Abstract

The interpretative methodology applied in Common Law CISG jurisprudence has driven a disparity of reasoning that hinders a uniform application of its provisions. This result is inconsistent with CISG Article 7 which mandates interpretation of the convention in accordance with its international character and the need to promote uniformity. This paper discusses the multiple aspects that have affected the uniform interpretation of CISG norms, including a reference to the case law in USA, Australia and Italy. Finally, the Unidroit principles are presented as an aid to overcome the difficulties in the application of CISG article 7.

LA CONVENCIÓN DE VIENA SOBRE COMPRAVENTA INTERNACIONAL DE MERCADERÍAS Y EL *COMMON LAW*: EL RETO DE INTERPRETAR EL ARTÍCULO 7

Resumen

La metodología interpretativa aplicada en la jurisprudencia del *Common Law* relativa a la Convención de Viena sobre Compraventa Internacional de Mercaderías ha conducido a una constante disparidad de razonamientos que obstaculizan una aplicación uniforme de sus disposiciones. Este resultado es inconsistente con el artículo 7 de la Convención, el cual establece que esta debe ser interpretada atendiendo a su carácter internacional y la necesidad de promover uniformidad. El presente texto explora los múltiples aspectos que han afectado la interpretación uniforme de las normas de la Convención, incluyendo una referencia a la jurisprudencia de Estados Unidos, Australia e Italia. Por último, el texto presenta los principios de Unidroit como una herramienta para superar las dificultades en la aplicación del artículo 7.

A CONVENÇÃO DE VIENA SOBRE COMPRA E VENDA INTERNACIONAL DE MERCADORIAS E O *COMMON LAW*: O DESAFIO DE INTERPRETAR O ARTIGO 7

Resumo

A metodologia interpretativa aplicada na jurisprudência do *Common Law* relativa à Convenção de Viena sobre Compra-Venda Internacional de Mercadorias levou a disparidades constantes de argumentos que impedem uma aplicação uniforme das suas disposições. Este resultado é incompatível com o Artigo 7 da Convenção, que afirma que ele deve ser interpretado de acordo com o seu caráter internacional e a necessidade de promover a uniformidade. Este artigo explora os múltiplos aspectos que têm afetado a interpretação uniforme das normas da Convenção, incluindo uma referência à jurisprudência dos Estados Unidos, Austrália e Itália. Finalmente, o texto apresenta os princípios de Unidroit como uma ferramenta para superar as dificuldades na aplicação do artigo 7.

Introduction

It has been widely considered that 'the adoption of uniform rules' contributes to the reduction of legal obstacles in 'International Trade' and thereby, facilitates its 'development'¹. To date, the Vienna Convention on the International Sale of Goods (CISG) is part of the legal regime of 79 states². The adoption of the convention allows states to reassess their domestic law and to incorporate a normative framework that more favours the necessities of international trade³. The CISG is recognised worldwide as a success towards the achievement of international legal uniformity⁴.

Success of the convention does not appear so evident when examining the Common Law jurisdictions where the CISG has been mostly 'neglected'⁵. The Common Law attitude for the CISG has been considered less than 'enthusiastic' in comparison to its reception by Civil Law countries⁶. Common Law case law has been constantly criticised and accused internationally of being in breach of the interpretative methodology of the CISG⁷; the predilection for domestic law during the interpretive process being a dominant cause⁸. This obstructs international

uniformity and results in mounting inconsistent reasoning of CISG provisions which leads contractual parties to frequently exclude the CISG consciously due to concern of ‘unpredictable outcomes’⁹.

Although uniformity of application in a strict sense is unrealisable, a ‘relative uniformity’ must be pursued¹⁰. Multiple causes for the absence of uniformity have been identified with some of them being attributable to the design of the CISG itself¹¹. However, the ‘homeward trend’¹² in the Common Law CISG jurisprudence, the ‘attachment’ to domestic legal criteria and the ‘reluctance’ to be seduced by the CISG has primary impact upon the achievement of global uniformity¹³.

The accelerated growth in international trade has forced a convergence of different legal traditions. The CISG constitute an important unification effort and provides many advantages compared to the possibility of being governed by the ‘uncertainty of an unknown domestic legal system’¹⁴. Common Law Courts and their practitioners would be advised to embrace the methodology of interpretation of the CISG for the benefits it represents.

