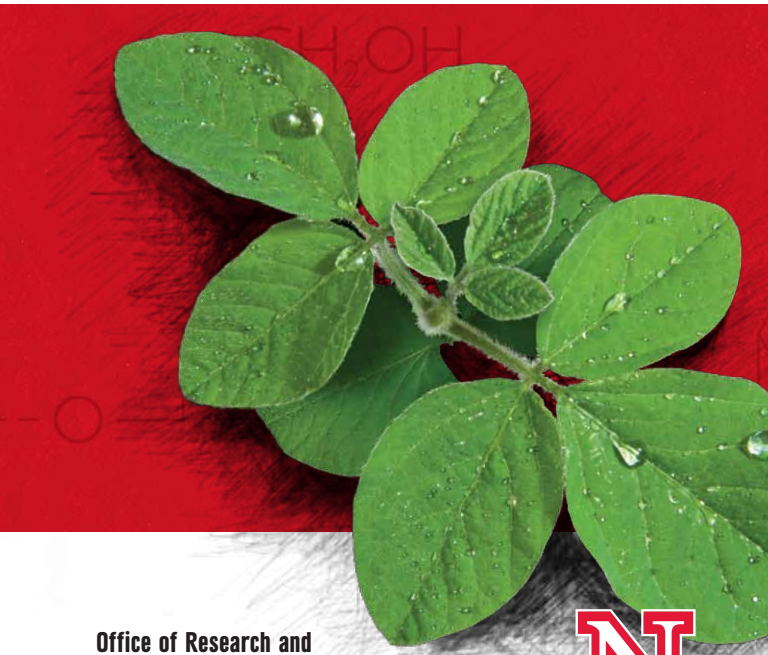
2011

Major Sponsored Programs and Faculty Awards for Research and Creative Activity: July 1, 2010 – June 30, 2011

Research and Creative Activity

July 1, 2010 – June 30, 2011
Major Sponsored Programs
and Faculty Awards
for Research and Creative Activity



Office of Research and
Economic Development
University of Nebraska–Lincoln

On the Cover: At UNL, discoveries, knowledge and new technologies grow from great ideas for addressing today's complex challenges. Producing enough food with limited water supplies as the world's population almost doubles in the next 40 years is one of the most critical of these challenges. The Robert B. Daugherty Water for Food Institute at the University of Nebraska is a global research, education and policy analysis institute committed to innovative solutions that will help the world sustainably grow more food using less water.

Chancellor Harvey Perlman and Vice Chancellor Prem Paul

This tenth annual "Major Sponsored Programs and Faculty Awards for Research and Creative Activity" booklet highlights the successes of University of Nebraska–Lincoln faculty during the fiscal year July 1, 2010-June 30, 2011. It lists the funding sources, projects and investigators on major grants and sponsored program awards received during the year; published books and scholarship; fellowships and other recognitions; startups and intellectual property licenses; and performances and exhibitions in the fine and performing arts.

This impressive list grows each year and I am pleased to present evidence of our faculty's accomplishments. Large grants in a diverse range of fields—from water, food, energy and human health, to math and science education, digital humanities and nanotechnology—enable UNL faculty to address important challenges facing Nebraska, our nation and the world. Our external research funding reflects their achievements, reaching a total of $132.2 million in fiscal year 2011.

With an eye to the future, we are enhancing and expanding our strengths by vigorously pursuing interdisciplinary initiatives necessary for tackling today's complex issues. We are cultivating innovative collaborations across disciplinary, institutional, state and national boundaries to solve global challenges, address national needs and enhance Nebraska's economy. And we are partnering with business, industry and entrepreneurs to ensure that we maximize the social, economic and environmental benefits of UNL research.

I invite you to read about our faculty's accomplishments in this booklet and envision the power of UNL's innovative and collaborative research, scholarship and creative activity to solve problems and create opportunities for Nebraska, the nation and the world.

Thank you for your interest in and support for research and creative activity at the University of Nebraska–Lincoln!

Prem S. Paul
Vice Chancellor for Research and
Economic Development

AWARDS OF $3 MILLION OR MORE

Active awards, July 1, 2010-June 30, 2011
*** Indicates new in 2010-2011**

Allen, Craig — Natural Resources

IGERT: Resilience and Adaptive Governance in Stressed Watersheds

$3,116,173 — NSF
8/15/09 – 7/31/14

Fritz, Sherilyn — Earth and Atmospheric Sciences
Samal, Ashok — Computer Science and Engineering
Tyre, Richard — Natural Resources
Tomkins, Alan — Law/Public Policy Center

Wildlife ecologist Craig Allen, with a grant from the National Science Foundation's Integrative Graduate Education and Research Traineeship Program, known as IGERT, leads an innovative, interdisciplinary graduate education program to prepare future scientists, policymakers and natural resource managers to address increasingly complex global water issues. The five-year grant funds an education project focused on resilience and adaptive governance in stressed watersheds. Doctoral students from many disciplines across the natural, computational and social sciences study resilience and adaptive management strategies for stressed watersheds in the U.S. and Eastern Europe. The program integrates scientific, socioeconomic and legal aspects involved in studying and managing complex systems of people and nature.

Becker, Donald — Biochemistry

Redox Biology Center

$10,096,061 — NIH-NCRR
8/1/07 – 7/31/12

Donald Becker, professor of biochemistry in the Institute of Agriculture and Natural Resources, is the director of the Redox Biology Center. Established in 2002 with a grant from the National Institutes of Health as a Center of Biomedical Research Excellence, the center received a competitive renewal grant in 2007 to support it through 2012. The center's researchers investigate how cells maintain a reduction-oxidation balance, a process called redox homeostasis, and study links between redox homeostasis and diseases such as cancer, cardiovascular disease, Alzheimer's disease and cataracts. The center's research will provide important advances in the understanding of redox regulation, comprising aspects of cellular aging and controlled cell death.

Chandra, Namas **Engineering Mechanics**

Army-UNL Center for Trauma Mechanics

$3,261,250 DoD-ARO

10/1/08 – 9/30/10

Namas Chandra, Elmer Koch Professor of Engineering Mechanics, received a grant from the Army Research Office to create the UNL Center for Trauma Mechanics. The center focuses on the effects of blast waves on the head and brain of a fully equipped soldier in the field. The project studies wave propagation effects on the skull and brain especially under mild traumatic brain injury (TBI) pressure loading conditions. The work of the center will be instrumental in improving understanding of TBI and may lead to design of more effective protection systems that shield soldiers from the combined effects of both blast waves and impact.

Cotton, Dan **eXtension**

National eXtension Project

$14,370,000 Association of Public

10/1/04 – 12/31/13 and Land-Grant Universities

eXtension: The Transformation of Cooperative Extension

$5,961,221 USDA-CSREES

8/15/07 – 8/14/12

Dan Cotton directs the eXtension Initiative, an Internet-based Cooperative Extension Service education and information system. UNL is the lead institution in this multi-year project, which partners with the University of Kentucky, North Carolina State University and Virginia Tech University. This is a collaborative effort of the nation's 107 land-grant universities and the U.S. Department of Agriculture's Cooperative State Research, Education and Extension Service to develop content and technology for the eXtension project. eXtension is a virtual educational environment that provides science-based, objective information. Users may take advantage of learning opportunities and interact with the expertise available from the land-grant university system by visiting www.extension.org.

DeKraai, Mark **Psychology/Public Policy Center**

Child Mental Health State Infrastructure Grant
$3,129,313 Nebraska Department of Health and Human Services
4/1/05 – 9/30/10
Gallagher, Kenneth Special Education and Communication Disorders

The Nebraska Department of Health and Human Services is supporting a five-year project directed by Mark DeKraai of UNL's Public Policy Center to build on major behavioral health system reform efforts to develop systems of care specifically for children age birth to 5; youth; youth with co-occurring disorders or substance abuse; and transition age youth. The project aims to individualize service models for children and youth, establish culturally and linguistically appropriate practices, and form a coalition for an integrated, family-centered system for children and families.

DiLillo, David **Psychology**

* Sexual Revictimization: Emotional and Psychosocial Mechanisms
$3,135,821 NIH-NICHD
7/15/10 – 6/30/15
Hoffman, Lesa Psychology

The National Institute of Child Health and Human Development is supporting the work of psychologist David DiLillo to study the problem of "revictimization" – the phenomenon in which women who suffered abuse during childhood or adolescence are up to 10 times more likely to be sexually victimized again as adults. This multi-site project is examining the processes that link early maltreatment to adult revictimization, in particular focusing on mechanisms related to psychopathology, sexual risk taking and alcohol use. Drawing on recent theoretical and empirical findings, DiLillo's team proposes that difficulties regulating emotions stemming from early abuse create underlying risk factors for the more immediate predictors of revictimization. Together, these findings will permit the testing of a comprehensive model of revictimization.

Dussault, Patrick **Chemistry**

* Building Infrastructure in Nanohybrid Materials and Algal Biology Research

$11,100,982 NSF-EPSCoR

10/01/10 – 09/30/15

Hage, David	Chemistry
Lai, Rebecca	Chemistry
Takacs, James	Chemistry
Cerutti, Heriberto	Biological Sciences/ Center for Plant Science Innovation
Morris, T. Jack	Biological Sciences
Han, Ming	Electrical Engineering
Hudgins, Jerry	Electrical Engineering
Ianno, Natale	Electrical Engineering
Lu, Yongfeng	Electrical Engineering
Schubert, Eva	Electrical Engineering
Schubert, Mathias	Electrical Engineering
Cahoon, Edgar	Biochemistry/ Center for Plant Science Innovation/
Clemente, Thomas	Agronomy and Horticulture/ Center for Plant Science Innovation
Bailey, Cheryl	Biochemistry
Black, Paul	Biochemistry
DiRusso, Concetta	Biochemistry/ Nutrition and Health Sciences
Spreitzer, Robert	Biochemistry
Weeks, Donald	Biochemistry
Van Etten, James	Plant Pathology

UNL's planned Center for Nanohybrid Functional Materials will combine the efforts of chemists, engineers and biologists to develop fundamental new science related to sensing and separation of targets ranging from small molecules to toxins. The center will be led by Professors Patrick Dussault, Charles Bessey professor in chemistry, and Mathias Schubert, associate professor of electrical engineering. The center will bring together investigators from two broad areas of science. One group has experience in creating highly ordered nanostructures, such as tiny silicon spirals that have unique characteristics in terms of how they appear under certain frequencies of light. Other center members are experts in using chemical and biochemical agents such as RNA or antibodies to bind a particular target such as a drug or a virus.

The Nebraska Coalition for Algal Biology and Biotechnology builds on UNL's innovation in research on algae and algal biotechnology, focusing on the production of renewable biofuels to replace gasoline and diesel. The project will expand on UNL's research in developing algal compounds of high value to society, such as specialty chemicals and drugs for humans or animals and will be directed by Donald Weeks, Maxcy Professor of Agriculture and Natural Resources.

The funding award is the major part of a five-year, $20 million Nebraska EPSCoR grant involving faculty from five universities: UNL, UNMC, UNK, Creighton and Doane College.

