

PUBLIC HEALTH REPORTS

VOL. 38

DECEMBER 28, 1923

No. 52

BIOLOGICAL PRODUCTS.

ESTABLISHMENTS LICENSED FOR THE PROPAGATION AND SALE OF VIRUSES, SERUMS TOXINS, AND ANALOGOUS PRODUCTS.

The following table contains a list of the establishments holding licenses issued by the Treasury Department in accordance with the act of Congress approved July 1, 1902, entitled "An act to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia, to regulate interstate traffic in said articles, and for other purposes."

The licenses granted to the following establishments for the products mentioned do not imply an indorsement of the claims made by the manufacturers for their respective preparations. The granting of a license means that inspections of the establishment concerned and laboratory examinations of samples of its products are made regularly to insure the observance of safe methods of manufacture, to ascertain freedom from contamination, and to determine the potency of diphtheria antitoxin, tetanus antitoxin, botulinus antitoxin, anti-dysenteric serum, antimeningococcic serum, antipneumococcic serum, bacterial vaccines, prepared from typhoid bacillus, paratyphoid bacillus A, paratyphoid bacillus B, diphtheria toxin-antitoxin mixture, and diphtheria toxin for Schick test, the only products for which potency standards or tests have been established.

The enumeration of the products is as follows: Serums are placed first, the antitoxins, being the older and more important, heading the list. The other products are arranged generally in the order of their origin. The items in each class are arranged alphabetically.

Establishments Licensed and Products for which Licenses have been Issued.

AMERICAN ESTABLISHMENTS.

Parke, Davis & Co., Detroit, Mich.—License No. 1:

Diphtheria antitoxin; tetanus antitoxin; antianthrax serum; antidysenteric serum; antigonococcic serum; antimeningococcic serum; antipneumococcic serum; antistreptococcic serum; hemostatic serum (Lapenta); normal horse serum; thyroidectomized horse serum; vaccine virus; rabies vaccine (Cumming); tuberculin old; tuberculin T. R.; tuberculin B. E.; tuberculin B. F.; bacterial vaccines made from acne bacillus, acne diplococcus, colon bacillus, Friedländer bacillus, gonococcus, influenza bacillus, meningococcus, micrococcus catarrhalis, paratyphoid bacillus A, paratyphoid bacillus B, pertussis bacillus, pneumococcus, prodigiosus bacillus, pseudodiphtheria bacillus, staphylococcus albus, staphylococcus aureus, streptococcus and typhoid bacillus; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test; pollen extract; modified bacterial derivatives made from colon bacillus, gonococcus, paratyphoid bacillus A, paratyphoid bacillus B, pneumococcus, staphylococcus albus, staphylococcus aureus, streptococcus, and typhoid bacillus.

H. K. Mulford Co., Philadelphia, Pa.—License No. 2:

Diphtheria antitoxin; tetanus antitoxin; perfringens antitoxin, antianthrax serum; antidyenteric serum; antigonococcic serum; antimelitensis serum; antimeningococcic serum; antipneumococcic serum; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine; tuberculin old; tuberculin T. R.; tuberculin B. E.; tuberculin B. F.; tuberculin proteose-free (Lyons); bacterial vaccines made from *acne bacillus*, *cholera vibrio*, *colon bacillus*, *dysentery bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *micrococcus mellitensis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *plague bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; sensitized bacterial vaccines made from *acne bacillus*, *cholera vibrio*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test; pollen extract; animal epidermal extract; animal food extract; vegetable food extract; pneumococcus antibody solution.

Slee Laboratories, Swiftwater, Pa.—License No. 6:

Diphtheria antitoxin; tetanus antitoxin; normal horse serum; vaccine virus; bacterial vaccines made from *colon bacillus*, *gonococcus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*.

The Cutter Laboratory, Berkeley, Calif.—License No. 8:

Diphtheria antitoxin; tetanus antitoxin; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine; tuberculin old; tuberculin B. F.; bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.

Bureau of Laboratories, Department of Health, New York City.—License No. 14:

Diphtheria antitoxin; tetanus antitoxin; antimeningococcic serum; antipneumococcic serum; normal horse serum; vaccine virus; rabies vaccine; tuberculin old; and bacterial vaccines made from *gonococcus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.

Lederle Antitoxin Laboratories, Pearl River, N. Y.—License No. 17:

Diphtheria antitoxin; tetanus antitoxin; antianthrax serum; antidyenteric serum; antigonococcic serum; antimeningococcic serum; antipneumococcic serum; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine; tuberculin old; tuberculin B. E.; tuberculin B. F.; bacterial vaccines made from *acne bacillus*, *cholera vibrio*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *plague bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *staphylococcus citreus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; pollen extract; diphtheria toxin for Schick test.

