Department of Sport and Exercise Science

The Role of Vitamin D and Physical Activity in Glycaemic Homeostasis

By
Ffion Curtis

December 2013

A thesis submitted to the Department of Sport and
Exercise Science in partial fulfilment of the
requirements for the degree of Doctor of Philosophy

DECLARATION

This work has not previously been accepted in substance for any degree and is not being concurrently submitted in candidature for any degree.

STATEMENT 1

This thesis is the result of my own investigations, except where otherwise stated. Where ***correction services** have been used, the extent and nature of the correction is clearly marked in a footnote(s).

Other sources are acknowledged by footnotes giving explicit references. A bibliography is appended.

Acknowledgments

I would like to thank all those who contributed towards the completion of this thesis...

My PhD supervisors; Dr Rhys Thatcher, Dr Glen Davison and Dr Sam Rice all of whom brought something special and unique to the project. A special thank you to Mr Jones and Dan the Man who ensured my time in SES was so enjoyable – even on the “just not today days”. Members of the local community, the Diabetes Healthcare team at Bronglais Hospital and the local Diabetes UK support group, who all contributed massively when recruiting for the studies. I would also like to thank all those who helped with project development, data collection and sample analyses; this includes colleagues within the department, the Diabetes Research Network Wales, Merthyr Tydfil biochemistry laboratories, and Healthspan who donated the vitamin D tablets.

Thank you to Toni and Will for all their continued support and patience, and to my dearest friend Abi, who alongside Toni, looked after Will for the last 4 years! Diolch

And last but not least I would like to thank Chris, who during those final days inspired me to reach out for perfect...

This PhD Project was funded through a Knowledge Economy Skills Scholarship in collaboration with Hywel Dda University Health Board.

Abstract.....	1
Chapter 1: Literature Review.....	2
1.1 Context.....	2
1.2 Vitamin D.....	4
1.3 Type 2 Diabetes (Pathogenesis, Diagnosis and Treatment).....	15
1.4 Vitamin D and Glucose Control.....	20
1.5 Physical Activity and Glucose Control.....	46
1.6 Physical Activity, Vitamin D and Glucose Control.....	49
1.7 Thesis aims and objectives.....	52
1.8 Rationale for Methods.....	54
Chapter 2: General Methods and Recruitment.....	65
2.1 General Methods.....	65
2.2 Ethics.....	65
2.3 Procedures.....	66
2.4 Blood sampling.....	66
2.5 Analyses.....	68
2.6 Recruitment Process.....	73
2.7 Development of analytical methods.....	77
Chapter 3: Study 1.....	79
3.1 Introduction.....	79
3.2 Methods.....	81
3.3 Results.....	84
3.4 Discussion.....	92
Chapter 4: Study 2.....	97

4.1 Introduction.....	97
4.2 Methods.....	99
4.3 Results.....	101
4.4 Discussion.....	116
Chapter 5: Study 3.....	122
5.1 Introduction.....	122
5.2 Methods.....	125
5.3 Results.....	134
5.4 Discussion.....	155
Chapter 6: Concluding Remarks.....	159
6.1 Concluding Remarks.....	158
6.2 In Conclusion.....	169
References.....	173