This paper begins by exploring the multiple aspects that have affected the uniform interpretation of CISG and continues drawing upon analysis of foreign literature to explain the main features of Common Law that have been asserted as interfering in an accurate interpretation of its provisions. A revision of the case law in USA, Australia and Italy is then presented and followed by a consideration of how a change in perception by lawyers and the courts can lead to a higher quality of CISG jurisprudence. The paper concludes with an analysis of how difficulties in the application of article 7 can be overcome through the aid of the Unidroit principles.

Searching the obstacles for the correct application of article 7

The implementation of unified laws does not necessarily translate to uniform application¹⁵. The uniform application of the CISG is challenged by the practice of tribunals, practitioners and commercial parties¹⁶. When applying the CISG, tribunals produce diverging outcomes, causing uncertainty that has led commercial parties to exclude the CISG from their contracts¹⁷. As a consequence, such parties often choose to regulate their contracts under the predictability of a precise domestic legal system¹⁸ however, in several cases, studies have illustrated that non incorporation is an automatic response to deficient knowledge of the CISG provisions¹⁹.

The homeward trend and the CISG incompleteness

The absence of uniform application has been attributed to multiple causes²⁰. It has been asserted that the inexistence of a unified court or ‘an official administrative body’²¹ results in inadequate interpretive guidance on the CISG provisions²².

The endeavored uniformity is undermined by the ‘homeward trend,’²³ whereby judges, being ‘a product of their background assumptions and conceptions,’²⁴ interpret the CISG through the introduction of criteria proper of domestic laws²⁵. The homeward trend can also be manifested in the tendency to achieve results that

lend to the application of domestic laws²⁶. The latter is exemplified through the invocation of Article 4(a) of the CISG which states that unless otherwise expressly provided, the Convention 'is not concerned with the validity of the contract'²⁷. Through this vehicle, judges tend to identify validity issues, thereby providing grounds for the application of their domestic law²⁸.

Scholarly writing has outlined that there are other characteristics of the CISG that exacerbate the obstacles to a uniform interpretation²⁹. The CISG is the result of diverse legal traditions and for this reason some terms are 'open ended'³⁰ and presents ambiguities³¹ that confer too much freedom to tribunals³². An example is the expression, 'reasonable time' in article 39(1) CISG³³. Additionally, the CISG is incomplete³⁴ for it only regulates the formation of the contract, obligation of the parties and contractual remedies³⁵. The Convention is devoid of some important legal definitions including the concept of goods, the contract of sale of goods and the concept of good faith³⁶. Incompleteness is further highlighted by the exclusion of validity questions³⁷, procedural law, taxation law, effects of the contract on the property and specification as to what rate of interest should be paid³⁸. When faced with such gaps, solutions must be pursued in the underlying principles of the convention. The difficulty lies in that there is no express mention of general principles and therefore, they are often difficult to identify. Consequently, answers are often sought in domestic law³⁹.

Some argue that the concept of freedom of contract underlying the CISG can constitute an obstacle to uniformity⁴⁰. Article 6 allows parties to contract out of the CISG and any of its provisions⁴¹. Article 95 allows states, while adhering to the CISG, to ‘not be bound’⁴² by article 1 (1) (b)⁴³. It allows exclusion of the CISG ‘when only one party has its place of business in a contracting state’⁴⁴. This reservation has been adopted by U.S.A., China and Singapore, amongst others⁴⁵.

Commentators argue that the principle of freedom of contract is incompatible with the objective of the Convention as stated in its preamble which, looks to promote ‘equality and mutual benefit’⁴⁶. Some go so far as to state that if it is possible to opt out of the Convention, its purpose is muted⁴⁷. If application of the convention is optional it is more likely that the party with the least negotiation position is forced to consent to the law preferred by the stronger trading partner⁴⁸. Opt outs logically limit the improvement in quality of the CISG jurisprudence towards uniformity.