Ells, Mark **Center on Children, Families and the Law**

Midwest Child Welfare
Technical Assistance Implementation Center
$8,695,645 DHHS-ACF
9/1/08 – 9/29/13
Graef, Michelle Center on Children, Families and the Law

A five-year, $8.7 million grant from the U.S. Department of Health and Human Services Children's Bureau has helped establish the Midwest Child Welfare Technical Assistance Implementation Center. The center provides long-term consultation and support to child service agencies and tribes in Nebraska, Iowa, Illinois, Indiana, Kansas, Michigan, Missouri, Minnesota, Ohio and Wisconsin. It partners with state and tribal child welfare agencies to assess their inner workings and identify broad changes that could help them operate more efficiently and effectively to serve families and children; identify obstacles to helping families; build the capacity of state and tribal child welfare systems; and work toward significant changes to improve outcomes for children and families involved with these system. The ultimate goal is to ensure all children have safe, stable and permanent homes. Co-leaders of the project are Mark Ells and Michelle Graef of the Center on Children, Families and the Law.

Espy, Kimberly Andrews **Psychology**

Executive Function Development in Preschool Children
$3,223,929 NIH-NIMH
8/26/09 – 5/31/14
Wiebe, Sandra Psychology
Sheridan, Susan Educational Psychology/Nebraska Center for Research on Children, Youth, Families and Schools
Carlo, Gustavo Psychology
Schutte, Anne Psychology

With support from the NIH National Institute of Mental Health, Kim Espy, Charles Bessey Professor of psychology, is researching executive control in children, which has been shown to be a precursor to childhood externalizing disorders (including ADHD). The objective of this project is to determine how executive control relates to later functional outcomes, the next step toward clinical application. Espy's research will elucidate the fundamental mechanisms that go awry in childhood psychopathology and identify precursors for use in future work to tailor preventive interventions to those who stand to benefit most.

Farritor, Shane **Mechanical Engineering**

Track Stability Assessment & Data Transmission

$3,534,439 DOT-FRA

9/17/04 – 12/31/11

Turner, Joseph Engineering Mechanics

Nelson, Carl Mechanical Engineering

With more than $3 million in support from the Department of Transportation's Federal Railroad Administration, associate professor of mechanical engineering Shane Farritor and colleagues are continuing to develop techniques to assess track stability and related high-speed wireless communication to improve the safety of railroad operations. This funding supports research in three different areas of railroad track safety: 1) real-time measurement of track modulus from a moving car, leading to preventative maintenance strategies that relate track modulus data to specific track problems; 2) study of the measurement of rail longitudinal stress, to help reduce rail failure; and 3) study of the use of electrical energy from passing trains to power an efficient warning light system at grade crossings that are not equipped with warning light systems due to the lack of electrical infrastructure, thus reducing accidents at these "passive" grade crossings.

Goddard, Stephen **Computer Science and Engineering**

Drought Risk, Impact and Mitigation Information System

$6,407,473 USDA-RMA-FCIC

9/1/05 – 8/31/10

Wilhite, Donald Natural Resources

Stephen Goddard

Donald Wilhite

Stephen Goddard, professor and chair of the computer science department and director of UNL's Laboratory for Advanced Research Computing, is principal investigator in a $6.4 million joint effort by climatologists and computer scientists to bring cutting-edge computer science technologies to agricultural producers' age-old decision-making processes. The three-year partnership agreements are between the U.S. Department of Agriculture's Risk Management Agency, UNL's Department of Computer Science and Engineering and the UNL-based National Drought Mitigation Center. A separate $1 million cooperative agreement, directed by Donald Wilhite, professor in the School of Natural Resources and director of the National Drought Mitigation Center, supports continued work on a tool that uses satellite technology and climate information to detect vegetation stress on the ground for a much more detailed view of drought's scope and potential impact.

Harwood, David **Earth and Atmospheric Sciences**

ANDRILL: Investigating Antarctica's Role
in Cenozoic Global Environmental Change

$12,978,160 NSF

6/1/05 – 5/31/12

Levy, Richard Earth and Atmospheric Sciences

David Harwood, professor of earth and atmospheric sciences, leads an international team of scientists drilling beneath the Antarctic ice pack to unearth geological strata that could hold ancient clues to contemporary global warming trends. The National Science Foundation awarded $12.9 million to a consortium of five U.S. universities headed by UNL and Northern Illinois University. Dubbed ANDRILL (ANtarctic geological DRILLing), the project is administered by the ANDRILL Science Management Office headquartered at UNL. ANDRILL is backed by more than $30 million in funding, including $9.7 million in previous and ongoing national agreements to support operations and nearly $8 million from the other countries to support scientific research. Other members of the U.S. consortium making up the American portion of the ANDRILL program are Florida State University, The Ohio State University and the University of Massachusetts Amherst. The project also includes scientists from Germany, Italy and New Zealand.

Hogan, Tiffany **Special Education and Communication Disorders**

* Language Bases of Skilled Reading Comprehension

$4,344,886 ED-IES through The Ohio State University

7/1/10 – 6/30/15

Bovaird, James Educational Psychology/
Nebraska Center for Research on
Children, Youth, Families and Schools

Nelson, J. Ron Special Education and
Communication Disorders

A UNL team led by Tiffany Hogan in the Department of Special Education and Communication Disorders is collaborating with researchers at The Ohio State University, University of Kansas and Arizona State University to study the language bases of skilled reading comprehension in 4- to 8-year-old children. The UNL researchers are working with local school districts to assess reading comprehension in approximately 300 children aged 4 to 8. They also work with other teams to develop instructional materials and procedures to improve reading comprehension and will then examine the effectiveness of those materials and procedures. The primary goal is to determine the feasibility and efficacy of instruction focused on basic and higher-order language skills for improving children's reading comprehension in the short- and long-term.

Josiah, Scott — **Nebraska State Forest Service**

Cooperative Forestry Program

$3,151,115 — USDA-FS

10/1/09 – 9/30/14

The Nebraska Forest Service, has received more than $3.1 million from the U.S. Department of Agriculture through the U.S. Forest Service State and Private Forestry Program, which assists in implementing cooperative state forestry programs. The Nebraska Forest Service improves lives by protecting, enhancing and utilizing Nebraska's tree and forest resources by providing statewide technical assistance and financial support in five major program areas: Wildland Fire Protection, Forest Stewardship, Community Forestry and Sustainable Landscapes, Forest Health, and Forest Product Marketing and Utilization. Working with wide array of federal, state and local government partners, volunteer fire districts, non-profits, communities, landowners and businesses, these programs protect life, property and tree and forest health statewide.

Lewis, Jim — **Mathematics/Center for Science, Mathematics and Computer Education**

* Nebraska NOYCE: NSF Mathematics Teaching and Master Teaching Fellows Program

$3,000,000 — NSF

9/1/10 – 8/31/16

Fowler, David	Teaching, Learning and Teacher Education
Kauffman, Douglas	Educational Psychology
Papick, Ira	Mathematics/Center for Science, Mathematics and Computer Education
Smith, Wendy	Center for Science, Mathematics and Computer Education
Swidler, Scott	Teaching, Learning and Teacher Education

A team led by Jim Lewis, Aaron Douglas Professor of mathematics and director of UNL's Center for Science, Mathematics and Computer Education, has secured a six-year, $3 million grant from the National Science Foundation to improve math education. The grant is through NSF's Robert Noyce Teacher Scholarship program, which aims to encourage talented science, technology, engineering and mathematics majors and professionals to become K-12 mathematics and science teachers in "high-need" classrooms. The math program covers tuition, fees and a stipend for 16 students who are pursuing master's degrees from the Department of Teaching, Learning and Teacher Education and certification to teach math for grades 7-12. Fellowship recipients also receive a supplementary stipend from UNL while they teach for four years in a high-need school district. The grant also provides professional development and stipends for 24 strong, master's-degree-holding, K-12 teachers who commit to teaching in a high-need district for five years. The selected "master teaching fellows" take courses that will give them the skills they need to improve math education in their schools and school districts. The program builds on previous successful efforts to enhance mathematics teaching and learning in Nebraska schools, including the Math in the Middle Institute and NebraskaMATH.

NebraskaMATH

$9,235,407 NSF
1/1/09 – 12/31/13

Heaton, Ruth	Teaching, Learning and Teacher Education/ Center for Science, Mathematics and Computer Education
McGowan, Thomas	Teaching, Learning and Teacher Education
Stroup, Walter	Statistics
Edwards, Carolyn	Psychology/Child, Youth and Family Studies
Papick, Ira	Mathematics/Center for Science, Mathematics and Computer Education
Jacobson, Barbara	Lincoln Public Schools

Jim Lewis, professor of mathematics; Ruth Heaton, associate professor of teaching, learning and teacher education; Thomas McGowan, professor of teaching, learning and teacher education; Carolyn Edwards, professor of psychology; Ira Papick, professor of mathematics; and Barbara Jacobson, curriculum director for Lincoln Public Schools, are directing NebraskaMATH, a statewide program aimed at improving mathematics achievement for all students and narrowing the achievement gap for at-risk students in kindergarten through third grade. The program is supported by a $9.2 million grant from the National Science Foundation. NebraskaMATH is a partnership of UNL, public school districts in Omaha, Lincoln, Grand Island, and Papillion-La Vista and Nebraska's Educational Service Units. It builds on the success of UNL's Math in the Middle Institute by initiating new programs that focus on enhancing teachers' knowledge of mathematics and teaching methods.

Math in the Middle Institute Partnership

$5,900,000 NSF
8/1/04 – 7/31/11

Heaton, Ruth	Teaching, Learning and Teacher Education/ Center for Science, Mathematics and Computer Education
McGowan, Thomas	Teaching, Learning and Teacher Education
Jacobson, Barbara	Lincoln Public Schools

Lewis, Heaton, McGowan and Jacobson are co-leaders of a $5.9 million project titled the Math in the Middle Institute Partnership. The goal is to create the next set of leaders in middle school mathematics who will mentor peers and offer challenging courses to their students. With support from the grant, 156 teachers from across Nebraska are taking 12 challenging math and pedagogy courses and earning master's degrees from UNL. Middle school is a gateway to high school success, and efforts to improve middle school learning, especially in mathematics, show benefits at later stages in students' academic careers.

Lodl, Kathleen **Extension**

* Child Care and Youth Training and Technical Assistance Project
Undisclosed amount USDA-NIFA
7/1/10 – 6/30/15
Durden, Tonia Child, Youth and Family Studies

With support from the U.S. Department of Agriculture's National Institute of Food and Agriculture, UNL Extension will work with counterparts at Penn State University to develop and deliver content and provide programming for a nationwide educational program to help the children of military families succeed as they enter the school system. The three-year project, led by Kathleen Lodl, assistant dean of UNL Extension, aims to develop and deliver early childhood professional development in 13 states, focusing on children through age 12 from military families who live off base. The goals of the program are to improve the quality of existing home and center-based child care and school-age/afterschool programs and to increase the number of military-connected children with access to services by increasing the number of practitioners. The Child and Youth TTAP will provide training and technical assistance to increase the knowledge and skills of child care providers and youth program staff. Content will be delivered to early childhood educators both face-to-face and online.

