Abstract

© 2015, Asian Social Science. All rights reserved. For manufacturers of vehicles the estimation of probability of occurrence in the market of sales of negative dynamics is actual, including on the basis of the information on cycles of development of branch. In the present paper the hypothesis of presence of cyclicity in development of branch on manufacture of vehicles is proved. The conclusion about existence of superlong-term cycles (waves) which are continuation of Kondratev long wave's time for completion of the superbig cycle of branch on manufacture of vehicles is made.
