Due to a typesetting error Eqs. (31) and (34) have been incorrectly reproduced. The correct formula is given by:

$$\bar{f}(\mathbf{Q}) = \exp \left(-\bar{V}_0 - \sum_{i=1}^L (2\alpha_i + 1) \bar{\nabla}'_{\langle \alpha_i \rangle} \cdot \mathbb{F}'_{\langle \alpha_i \rangle}(\mathbf{Q}) \right) \quad (31)$$

$$\bar{f}(\mathbf{Q}) = \exp \left(-\bar{V}_0 - \sum_{i=1}^L (2\alpha_i + 1) \bar{\nabla}'_{\langle \alpha_i \rangle} \cdot \mathbb{F}'_{\langle \alpha_i \rangle}(\mathbf{Q}) \right) \quad (34)$$