Bacterio-Therapeutic Laboratory, Asheville, N. C.—License No. 23:

Watery extract of tubercle bacilli (von Ruck); modified tubercle bacillus derivative (von Ruck).

Dr. G. H. Sherman, East Jefferson Avenue, Detroit, Mich.—License No. 30:

Bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *nonvirulent tubercle bacillus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*.

The Abbott Laboratories, 4735 East Ravenswood Avenue, Chicago, Ill.—License No. 43:

Bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; pollen extract.

Beebe Laboratories, St. Paul, Minn.—License No. 45:

Diphtheria antitoxin; tetanus antitoxin; bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *ozena bacillus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*.

Dr. W. T. McDougall, 640 Minnesota Avenue, Kansas City, Kans.—License No. 49:

Rabies vaccine.

St. Louis Pasteur Institute, 3514 Lucas Avenue, St. Louis, Mo.—License No. 50:

Rabies vaccine (dilution method).

The Upjohn Co., Kalamazoo, Mich.—License No. 51:

Bacterial vaccines made from *colon bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; pollen extract.

- E. R. Squibb & Sons' Research and Biological Laboratories, New Brunswick, N. J.**—License No. 52:
Diphtheria antitoxin; tetanus antitoxin; antagonococcic serum; antimeningococcic serum; antipneumococcic serum; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine; bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *staphylococcus citreus*, *streptococcus*, and *typhoid bacillus*; leucocytic extract from the horse; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test; pollen extract; arsphenamine; nearsphenamine; sodium arsphenamine; sulpharsphenamine; solution of arsphenamine.
- Laboratory of Clinical Pathology, 1208 Wyandotte Street, Kansas City, Mo.**—License No. 53:
Rabies vaccine.
- Dr. James McI. Phillips, 2057 North High Street, Columbus, Ohio.**—License No. 54:
Rabies vaccine (dilution method).
- Eli Lilly & Co., Indianapolis, Ind.**—License No. 56:
Diphtheria antitoxin; tetanus antitoxin; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine (Harris); tuberculin old; tuberculin T. R.; tuberculin B. E.; tuberculin B. F.; bacterial vaccines made from *acne bacillus*, *cholera vibrio*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *meningococcus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *plague bacillus*, *pneumococcus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.
- Swan Myers Co., 219 North Senate Avenue, Indianapolis, Ind.**—License No. 58:
Bacterial vaccines made from *acne bacillus*, *colon bacillus*, *Friedländer bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *micrococcus tetragenus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; pollen extract.
- Gilliland Laboratories, Marietta, Pa.**—License No. 63:
Diphtheria antitoxin; tetanus antitoxin; antimeningococcic serum; antipneumococcic serum; antistreptococcic serum; normal horse serum; vaccine virus; rabies vaccine; tuberculin old; tuberculin B. E.; tuberculin B. F.; bacterial vaccine made from *acne bacillus*, *gonococcus*, *influenza bacillus*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.
- Antitoxin and Vaccine Laboratory, Department of Public Health, Commonwealth of Massachusetts, Jamaica Plain, Boston 30, Mass.**—License No. 64:
Diphtheria antitoxin; antimeningococcic serum; antipneumococcic serum; vaccine virus; bacterial vaccine made from *paratyphoid bacillus A*, *paratyphoid bacillus B*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.
- United States Standard Products Co., Woodworth, Wis.**—License No. 65:
Diphtheria antitoxin; tetanus antitoxin; normal horse serum; bacterial vaccines made from *acne bacillus*, *colon bacillus*, *gonococcus*, *influenza bacillus*, *micrococcus catarrhalis*, *paratyphoid bacillus A*, *paratyphoid bacillus B*, *pertussis bacillus*, *pneumococcus*, *pseudodiphtheria bacillus*, *staphylococcus albus*, *staphylococcus aureus*, *streptococcus*, and *typhoid bacillus*; diphtheria toxin-antitoxin mixture; diphtheria toxin for Schick test.
- D. L. Harris Laboratories, Metropolitan Building, St. Louis, Mo.**—License No. 66:
Rabies vaccine (Harris).
- The Arlington Chemical Co., Yonkers, N. Y.**—License No. 67:
Bacterial vaccines made from *colon bacillus*, *micrococcus tetragenus*, *pneumococcus*, *staphylococcus albus*, *staphylococcus aureus*, *staphylococcus citreus*, *streptococcus*; pollen extract; animal epidermal extract; animal food extract; vegetable food extract.
- Dermatological Research Laboratories, Philadelphia, Pa. (branch of Abbott Laboratories, Chicago, Ill.)**—License No. 68:
Arsphenamine; nearsphenamine; sulpharsphenamine.
- H. A. Metz Laboratories, 122 Hudson Street, New York City.**—License No. 69:
Arsphenamine; nearsphenamine; sodium arsphenamine; silver arsphenamine; neosilverarsphenamine; sulpharsphenamine.
- Synthetic Drugs and Diarsenol Laboratories, Buffalo, N. Y.**—License No. 70:
Arsphenamine; nearsphenamine; sodium arsphenamine; sulpharsphenamine.
- Hynson, Westcott, & Dunning, Baltimore, Md.**—License No. 76:
Suspension of arsphenamine; suspension of nearsphenamine.
- Mallinckrodt Chemical Works, St. Louis, Mo.**—License No. 77:
Arsphenamine; nearsphenamine.
- Persson's Laboratories, Mount Clemens, Mich.**—License No. 79:
Bacterial vaccine made from *colon bacillus*, *gonococcus*, *pneumococcus*, *staphylococcus albus*, *staphylococcus aureus* and *streptococcus*.
- Agricultural Experiment Station, College of Agriculture, University of Illinois, Urbana, Ill.**—License No. 81:
Botulinus antitoxin.

