Dongming Zhu

December 2, 1962 - May 30, 2018

The TBC community lost a very active researcher on high temperature ceramics materials and coatings.

Dongming Zhu was a very creative scientist who was full of energy and high throughput. He made lasting contributions in the area of high temperature ceramic coatings. His earlier research identified promising compositions for lower conductivity TBC systems. For the past 10 years, he was involved in identifying environmental barrier coating (EBC) compositions for ceramic metal composites. He made numerous conference presentations, published over 100 scientific papers, contributed to several conference proceedings, and organized conferences and sessions on TBC and EBC. He was very well liked and respected in the community.

He was an active participant in ECI sponsored conferences on TBC, CMC and EBC as evident from the following list:

- 2007 Thermal Barrier Coatings II - Speaker
- 2011 Thermal Barrier Coatings III - Speaker
- 2014 Thermal Barrier Coatings IV – Speaker and Poster Presenter
- 2017 Advanced Ceramic Matrix Composites – Co-Chair, Speaker, and Session Chair
