Abstract

This article is devoted to the problem of Russian economy innovational structure creation and maintaining. Authors point out, that building of innovational economy is possible only on the assumption of the government, political forces and business partnering mechanism efficiency. Those subjects have to closely collaborate, not confront each other, with clear differentiation of economic targets and responsibilities of all partners. General direction of the Russian economy social-economic structure reforming is its further maximal adaptation to the market of innovational products and services features. There is a necessity of task-oriented economical subjects, political and social groups retrieve aggregation with which will allow enhancing progressive Russian society forces influence to the basic economy development trend.