Lu, Yongfeng **Electrical Engineering**

Multi-Energy Processing for Novel Coating Technologies
$4,138,000 DoD-ONR
4/10/09 – 4/9/12

With the support of the Department of Defense's Office of Naval Research, Lott Professor of Electrical Engineering Yongfeng Lu, is undertaking a project to investigate and delineate the underlying science behind multi-energy processing, an emerging surface coating technology that will make surface coatings stiffer, tougher and lighter for use in applications like thermal barriers, corrosion protection and interface tribology. Multi-energy processing can be used, for example, to deposit diamond and diamond-like carbon coatings in open atmosphere. The multi-energy processing approach is a marked improvement over conventional coating techniques that require high vacuum and high temperature. Lu will apply his fundamental understanding of multi-energy processing to develop a new multi-laser-beam, low-temperature, open-atmosphere, contamination-free surface coating technique to deposit hard coating materials from gaseous and polymeric precursors on various substrates, resulting in optimized efficiency, improved quality and minimal thermal stress.

Multi-Laser-Beam Open-Atmosphere Surface Coating Techniques Based on Precursor Excitation, Photodissociation and Controlled Cooling

$5,014,954 DoD-ONR-MURI

3/15/05 – 10/30/11

Zeng, Xiao Cheng Chemistry

With support from the Department of Defense, Yongfeng Lu is conducting a five-year study to investigate a new process to deposit a diamond or diamond-like coating on surfaces to create thermal barriers and increase corrosion protection. He is developing a coating technique that employs multiple laser beams to deposit the coating at room temperature in an open atmosphere – a significant improvement over conventional coating techniques that require low vacuum and high temperature. The resulting process will be more energy-efficient, improve the quality of materials on which the coating is deposited and minimize thermal stress.

Lubben, Bradley **Agricultural Economics**

North Central Risk Management Education Center

$3,506,736 USDA-CSREES

11/15/09 – 11/14/13

The North Central Risk Management Education Center provides program leadership and coordination for risk management education in the North Central Region (Kansas, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, Ohio, North Dakota, South Dakota and Wisconsin). It is one of four risk management education centers in the United States. They were established in 2001 to provide risk management education for agricultural producers to help them develop knowledge, skills and tools needed to make informed risk management decisions for their operations.

Meagher, Michael **Chemical and Biomolecular Engineering**

* Therapeutic Countermeasures against the Botulinum Neurotoxin in Support of USAMRIID Botulinum Therapeutic Program

$3,875,001 DoD-DTRA

8/16/10 – 8/15/13

Michael Meagher, Donald L. Othmer Professor of Chemical and Biomolecular Engineering, directs the Biological Process Development Facility, which provides clients with process research and early manufacture of new therapeutic molecules for clinical testing. Supported in part by funding from the Department of Defense, the BPDF also develops vaccines against biological warfare agents, as well as products that can be used as therapeutic countermeasures to treat people who have been exposed to biological agents.

Process Research, Development and Manufacturing of 5P12 RANTES

$3,793,418 Mintaka Foundation for Medical Research

3/1/10 – 3/31/12

Van Cott, Kevin Chemical and Biomolecular Engineering

Mintaka Foundation for Medical Research is supporting the BPDF's development of a process to produce a cream containing 5P12-RANTES, a protein widely considered to be one of the most promising candidates for use as a topical HIV prevention agent.

Paul, Prem **Research and Economic Development**

Nebraska Center for Energy Sciences Research

$5,000,000 Nebraska Public Power District

11/24/09 – 3/31/16

The Nebraska Center for Energy Sciences Research is a collaboration between UNL and the Nebraska Public Power District. The center was established in April 2006 to support energy research that produces new technologies, processes and systems that provide new or significantly enhanced renewable energy sources, improves the quality of life and boosts economic opportunity. The center fosters interdisciplinary collaboration among UNL faculty and with other research institutions, public-sector agencies and private sector companies with similar interests. The center supports both basic and applied research and has a broad mandate to explore a range of renewable energy opportunities (including biofuels, wind and solar energy), as well as opportunities for energy conservation.

ADVANCE-Nebraska: An Institutional Approach to Hiring, Retaining, and Promoting Women STEM Faculty at the University of Nebraska–Lincoln

$3,801,443 NSF
9/1/08 – 8/31/13

Holmes, Mary Anne	Earth and Atmospheric Sciences
McQuillan, Julia	Sociology
Manderscheid, David	Arts and Sciences
Fritz, Susan	Institute of Agriculture and Natural Resources
Chandra, Namas	Engineering

The National Science Foundation funds ADVANCE-Nebraska, a program intended to significantly increase the gender diversity of the UNL faculty, especially in the science, technology, engineering and mathematics (STEM) fields. The ADVANCE office, led by program director Mary Anne Holmes, professor of practice of earth and atmospheric sciences, coordinates recruitment and retention-enhancing activities, disseminates information to the campus and the academic community at large, and serves as liaison for the many groups engaged in diversity-focused activities on campus. Other ADVANCE efforts include initiatives related to flexible work arrangements to accommodate work-life issues of faculty; development of a dual career partner program; training programs to minimize the influence of bias on decision-making processes; and informal networking through professional development workshops and retreats. The five-year, $3.8 million grant is from NSF's ADVANCE program, which aims to increase participation and advancement of women in academic science and engineering careers.

Pope, Kevin — **Natural Resources**

Angler Behavior in Response to Management Actions on Nebraska Reservoirs

$3,147,776 Nebraska Game and Parks Commission
1/1/09 – 12/31/13

Kevin Pope, assistant unit leader-fisheries of the Nebraska Cooperative Fish and Wildlife Research Unit and associate professor in the School of Natural Resources, with support from the Nebraska Game and Parks Commission, will document the current participation levels of anglers in Nebraska's lentic systems. In particular, participation levels of generic angling groups will be quantified among specific water bodies, and a model will be developed to describe generic angler participation (spatial and temporal) within a region. Such a model will help managers better determine appropriate lake-specific management objectives, given the dynamic nature of angler participation, and will be important for increased effectiveness of angler recruitment and retention activities throughout the Midwest.

Rilett, Laurence — **Civil Engineering/ Nebraska Transportation Center**

Region 7 University Transportation Center

$7,629,000 — DOT-RITA

10/1/06 – 6/30/12

The U.S. Department of Transportation's Research and Innovative Technology Administration has designated UNL's Mid-America Transportation Center (MATC) as a regional university transportation center. MATC is a consortium with UNL as the lead institution with regional partners Kansas State University, University of Kansas, University of Missouri-Rolla and Lincoln University of Missouri. The Nebraska Department of Roads and the Kansas and Missouri Departments of Transportation also are key partners. Laurence Rilett, Keith W. Klaasmeyer Chair in Engineering and Technology in UNL's civil engineering department, directs the center. Its focus is "improving safety and minimizing risk associated with increasing multi-modal freight movement on the U.S. surface transportation system." MATC will focus on safety research related to rural transportation. Key safety research areas include traffic control, animal crashes, safer at-grade railway crossings and work zones, and the development of more effective and economical roadside crash barriers. The university transportation center program supports transportation research, education and technology transfer that promote scientific innovations in a variety of transportation modes and disciplines. Region 7 serves Iowa, Kansas, Missouri and Nebraska. It is one of 10 regional university transportation centers in the nation.

Rothermel, Gregg — **Computer Science and Engineering**

* Safeguarding End-User Military Software

$3,975,935 — DoD-AFOSR

9/1/10 – 8/31/14

Cohen, Myra	Computer Science and Engineering
Dwyer, Matthew	Computer Science and Engineering
Elbaum, Sebastian	Computer Science and Engineering
Sarma, Anita	Computer Science and Engineering
Srisa-An, Witawas	Computer Science and Engineering

A team of University of Nebraska–Lincoln software engineering researchers, headed by Gregg Rothermel, has received a nearly $4 million grant from the U.S. Air Force's Office of Scientific Research for a project to help find and fix faults in modern military systems. Military systems are a complex assembly of hardware systems, software systems and human beings all interacting to achieve an overall mission objective. The goal of UNL's ESQuaRed team (Laboratory for Empirically-based Software Quality Research and Development), part of the Department of Computer Science and Engineering, is to develop methods for modeling how people interact with software and hardware components and with each other in order to analyze the quality of the system as a whole. The information obtained as a result will be used to improve the dependability and safety of the systems.

Sellmyer, David — **Physics and Astronomy/Nebraska Center for Materials and Nanoscience**

* Research and Develop Nanoscale Magnetoelectronic, Sensor and Energy Materials and Devices

$5,864,300 — DoD-ARO

9/24/10 – 9/23/13

Cheung, Chin Li	Chemistry
Liou, Sy-Hwang	Physics and Astronomy
Shield, Jeffrey	Mechanical Engineering
Skomski, Ralph	Physics and Astronomy
Zeng, Xiao Cheng	Chemistry/Physics and Astronomy

David Sellmyer, professor of physics and astronomy, and colleagues in the Nebraska Center for Materials and Nanoscience, have received funding from the Army Research Office to support several efforts of high current interest in nanoscience and nanotechnology: 1) magnetoelectronic and sensor materials and devices, 2) nanomaterials for energy applications, and 3) development of a nanofabrication and characterization facility to support related research. Goals of the first project are to develop a high-sensitivity magnetoresistive sensor for both DC and high-frequency-band EMI magnetic field mapping; investigate new magnetic semiconductor systems for room-temperature spintronic applications; and research the fabrication of nanodot arrays for magnetic logic and information-processing operations. Research on nanomaterials for energy systems will involve fabrication of new nanomagnets for applications in motors and hybrid vehicles, as well as research on nanoparticles and nanoclusters on oxide structures likely to have applications in energy production and environmental science. The third general area of this project involves the purchase and installation of a variety of state-of-the-art nanofabrication and characterization tools to be housed in the new NIST ARRA-supported Nanoscience Metrology Facility.

Cooperative Agreement to Research and Develop High-Sensitivity Nanosensors for Defense Applications

$4,260,001 — DoD-ARO

9/25/09 – 9/24/12

Liou, Sy-Hwang	Physics and Astronomy
Skomski, Ralph	Physics and Astronomy
Lai, Rebecca	Chemistry
Dussault, Patrick	Chemistry

The Department of Defense's Army Research Office also supports research to develop high-sensitivity nanosensors for defense applications. The key to improving the sensitivity of the magnetic sensors is to understand and control sources of noise and to understand the fundamental limitations due to both noise and signal. This research will provide clear pathways for applications developers to improve signal and reduce noise and lead to development of new materials for improving future sensors. In particular, there is considerable room for improvement in ferromagnetic materials. The project has important applications in the areas of homeland security, health care, information technology and nanotechnology.

