

SUSTAINABLE E-WASTE Design Competition

PROJECT ABSTRACTS Technical/Geek Category

Team Number: 19

Category: Technical / Geek

Project Title: CompuTable

Team Members: David Attig, Daniel Carmona, Zach Eddy, Mark Miller, Brett Phillips

Project Description:

Have the convenient features of a PC at your fingers or at your feet rather. Sit back with your feet propped up and check the weather, stock tickers, and news headlines with one glance as you set down your coffee. Check on your NCAA bracket and see up-date-scores on the important games as you watch March Madness basketball on your living room TV. Enjoy a centerpiece that sets the mood with colored lighting and background music as a photo slide show plays. With CompuTable, you can have access to all your favorite gadgets/widgets, hands free, in the comfort of your living room.

Take your average coffee table, add a couple of screens, a CPU, speakers, and lighting, and you would have the CompuTable. And the lights aren't the only thing green about the CompuTable; it's built from salvaged and recycled computer components and requires less energy than a typical desktop. Don't boot up your desktop in the other room to gain access to basic features; don't tote around your laptop and power cord; don't fiddle with a small cell phone screen using apps that drain your battery; instead, sit back, relax, and enjoy your CompuTable.

Project Abstracts

Artist / Designer

- +QWERTY
- +Tourist Kiosk
- +Weave Lamp
- +WHENCE
- +Penta-Chair
- +Project E3
- +Campus Internet Kiosk
- +Seedling keys
