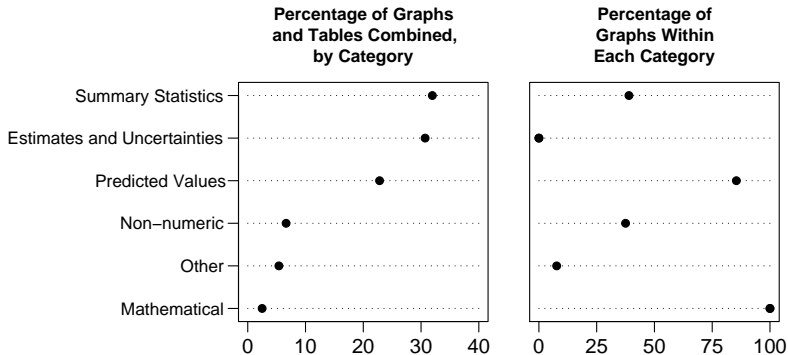

Age and voting

Peacekeeping

Sports fans

Multiple regression models

Conclusion

# Why Tables?

- **Tables:**
  - Much easier to produce
  - Standard in teaching, presentation and publishing
  - Can aid replication studies
- **Graphs:**
  - Takes a lot of work
  - Belief it's not possible to present info graphically

Improving the  
Presentation of

Multiple regression models

Conclusion

# Why Tables?

- Tables:
  - Much easier to produce
  - Standard in teaching, presentation and publishing
  - Can aid replication studies
- Graphs:
  - Takes a lot of work
  - Belief it's not possible to present info graphically

# Why Graphs?

- Better at communicating empirical results
- Process of graph creation a feature, not a bug
- Most data and results can be presented graphically