Sheridan, Susan

Educational Psychology/ Nebraska Center for Research on Children, Youth, Families and Schools

Nebraska Center for Research on Rural Education (R2Ed)

$9,997,852 ED-IES

7/1/09 – 6/30/14

Glover, Todd	Nebraska Center for Research on Children, Youth, Families and Schools
Kunz, Gina	Nebraska Center for Research on Children, Youth, Families and Schools
Nugent, Gwen	Nebraska Center for Research on Children, Youth, Families and Schools
Bovaird, James	Educational Psychology/ Nebraska Center for Research on Children, Youth, Families and Schools
Steckelberg, Allen	Teaching, Learning and Teacher Education
Trainin, Guy	Teaching, Learning and Teacher Education

Susan Sheridan, George Holmes University Professor of educational psychology, heads the National Center for Research on Rural Education, the only one of its kind in the U.S., funded by a five-year grant from the U.S. Department Education's Institute of Education Sciences. The center conducts cutting-edge rural education research to improve student learning in reading, science and math. Researchers identify how to best provide professional development for teachers to infuse state-of-the-art instructional strategies in their classrooms and enhance student learning. Research on rural education is limited and the center will provide the infrastructure, leadership and expertise to focus on unique rural needs.

Parent Engagement and Learning Birth to Five

$5,077,441 NIH-NICHD

9/26/03 – 7/31/10

Edwards, Carolyn Psychology

Susan Sheridan and co-investigator Carolyn Edwards, Willa Cather Professor of psychology, are leading a team of researchers from UNL and UNMC in a school-readiness project funded by three federal agencies. The team will launch and evaluate a comprehensive, community-based early education program for children aged 0-5. The goal is to increase children's readiness for school by teaching parents to build an effective relationship with their children at home and to be active participants in their children's learning when they enter school. The program is designed to enhance children's cognitive, behavioral and socioemotional well-being, which together set the stage for school readiness.

Stowell, Richard **Biological Systems Engineering**

* National Facilitation of Extension Programming in Climate Change Mitigation and Adaptation for Animal Agriculture

$4,290,618 USDA-NIFA

Heemstra, Jill Northeast Research and Extension Center

Koelsch, Richard Biological Systems Engineering/Extension

University of Nebraska–Lincoln Extension has been awarded $4.1 million from the National Institute of Food and Agriculture for a five-year project addressing climate change and animal agriculture issues, led by UNL Extension engineer Richard Stowell. Five other land-grant universities are partnering in the project that will be facilitated through the Livestock and Poultry Environmental Learning Center. The overall goal of the proposed project is for Extension, working with partner organizations, to effectively inform and influence livestock and poultry producers and consumers of animal products in all regions of the U.S. to move animal production toward practices that are environmentally sound, climatically compatible and economically viable.

Swanson, David **Computer Science and Engineering**

US CMS Tier 2 Center

$3,987,767 NSF through UCLA

5/1/05 – 12/31/11

Bloom, Kenneth Physics and Astronomy

Dominguez, Aaron Physics and Astronomy

David Swanson, research associate professor of computer science and engineering, directs the Holland Computing Center, which hosts a US CMS Tier 2 computing site, funded by the National Science Foundation's US Compact Muon Solenoid (CMS) Research Program through a subcontract with UCLA. Ken Bloom and Aaron Dominguez, both associate professors of physics at UNL, are collaborating with Swanson and HCC staff to analyze data from particle collisions at the Large Hadron Collider at the European Organization for Nuclear Research near Geneva, Switzerland. UNL researchers are involved in one of the two largest experiments. CMS is designed to investigate a wide range of physics, including the search for the Higgs boson, extra dimensions and particles that could make up dark matter. The experiment creates so much data that a 'tiered' hierarchy of computing facilities has been created to analyze it; UNL is a member of that hierarchy, hosting a subset of the data.

Tsymbal, Evgeny — **Physics and Astronomy/Nebraska Center for Materials and Nanoscience**

Materials Research Science & Engineering Center: Quantum Spin

$6,321,899 — NSF
9/1/08 – 8/31/14
Gruverman, Alexei — Physics and Astronomy

Evgeny Tsymbal, professor of physics and astronomy at UNL, leads the Materials Research Science and Engineering Center (MRSEC). The center was established in 2002 with a grant from the National Science Foundation and involves scientists from the Departments of Physics and Astronomy, Chemistry and Mechanical Engineering, and the School of Biological Sciences. MRSEC projects focus on fabricating and studying new magnetic structures and materials at the nanometer scale. The research has applications in advanced computing and data storage, handheld electronic devices, advanced sensors and future medical technologies.

Umstadter, Donald — **Physics and Astronomy**

High-Energy Laser for Detection, Inspection, & Non-Destructive Testing

$4,846,860 — DoD-AFOSR
5/15/08 – 5/14/11
Banerjee, Sudeep — Physics and Astronomy
Shadwick, Bradley — Physics and Astronomy

With support from the Department of Defense Air Force Office of Scientific Research, Donald Umstadter, Leland and Dorothy Olson Professor of Physics and Astronomy, will complete construction of a high-energy laser system at the UNL Extreme Light Laboratory capable of delivering a peak power of 1 petawatt. This project is critical to the development and performance of laser-driven radiation sources used for detection, inspection and non-destructive testing. The most immediate result will be a dramatic increase in the brightness and quality of the laser-driven electron beams and x-rays, with applications for detecting cracks in aging critical components and detecting special nuclear materials through large thicknesses of shielding.

Tunable, Monoenergetic Gamma-Ray Source for Identification of Embedded SNM

$3,904,359 — DHS-DNDO
3/1/07 – 8/31/11
Banerjee, Sudeep — Physics and Astronomy

With support from the Department of Homeland Security Domestic Nuclear Detection Office, Donald Umstadter is developing an x-ray source capable of distinguishing different target materials embedded in thick shielding, including special nuclear materials (SNM), and determining the target's size, shape and isotopic composition. By allowing rapid scanning of a large number of cargo containers, and enabling spot inspections on land and sea, this system would provide early detection capability,

and so greatly reduce the threat from SNM. As such, it has the potential to radically improve current cargo screening capabilities and transform the national security environment.

Velander, William **Chemical and Biomolecular Engineering**

cGMP Recombinant FIX and Oral Hemophilia B Therapy
$9,587,071 NIH-NHLBI
9/6/05 – 8/31/11
Van Cott, Kevin Chemical and Biomolecular Engineering

William Velander, Donald R. Voelte Jr. and Nancy A. Keegan Endowed Chair in Engineering, is principal investigator in a partnership funded by a $9.9 million grant from the National Institutes of Health/ National Heart, Lung and Blood Institute. The goal is to develop an abundant, pure, safe and effective therapy for Hemophilia B using recombinant human coagulation proteins produced in the milk of transgenic pigs. The project builds on innovative bioengineering technologies pioneered by Velander that enable improved intravenous and novel oral delivery of hemophilic factors to patients. Hemophilia B is a congenital bleeding disorder that causes pain, crippling injuries and early death. It can be treated by Factor IX, a blood protein, but the costs are prohibitive and most patients do not receive it. Velander's project isolates Factor IX in the milk of transgenic pigs.

Production and Purification of Fibrinogen Components for Production Fibrin Sealant of Hemostatic Dressing
$5,398,990 DoD-AMR
8/1/05 – 8/30/10
Van Cott, Kevin Chemical and Biomolecular Engineering

William Velander is also leading a project, funded by the Department of Defense, to develop processes to produce recombinant fibrinogen and other blood proteins for bandages and implant devices, and to conduct research and clinical trials on their effectiveness. The fibrinogen bandage is a potentially life-saving technology for patients who lose large amounts of blood. When applied, the bandage immediately begins clotting the wound, stemming blood loss. The technology could be used in battlefield or other applications where patients are hemorrhaging. Fibrinogen technology could also play a role in helping develop implantable devices with increased biological compatibility. Fibrinogen made from human plasma is scarce and expensive; Velander has developed a process for producing it from transgenic cattle bred with a human gene that enables them to produce fibrinogen.

Whitbeck, Les **Sociology**

Ojibwe Pathways Through the High School Years

$3,121,678 NIH-NIDA

9/3/05 – 6/30/12

Johnson, Kurt Sociology

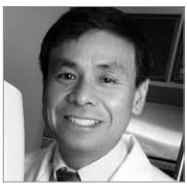
Les Whitbeck, John G. Bruhn Professor of Sociology, is coordinating a seven-year project, funded by the National Institute on Drug Abuse, to investigate risk and resilience for early onset substance use and abuse among pre-teen Native children in the Upper Midwest.

Wood, Charles **Biological Sciences/ Nebraska Center for Virology**

Nebraska Center for Virology

$5,565,196 NIH-NCRR

9/16/10 – 7/31/15



Charles Wood, Lewis Lehr/3M University Professor of Biological Sciences, is the director of the Nebraska Center for Virology. The center, funded by the National Institutes of Health, combines the expertise and facilities of Nebraska's leading biomedical research institutions: UNL, the University of Nebraska Medical Center and Creighton University. Center research addresses pathogenic and therapeutic aspects of some of the most devastating viral and neuroimmune disorders facing the global community, including AIDS, HIV-associated cancers, Alzheimer's disease and chronic infections caused by herpes viruses and a new class of infectious agents called prions.

Kaposi's Sarcoma & Human Herpesvirus in Africa

$3,424,172 NIH-NCI

7/16/10 – 4/30/15

Since the onset of the AIDS epidemic, Kaposi's sarcoma has become the most frequently diagnosed pediatric cancer in sub-Saharan Africa. It is associated with Human Herpesvirus 8 (HHV-8) and Kaposi's Sarcoma Herpesvirus. The project seeks to understand how these viruses are transmitted to children by studying children in Lusaka, Zambia. The goal is to establish the rates of transmission and to identify virologic, immunologic and ethnographic risk factors that predispose children to HHV-8 infection. It is anticipated that the information could be used to develop intervention strategies.

Yohe, John

Agronomy and Horticulture/ International Sorghum and Millet Collaborative Research Support Program

International Sorghum/Millet Collaborative Research Support Program (INTSORMIL)

$12,900,000 USAID
9/30/06 – 9/29/11

Heinrichs, Elvis — Entomology/INTSORMIL
Johnsen, Carolyn — Journalism and Mass Communications
Struthers, Amy — Journalism and Mass Communications

John Yohe, associate professor in the Department of Agronomy and Horticulture, directs the International Sorghum/Millet (INTSORMIL) Collaborative Research Support Program. INTSORMIL is a collaborative international organization that supports research focused on improving nutrition and increasing income in developing countries and the United States. Scientists from U.S. land grant universities collaborate with scientists in host countries in the development of technology to improve production and utilization of sorghum and millet and facilitate natural resource management. Their work is done in Africa, Eurasia, Latin America and the United States.

Transfer of Sorghum & Millet Production, Processing & Marketing Technologies Program in Mali

$5,250,000 USAID
10/1/07 – 9/30/12

John Yohe, with support from the U.S. Agency for International Development, is directing this project designed to improve sorghum and millet farmers' productivity and incomes in targeted areas of Mali by moving sorghum and millet production technologies onto farmers' fields, linking farmers' organizations to food and feed processors, and commercializing processing technologies. Ultimately, the project's goal is to improve the supply chain from the farm level to the consumer.

