# OPEN EDUCATIONAL RESOURCES STAFF TRAINING

## Goals:

- Participants will learn about OER and how we can help support faculty interested in adopting OER.
- Participants will meet each other, learn what we do in our respective departments and how we can work together.

## Schedule:

8:30am: Introductions

8:40am: What is OER?

9:00am: Copyright and licensing

9:30am: Identifying what faculty want to do with OER

10:00am: Instructional design and learning objectives introduction

10:15am: Break

10:30am: Searching for OER

10:50am: OER in the LMS

11:20am: Support for faculty - what our departments are doing

11:40am: Q&A

# WHAT IS OER?

*How dynamic educational content is hiding in plain sight*

"OER are teaching, learning, and research resources that reside in the public domain or have been released under an intellectual property license that permits their free use and re-purposing by others"

# IN OTHER WORDS

OER are free tools, materials, or techniques that support teaching and learning:

- Full courses
- Course materials
- Lesson modules
- Textbooks
- Streaming videos
- Tests
- Software
- And more

OPEN EDUCATIONAL  
RESOURCES

WHAT IS OPEN?

Christina Hendricks @clhendricksbc · Oct 20

“Open is yum.” From Hill (1975), What’s Open about Open Education? #oer  
#openeducation #openpedagogy #OpenEd

As any ad man knows, the best slogans are those which, irrespective of whether they actually denote anything about the product and the uses for which it is designed, do the most effective job of evoking useful mental associations and feelings of approval. Words that can be used in many different ways are more likely to pick up extraneous emotional overtones which will advance their effect as slogans. This has been well described as the ‘boo-hurrah’ effect that words often have, which more modern idiom, as my children have taught me, might well render ‘yuk-yum’.

An excellent candidate for sloganizing is the word ‘open’. Immediately one uses it, the options polarize. To be open (depending on context) is to be not closed, restricted, prejudiced or clogged; but free, candid, generous, above board, mentally flexible, future-oriented, etc. The opposite *[sic]* does not bear thinking about, and there can be no third alternative. ‘Open’ is yum.

# HOW IS OPEN DIFFERENT, HERE?

- Free + permissions (Wiley)
- A free granting of permissions (updated, Wiley)
- 5r permissions + value (Merkley)
- Free + import (Lashley)

# THE 5 Rs OF OPEN CONTENT

**RETAIN** copy and keep forever

**REUSE** use forever

**REVISE** modify or improve freely

**REMIX** combine with other open/original work

**REDISTRIBUTE** share widely

Shame is an unspoken epidemic, the secret behind many forms of broken behavior. Brené Brown, whose earlier talk on vulnerability became a viral hit, explores what can happen when people confront their shame head-on. Her own humor, humanity and vulnerability shine through every word.

# Psychology

[Table of Contents](#) | [Instructor Resources](#) | [Student Resources](#) | [Details](#) | [Errata](#)

Psychology is designed to meet scope and sequence requirements for the single-semester introduction to psychology course. The book offers a comprehensive treatment of core concepts, grounded in both classic studies and current and emerging research. The text also includes coverage of the DSM-5 in examinations of psychological disorders. Psychology incorporates discussions that reflect the diversity within the discipline, as well as the diversity of cultures and communities across the globe.

- > [Projects and examples](#)
- > [Assignments: written \(no examples\)](#)

## Course Description

This course is an introductory exploration of documentary film theory and production, focusing on documentaries about science, engineering, and related fields. Students engage in digital video production as well as social and media analysis of science documentaries. Readings are drawn from social studies of science as well as from documentary film theory. The course uses documentary video making as a tool to explore the worlds of science and engineering, as well as a tool for thinking analytically about media itself and the social worlds in which science is embedded. The course includes a hands-on lab component devoted to digital video production, in addition to classroom lectures and in-class film screenings.

“The *use* of a learning resource, through adaptation and repurposing, becomes the *production* of another resource. Though there is a steady stream of new resources input into the network by volunteers, this represents, not the result of an OER sustainability project, but the *beginning* of it.”

Stephen Downes (2007)

# COPYRIGHT AND LICENSING

*in about 20 minutes*

# Copyright

1. To reproduce the work
2. To prepare derivative works
3. To distribute copies or phonorecords of the work to the public by sale, rental, lease, or lending
4. In the case of literary, musical, dramatic, and choreographic works, pantomimes, and motion pictures and other audiovisual works, to perform the work publicly
5. In the case of literary, musical, dramatic, and choreographic works, pantomimes, and pictorial, graphic, or sculptural works, including the individual images of a motion picture or other audiovisual work, to display the copyrighted work publicly
6. In the case of sound recordings, to perform the copyrighted work publicly by means of a digital audio transmission

Source: <https://www.copyright.gov/help/faq/definitions.html> public domain

# Copyright

Applies to work that is:

- Original
- Fixed medium

Does not apply to:

- Facts, ideas, aggregations of data
- Government documents

# Copyright

Applies to work for a fixed term:

- Currently, life of author + 70 years (US)
- “For works made for hire, anonymous works and pseudonymous works (unless the author’s identity is revealed in Copyright Office records), the duration of copyright is 95 years from publication or 120 years from creation, whichever is shorter.”  
(<https://policy.boisestate.edu/governance-legal/use-of-copyrighted-works/>)

Is applied immediately = you do NOT need the ©  
Once copyright expires, or if the work was not subject to copyright, it is part of the Public Domain

Source: <http://copyright.cornell.edu/resources/publicdomain.cfm>

# POLICY TITLE: USE OF COPYRIGHTED WORKS

Boise State University BSU Policy #1130

Effective Date: June 2015

## **Purpose:**

To provide guidance regarding the permissible use of others' copyrighted works.

