Facts about our ecological crisis are incontrovertible. We must take action

Humans cannot continue to violate the fundamental laws of nature or science with impunity, say 94 signatories including **Dr Alison Green** and **Molly Scott Cato MEP**

Letters

Fri 26 Oct 2018 15.56 BST

We the undersigned represent diverse academic disciplines, and the views expressed here are those of the signatories and not their organisations. While our academic perspectives and expertise may differ, we are united on one point: we will not tolerate the failure of this or any other government to take robust and emergency action in respect of the worsening ecological crisis. The science is clear, the facts are incontrovertible, and it is unconscionable to us that our children and grandchildren should have to bear the terrifying brunt of an unprecedented disaster of our own making.

We are in the midst of the sixth mass extinction, with about 200 species becoming extinct each day. Humans cannot continue to violate the fundamental laws of nature or of science with impunity. If we continue on our current path, the future for our species is bleak.

Our government is complicit in ignoring the precautionary principle, and in failing to acknowledge that infinite economic growth on a planet with finite resources is non-viable. Instead, the government irresponsibly promotes rampant consumerism and free-market

fundamentalism, and allows greenhouse gas emissions to rise. Earth Overshoot Day (the date when humans have used up more resources from nature than the planet can renew in the entire year) falls ever earlier each year (1 August in 2018).

When a government wilfully abrogates its responsibility to protect its citizens from harm and to secure the future for generations to come, it has failed in its most essential duty of stewardship. The “social contract” has been broken, and it is therefore not only our right, but our moral duty to bypass the government’s inaction and flagrant dereliction of duty, and to rebel to defend life itself.

We therefore declare our support for Extinction Rebellion, launching on 31 October 2018. We fully stand behind the demands for the government to tell the hard truth to its citizens. We call for a Citizens’ Assembly to work with scientists on the basis of the extant evidence and in accordance with the precautionary principle, to urgently develop a credible plan for rapid total decarbonisation of the economy.

Dr Alison Green *Pro vice-chancellor (academic), Arden University, National Director (UK) Scientists Warning*

Professor Joy Carter *Vice-chancellor, University of Winchester*

Dr Rowan Williams

Danny Dorling *Halford Mackinder professor of geography, University of Oxford*

Since you're here ...

... we have a small favour to ask. Three years ago, we set out to make The Guardian sustainable by deepening our relationship with our readers. The revenues provided by our print newspaper had diminished. The same technologies that connected us with a global audience also shifted advertising revenues away from news publishers. We decided to seek an approach that would allow us to keep our journalism open and accessible to everyone, regardless of where they live or what they can afford.

And now for the good news. Thanks to all the readers who have supported our independent, investigative journalism through contributions, membership or subscriptions, we are overcoming the perilous financial situation we faced. Three years ago we had 200,000 supporters; today we have been supported by over 900,000 individuals from around the world. We stand a fighting chance and our future is starting to look brighter. But we have to maintain and build on that level of support for every year to come.

Sustained support from our readers enables us to continue pursuing difficult stories in challenging times of political upheaval, when factual reporting has never been more critical. The Guardian is editorially independent - our journalism is free from commercial bias and not influenced by billionaire owners, politicians or shareholders. No one edits our editor. No one steers our opinion. This is important because it enables us to give a voice to the voiceless, challenge the powerful and hold them to account. Readers' support means we can continue bringing The Guardian's independent journalism to the world.

If everyone who reads our reporting, who likes it, helps to support it, our future would be much more secure. **For as little as £1, you can support the Guardian - and it only takes a minute. Thank you.**