Interdisciplinary Team

Infrastructure for the Enhancement of Systems Biology Research & Development at UNL

$4,329,877 NSF
7/1/07 – 7/31/10

This grant supports multi-campus collaborative research between biologists and engineers for creating a strategic research niche in epigenetics – the study of heritable changes in gene functions not associated with changes in DNA sequence. Much of what comprises the complexity of multi-cellular organisms is programmed within the network of interacting molecules – protein, RNA and DNA – known collectively as chromatin. Engineers are creating nano-devices for delivering molecules into cells for better understanding the role of chromatin in cell function and its response to the environment.

Awards of $1 Million to $2,999,999

Active awards, July 1, 2010-June 30, 2011

* Indicates new in 2010-2011

Alfano, James — **Plant Pathology/ Center for Plant Science Innovation**

Suppression of Innate Immunity by ADP Ribosyltransferase Type III Effectors

$1,797,433 — NIH-NIAID

Azizinamini, Atorod — **Civil Engineering/ Nebraska Transportation Center**

Bridges for Service Life Beyond 100 Years: Innovative Systems

$1,999,637 — NAS-TRB

Tadros, Maher — Civil Engineering

Baenziger, P. Stephen — **Agronomy and Horticulture**

* Improving Barley and Wheat Germplasm for Changing Environments

$1,261,597 — USDA through University of California, Davis

Lee, Donald — Agronomy and Horticulture

Regassa, Teshome — Agronomy and Horticulture

Waters, Brian — Agronomy and Horticulture

Barker, Bradley — **4-H Youth Development**

Scale-UP: National Robotics in 4-H: Workforce Skills for the 21st Century

$2,498,908 — NSF

Nugent, Gwen — Nebraska Center for Research on Children, Youth, Families and Schools

Adamchuk, Viacheslav — Biological Systems Engineering

Barycki, Joseph — **Biochemistry**

Structural Insights into Redox Homeostasis

$1,065,673 — NIH-NIGMS

Becker, Donald — **Biochemistry**

Role of Proline in Redox Homeostasis and Apoptosis

$1,089,521 — NIH-NIGMS

Mechanistic Studies of Functional Switching in the PutA Flavoprotein

$1,215,139 — NIH-NIGMS

Blum, Paul — **Biological Sciences**

Uranium Mobilization by Extremely Thermoacidophilic Archaea
$513,000 — DoD-DTRA through North Carolina State University

REU Site: Integrated Development of Bioenergy Systems
$279,592 — NSF
Cerutti, Heriberto — Biological Sciences/ Center for Plant Science Innovation

Biohydrogenesis in the Thermotogales
$525,000 — DOE through North Carolina State University

Bobaru, Florin — **Engineering Mechanics**

* Predictive Models for Dynamic Brittle Fracture and Damage at High-Velocity Impact in Multilayered Targets
$257,020 — DoD-ARO

Adaptivity in Peridynamics for Composite Plates
$305,278 — DOE–Sandia National Laboratories

Brand, Jennifer — **Chemical and Biomolecular Engineering/ Nebraska Center for Materials and Nanoscience**

Novel Rare-Earth Semiconductors for Solid-State Neutron Detectors

$767,293 — DoD-DTRA

Belashchenko, Kirill — Physics and Astronomy

Dowben, Peter — Physics and Astronomy

Direct Energy Conversion with Heteroisomeric Boron Carbide Diode Devices

$238,398 — CIA

Brisson, Jennifer — **Biological Sciences**

Contrasting Environmental and Genetic Controls of Alternative Phenotypes

$782,884 — NIH-NIEHS

Brown, Deborah — **Biological Sciences**

* Vaccine Strategies that Target Cytolic CD4 T Cells to the Lung

$401,110 — NIH-NIAID

Brown, Mary — **Natural Resources**

Advancing Tern and Plover Common Sense Conservation into the Future

$270,000 — Nebraska Environmental Trust

Bulling, Denise — **Public Policy Center**

* Developing Nebraska's Homeland Security Planning Capacity

$356,500 — DHS through Nebraska Military Department-NEMA

* Tri-County Urban Area Security Initiative (UASI) Planning

$200,000 — DHS through Nebraska Military Department-NEMA

Cady, Daniel — **Extension**

Nebraska Technology Transfer Center at UNL

$817,522 — Nebraska Department of Roads

Cahoon, Edgar — **Biochemistry/ Center for Plant Science Innovation**

Development of Bio-Based Lubricants in a Dedicated Industrial Oilseed Crop
$500,000 — USDA-NIFA
Clemente, Thomas — Agronomy and Horticulture/ Center for Biotechnology/ Center for Plant Science Innovation

Probing the Metabolic and Physiological Significance of Sphingolipid Long-Chain Base Desaturation in Plants
$550,500 — NSF

Biochemical Genomics: Quizzing the Chemical Factories of Oilseeds
$695,986 — NSF through Washington State University

Center for Metabolic Channeling for Enhanced Biofuel Systems
$852,403 — DOE through Donald Danforth Plant Science Center

BioCassava Plus
$298,442 — Bill & Melinda Gates Foundation through Donald Danforth Plant Science Center

Metabolic Profiling to Understand the Biochemical Basis for Genetic Enhancement of Soybean
$200,000 — Nebraska Soybean Board

Cantrell, Randolph — **Center for Applied Rural Innovation**

Marketing Rural Communities to Attract and Retain Workers
$498,558 — USDA-NRICGP
Burkhart-Kriesel, Cheryl — Panhandle Research and Extension Center

Carlo, Gustavo — **Psychology**

* An Ecological Model of Latino Youth Development
$315,000 — NSF
Buhs, Eric — Educational Psychology
Carranza, Miguel — Sociology/Institute for Ethnic Studies

Early Career Awards

Active awards, July 1, 2010-June 30, 2011
*** Indicates new in 2010-2011**

NSF CAREER Grants

National Science Foundation CAREER grants are awarded only to untenured junior faculty. These grants recognize research and education "of the highest quality and in the broadest sense." CAREER grants are unique in requiring a four- to five-year plan for the scientist's development as both a researcher and an educator.

$400,000 NSF

K Awards

National Institutes of Health K Awards support intensive development experiences leading to research independence in one of the biomedical, behavioral or clinical sciences. The proposed career-development experience must be in a research area new to the applicant and/or one in which an additional supervised research experience will substantially add to the applicant's research capabilities. Candidates must provide a plan for achieving independent research support by the end of the award, and must be willing to spend a minimum of .75 FTE on research and career development during the award project period.

Angeletti, Peter
Biological Sciences
Maintenance of Human Papilloma Virus Genes
$613,512 NIH-NCI

Peterson, Daniel
Food Science and Technology
Adaptive Immune Response to Symbiotic Bacteria as a Mediator of Gut Homeostasis
$379,890 NIH-NIAID

Sayood, Khalid
Electrical Engineering
Identification of Biological Materials of Unknown Origin
$764,005 NIH-NIAID

Young Investigator Research Program (YIP)

The Department of Defense bestows its Young Investigator Research Program (YIP) award on scientists and engineers at research institutions across the United States who have received Ph.D. or equivalent degrees in the last five years and show exceptional ability and promise for conducting basic research. The objective of the program is to foster creative basic research in science and engineering, and enhance early career development of outstanding young investigators. Those selected receive the grants over a three-year period.

Cohen, Myra
Computer Science and Engineering
Just-Enough-Testing: Adaptive Targeted Testing of Software Product Lines
$316,551 DoD-AFOSR

Arts and Humanities Awards
$50,000 or more

Active awards, July 1, 2010-June 30, 2011
*** Indicates new in 2010-2011**

Awakuni-Swetland, Mark — **Anthropology/Ethnic Studies**

Omaha and Ponca Digital Dictionary

$348,800 — NEH

9/1/08 – 8/31/12

Walter, Katherine — University Libraries/Center for Digital Research in the Humanities

Mark Awakuni-Swetland, assistant professor of anthropology, and colleagues are creating a comprehensive Omaha and Ponca digital dictionary that will be available online for native communities, students, researchers and the public. The National Endowment for the Humanities funds this work through a joint NEH-National Science Foundation-Smithsonian Institution "Documenting Endangered Languages" initiative. It's also a "We the People" project, a special NEH recognition for model projects advancing the study, teaching and understanding of American history and culture. This project will provide extensive information on the Omaha and Ponca language and will be far more robust and usable than existing resources.

Behrendt, Stephen — **English**

The Aesthetics of British Romanticism, Then and Today

$124,498 — NEH

10/1/09 – 9/30/10

Stephen Behrendt, professor of English, received support from the National Endowment for the Humanities to offer a five-week summer seminar for college teachers called "the Aesthetics of British Romanticism, Then and Today." Participants examined the factors that influenced literary judgments in Romantic-era Britain (c. 1780-1835) leading to the marginalization or exclusion of women, working-class writers and others, and ultimately sanctioning a limited and unrepresentative "canon" of writers. The seminar explored the complex relations among art, culture, class and socio-political rhetoric through historical and modern perspectives that consider "art" as a negotiated ground among its producers, consumers and commentators.

Engen-Wedin, Nancy — **Teaching, Learning and Teacher Education/Lied Center for Performing Arts**

The Teaching Artist Initiative (Nebraska)

$50,000 — Dana Foundation

1/1/09 – 2/28/11

Nancy Engen-Wedin, lecturer in the Department of Teaching Learning and Teacher Education and ArtsREACH coordinator with the Lied Center for Performing Arts, is using funding from the Dana Foundation to support the Nebraska Teaching Artist Initiative. This program helps community and teaching artists plan artist residencies for K-12 students in Nebraska's rural school districts.

Graybill, Andrew — **History**

* A Mixture of So Many Bloods: A Family Saga of the American West

$50,400 — NEH

8/1/10 – 7/31/11

Andrew Graybill, associate professor of history, has been awarded a prestigious National Endowment for the Humanities Fellowship to support completion of his book, *A Mixture of So Many Bloods: A Family Saga of the American West,* to be published in 2012. The book follows five members of three generations of a mixed-blood Montana family from approximately 1850 to 1950. Peoples of mixed ancestry spoke English and indigenous languages and helped smooth relations between native peoples and Anglo newcomers. After about 1870, with the arrival of more white settlers and the development of mining and logging industries, many mixed-blood people were marginalized and pushed onto reservations. Using federal records, archived personal papers, newspaper stories and clippings and catalogs from museum exhibits, Graybill has been able to recreate the history of one remarkable family, which in turn tells the story of the evolving American frontier.

Kooser, Ted — **English**

American Life in Poetry Project

$236,800 — Poetry Foundation

1/1/05 – 12/31/11

The Poetry Foundation, in partnership with the Library of Congress, supports the American Life in Poetry project, an initiative of Ted Kooser, the 2004-2006 Poet Laureate Consultant in Poetry to the Library of Congress. American Life in Poetry is a free weekly column for newspapers and online publications featuring a poem written by a contemporary American poet, chosen by Kooser, with a brief introduction written by Kooser. The sole mission of this project is to promote poetry. The Poetry Foundation funds the project, with administrative support provided by the UNL English department, where the project office is located.

