

## **B2b - Pratignano**

Excerpt from the “Piana della Farnia” sheet of the Carta Geologica della Regione Emilia-Romagna. Coordinates in the “San Marcello Pistoiese” sheet of the Carta Geologica d’Italia: lat. 44° 10’ 25”; long. 1° 38’ 0”

The cross-section target is a very large rock-block slide, which has not yet been outlined in the Carta Geologica della Regione Emilia-Romagna, but is clearly revealed by a long and deep trench in the slope morphology (Lago Pratignano). All depth data which are relevant to the slip surface interpolation have been reported in the layer “SS depth” of this .pdf document.
