y and ELISA

(mL)

**Generation of CTL targets**  
In vitro re-stimulation of splenic cells performed with a specific OVA peptide (SIINFEKL) characterized by its specific recognition by MHC class I association

**Generation of antigen-specific cytotoxic T cells** C57BL/6 mice i.p. immunized with 4 mg of NP, 10 µg of OVA or both NP and OVA

**In vivo induction of OVA specific cells** in response to stimulation with splenocytes from mice immunized

**Poly-α immunoc polymer, show**

NPs induce a broad spectrum of responses