Powers-Weightman-Rosengarten Co., Philadelphia, Pa.—License No. 82:

Arsphenamine (arsenobenzol billon); neorsphenamine (novarsenobenzol billon); sulpharsphenamine, a compound of glucose with arsphenamine base (amino arseno phenol or eparseno).

Terrell Laboratories, 311 State Bank Building, Fort Worth, Tex.—License No. 84:

Rabies vaccine (killed virus).

Jensen-Salsbury Laboratories, Kansas City, Mo.—License No. 85:

Botulinus antitoxin; rabies vaccine (killed virus).

Cook Laboratories, 536 Lake Shore Drive, Chicago, Ill.—License No. 86:

Bacterial vaccines made from aene bacillus, colon bacillus, Friedlander bacillus, gonococcus, influenza bacillus, micrococcus catarrhalis, paratyphoid bacillus A, paratyphoid bacillus B, pertussis bacillus, pneumococcus, staphylococcus albus, staphylococcus aureus, streptococcus and typhoid bacillus.

Kober Chemical Co., Hastings-on-Hudson, N. Y.—License No. 88:

Arsphenamine.

W. F. Straub Laboratories, 5514-5520 Norwood Park Avenue, Chicago, Ill.—License No. 89:

Bacterial vaccines made from colon bacillus and staphylococcus aureus.

FOREIGN ESTABLISHMENTS.

Institut Pasteur de Paris, Paris, France.—License No. 11. Selling agents for the United States: Pasteur Laboratories of America, 366 West Eleventh Street, New York City:

Diphtheria antitoxin; tetanus antitoxin; antianthrax serum; antidysenteric serum; antiplague serum; antistreptococcal serum; bacterial vaccines made from cholera vibrio, plague bacillus, staphylococcus albus, and staphylococcus aureus.

Farbwerke Hoechst, vorm. Meister Lucius und Brüning, Hoechst am Main, Germany.—License No. 24.

Selling agents for the United States: H. A. Metz Laboratories, 122 Hudson St., New York City:

Diphtheria antitoxin; tetanus antitoxin; antistreptococcal serum; normal horse serum; tuberculin old; tuberculin T. R.; tuberculin B. E.; tuberculin B. F.; bacterial vaccines made from cholera vibrio, gonococcus, staphylococcus albus, staphylococcus aureus, and staphylococcus citreus; typhoid bacillus; sensitized bacterial vaccine made from typhoid bacillus; arsphenamine; neorsphenamine; sodium arsphenamine; silver arsphenamine; neosilverarsphenamine.

Connaught Antitoxin Laboratory, University of Toronto, Canada.—License No. 73:

Diphtheria antitoxin; tetanus antitoxin.

Les Etablissements Poulenc Frères, 92 Rue Vieille-du-Temple, Paris, III, France.—License No. 74. Selling agents for the United States: Powers-Weightman-Rosengarten Co., Philadelphia, Pa.:

Bacterial vaccine made from gonococcus, micrococcus tetragenus, pertussis bacillus, staphylococcus albus, staphylococcus aureus, and synococcus; arsphenamine; neorsphenamine.