## **Additional Authority:**

Title 17 United States Code, the Federal Copyright Act (the Copyright Act), §102-112

## **Scope:**

Faculty, Staff, and Students.

## **Responsible Party:**

Provost and Vice President for Academic Affairs, 426-1212

Albertson's Library Administration, 426-1234

Screenshot from: <https://policy.boisestate.edu/governance-legal/use-of-copyrighted-works/>

## FAIR USE

Fair use is a concept embedded in U.S. law that recognizes that certain uses of copyright-protected works do not require permission from the copyright holder or its agent. These include instances of minimal use that do not interfere with the copyright holder's exclusive rights to reproduce and reuse the work.

Fair use is not an exception to copyright compliance; it is more of a "legal defense." That is, if you copy and share a copyright-protected work and the copyright holder claims copyright infringement, you may be able to assert a defense of fair use which you would then have to prove.

Fair use is primarily intended to allow the use of copyright-protected works for commentary, parody, news reporting, research and education. **However, not all uses in an academic context are automatically considered fair use.**

The Copyright Act does not spell out the specific types of content reproduction that qualify as fair use. It offers an outline as to how to analyze whether fair use may apply in a particular situation. As a result, the Copyright Act leaves it up to the individual to determine, based upon the factors in [Section 107](#) of the Act, whether fair use applies in each particular circumstance. To avoid a potential legal challenge from the copyright holder, many institutions follow a policy of "when in doubt, obtain permission."

# GUIDING FACULTY:

*How do you determine what OER is right for the faculty?*

# Guiding Questions

## Course Questions

- What is the level of the course?
- What is the enrollment size?
- Is this course taught at a lot of other institutions?

## Textbook Questions

- Are they wanting a textbook or just supplemental resources?
- Do they have a textbook they like using?
- If not, what were the problems with their previous textbook? What did it not achieve for their course and students?

# Guiding Questions

## Faculty

- How much curation does the faculty member want to do?
- Are they wanting to update the OER?
- Do they want ancillary materials (PowerPoints, Test Banks)?
- How comfortable are they with technology?

# MAKING RECOMMENDATIONS TO FACULTY

*How do you help them pick the right approach for their course?*

# Factors to Consider for OER Recommendations

Adoption	Adaptation	Creation
High enrollment / Standard courses / Lower division courses	Courses for which content exists, but not in textbook form	Highly specialized, upper-division / New courses for which content doesn't exist
Familiar to traditional textbooks	Faculty wants more control / customization	Faculty wants full customization
Ancillary materials needed	Is okay with building some supporting resources / assessments	A way to contribute to the field
Requires minimal time investment for integration into a course	Requires more oversight / updating	Requires a large time investment
Content may be more well-vetted	Content can be more current / easy to omit	A way of creating and sharing new knowledge
Ex: <a href="#">OpenStax</a>	Ex: <a href="#">PM4ID</a>	Ex: <a href="#">Teaching in the Digital Age</a>

# GETTING FACULTY STARTED

*What are the next steps?*

## **Adoption**

1. Outline course outcomes / structure
2. Search for content
3. Ensure that selected option aligns with outcomes / structure

## **Adaptation**

1. Outline course outcomes / structure
2. Search for content
3. Match OER with structure
4. Curate multiple sources together

## **Creation**

1. Outline course outcomes / structure
2. Use an incremental approach or partner with others
3. Leverage smaller OER when available (images, videos)

# INSTRUCTIONAL DESIGN AND LEARNING OBJECTIVES

# SEARCHING FOR OER

# Finding OER

# O(A)ER AND THE LMS

*Strategies for managing OER and/or library resources*

# TO (RE)USE

Simply linking to open/alternative content that is hosted elsewhere

Recommended tools

- **Blackboard Learn**
- Canvas (for the programs that use it)

# (RE)USE DEMO

*Open Textbook Library*

# TO REUSE/RETAIN/REVISE/REMIX

Downloading open content to ensure that content does not change or to modify that version

## Recommended tools

- **Google Drive**
- **Blackboard Content Collection**
- **Canvas Files**

# REUSE/RETAIN/REVISE/REMIX DEMO

*Google Drive*

# TO REDISTRIBUTE

Openly sharing modified or original content so that others may reuse/retain/revise/remix/redistribute

## Recommended tools

- **OER Commons**
- **ScholarWorks**
- Pressbooks\*
- Google Drive
- Canvas Commons
- Blackboard Open Content

*\*Institutional support is not yet available*

# REDISTRIBUTE DEMO
