Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. Theoretical issues of Russian economy development in the context of globalization, internal and external factors, forming tendencies of structural changes of national production are considered in the article. The situation on the Russian market of exported goods, and its impact on the financial system of Russia are considered. Conditions for investment business are analyzed, the role of state finance, taxation and monetary policies on the performance of business in Russia are explored. A comparative analysis of investment conditions in Russia and in Western developed countries is made. Possible changes in macroeconomic policies, aimed at improving the conditions for investments in Russia, are determined.
