### Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. The state and the problems of the small business system in the Russian Federation are primarily associated with its financial conditions. Insufficient rate of small business growth relates to a variety of causes, including lack of availability of the long-term lending resources. Small business lending conditions need state-financing backing. This publication substantiates the need for growing such a form to support small business as the guarantees for getting access to supplementary financial resources.
