**A research report submitted to the Faculty of Science, University of  
Witwatersrand, Johannesburg, in partial fulfilment of the requirements for  
the Master's Degree in Science Education**

**May 2016**

## Abstract

*Studies have revealed that the teacher's science classroom language plays a critical role in learners' understanding of science concepts. The quality of the teacher's science language impacts on the quality of learning. Learners encounter difficulties with the science classroom language irrespective of whether they are first or second language speakers of the language of instruction. The difficulty of the science language is mainly due to words having different meanings in science as compared to their everyday meanings, and also the foreignness of some science words (Oyoo, 2012). The language in science is therefore distinct from everyday language. In the South African context, the strategies to improve the quality of science education in secondary schools have not included the language. This study focus on the quality of the teachers' science language in physical science classrooms. In this study data was collected by means of lesson observations of participant teachers followed by interview of one of the participant teacher. Two teachers participated in the study, and both teachers were from the same school. One teacher was teaching grade 10 physical science and the other teacher was teaching grade 11 physical science. Content analysis was used to analyse both lesson observation and interview transcripts. The findings from the lesson observation revealed that participant teachers overlooked explanation of some technical words as well as some non-technical words used in science context. The interview with one of the teachers showed an unawareness of the difficulty of the science language as he pointed that there was little difference between the science language and everyday language. The study recommends that there should be teacher development programmes dealing specifically with the language problem in science.*

**Key Words:** South Africa; science language; everyday language:

## **Acknowledgements**

I wish to express my sincere gratitude to the following:

- My supervisor, Professor Samuel Ouma Oyoo, for his professional guidance, encouragement, and support throughout the research. He was always available whenever I needed his assistance
- The Gauteng Department of Education for allowing me to conduct my study in one of its schools
- The participant teachers who allowed me to observe their lessons and to conduct an interview thereafter
- My wife Sazini and family for their support and encouragement throughout the study
- The NRF (National Research Foundation) for the financial support throughout my masters' degree studies

### **Declaration**

**I declare that this report is my own work and no part of it has been copied from another source (unless indicated as quote). All work, sentences, and paragraphs taken directly from other work have been cited and the reference recorded in the reference list.**

## TABLE OF CONTENTS

Abstract .....	ii
Acknowledgements .....	iii
Declaration .....	iv
Table of Contents .....	v
List of Tables .....	vii
List of Figures .....	viii
List of Appendices .....	ix

### CHAPTER ONE: INTRODUCTION

1.1 Background and Context of Study .....	1
1.2 Rationale .....	6
1.3 Research Questions .....	7
1.4 Theoretical Framework .....	8
1.5 Conceptual Framework .....	8
1.6 Chapter Summary .....	9

### CHAPTER TWO: LITERATURE REVIEW

2.1 Introduction .....	10
2.2 What does learning science entail .....	10
2.3 Conceptual Change .....	12
2.4 The Role of language .....	14
2.5 Components of the science language .....	15
2.5.1 The Technical Component .....	15
2.5.2 The Non-Technical Component .....	15
2.6 Difficulty of the science teacher's language .....	16
2.6.1 Difficulty of the technical science words .....	16
2.6.2 Difficulty with the non-technical component .....	17
2.7 Language in South Africa .....	19
2.8 Role of the teacher .....	20
2.9 Approach to language problem .....	24
2.10 Chapter Summary .....	24

### **CHAPTER THREE: METHODOLOGY**

3.1 Introduction .....	26
3.2 Research Methodology .....	26
3.3 Qualitative Research .....	27
3.4 Observation .....	28
3.5 Interview .....	29
3.6 Sampling of participants .....	31
3.7 Research Rigour .....	33
3.8 This study .....	34
3.8.1 Gaining access to the research site .....	34
3.8.2 Data Collection .....	37
3.8.2.1 Observation .....	37
3.8.2.2 Teacher Interview .....	37
3.8.3 Review of the data collecting process .....	38
3.9 Data Analysis .....	38
3.10 Chapter Summary .....	39

### **CHAPTER FOUR: DATA ANALYSIS AND DISCUSSION**

4.1 Introduction .....	40
4.2 Data Analysis .....	41
4.2.1 Observation .....	41
4.2.1.1 Teacher A .....	41
4.2.1.2 Teacher B .....	46
4.3 Findings on teacher participant interview .....	43
4.4 Discussion .....	53
4.5 Chapter Summary .....	54

### **CHAPTER FIVE: CONCLUSION**

5.1 Conclusion .....	56
5.2 Implications and Recommendations .....	57
5.3 Limitations .....	58
5.3.1 Sample .....	58
5.3.2 Observation .....	58
5.3.3 Interviews .....	58
5.4 Reflection on Research .....	59
