A conference on

Truth, Beauty and Imagination

in the Academy

February 16 - 18, 2000

**COASTAL CAROLINA
UNIVERSITY**

Concept AT Coastal

The Celebration of Inquiry conference, in its second year at Coastal Carolina University, is a university-wide academic conference designed to unite our learning community in cross-disciplinary discussion of a common theme.

During the days of the conference all classes are re-directed to conference sessions. It is our hope that the conference will provide a space in which students can experience and participate in inquiry-based intellectual discussion.

Author and scholar Gerald Graf makes an analogy between higher education and baseball. He says we teach pitching in one class, batting in another, catching in a third and, at last, running the bases. In each of the classes, we tell students they are learning about one component in a game called baseball, but students never actually see the game or play it. The Celebration of Inquiry conference at Coastal Carolina University invites students to the “game” as audience and/or “players.”

In 1999, Coastal Carolina University hosted its first Celebration of Inquiry conference; the theme for the conference was “Conflict and Creativity in the Search for Knowledge.” Archbishop Desmond Tutu and Horry County School Superintendent, Gerrita Postlewait, were plenary speakers. There were also 120 concurrent sessions offered by Coastal Carolina Uni-

versity students, faculty and staff.

This year’s Celebration of Inquiry conference will address the theme, “Truth, Beauty, and Imagination in the Academy.” We are moving from the exploration of knowledge in last year’s conference to imagination. Einstein said, “Imagination is more important than knowledge.” Knowledge is critical, but it is imagination which moves us beyond the limitation of what we know to what we might be able to know. What is Truth? How do we define Truth in the various disciplines at the university? And what does Beauty have to do with our work in the Academy?

One approach we will take during this year’s Celebration of Inquiry conference is a consideration of this line from the 13th century mystic Sufic poet, Rumi, “Let the beauty you love be what you do. There are hundreds of ways to kneel and kiss the ground.” What is the “beauty [we] love”? How can we identify it? How can it guide our study and work?

The Celebration of Inquiry conference is free and open to the public. There is no registration required. Information about the conference is available at <http://www.coastal.edu/inquiry> and from Coastal Carolina University’s Office of Marketing Communications (843-349-2015).

All conference sessions are held at Coastal Carolina University. All sessions are free and open to the public. There is no conference registration. There will be conference information tables in the Student Center, Singleton, Wall, and Kearns Hall where participants may pick up a copy of the conference program. The program will also be available on the conference web site at www.coastal.edu/inquiry

Great Jobs on the Grand Strand in 2010: Perceptions of Elementary School Children

As a part of their Teach a Child About Business project, the Students In Free Enterprise (SIFE) team here at Coastal is conducting a poster design contest for "Great Jobs on the Grand Strand in 2010: Perceptions of Elementary School Children." School children in first and either fourth or fifth grades will design posters next week as a part of the Teach a Child About Business project, and these will be placed throughout the Wall Building during the Celebration of Inquiry. Coastal statistics students in CBAD 291 will code the categories of posters created and then do statistical tests based on the perceptions of the different age students.

For more information about this project, contact Dr. Darla Domke-Damonte, Assistant Professor of Management, E. Craig Wall School of Business Administration (349-1219; Email: ddamonte@coastal.edu)

In addition to the three plenary sessions and the three performances during the conference, there will be more than 155 concurrent sessions offered on Thursday and Friday. More than 160 CCU students will be involved as presenters in those sessions. Sessions include workshops, performances, panel discussions, lectures and poster sessions. There are a number of interdisciplinary panels that explore topics from the perspective of multiple disciplines.

35 **The Beauty of Trash, Rock and Roll Style**

Steve Hamelman

In this interactive presentation, I take the term “beauty” and turn it on its head in terms of rock and roll music. The theme of “trash” or “garbage” is a time-honored one in the lyrics of even the best rock, and it also characterizes the critical literature. I demonstrate, with plenty of recorded examples to support my research, the fine line between classic and disposable rock and roll, and in the process I show how these terms are often interchangeable — garbage sometimes being the key ingredient in the success of the most beautiful (or at least enduring) rock songs.

