Energy Saving Scheme Based On Traffic Forwarding For Optical Fiber Access Networks - DTU Orbit (09/11/2017)

Energy Saving Scheme Based On Traffic Forwarding For Optical Fiber Access Networks

We report on an energy saving block that regroups and powers off OLTs during low traffic periods, resulting in energy savings up to 87,5% in the central office of optical access networks.

General information

State: Published
Organisations: Department of Photonics Engineering, Metro-Access and Short Range Systems, Technical University of Denmark
Authors: Lopez, G. A. R. (Ekstern), Estaran Tolosa, J. M. (Intern), Vegas Olmos, J. J. (Intern), Tafur Monroy, I. (Intern)
Number of pages: 2
Pages: ThP1-1
Publication date: 2013

Host publication information

Title of host publication: 2013 18th OptoElectronics and Communications Conference held jointly with 2013 International Conference on Photonics in Switching (OECC/PS)
Publisher: IEEE
Main Research Area: Technical/natural sciences
Conference: 18th OptoElectronics and Communications Conference (OECC 2013), Kyoto, Japan, 30/06/2013 - 30/06/2013
