

45TH TURBOMACHINERY & 32ND PUMP SYMPOSIA
HOUSTON, TEXAS | SEPTEMBER 12 - 15, 2016
GEORGE R. BROWN CONVENTION CENTER

Lateral Rotordynamics of Petrochemical Equipment - Review, Examples and Problems

John A. Kocur, Jr.

ExxonMobil
Research and Engineering

 | TEXAS A&M
UNIVERSITY

TURBOMACHINERY
LABORATORY
TEXAS A&M ENGINEERING EXPERIMENT STATION

Biography – John Kocur

- John A. Kocur, Jr. is a Machinery Engineer in the Equipment Engineering Division at ExxonMobil Research & Engineering in Houston, TX. He has worked in the turbomachinery field for 30+ years. In his current capacity, he provides support to the downstream, upstream and chemical business within ExxonMobil with expertise on vibrations, rotor/thermo dynamics and failure analysis of rotating equipment. Prior to joining EMRE, he held the position of Manager of Product Engineering and Testing at Siemens Demag Delaval Turbomachinery. There Dr. Kocur directed the development, research, engineering and testing of the compressor and steam turbine product lines. He has also held positions with Pratt & Whitney and Amoco Corporation.
- Dr. Kocur received his BSME (1978), MSME (1982) and Ph.D. (1991) from the University of Virginia and an MBA (1981) from Tulane University. He has authored papers on rotor instability and bearing dynamics, lectured on hydrostatic bearings, has sat as a committee chairman for NASA Lewis and is a member of ASME. Currently, he holds positions within API as 617 chair, 684 chair and member of Subcommittee on Mechanical Equipment Steering Committee.

Table of Contents

- **Introduction**
- **Lateral Analysis**
- **Rotor Stability**
- **Bearing Instability Example**
- **Low Frequency Instability Example**
- **Compressor Test Stand Vibration**
- **Morton Effect Case Study**
- **TurboExpander Case Study**