The drafters of the CISG predicted the ‘homeward trend’⁴⁹ and attempted to minimise it through use of a ‘plain language’⁵⁰, ‘using words of common content in the various languages’⁵¹ but particularly with the incorporation of Article 7 (1) which mandates interpretation of the convention in accordance to ‘[its] international character and the need to promote uniformity in its application’⁵². The article does not detail the mode by which uniformity can be achieved⁵³ although; it has been understood as ‘imperative’ to not read the Convention using ‘the lenses of

domestic law⁵⁴. In other words, domestic legal terms, non-*CISG* cases and non-*CISG* provisions should not be applied⁵⁵.

Article 7 has been vastly studied by academics concerned with providing efficient tools to ensure international and uniform application. It has been construed as an invitation to ‘tribunals in one contracting state [to] consider the opinions of tribunals in other contracting states’⁵⁶, as ‘persuasive authority’⁵⁷ which, has been denominated as ‘global jurisconsultorium’⁵⁸. However, there is consensus that there is no ‘*stare decisis*’⁵⁹ principle and therefore, they are no binding precedents⁶⁰. It is considered that decisions must be analysed critically otherwise bad reasoning will be perpetuated⁶¹. Article 7 also invites invocation of the *CISG* legislative history⁶² and scholarly opinions as an aid in the achievement of uniform outcomes⁶³.

However, in practice commentators have outlined that, “[v]ery rarely do decisions take into account the solutions adopted on the same point by courts in other countries”⁶⁴. Barriers that stem from different legal traditions present challenges in the realization of this task⁶⁵ particularly, issues have been observed in Common Law countries⁶⁶.

The *CISG* is perceived as being reflective of a Civil Law background⁶⁷, grounded in part upon the fact that its predecessor, *Ulis*, was redacted by civilians⁶⁸.

The Convention finds considerable acceptance in Civil Law jurisdictions⁶⁹ where voluminous CISG cases have been reported⁷⁰. To date, the number of Common Law cases is relatively 'scarce'⁷¹. An obstacle to improving uniformity between Civil Law and Common Law is the UK's disinterest in ratifying the CISG⁷². Some commentators adduce that the reason could be that "the Convention would result in a diminished role for English Law within the international trade arena"⁷³. Without the UK's adoption of the CISG, tribunals in countries that have typically adhered to English Law⁷⁴ are now without accustomed guidance when attempting to apply the Convention⁷⁵. Some suggest that these jurisdictions have started to evolve their own CISG case law⁷⁶.

Features of the common law that may affect the application of the CISG

There are several distinctive features between Common Law and Civil Law jurisdictions that have been referred to as obstacles to uniform application. One is Common Laws 'attachment' to its legal history which makes difficult the incorporation of external concepts⁷⁷. Furthermore, the notion of legal precedent does not have a 'global definition' and the differences in approach are intense amongst various jurisdictions⁷⁸.

a. The concept of precedent

Under Common Law⁷⁹, judicial precedents are binding authorities⁸⁰ and central to the law making process⁸¹. In Civil Law jurisdictions 'rules are derived from statutes'⁸² and judicial decisions are not technically a source of legal rules although, precedent can possess considerable persuasive value and therefore have great significance in the legislative process⁸³.

Of consideration is that in its tradition of applying precedents, Common Law has been limited to decisions made in respect of their own national law⁸⁴. The precedent as a persuasive authority of the CISG more closely resembles that of Civil Law⁸⁵.

b. Different method of interpretation

Other aspect of distinctiveness is the different method of interpretation proper of Common Law countries. Under Civil Law, interpretative doubts are resolved with the application of principles whereas⁸⁶, under common law systems interpretation must be 'narrow' with the meaning of the legislation primarily deduced from the words of the statute and application of general principles seemingly unfamiliar⁸⁷.

Narrow interpretation does not favourably fit the international character of the Convention which, calls for identifying its underlying principles in order to fill gaps. A 'broader interpretation' can result in a more orthodox application of Article 7 (1)⁸⁸.

The understanding of Article 7 as invitation to consider international scholarly writing⁸⁹, historical background and preparatory materials of the CISG is 'familiar'

for civilians for whom doctrinal opinions have traditionally been an ‘interpretative’ aid and parliamentary material has habitually provided ideological approach to the purpose of legislations⁹⁰.