Laboratoires Naline, Villaneuve-la-Garenne, Seine, France.—License No. 75. Selling agents for the United States: Geo. J. Wallau, 6 Cliff St., New York City:

Phospharsenamine (galyl).

Laboratoire de Biochimie Médicale, 92 Rue Michel-Ange, Paris, France.—License No. 83:

Sulpharsphenamine.

Istituto Sieroterapico Milanese, Milan, Italy.—License No. 87:

Antianthrax serum; bacterial vaccines made from pneumococcus, staphylococcus albus, staphylococcus aureus, staphylococcus citreus, and streptococcus; neorsphenamine (Neoiacol).

CURRENT COURT DECISIONS PERTAINING TO PUBLIC HEALTH.

Laundries, regulation of.—The enforcement of an ordinance of the city of Chicago, regulating the establishment, licensing, operation, and sanitation of laundries, was sought to be enjoined. The lower court dismissed the bill and the decree was affirmed by the Supreme Court of Illinois. It was held that the ordinance was clearly a health regulation which the city had authority to pass, and those provisions of the ordinance which were attacked were held valid. (*Moy et al v. City of Chicago et al.*, 140 N. E. 845.)

Sewers and sewage disposal.—The Supreme Court of California has decided that section 3 of the public health act, which requires a permit from the State board of health in connection with sewers and sewage disposal, applies only to the use of sewers after construc-

tion and does not apply to their construction. (*Ex parte Chutuk*, 218 Pac. 393.)

State board of health, membership of.—In a quo warranto proceeding brought in the name of the State, on the relation of the attorney general, to determine the membership of the State board of health, and also who was entitled to the office of secretary of the board, the Supreme Court of Kansas held as follows:

(1) Appointments to membership on the State board of health, which are not acted on or rejected by the senate, entitle the appointees to hold their offices to the end of their terms or until the appointments are considered and rejected by the senate.

(2) A mere recital in the commission issued to the appointee by the governor that the appointment had been confirmed does not establish the fact.

(3) The governor can not revoke appointments made during a recess of the legislature merely because such appointments are not sent to or acted upon by the senate at the next legislative session.

(4) In the absence of a statutory provision to that effect, the failure of an appointee to take and file his oath of office does not create a vacancy in the office.

(5) The action of a board member, already legally appointed, in qualifying under a subsequent appointment and attending and participating in an illegal meeting of the board, was not a resignation of his office and did not affect his title to the office which he already occupied under a previous legal appointment.

(6) The secretary who was appointed at the meeting of the board held on June 5, 1923, was vested with a good title to his office. (*State ex rel. Griffith, Atty. Gen., v. Matassarini et al.*, 217 Pac. 930.)

Garbage disposal ordinance upheld.—An ordinance of the city of Enid, regulating the removal and disposal of garbage and directing the making of a contract with some person, firm, or corporation for such removal and disposal, has been held valid by the Supreme Court of Oklahoma. The ordinance was attacked on the grounds that (1) it created a monopoly of the business of hauling and disposing of garbage, and (2) that it was discriminatory, illegal, and in excess of the police power of the city to prohibit a business which was not a nuisance per se. (*Burns v. City of Enid et al.*, 217 Pac. 1038.)

DEATH RATES IN A GROUP OF INSURED PERSONS.

COMPARISON OF DEATH RATES FOR PRINCIPAL CAUSES OF DEATH, SEPTEMBER AND OCTOBER, 1923, AND OCTOBER AND YEAR, 1922.

The accompanying table is taken from the Statistical Bulletin of the Metropolitan Life Insurance Co. for November, 1923. It presents the mortality experience of the industrial insurance department of the company for September and October, 1923, and October and year 1922. The rates for 1923 are based on a strength of over 14,000,000 persons.

The Bulletin says: "The October death rate of eight per thousand exceeds by a small margin last year's figure for the same month (7.9). The usual seasonal increase over September is in evidence this year and is due, for the most part, to higher October rates for cerebral hemorrhage, organic heart disease, pneumonia, diphtheria, and accidents. The health situation, as a whole, is a very satisfactory one. There is no general epidemic prevalence of any disease. Measles, which has been much in evidence during most of 1923, shows for the first time this year a lower death rate than for the corresponding month of 1922. The tuberculosis rate continues low and a further reduction this year in the mortality from this disease is now practically assured. Heart disease, on the other hand, continues to cause more deaths than for several years.

