# Federally Registered Restricted Use Pesticides

August 2001

UNIVERSITY OF  
**Nebraska**

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Elbert Dickey, Dean and Director, University of Nebraska, Institute of Agriculture and Natural Resources.

University of Nebraska Cooperative Extension educational programs abide with the non-discrimination policies of the University of Nebraska-Lincoln and the United States Department of Agriculture.

The list of federally registered restricted use pesticides published herein is intended solely to assist applicators, educators and consumers in recognizing products which may be classified for such use. The "Restricted Use" classification restricts a product or its uses to use by a certified pesticide applicator or under the direct supervision of a certified applicator. (For detailed information on the "Restricted Use" Classification, consult 40 CFR Subpart I, 152.160).

This publication is based on the Restricted Use Products (RUP) Report database maintained by the Office of Pesticide Programs, U.S. Environmental Protection Agency (EPA). This publication follows the EPA report format and lists the active ingredients as cross-referenced with the restricted use pesticides/product trade names. The official list of Restricted Use pesticides is subject to periodic change.

The active ingredient, isoxaflutole (Balance and Epic herbicides), holds a conditional registration and is not included by the EPA in its federally registered restricted use pesticides list. For a current list of federally registered restricted use pesticides, contact the nearest EPA office. In addition, individual state lead agencies must register these products before sale and use in their respective states.

Those active ingredients identified by an asterisk (\*) have product trade names registered for restricted use in the state of Nebraska by the Nebraska Department of Agriculture.

Additional pesticide-related information is available on the "Pesticide Education Resources" web site at the University of Nebraska-Lincoln. See <http://PestEd.unl.edu>.

I extend my appreciation to Judy Johnson of our Pesticide Education Office for her assistance in the review of the EPA database and revision of this publication.
