

Keilin Memorial Lecture

- Keilin's Cytochromes: How Bacteria Use Them, Vary Them and Make Them** S. J. FERGUSON 629

Royal Irish Academy Medal Lecture

- Thromboxane A₂ Signalling in Humans: a 'Tail' of Two Receptors** B. T. KINSELLA 641

colloquia**674th Meeting, Trinity College, Dublin****colloquium: DNA Damage Signalling and Apoptosis**

- | | | |
|---|--|------------|
| Detecting, signalling and repairing DNA double-strand breaks | S. P. JACKSON | 655 |
| ATM (ataxia telangiectasia mutated): expanding roles in the DNA damage response and cellular homeostasis | Y. SHILOH | 661 |
| Choosing between growth arrest and apoptosis through the retinoblastoma tumour suppressor protein, Abl and p73 | J. Y. J. WANG AND S. W. KI | 666 |
| DNA damage signalling and NF-κB: implications for survival and death in mammalian cells | M. P. BOLAND | 674 |
| Uncovering BRCA1-regulated signalling pathways by microarray-based expression profiling | P. B. MULLAN, S. McWILLIAMS, J. QUINN, H. ANDREWS, P. GILMORE, N. McCABE, S. McKENNA AND D. P. HARKIN | 678 |
| Mechanisms of p53-dependent apoptosis | M. SCHULER AND D. R. GREEN | 684 |
| UV stimulation induces NF-κB DNA-binding activity but not transcriptional activation | K. J. CAMPBELL, N. R. CHAPMAN AND N. D. PERKINS | 688 |
| Secondary DNA structures as molecular targets for cancer therapeutics | L. H. HURLEY | 692 |
| Caspases: cellular demolition experts | E. M. CREGH AND S. J. MARTIN | 696 |
| Cytotoxic signalling by inhibitors of DNA topoisomerase II | W. T. BECK, Y.-Y. MO AND U. G. BHAT | 702 |
| Pyrrolo-1,5-benzoxazepines: a new class of apoptotic agents | D. M. ZISTERER, M. M. McGEE, G. CAMPANI, A. RAMUNNO, C. FATTORUSSO, V. NACCI, M. LAWLER AND D. C. WILLIAMS | 704 |

colloquium: Neurotransmitter Transporters: Molecular Mechanism and Regulation

Molecular characterization of substrate-binding sites in the glutamate transporter family	B. I. KANNER, M. P. KAVANAUGH AND A. BENDAHAN	707
Molecular cloning and characterization of a murine hemicholinium-3-sensitive choline transporter	S. APPARSUNDARAM, S. M. FERGUSON AND R. D. BLAKELY	711
Molecular mechanisms of cystine transport	G. J. McBEAN AND J. FLYNN	717
Regulation of the serotonin transporter by interacting proteins	J. HAASE, A.-M. KILLIAN, F. MAGNANI AND C. WILLIAMS	722
Structure, function and regulation of the 5-hydroxytryptamine (serotonin) transporter	S. HORSCHITZ, R. HUMMERICH AND P. SCHLOSS	728
Impact of oligomerization on the function of the human serotonin transporter	J. A. SCHMID, H. JUST AND H. H. SITTE	732
Upregulation of γ-aminobutyric acid transporter expression: role of alkylated γ-aminobutyric acid derivatives	T. L. WHITWORTH AND M. W. QUICK	736
Regulation of glycine transporters	B. LÓPEZ-CORCUERA, C. ARAGÓN AND A. GEERLINGS	742
Molecular determinants involved in the asymmetrical distribution of glycine transporters in polarized cells	F. ZAFRA AND C. GIMÉNEZ	746

colloquium: Mitochondrial Uncoupling Proteins

A history of UCPI	D. G. NICHOLLS	751
Life without UCPI: mitochondrial, cellular and organismal characteristics of the UCPI-ablated mice	J. NEDERGAARD, V. GOLOZOUBOVA, A. MATTHIAS, I. SHABALINA, K.-I. OHBA, K. OHLSON, A. JACOBSSON AND B. CANNON	756
Coenzyme Q induces GDP-sensitive proton conductance in kidney mitochondria	K. S. ECHTAY AND M. D. BRAND	763
UCP3 and its putative function: consistencies and controversies	M.-E. HARPER, R. M. DENT, V. BEZAIRE, A. ANTONIOU, A. GAUTHIER, S. MONEMDJOU AND R. McPHERSON	768
Uncoupling protein 3 biological activity	J. P. GIACOBINO	774
Physiological effects of variants in human uncoupling proteins: UCP2 influences body-mass index	N. A. SCHONFELD-WARDEN AND C. H. WARDEN	777
Uncoupling protein 3 and fatty acid metabolism	A. G. DULLOO, S. SAMEC AND J. SEYDOUX	785
Mitochondrial uncoupling and lipid metabolism in adipocytes	J. KOPECKÝ, M. ROSSMEISL, P. FLACHS, K. BARDOVÁ AND P. BRAUNER	791
Perspectives on the biology of uncoupling protein (UCP) homologues	S. H. ADAMS, G. PAN AND X. X. YU	798

Mechanism of uncoupling protein action	K. D. GARLID, M. JABUREK AND P. JEZEK	803
Uncoupling protein, H⁺ transport and regulation	M. KLINGENBERG, E. WINKLER AND K. ECHTAY	806
Uncoupling protein 2 in the brain: distribution and function	D. RICHARD, S. CLAVEL, Q. HUANG, D. SANCHIS AND D. RICQUIER	812

colloquium: Enzymes that Regulate Lipid Metabolism in Cell Signalling

Sphingolipids related to apoptosis from the point of view of membrane structure and topology	W. J. VAN BLITTERSWIJK, A. H. VAN DER LUIT, W. CAAN, M. VERHEIJ AND J. BORST	819
Co-ordinate regulation of growth factor receptors and lipid phosphate phosphatase-I controls cell activation by exogenous lysophosphatidate	C. PILQUIL, Z.-C. LING, I. SINGH, K. BURI, Q.-X. ZHANG AND D. N. BRINDLEY	825
Regulation of <i>de novo</i> sphingolipid biosynthesis and the toxic consequences of its disruption	S. C. LINN, H. S. KIM, E. M. KEANE, L. M. ANDRAS, E. WANG AND A. H. MERRILL, JR	831
The sphingosine-1-phosphate receptor EDG-I is essential for platelet-derived growth factor-induced cell motility	H. M. ROSENFELDT, J. P. HOBSON, S. MILSTIEN AND S. SPIEGEL	836
FcγRIIB-mediated inhibition of T-cell receptor signal transduction involves the phosphorylation of SH2-containing inositol 5-phosphatase (SHIP), dephosphorylation of the linker of activated T-cells (LAT) and inhibition of calcium mobilization	W. A. JENSEN, S. MARSCHNER, V. L. OTT AND J. C. CAMBIER	840
Antagonism of PI 3-kinase-dependent signalling pathways by the tumour suppressor protein, PTEN	C. P. DOWNES, D. BENNETT, G. MCCONNACHIE, N. R. LESLIE, I. PASS, C. MACPHEE, L. PATEL AND A. GRAY	846

colloquium: Signal Transduction During Innate and Adaptive Immunity

Sepsis begins at the interface of pathogen and host	B. BEUTLER	853
AGC protein kinase phosphorylation and protein kinase C	P. J. PARKER AND S. J. PARKINSON	860
Biochemical and genetic analyses of the Tec kinases Itk and Rlk/Txk	M. J. CZAR, J. DEBNATH, E. M. SCHAEFFER, C. M. LEWIS AND P. L. SCHWARTZBERG	863
