Crambin:

Model file name: 2fd7-crambin-stick_sc1-5.stl

Authors: Michelle E Howell, Rebecca L Roston

This is a teaching model of cytochrome c (PDB: [2FD7](#)). It is designed in a stick representation to explore protein secondary structure and how much space the protein takes up. The printable model is already uploaded to [Shapeways.com](#) in the [MacroMolecules](#) shop under the name “[Crambin](#)” and is intended to accompany the “[Lipoprotein signal peptidase II](#)”, “[Cytochrome c](#)”, and “[3 water molecules](#)” models. This model has been printed successfully using these parameters on Shapeways’ laser sintering printer in the following material: Processed Versatile Plastic (Strong & Flexible Plastic).
