DATA SCIENCE AND BIG DATA IN ECOMMERCE AND RETAIL

A. LOPATENKO, PhD
Director of Engineering in Re-cruit Institute of Technology of Recruit Holdings Co

Institute of Technology of Recruit Holdings Co.

Abstract. In this presentation we will describe a role Data Science plays in eCommerce and Retail. Problems such as Inventory management, search/navigation/personalization, best price prediction, customer acquisition and others will be described and formalized in Data Science terms. Algorithms typically used to solve these problems will be presented

Author. Andrei Lopatenko is a Director of Engineering in Recruit Institute of Technology of Recruit Holdings Co. He worked for Google where he was working on algorithms for web search, Apple Inc where he was a founding engineer for Apple Maps Search and developed search algorithms for Apple AppStore and iTunes, Walmartlabs where he led a team developing search algorithms. He obtained a PhD degree in

Computer Science from the University of Manchester, UK in 2007.

His areas of expertise are organization design, building teams, building mentorship networks, running cohesive high performance teams, performance management, scaling up organizations, deep learning, search relevance, learning to rank, data science.
