Abstract

© 2017. revistaESPACIOS.com Derechos Reservados. Innovations and innovation activity become driving forces for the development of all sectors of the economy, and the development of human capital in particular. For this reason, in this work we offered a methodological approach of an estimation of human capital in the case of the Republic of Tatarstan and the Volga Federal District regions for the period from 2010 to 2015 with forecast to 2020.

Keywords

Human capital development, Innovative capacity of the region, Prospects of development of the region, Representative approach