Price, Kenneth — **English/Center for Digital Research in the Humanities**

Walt Whitman's Civil War Writings

$300,000 — NEH
7/1/08 – 6/30/11

Walt Whitman and Reconstruction

$86,142 — National Historical Publications and Records Commission
9/1/10 – 8/31/11

Ken Price, professor of English and Hillegass University Professor of 19th Century American Literature, is primary investigator for grants from the National Endowment for the Humanities and the National Historical Publications and Records Commission. With these grants, the Walt Whitman Archive is creating a comprehensive edition of the Civil War writings of Walt Whitman. The War profoundly shaped *Leaves of Grass,* the first masterpiece of American poetry, and Whitman extensively depicted and analyzed the Civil War in journals, notebooks, letters, essays, memoirs and manuscript drafts. The hundreds of documents that give voice to Whitman's experience of the war will be electronically edited, arranged and published. In addition to making these documents freely available, this work will help to model for other scholars best practices in creating, publishing and sustaining electronic editions. The project will provide scholars and students a site where they can read, evaluate and experience a set of texts that provide unique insight into the American experience of the Civil War.

Seefeldt, William — **History/Center for Digital Research in the Humanities**

William Cody Research Project

$131,374 — Buffalo Bill Historical Center
7/1/09 – 8/31/12

William Seefeldt, assistant professor of history, has received support from the Buffalo Bill Historical Center to develop a series of thematic digital datasets that can be used to provide historical context for the center's Cody Papers project. The digital datasets will include the rosters of the various Wild West shows from published programs and other business records and biographical sketches of the participants, including the Show Indians. They will be marked and encoded for inclusion in the larger Buffalo Bill digital archive collection hosted by BBHC. Other research projects may include a database containing encoded full-text transcriptions of newspaper coverage of the tour stops throughout North America and Europe and a geospatial database of Cody's travels and residences throughout his lifetime that could be used to create maps and visualizations by date or location.

Shear, Donna **University of Nebraska Press**

* Recovering Languages and Literacies of the Americas:
A Collaborative Initiative

$781,900 Andrew W. Mellon Foundation

1/3/11 – 11/30/14

This three-year, $781,900 grant from the Andrew W. Mellon Foundation gives the University of Nebraska Press, along with the University of Oklahoma Press and the University of Texas Press, resources to help linguistic scholars publish indigenous language grammars and dictionaries, literacy studies, ethnographies and other linguistic monographs. Twenty-seven books – nine from each press – will be published on the grammar and literacy of endangered languages. The initiative also aims to generate broader interest in linguistic monographs and to find more efficient, cost-effective ways to produce monographs. These publications are important resources for academics in the fields of linguistics, indigenous studies and social sciences, and to communities wishing to preserve their language and culture, said Donna Shear, University of Nebraska Press director, who is leading this collaboration.

Thomas, William **History/Center for Digital Research in the Humanities**

Railroads and the Making of Modern America—
Tools for Spatio-Temporal Correlation, Analysis and Visualization

$99,493 NEH

1/1/10 – 8/31/11

Ian Cottingham Computer Science and Engineering

Stephen Scott Computer Science and Engineering

With support from the National Endowment for the Humanities, history professor William Thomas plans to develop useful tools for spatio-temporal visualization of data on the railroad system and the relationships among them. Because the railroad "system" and its spatio-temporal configuration appear differently from locality to locality and region to region, it's important to adjust how the system is "located" and "seen." By applying data mining and pattern recognition techniques, software systems can be created that dynamically redefine the way spatial data are represented. Utilizing processes common to analysis in computer science, researchers will develop a software framework that allows these embedded concepts to be visualized and further studied.

Walter, Katherine **University Libraries/Center for Digital Research in the Humanities**

* Charles E. Cather Collection of Willa Cather Materials
$2,000,000 Charles E. Cather
3/14/11 – 6/30/12

Charles Cather, an heir to his aunt Willa Cather, left an estate gift to the University of Nebraska that consists of manuscripts, letters, medals and inscribed first editions of her work. Also included are hand-written scenes from Cather's last, unpublished novel, *Hard Punishments*. The estimated value of the donation is $2 million. Willa Cather graduated from the university in 1895 and died in 1947. Her novels, including *O Pioneers*, *My Antonia* and *Song of the Lark*, were based on frontier life on the Great Plains. She won the Pulitzer Prize in 1922 for *One of Ours*. The University of Nebraska has the largest Cather archive in the world.

* Center for Digital Research in the Humanities Endowment
$500,000 NEH
12/21/10 – 7/31/14
Price, Kenneth English/Center for Digital Research in the Humanities

The National Endowment for the Humanities has awarded a four-year, $500,000 challenge grant to the Center for Digital Research in the Humanities, led by Katherine Walter, UNL Libraries chair of digital initiatives and collections, to permanently support some of the center's key programs. The grant will support two graduate student assistantships annually, an ongoing two-year postdoctoral fellowship and the Nebraska Digital Workshop, the center's signature event. The workshop brings the nation's top early career digital humanities scholars to UNL to showcase their research, get feedback from senior faculty and network with potential research partners and employers.

* Major Railroad Archival Collections
$208,481 Council on Library and Information Resources
12/16/10 – 12/31/13
Bolin, Mary University Libraries
Mering, Margaret University Libraries

Walter also is leading UNL Libraries' "Major Railroad Archival Collections" project. Funded by a three-year, $208,500 grant from the Andrew W. Mellon Foundation in cooperation with the Council of Library and Information Resources, the initiative will make the archival collections from four major railroads (Union Pacific, Charles J. Kennedy, Chicago Burlington and Quincy Lines West, and Val Kuska Burlington Northern) available through a single Web portal. The project's goal is to enhance knowledge of railroad history and make it easier for historians and railroad aficionados to link multiple information sources that show how major railroad lines influenced the growth of U.S. cities and towns during the 19th century.

centerNet: Cyberinfrastructure for Digital Humanities
$50,000 NEH
9/1/09 – 8/31/12

The National Endowment for the Humanities also is supporting construction of a technical infrastructure and institutional framework that will enable centerNet to play a vital role in developing both national and international cyberinfrastructure and become a stable, self-supporting organization. Through centerNet, digital humanities centers can collaborate and maximize their capacity for sparking further innovation in the digital humanities.

National Digital Newspaper Program: Nebraska
$563,012 NEH
7/1/07 – 8/31/12
Wunder, John — Journalism and Mass Communications
Mering, Margaret — Center for Digital Research in the Humanities
Pytlik Zillig, Brian — Center for Digital Research in the Humanities

Katherine Walter, who co-directs UNL's Center for Digital Research in the Humanities, leads the Nebraska Digital Newspapers Project, through which about 100,000 pages of Nebraska newspapers from 1880 through 1910 will be digitized for inclusion in the Library of Congress' national "Chronicling America" website. UNL Libraries is partnering with the College of Journalism and Mass Communications and the Nebraska State Historical Society on this "We the People" grant. Nebraska is one of nine states selected in the early phases of this project, which eventually will include all 50 states. "We the People" grants recognize model projects that advance the study, teaching and understanding of American history and culture.

Winkle, Kenneth — History

* Civil War Washington Collaborative Research
$220,000 NEH
7/1/10 – 6/30/13
Lawrence, Susan — History
Price, Kenneth — English/Center for Digital Research in the Humanities

History professor Kenneth Winkle received a three-year, $220,000 collaborative research grant from the National Endowment for the Humanities to expand digital research on Civil War-era Washington, D.C., especially its pivotal role in the antislavery and civil rights movements. The Civil War Washington project examines the war's impact on the nation's capital. The grant received "We the People" designation, which recognizes projects that advance the study, teaching and understanding of American history and principles. The grant will enable researchers to study how race, slavery and emancipation changed the capital a century and a half ago. Researchers will investigate how African Americans living in Washington during the Civil War gained their freedom, won the fight for the Union and against slavery and achieved legal equality.

Arts and Humanities Awards
$5,000-$49,999

Active awards in 2010
* Indicates new in 2010

Ducey, Carolyn — **Textiles, Clothing and Design/ International Quilt Study Center**

* The Ardis and Robert James Collection Conservation
$25,000 — Institute of Museum and Library Services

Elias Rowley, Kristen — **University of Nebraska Press**

Literary Publishing at the University of Nebraska Press
$20,000 — NEA

Engen-Wedin, Nancy — **Teaching, Learning and Teacher Education/Lied Center for Performing Arts**

Lied Center Community Engagement Touring Grant – MAAA
$12,500 — Mid-America Arts Alliance

Umoⁿhoⁿ Cultural Arts Program
$15,000 — Kennedy Center for Performing Arts

Hanson, Marin — **International Quilt Study Center**

* Quilt Index Internationalization Collaborative Planning
$9,879 — Michigan State University
Crews, Patricia — International Quilt Study Center

Jewell, Andrew — **University Libraries/Center for Digital Research in the Humanities**

The Crowded Page
$49,577 — NEH

Ose, Maureen — **International Quilt Study Center**

Lancaster County Visitor Improvement Fund - Marseille Exhibition Promotion
$10,000 — Lancaster County

Richmond, John — **Music**

Recording Project Christopher Mark
$6,000 — Various Sources

2010 Honors Jazz Weekend & Summer Camp
$12,000 — Berman Music Foundation
Haar, Ora — Music

Seefeldt, William — **History**

Sustaining Digital History
$49,116 — NEH
Thomas, William — History

Wahlqvist, Petra — **Lied Center for Performing Arts**

* Exploring New Perspectives on Diversity through World-Class Performances in Nebraska
$25,000 — NEA

* Arts across Nebraska Extension
$25,000 — Nebraska Arts Council

Creative Campus Innovations Continuation
$20,000 — Association of Performing Arts Presenters

Weiss, Wendy — **Textiles, Clothing and Design**

TSA Textile Exhibitions Outreach
$8,300 — Woods Charitable Fund

Hillestad Textiles Gallery
$37,170 — Friends of the Hillestad Textiles Gallery

Yoon, Hye Yung — **Music**

Commissioning/USA Meet the Composer: Amerindia
$10,000 — Meet the Composer
Sirota, Jonah — Music
Fischer, Rebecca — Music
Beaver, Gregory — Music

NUtech VENTURES™

Pioneering Partnerships for Innovation™

NUtech Ventures connects innovators with the people and resources they need to start companies, develop products and create jobs. If you're interested in starting a company, licensing your technologies or securing developmental funding for your leading-edge research, we can help you connect with industry partners, entrepreneurs and investors. Because we're commercialization agents and not just brokers of intellectual property, we represent your interests to external partners. We add value to your research by enabling a fully collaborative process for joint creation, development and commercialization so your technologies can change the world.

