

Vapor-Liquid Equilibrium of CO₂ with Aqueous Solutions of DEEA, MAPA and their Mixture - DTU Orbit (09/11/2017)

Vapor-Liquid Equilibrium of CO₂ with Aqueous Solutions of DEEA, MAPA and their Mixture

General information

State: Published

Organisations: Center for Energy Resources Engineering, Department of Chemical and Biochemical Engineering, CERE – Center for Energy Resources Engineering, Norwegian University of Science and Technology

Authors: Waseem Arshad, M. (Intern), Fosbøl, P. L. (Intern), von Solms, N. (Intern), Fjøsne Svendsen, H. (Ekstern), Thomsen, K. (Intern)

Publication date: 2013

Event: Abstract from 2nd Post Combustion Capture Conference, Bergen, Norway.

Main Research Area: Technical/natural sciences

Vapor-liquid equilibrium, Post-combustion capture, Calorimeter, Phase change solvents, Amine, N,N-diethylethanolamine (DEEA), 3-Methylamino propylamine (MAPA)

Electronic versions:

PCCC2-Abstract_Mwa.pdf

Bibliographical note

17-20 September, 2013, Bergen Norway
