## **ACKNOWLEDGEMENT**

Foremost, I wish to count my blessings and thanked Allah S.W.T for providing me with the mental and physical faculties as well as other positive attributes notably perseverance to complete this challenging research paper. Special mention goes to my research advisor Madam Suzana Binti Hassan for her guidance, supervision and support. Besides that, Madam Suzana comments and suggestions greatly assist in the successful completion of this project paper. In addition, special thanks to Sir Syamsul Samsudin for his guidance and advice towards the completion of this project paper.

Last but not least, I would like to extend my appreciation to each and every one who have assisted in one way or another in order for me to complete this research paper. Sincere thanks to all my friends and office colleagues for their understanding, kindness and moral support during the testing time undertook to complete this assignment. Lastly, my deepest gratitude to my beloved parents for their unwavering support, invaluable assistance and sincere blessing.

Thank you.

## **ABSTRACT**

Export has become one of the biggest inflow for economic growth, so success of export-led growth is the best interest for trade policy purposes. That is why most of the countries will try to export their goods or services throughout the world in order to generate higher country inflows than outflows. Therefore, many researchers have done research on export-led growth in many countries to look at the country economic growth like gross domestic product. This research conducts a study for Malaysia which is one of the Southeast Asia countries that export product outside a country. Other than that, the aims of this research is to identifies the relationship between the gross domestic product with the macroeconomic variables. The variables include export, import, gross capital formation and exchange rate. To test this research, the study uses multiple linear regression analysis while the data is taken annually from the year 1961 until 2015.