We would like to recognize the following UNL inventors and creators whose technologies have formed the basis of UNL startup companies and licensing agreements with our industry partners between July 1, 2010, and June 30, 2011.
(UNL faculty and staff are indicated in red):

2010-2011 STARTUPS

David J. Andrews, Ismail M. Dweikat, John Rajewski, all Agronomy and Horticulture; Linda Pavlish
Technology: Nebraska Bioenergy Millet Hybrid (NBMH)

Chin Li Cheung, Chemistry; Joseph Reese Brewer, Rare Earth Solar LLC
Technology: Rare-earth Based Low Work Function Electrodes

Song Ci, Hamid Sharif-Kashani, Jiucai Zhang, all Computer and Electronics Engineering; **Mahmoud Alahmad Hamid,** Durham School of Architectural Engineering and Construction
Technology: Adaptive Reconfigurable Battery: Method and Apparatus

---

Shane M. Farritor, Amy Catherine Lehman, Stephen R. Platt, Abigail Visty, all Mechanical Engineering; **Jason James Dumpert,** Biological Systems Engineering; Mark Rentschler, Virtual Incision Corporation; Dmitry Oleynikov, UNMC; Adnan Hadzialic; Nathan Wood

Technologies: In Vivo Robot; Untethered, Radio-Controlled, Laparoscopic Video, Diagnostic, Surgical Miniature Robotic Device; Imaging Robot; Method and Robotic Device for Drug Delivery; In Vivo Tilting Adjustable-Focus Surgical Camera Robot; Winch Component for Robotic Device; Motorless Magnetically Couplable Robotic Device; Mechanical Robot Attachment; Multifunctional Operation Component; Hydraulic Actuation and Locking Tube; Methods and Devices for Inflation and Attachment; Gear Drive Method; In Vivo Environmental Sensor; Magnetically Manipulated Robotic Camera and Related Methods; Cavity Inflation; Modular Robotic Devices and Methods; Medical Devices Having a Positionable Camera; Triangle Robot; Needle Attachment Creates Stable Platform for Surgical Devices Inside the Peritoneal Cavity Throughout Surgical Procedure; Methods, Systems and Devices for Surgical Visualization and Device Manipulation

---

David B. Marx, Statistics; **Ashok Samal,** Computer Science and Engineering; Kendra Schmid, UNMC

Technology: Computer Algorithm to Assess Facial Attractiveness

---

Joseph A. Turner, Engineering Mechanics; **Richard Arnold, Shane M. Farritor, Sheng Lu,** all Mechanical Engineering; Chris Norman

Technologies: A Method for Identifying Trends In Repeated Measurements as Applied to Measurements of Railroad Track Quality; System and Methods to Determine and Monitor Changes in Microstructural Properties; Laser Measurement of Track Modulus from Moving Railcar; Stress Determination in Heterogeneous Materials; Measurement of Vertical Track Modulus Using Space Curves; A System to Measure Vertical Rail Deflection

2010-2011 INTELLECTUAL PROPERTY LICENSE AGREEMENTS

P. Stephen Baenziger, Agronomy and Horticulture
Technology: NE96T441 (NE441T) Triticale 'Grow Green Plus'

P. Stephen Baenziger, Greg Dorn, Richard Little, Mitchell Montgomery, all Agronomy and Horticulture; Jerry Bohlman
Technology: Hard red winter wheat cultivar NE01481 "McGill"

P. Stephen Baenziger, Greg Dorn, Richard Little, Mitchell Montgomery, all Agronomy and Horticulture; Jerry Bohlman; Chris Hoagland, Purdue University
Technology: Genetic Segregating Materials for Wheat Breeding, generations F3, F4, and F5, 2,743 lines
Technology: Genetic Materials in the UNL Wheat Breeding Program, generations F2 to F9
Technology: Segregating Populations and Experimental Lines
Technology: Genetic Materials Containing Clearfield Technology in the UNL Wheat Breeding Program, generations F2 to F9
Technology: Genetic materials in the UNL Wheat Breeding Program, generation F2, 966 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F6 (2010), 69 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F6 (2010), 84 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F6 (2010), 80 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F6 (2010), 20 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F6 (2010), 37 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 23 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 17 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 7 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 6 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 7 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 10 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 7 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F7 (2010), 5 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F8 (2010), 4 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F8 (2010), 3 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F8 (2010), 2 lines
Technology: Intermediate-Stage Wheat Germplasm, generation F8 (2010), 3 lines

Kenneth G. Cassman, Daniel T. Walters, both Agronomy and Horticulture; Haishun Yang, Monsanto; Achim Dobermann, International Rice Research Institute
Technology: Hybrid-Maize: A Simulation Model for Corn Growth and Yield (2 licenses)

Ruben Donis, Veterinary and Biomedical Sciences; Ventzislaw Vassilev
Technology: Method for Engineering the Genome of BVDV for Vaccine Development and Analysis of Virus Replication

George L. Graef, Leslie Korte, Travis L. Wegner, Dennis White, all Agronomy and Horticulture
Technology: Soybean Variety U07-135478R
Technology: Soybean Variety U01-135601R

Haorong Li, Architectural Engineering
Technology: Optimal Coordination Control and Soft Repair of Multi-RTU

Donald Rundquist, School of Natural Resources
Technology: CALMIT Software

Blair Siegfried, Murugesan Rangasamy, both Entomology
Technology: RNA Interference as a Tool to Control Western Corn Rootworm Adults and Screening of Gene Function

2010-2011 OPTION AGREEMENTS

P. Stephen Baenziger, Greg Dorn, Richard Little, Mitchell Montgomery, all Agronomy and Horticulture; Jerry Bohlman; Chris Hoagland, Purdue University
Technology: Genetic Materials Containing Clearfield Technology in the UNL Wheat Breeding Program, generations F2 to F9

Pratik N. Bhandari, Milford A. Hanna, both Biological Systems Engineering
Technologies: Preparation of Starch Ethers, Particularly the Sodium Salt of the Carboxymethyl Ether of Starch Using Reactive Extrusion; A Process for Preparing Carboxymethyl Cellulose Using an Extruder as a Chemical Reactor; Preparation of Starch Esters Using Extruder as a Chemical Reactor; Preparation of Cellulose Esters Using Extruder as a Chemical Reactor

Chin Li Cheung, Chemistry; Joseph Reese Brewer, Rare Earth Solar LLC
Technology: Rare-earth Based Low Work Function Electrodes

Song Ci, Hamid Sharif-Kashani, Jiucai Zhang, all Computer and Electronics Engineering; **Mahmoud Alahmad Hamid,** Durham School of Architectural Engineering and Construction
Technologies: Adaptive Reconfigurable Battery: Method and Apparatus; Method and Apparatus on Model-based Cell Tracking; Non-uniform Cell Interaction Analysis in Terms of SOC Modeling; An Enhanced Circuit-based Model for Single-cell Battery; A Circuit-based Model of Multi-cell Battery

Chris Henry, Biological Systems Engineering; Ron Sheffield
Technologies: Mask Scentometer; Infinitely Variable Field Olfactometer Meter

Carl A. Nelson, Xiaoli Zhang, both Mechanical Engineering
Technology: System for Controlling Minimally Invasive Surgical Tools

Sheila E. Scheideler, Animal Science; Jodi A. Ash
Technology: Eggshell Derived Monocalcium and Dicalcium Phosphate

Blair Siegfried, Murugesan Rangasamy, both Entomology
Technology: RNA Interference as a Tool to Control Western Corn Rootworm Adults and Screening of Gene Function

CREATIVE ACTIVITY

Faculty who created, performed or produced creative works in fine and performing arts and architecture, nationally or internationally, July 1, 2010-June 30, 2011

Submitted by faculty, chairs/heads or deans

John R. Bailey — **Music**

Guest artist, flute. Rochester Flute Association's Annual Flute Fair, Rochester, NY.

Guest artist, flute. Hot Springs Fall Flute Seminar, Hot Springs, AR.

Conductor, National High School Honors Flute Choir. National Flute Association Annual Convention, Anaheim, CA.

Carolyn Barber — **Music**

Conductor, New York All-State Wind Ensemble. Eastman Theatre, Rochester, NY.

Diane C. Barger — **Music**

Performer, Moran Woodwind Quintet. College Music Society National Conference, Minneapolis, MN.

Alisa S. Belflower — **Music/Theatre and Film**

Performer, cast recording of "The Giver." NAMT Festival of New Musicals, New York, NY.

Michael Burton — **Textiles, Clothing and Design**

Artist, digital video, "Blink!" Denver Art Museum, Denver, CO.

Artist, digital video, "The Ancient Mariner" and "Frequency." Videoholica, Varna, Bulgaria.

Anthony J. Bushard — **Music**

Artist, multimedia lecture, White Picket Harmonies: "Aaron Copland's Influence on Thomas Newman's Suburban Scoring." National Meeting of the College Music Society, Minneapolis, MN.

Artist, multimedia lecture, "The Curious Case of Paseo Hall: Newspaper Coverage of the Kansas City Jazz Scene during the 1930s." National Meeting of the College Music Society, Minneapolis, MN.

Dana Fritz — **Art and Art History**

Artist, photography, "Terraria Gigantica: The World Under Glass." Barnabee Gallery, Kalamazoo, MI.

Artist, photography, "Terraria Gigantica: The World Under Glass." Thinking Photography: Five Decades at the Kansas City Art Institute, Nelson-Atkins Museum of Art, Kansas City, MO.

Eric Richards **Music**

Composer, "Fantasy for Trumpet and Jazz Orchestra." Midwest Band and Orchestra Clinic, Chicago, IL.

Composer, "Fantasia on Spring, River, Flower, Moon, Night." Shanghai Conservatory of Music, Shanghai, NN, PRC.

Composer, "Freeflow." University of Denver, Denver, CO.

Wendy Weiss **Textiles, Clothing and Design**

Artist, fiber art, "Landscape: Stand of Trees." Henan Art Museum, Zhengzhou, China.

BOOKS

Faculty who wrote or edited books published July 1, 2010-June 30, 2011

Julia E. Schleck — **English**

Author. *Telling True Tales of Islamic Lands: Forms of Mediation in Early English Travel Writing, 1575-1630.* Selinsgrove, PA: Susquehanna University Press.

Susan M. Sheridan — **Educational Psychology**

Author. *The Tough Kid Social Skills Book.* Eugene, OR: Pacific Northwest Publishing.

Author. *Social Skills for the Tough Kid: Tips and Tools for Parents.* Eugene, OR: Pacific Northwest Publishing.

Keng Siau — **Management**

Editor, with Roger Chiang. *Systems Analysis and Design: People, Processes, and Projects.* Armonk, NY: M.E. Sharpe.

Robert A. Spies — **BUROS**

Editor, with Janet F. Carlson, BUROS, and Kurt F. Geisinger, BUROS. *The Eighteenth Mental Measurement Yearbook.* Lincoln, NE: University of Nebraska Press.

James Stubbendieck — **Agronomy and Horticulture/ Center for Great Plains Studies**

Author, with Stephan L. Hatch and Neal M. Bryan. *North American Wildland Plants, 2nd edition. A Field Guide.* Lincoln, NE: University of Nebraska Press.

Jordan Stump — **Modern Languages and Literature**

Author. *The Other Book: Bewilderments of Fiction.* Lincoln, NE: University of Nebraska Press.

Stephen L. Taylor — **Food Science and Technology**

Editor. *Advances in Food and Nutrition Research, Vol. 59, 60, 61.* London, UK: Elsevier/Academic Press.

Elizabeth Theiss-Morse — **Political Science**

Author, with Michael W. Wagner, Political Science, William H. Flanigan and Nancy H. Zingale. *Political Behavior in Midterm Elections.* Washington, D.C.: CQ Press.

