Involvement of up-regulation of miR-210 in a rat epilepsy model [Corrigendum]

Chen L, Zheng H, Zhang S. Involvement of up-regulation of miR-210 in a rat epilepsy model. *Neuropsychiatr Dis Treat*. 2016;12:1731–1737.

On page 1734, false positive results were displayed in Figure 2B. The correct Figure 2 is as follows:

Figure 2 miR-210 inhibitor prohibited epilepsy-induced morphological changes.

Notes: (**A**) Intrahippocampal injection of miR-210 inhibitor reversed miR-210 level induced by epilepsy modeling. **P<0.01 compared with control; **P<0.01 compared with E group. (**B**) Hematoxylin and eosin staining indicated that miR-210 inhibitor mitigated the morphological changes caused by epilepsy. Scale bar: 100 μ m. **Abbreviations:** E, epilepsy; miRI + E, miR-210 inhibitor and epilepsy; V + E, vehicle and epilepsy.

On page 1735, false positive results were displayed in Figure 3. The correct Figure 3 is as follows:

Figure 3 miR-210 inhibitor prohibited epilepsy-induced neuronal apoptosis.

Notes: (A) Apoptosis detected by Tunel assay with the arrows indicating apoptotic cells. Scale bar: 50 μ m. (B) Quantitative data of the apoptosis. **P<0.01 compared with control; ##P<0.01 compared with E group.

Abbreviations: E, epilepsy; miRI + E, miR-210 inhibitor and epilepsy; V + E, vehicle and epilepsy.

Neuropsychiatric Disease and Treatment

Publish your work in this journal

Neuropsychiatric Disease and Treatment is an international, peerreviewed journal of clinical therapeutics and pharmacology focusing on concise rapid reporting of clinical or pre-clinical studies on a range of neuropsychiatric and neurological disorders. This journal is indexed on PubMed Central, the 'PsycINFO' database and CAS, and is the official journal of The International Neuropsychiatric Association (INA). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
