

## DG9 - Gas Turbines: Operation & Maintenance

**Instructors:** Hussain Al-Baloshi (Qatar Petroleum), Klaus Brun (SwRI), Manoj Gupta (Siemens), Rainer Kurz (Solar Turbines Incorporated)

Suggested Topics:

- Preventive/predictive maintenance
- Condition monitoring
- Air filtration onshore and offshore
- Fogging/evaporative cooling/inlet chilling
- Liquid fuel handling and storage
- Gas fuel issues
- Lean premix combustion and emissions issues
- Repair techniques
- Matching of driver and driven equipment
- Auxiliary systems reliability
- Noise

Maintenance and spare parts philosophies, including LTSAs, OEM versus non-OEM, engine exchange

- Component failures
