# **The influence of surgery on the development of distant tumour recurrence**

De invloed van chirurgie op het ontstaan  
van tumorrecidief op afstand

## **Proefschrift**

ter verkrijging van de graad van doctor aan de  
Erasmus Universiteit Rotterdam  
op gezag van de rector magnificus

Prof.dr. S.W.J. Lamberts

en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 19 januari 2007 om 11.00 uur

door

**Miranda ten Kate**

geboren te Assen

## **PROMOTIECOMMISSIE**

Promotor: Prof.dr. J. Jeekel

Overige leden: Prof.dr. E.J. Kuipers  
Prof.dr. P. Sonneveld  
Prof.dr. H.W. Tilanus

Copromotor: Dr. C.H.J. van Eijck

# CONTENTS

## **Part I. General Introduction**

- I. General Introduction 9

## **Part II. Surgical trauma and tumour recurrence at distant sites: *in vivo*.**

- II. Liver surgery enhances implantation of circulating tumour cells, but does not stimulate growth of tumour cells 27

## **Part III. Surgical trauma and tumour recurrence at distant sites: *in vitro*.**

- III. Influence of pro-inflammatory cytokines on the adhesion of human colon carcinoma cells to lung microvascular endothelium. 45
- IV. Proinflammatory cytokines affect pancreatic carcinoma cell – endothelial cell interactions. 65
- V. Polymorphonuclear leukocytes increase the adhesion of circulating tumour cells to microvascular endothelium. 83
- VI. The role of superoxide anions in the development of distant tumour recurrence. 98

## **Part IV. Tumour cell interactions with the extracellular matrix.**

- VII. Mechanisms of colon carcinoma cell binding to components of the extracellular matrix. 115

## **Part V. General discussion and Summary.**

- VIII. General discussion 129
- IX. Summary and Conclusions 141
- Samenvatting en Conclusies 147
- Dankwoord 155
- Curriculum Vitae 157