John Turner — **Classics and Religious Studies**

Editor, with Kevin Corrigan. *Plato's Parmenides and Its Heritage, Vol. I: History and Interpretation from the Old Academy to Later Platonism and Gnosticism. Volume II: Its Reception in Neoplatonic, Jewish and Christian Texts.* Atlanta, GA: SBL Publications and Leiden, The Netherlands: Brill Academic Publishers.

Jorge D. Veneciano — **Sheldon Memorial Art Gallery and Sculpture Garden**

Editor, with Rhonda K. Garelick, English. *The Fabulous Harlequin: ORLAN and the Patchwork Self.* Lincoln, NE: University of Nebraska Press.

Mehmet C. Vuran — **Computer Science and Engineering**

Author, with Ian F. Akyildiz. *Wireless Sensor Networks.* Hoboken, NJ: John Wiley & Sons Inc.

William Walstad — **Economics**

Editor, with Michael Salemi. *Teaching Innovations in Economics: Strategies and Applications for Interactive Instruction.* Cheltenham, UK: Edward Elgar Publishing.

Editor, with Michio Yamaoka. *Comparative Studies on Economic Education in the Asia-Pacific Region.* Tokyo, Japan: Shumpusha Publishing.

Laura M. White — **English**

Author. *Jane Austen's Anglicanism.* Farnham, Surrey, UK: Ashgate Publishing.

Laura Madeline Wiseman — **English**

Author. *Ghost Girl.* Columbus, OH: Pudding House.

Yan (Ruth) Xia — **Child, Youth and Family Studies**

Author. *Chinese Adolescents in Social Transition: Chinese Adolescents' Decision-Making, Parent-Adolescent Communication and Relationship.* Dudweiler, Germany: Lambert Academic Publishing.

Sandi B. Zellmer — **Law/Water Center**

Author, with Leonard Shabman. *Missouri River Planning: Recognizing and Incorporating Sediment Management.* Washington, D.C.: National Academy of Sciences.

RECOGNTIONS AND HONORS

Faculty who have been elected to honor academies or who received national or international honors or awards, July 1, 2010-June 30, 2011

Submitted by faculty, chairs/heads or deans

Brian Larkins — **Agronomy and Horticulture/ Research and Economic Development**

National Academy of Sciences

William Splinter — **Biological Systems Engineering, Emeritus/ Larsen Tractor Test and Power Museum**

National Academy of Engineers

James Van Etten — **Plant Pathology**

National Academy of Sciences

James Alfano — **Plant Pathology**

Fellow, American Phytopathological Society

Tom Allisma — **Architecture**

First place, Educators Design Excellence Award for Commercial Projects, Blue Sushi Sake Grill, American Society of Interior Designers

Kathleen P. Anderson — **Animal Science**

Partnership Award: Effective and Efficient Use of Resources, National Institute of Food and Agriculture

Outstanding Educator Award, Equine Science Society

Eric Berger — **Law**

Richard D. Cudahy Award, American Constitution Society

Dennis R. Brink — **Animal Science**

President, International Gamma Sigma Delta, the Honor Society of Agriculture

Cheryl A. Burkhart-Kriesel — **Panhandle Research and Extension Center**

Internet Education Technology Award, National Extension Association of Family and Consumer Sciences

Amy Burnett — **History**

Fulbright Scholar, U.S. Fulbright Commission

Susan M. Burzynski Bullard — **Journalism and Mass Communications**

First Place, Most Promising Professor, Association for Education in Journalism and Mass Communication

Chris Calkins — **Animal Science**

2011 Distinguished Research Award, American Meat Science Association

Randolph L. Cantrell — **Nebraska Rural Initiative**

Friend of Community Development Award, Community Development Society

Leslie C. Carlson — **Marketing**

Best Paper Award in the Marketing Research Track, Society of Marketing Advances

David J. Cochran — **Industrial and Management Systems Engineering**

Fellow, Human Factors and Ergonomics Society

Carina Curto — **Mathematics**

Sloan Research Fellowship, Alfred P. Sloan Foundation

Lory L. Dance — **Sociology/Institute for Ethnic Studies**

Hedda Andersson Fellowship, Lund University (Sweden) Human Rights Program

Jeffrey L. Day — **Architecture**

Faculty Design Award, Association of Collegiate Schools of Architecture

Rising Star Award, *Residential Architect magazine*

Bruce I. Dvorak — **Civil Engineering/ Biological Systems Engineering**

Fulbright, Czech Fulbright Commission

Matthew B. Dwyer — **Computer Science and Engineering**

Impact Paper Award, Association for Computing Machinery (ACM) SIGSOFT

Extraordinary Professor, Stellenbosch University, South Africa

Fulbright Scholar, South Africa, Council for the International Exchange of Scholars

Carolyn P. Edwards — **Psychology/ Child, Youth and Family Studies**

Lifetime Achievement Award, North American Reggio Emilia Alliance (NAREA)

Rolando A. Flores — **Food Science and Technology**

USDA-ARS 2010 Technology Transfer Award, USDA

USDA-ARS Eastern Region Research Center Award of Excellence in Technology Transfer, USDA

Connie M. Francis — **Nebraska Rural Initiative**

Internet Education Technology Award, National Extension Association of Family and Consumer Sciences

Scott Friend — **Marketing**

2011 Dissertation Award, AMA Sales SIG

Rhonda Garelick — **English/Fine and Performing Arts**

First Prize in Design for a Book, American Association of Museums

James W. Gentry — **Marketing**

Reviewer of the Year Award, *Journal of Public Policy and Marketing*

Reviewer of the Year Award, *Journal of Macromarketing*

Sarah J. Gervais — **Psychology**
Georgia Babladelis Best Paper Award, Division 35 (Psychology of Women) of the American Psychology Association

Joan R. Giesecke — **University Libraries**
2011 National Equality Award, American Library Association

Ronnie D. Green — **IANR**
President, American Society of Animal Science

Kevin G. Hanrahan — **Music**
Best Poster Paper Presentation, National Association of Teachers of Singing

Delwyn L. Harnisch — **Teaching, Learning and Teacher Education/ Educational Psychology**
Fulbright Scholar, The J. William Fulbright Foreign Scholarship Board

Mark A. Hinchman — **Interior Design/Architecture**
Book and Media Award, Interior Designs Educators Council (IDEC)

Margaret D. Jacobs — **History/Womens and Gender Studies**
Robert G. Athearn Book Award, Western History Association

Armitage-Jameson Book Prize, Coalition of Western Women's History

Stacy James — **Journalism and Mass Communications**
2010 Distinguished Service Award, Association for Education in Journalism and Mass Communications

Wayne Jensen — **Durham School of Architectural Engineering and Construction**
ASCE 2011 *Leadership and Management in Engineering* - Best Feature Article Award, American Society of Civil Engineers

Jeffrey Keown — **Animal Science**
DeLaval Extension Award, American Dairy Science Association

Carole Levin — **History**
Folger Library Fellowship, Folger Shakespeare Library

Drew Lyon — **Panhandle Research and Extension Center**
Fellow, Crop Science Society of America

Crop Science Extension Education Award, Crop Science Society of America

Roger W. Mandigo — **Animal Science**
Meat Industry Hall of Fame Inductee, National Association of Meat Processors

Achievement Award, American Association of Meat Processors

Peter Maslowski — **History**
Samuel Eliot Morison Prize, Society for Military Historians

Bernard "Barney" R. McCoy — **Journalism and Mass Communications**

Best of Competition, Radio Hard News Reporting, Broadcast Education Association

David L. Olson — **Management**

Best Paper Award (with co-author Jesse Staley), Conference on Enterprise Information Systems, Natal, Brazil, The International Federation for Information Processing

Irvin T. Omtvedt — **Animal Science**

Distinguished Professional Animal Scientist Award, American Registry of Professional Animal Scientists

Robert Portnoy — **University Health Center**

Fulbright Scholar, China, Council for International Exchange of Scholars

Wei Qiao — **Electrical Engineering**

Andrew Smith Outstanding Young Member Award, IEEE Industry Applications Society

Kamlakar P. Rajurkar — **Industrial and Management Systems Engineering**

Dr. Hideo Hanafusa Outstanding Investigator Award, International Symposium on Flexible Automation

Brett C. Ratcliffe — **Entomology**

Honorary membership, Coleopterists Society

Peter Revesz — **Computer and Electronics Engineering**

Jefferson Science Fellowship, National Academies

Kathleen M. Rudasill — **Educational Psychology**

Article of the Year, *Journal of School Psychology*

Anthony B. Schutz — **Law**

2010 Professional Scholarship Award, American Agricultural Law Association

Zhigang Shen — **Durham School of Architectural Engineering and Construction**

ASCE 2011 *Leadership and Management in Engineering* - Best Feature Article Award, American Society of Civil Engineers

William D. Spaulding — **Psychology**

Mike S. Neal Award, American Psychological Association

Joseph Starita — **Journalism and Mass Communications**

Leo Reano Memorial Award, National Education Association

James Stubbendieck — **Agronomy and Horticulture/ Center for Great Plains Studies**

Frederic G. Renner Outstanding Achievement Award, Society for Range Management

Elizabeth A. Theiss-Morse — **Political Science**
Robert E. Lane Book Award, American Political Science Association

Evgeny Tsymbal — **Physics and Astronomy/ Nebraska Center for Materials and Nanoscience**
Arfken Scholar-In-Residence, Miami University, Oxford, Ohio

Christopher Y. Tuan — **Civil Engineering**
Fellow, American Society of Civil Engineers

Harriet S. Turner — **Modern Languages and Literature**
2011 Andrew Heiskell Award for Innovative Programs in the Category of U.S. - Spain Academic Cooperation, Institute of International Education

L. Dale Van Vleck — **Animal Science**
Agricultural Research Service Science Hall of Fame Inductee, USDA Agricultural Research Service

Jorge Veneciano — **Sheldon Memorial Art Gallery and Sculpture Garden**
First Prize, American Association of Museums 2011 Museum Publications Design Competition

Clarence E. Waters — **Durham School of Architectural Engineering and Construction**
2010 Taylor Technical Talent Award, Illuminating Engineering Society of North America

President, Architectural Engineering Institute

Donald Weeks — **Biochemistry**
Fellow, American Association for the Advancement of Science

Curtis L. Weller — **Biological Systems Engineering**
Excellence in Teaching Award, American Association of Cereal Chemists International

Jefferson Science Fellow, U.S. State Department

Glossary of Federal Agency Abbreviations

CIA Central Intelligence Agency

CNS Corporation for National Service

DHS Department of Homeland Security
- DNDO Domestic Nuclear Detection Office

DHHS Department of Health and Human Services
- ACF Administration for Children and Families
- CDC Centers for Disease Control
- NCCAM National Center for Complementary and Alternative Medicine

DOC Department of Commerce
- EDA Economic Development Administration
- NIST National Institute of Standards and Technology
- NOAA National Oceanic & Atmospheric Administration

Every effort has been made to verify the accuracy and completeness of submissions. Faculty, department chairs and heads and the deans were invited to submit entries online regarding published books, national and international recognitions, and creative works in fine and performing arts and architecture. Information on major sponsored program awards was gathered by the Office of Sponsored Programs. Reports on startups and license agreements were produced by NUtech Ventures.