36 **Joseph Jongen and the Musical Revolution of the Early 20th Century**

Gary Miles Stegall

Throughout his career, Belgian composer Joseph Jongen (1874-1954) was torn between his attachment to the more conservative ideals of the late 19th century movement known as the “Belle Epoque” (period of beauty) that were strongly promoted by the “Academies” of Fine Arts in Belgium and France, and the more radical, experimental philosophies that exploded onto the European musical scene at the turn of the century. In his journals, Jongen expressed constant shock and disgust with many of these more progressive trends. In his account of the world premiere in Paris of Stravinsky’s “Rite of Spring” (1913), Jongen accused Stravinsky of being an Asi-

atic barbarian who knew or cared nothing about the whole of Western musical thought. At a time when most musical geniuses were making their reputations by the creation of music that was more daring, and at times horribly anti-musical, Jongen was left in the lurch, along with the other members of the conservative Academies, to continue his career in a state of confusion, painfully aware that the music that he must create would become sadly out of fashion.

46 **Writing and Imagination**

Megan LeBoutillier

Truth can find its most natural expression through writing. Writing can be an avenue directly within yourself to sensitivity, beauty and imagination. Yet the Thursday maps to this avenue are easily distorted through the general academic approach to writing. Experiential writing will once again introduce the possibilities inherent in the process of listening in to ourselves through writing. As Camus wrote: “A man’s work is nothing but the slow trek to rediscover, through the detours of art, those two or three great and simple images in whose presence his heart first opened.”

PLENARY SPEAKERS

Anne Swanson

Anne Swanson

Anne Barrett Swanson, Dean of the School of Natural Sciences and Professor of Biology at Sonoma State University, 1990-93 Kellogg Fellow, and 1996-98 Courage to Teach Fellow, holds a Ph.D. in biochemistry from the University of Wisconsin-Madison. She has worked in cancer research, has been an associate program director at the National Science Foundation, and has spent some twenty years in higher education both as a teacher and an administrator.

Anne was born with a physical disability (osteogenesis imperfecta, or "brittle bones"). She is active at the national level as an advocate for people with disabilities. Her Kellogg Fellowship work involved two strands: a cross-cultural study of the fledgling disability civil rights movement emerging at the grass roots level among disabled people in various countries and cultures; and conflict resolution facilitation, including work with Israelis and Palestinians in the Middle East.

Daniel Ladinsky

Currently a resident of Myrtle Beach, Daniel Ladinsky has translated the Persian poetry of Hafiz into English. Hafiz, who lived from 1320-1388 A.D., wrote poetry about divinity and love. Ladinsky's renderings of Hafiz's work are written in a contemporary style. He describes his work as "...releasing the spirit of Hafiz—a spirit of infinite tenderness and compassion, of great exuberance, joy and laughter, of ecstatic love and fervent longing for his Beloved, and of wonder and delight at the divine splendor of the universe."

Ladinsky's volumes of poetry include *I Heard God Laughing: Renderings of Hafiz* (1996), *The Subject Tonight Is Love: 60 Wild and Sweet Poems of Hafiz* (1996), and *The Gift: Poems by the Great Sufi Master* (1999). His latest, *The Gift*, was the bestselling book of poetry in the U.S. for the month of August 1999.

Ladinsky's plenary session will be followed by a reception during which he will autograph copies of his books.

Daniel Ladinsky

Coleman Barks

Coleman Barks

Coleman Barks was featured on Bill Moyers's Language of Life series reading and discussing his renderings of the 13th century Sufi mystic poet Mevlana Jalal-e Din Mohammad Mevlavi Balkhi Rumi. Barks began his work with Rumi's poetry in 1976 when Robert Bly handed him a copy of A. J. Arberry's translations and said, "These poems need to be released from their cages." Rumi was born on September 29, 1207 A.D. in the northeastern provinces of Persia. He was an accomplished scholar and educator by the age of 37, but a meeting with Shams of Tabriz, a wandering dervish, changed his life forever and led him into the realms of ecstatic poetry. Rumi's "passionate, playful poems find and celebrate sacred life in everyday existence" which gives them universal appeal. Rumi's impact has been so great on philosophy, literature, mysticism and culture, that for nearly 800 years people worldwide have used his verses for inspiration and leadership.

