

# Treatment Of Effluent From Re-Refined Lubricating Oils By Combined Processes Of Coagulation, Flocculation, And Fenton Process

Da Silva, Lucas Pisoni; Taffarel, Silvio Roberto; Da Silveira, Fernanda Rosa; De Sá Campos, Fagner Taffarel; Oliveira Silva, Luis Felipe.

## Abstract

This work examines the possibility and the potential application of physicochemical processes (coagulation and flocculation) and advanced oxidative processes (Fenton Process) in the treatment of effluents from the re-refining of used lubricating oils.

## Keywords

Advanced Oxidative Processes; Fenton; Lubricating Oils; Re-Refining; Wastewater Treatment.