"Attention must again be called to the very unsatisfactory death rate for accidents in October. The mortality increased sharply over the September figure and stands 25 per cent higher than for October, 1922. There were 232 automobile fatalities, corresponding to a death rate of 19.4 per 100,000. This is not only the highest figure for any month in 1923, but is the maximum for any one month among Metropolitan Industrial policyholders. * * * Automobile accidents in October caused three times as many deaths as typhoid fever and almost as many as diphtheria, whooping cough, scarlet fever, and measles combined. The leading cause of death, organic heart disease, was responsible for only six deaths to every one automobile fatality.

"The general, or population, death rate for the large cities of the United States in October was 11.3 per 1,000. This is identical with the rate for October, 1922, and shows only a slight increase, altogether seasonal, over the figure for September, 1923. There was more or less increased prevalence in October of diphtheria, influenza, measles, poliomyelitis, scarlet fever, and smallpox, while fewer cases of typhoid and whooping cough were reported. Comparison with October of last year shows more influenza, malaria, measles, poliomyelitis, and smallpox, but less diphtheria, scarlet fever, and whooping cough."

Death rates (annual basis) for principal causes per 100,000 lives exposed, September and October, 1923, and October and year 1922.

¹Deaths for week ended Friday, Dec. 14, 1923.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

These reports are preliminary, and the figures are subject to change when later returns are received by the State health officers.

Rhode Island	91	1	58	1	134	3
Washington	130	1,727	1	221	167	58
Wyoming	4	8	206	27	3

RECIPROCAL NOTIFICATION, NOVEMBER, 1923.

Cases of communicable diseases referred during November, 1923, to other State health departments, by departments of health of certain States.

Referred by—	Diphtheria.	Polio-myelitis.	Scarlet fever.	Small-pox.	Tuberculosis.	Typhoid fever.
Illinois	2
Massachusetts	1
Minnesota	1	1	32	6
New Jersey	1	1
New York	1	1

CITY REPORTS FOR WEEK ENDED DECEMBER 8, 1923.

CEREBROSPINAL MENINGITIS.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding week of the years 1915 to 1922, inclusive. In instances in which data for the full eight years are incomplete, the median is that for the number of years for which information is available.

City.	Median for previous years.	Week ended Dec. 8, 1923.		City.	Median for previous years.	Week ended Dec. 8, 1923.

ESTHONIA.

Communicable Diseases—October, 1923.

Communicable diseases were notified in the Republic of Esthonia during the month of October, 1923, as follows:

Disease.	Cases.	Remarks.	Disease.	Cases.	Remarks.
Diphtheria.....	16		Tuberculosis.....	108	
Measles.....	3		Typhoid fever.....	58	
Scarlet fever.....	36		Typhus fever.....	2	Paratyphus fever, 4 cases.
Smallpox.....	17				

GREAT BRITAIN.

Births and Deaths—Third Quarter, 1923—Scotland.

The accompanying tables were compiled from data given in the "Quarterly return of the births, deaths, and marriages registered in Scotland" during the quarter ended September 30, 1923, published by authority of the registrar general of Scotland.

The following are extracts from the return:

"The more outstanding features of the vital statistics in Scotland during the third quarter of the year are a birth rate of 21.9 per thousand, a marriage rate of 8.0 and a death rate of 10.6. The birth rate continues to show a fall. It is 1.9 less than that of the previous quarter, and 0.7 less than that of the third quarter of last year. The marriage rate shows an increase when compared both with what it was in the previous quarter and what it was in the corresponding quarter of last year, being 0.8 more than in the previous quarter and 0.4 more than in the third quarter of last year. The quarterly death rate is the lowest recorded since the introduction of national registration. It is 2.7 less than that of the previous quarter and 0.1 less than the corresponding quarter of last year, in which quarter the previous lowest recorded death rate occurred.

"The illegitimate children registered during the quarter numbered 1,880, which number, although 13 more than in the previous quarter, is 82 less than in the third quarter of last year. It is less than in all previous third quarters, with the exception of the third quarters of the years 1915 and 1917.

"The infantile mortality rate of the quarter was 62 per thousand births, and is the lowest Scottish quarterly infantile mortality rate yet recorded.

"The death rates from all forms of tuberculosis and from phthisis were 98 and 67 per 100,000, respectively, and both are exceptionally low.

"The death rate from malignant disease was 129 per 100,000. It remains at the same high level as was found in the previous quarter."

Birth and death rates in Scotland, July to September, inclusive, 1923.

	Scot-land.	Larger burghs.	Smaller burghs.	County districts.
Births per 1,000 population.....	21.9	22.9	20.3	21.2
Deaths per 1,000 population.....	10.6	11.1	10.6	10.0