Educated at Berkeley and UNC-Chapel Hill, Barks is currently affiliated with the English department at the University of Georgia. Coleman Barks has published books of his own poetry and 12 volumes of translated work. He is widely regarded as the premier English interpreter of Rumi.

Those interested in knowing more about Barks and Rumi may want to attend the session by Marcia Hayes, "Intersections in Time: Preview of Coleman Barks" (#100), Friday, 8:30 to 10:10 a.m. in Wall Auditorium.

In Search of a Name: European Immigration from 1892-1924

Margaret Sydnor Santee

Over twelve million men, women, and children entered the United States through Ellis Island, one of six ports open to immigrants, oblivious to problems facing them. Many names were misspelled or shortened during the admission process because of the vast numbers of immigrants being processed in a short time period. Documented stories reveal lost surnames, leading to problems in locating ancestors and identity confusion. Success in locating lost names can be found in a National Archives through the technology of a Soundex, alphabetical auditory listings which have been grouped according to the years the immigrants entered the United States.

Does Truth Have Many Faces? Multi-Culturalism, Truth, and the Study of History, Science, Literature, and Religion

Nils Rauhut, Brian Nance, Toby Ziglar, Daniel Ennis, Phil Schneider

It has become a standard feature of our current intellectual climate to embrace multiple perspectives and many-fold approaches to one and the same field of study. Nearly everyone in academia seems to accept that there are various ways to understand history, literature, science, and religious experiences. But how does this acceptance of multiplicity and diversity of method shape

our conception of truth? In this session we will explore how different academic disciplines are reacting to the influence of multi-perspective approaches to truth.

What's a Management Information System and How Do I Create It?

Joshua Barr, Paul Pinkston, Kurt Squires

A management information system MIS consists of several components and, as a whole, is one part of an overall information system in an organization. Each organization has unique information needs and, therefore, each part of the overall MIS should address these requirements. The MIS ties in with several lower-level databases as well as addressing upper-level data. The design can be as varied as the managers who use it. But certain facets should always be

considered no matter who develops or uses the MIS. We address and discuss the commonality and uniqueness of MIS design and usage.

Open-Forum Family Counseling: An Approach for Nurturing Families and the Community Using Truth, Beauty, and Imagination!

Jim Rogers, Stacy Cretzmeyer

In the wake of the Littleton, Colorado, tragedy, the violent attack on a Jewish Thurs-

day Community Center in L.A., the increase in school, student, and family conflicts, and other such negative societal realities, children, families and communities seem under attack from within and without. Families are seeking new skills for coping with the formidable pressures that impact parents, children and young people in our communities. This nationally-certified Parent and Family Life Educator teams up with a National Certified Counselor and Licensed Professional Counselor, to demonstrate the "open forum family counseling" approach developed by Dr. Alfred Adler and refined by Rudolf Dreikurs to guide and assist families in recognizing and working to resolve their intra-family concerns, thereby supporting and empowering the entire community. This presentation also involves the audience as participants as well as observers, as the entire gathering explores the family dynamics which are at issue for a "volunteer" family. Truth and Beauty in Keats's "Ode on a Grecian Urn"

Steven Carr, Peter Lecouras, Jeannie Lookadoo, Vanessa Salomo, Maggie Santee and Liz Stanley

Beauty and Truth are central themes of Keats's "Ode on a Grecian Urn." When Keats ends his poem by saying that "Beauty is truth, truth beauty," he is suggesting that they are identical and even interchangeable. Because truth and beauty are so personal, so involved with whom we are as individuals, some of the five papers to be presented by this panel will begin or end with reflections from their own experiences. But the central issue of this panel is the discussion of the poem and what it suggests about truth and beauty to its readers.