Wider interpretation of Article 7 is unaccustomed with the Common Law perspective where traditionally, ‘parliamentary intention must appear in the text’ of the statute and neither the legislative history nor the doctrine have regularly been considered as an appropriate aid for statutory interpretation⁹¹. However, there is some academic reference that modern Common Law interpretation has started to display a more encompassing approach⁹².

c. Procedural differences ‘iura novit curie’

Commentators have also made reference to procedural issues in Common Law countries⁹³. In most Civil Law jurisdictions there is an ‘inquisitorial system’⁹⁴ and there is application of the ‘iura novit curie’⁹⁵ (‘the judge knows the law’)⁹⁶ whereby, the judges have an ‘*ex officio*’⁹⁷ duty to search for the correct precedent. In most Common Law countries the judge relies on the pleading of the parties⁹⁸. For this reason, if the counsel omits to mention the CISG judges cannot apply it⁹⁹.

The reality is that even in ‘*jura noscit curia*’¹⁰⁰ jurisdictions, for practical reasons, the judges often limit themselves to the material presented by counsel¹⁰¹, with the duty being predominantly upon the party to look to international case law. For this reason some argue that the non-uniform CISG application is a consequence of the ignorance of the parties rather than that of the court¹⁰². However, Spagnolo

has pointed out that there is not a real barrier for judges to apply the ‘*jura noscitur curia*’ in demand of the correct application of the CISG¹⁰³.

d. Different legal notions

Another difficulty is the differences between legal notions that are incorporated into the Common Law system and those of the CISG¹⁰⁴.

The absence of consideration

The requisite of ‘consideration’ pertaining to Common Law systems is not ‘demanded’ under CISG provisions¹⁰⁵. Article 29 (1) of the CISG establishes that “[a] contract may be modified or terminated by the mere agreement of the parties”¹⁰⁶. This provision has been understood to “overrule” the common law requirement of consideration¹⁰⁷. The inapplicability of consideration in the CISG has been well recognised in some decisions. In *Shuttle Packaging Systems LLC v Jacob Tsonakis*¹⁰⁸ the Court stated that “under the Convention, a contract for the sale of goods may be modified ‘without consideration for the modification’”¹⁰⁹. However, some tribunals have made evident their misunderstanding of this distinction and show a clear ‘homeward trend’¹¹⁰, interpreting ‘consideration’ as a validity issue which, allows the application of CISG Art 4(a) and provides room to analyse the lack of consideration under domestic law¹¹¹.

In the formation of the contract, under the CISG its existence is dependent upon the correspondence between offer and acceptance¹¹². This CISG provision allows that even if there is not a complete compatibility between offer and acceptance the contract can still exist although, just in those cases where the acceptance introduces changes that do not materially alter the terms of the offer¹¹³. However, in practice it is difficult to find contractual changes that do not materially affect the offer¹¹⁴.

Under the CISG the 'acceptance of an offer becomes effective at the moment the indication of assent reaches the offeror'¹¹⁵. Practices established by the parties that 'may indicate assent by performing an act'¹¹⁶ can constitute acceptance¹¹⁷. This displays some distinctiveness from some Common Law regulations which generally require 'communication of acceptance'¹¹⁸.

Absence of the parol evidence rule

The common law parol evidence rule does not allow 'the consideration of any agreement that contradicts a contemporary or subsequent writing intended by the parties as a final expression of their agreement'¹¹⁹. 'Oral or any other extrinsic evidence cannot be permitted to alter, contradict or explain terms of a written contract'¹²⁰. This concept is inapplicable to the CISG¹²¹. Article 8 of the CISG refers to the interpretation of statements or other conduct of a party, stating in its subparagraph 3 that:

In determining the intent of a party or the understanding a reasonable person would have had, due consideration is to be given to all relevant circumstances of

the case including the negotiations, any practices which the parties have established between themselves, usages and any subsequent conduct of the parties (Ibid).

This provision has been understood to supersede any domestic law that would prevent a tribunal from ‘considering’¹²² other agreements and it is therefore in direct contradiction to the parol evidence rule¹²³.

The notion of good faith

The concept of good faith is included within Article 7 (1) of the CISG although; it was the object of great discussion during the drafting period¹²⁴. The different approaches amongst Common Law and Civil Law jurisdictions can make this concept ‘vague’¹²⁵. Under the German concept of good faith parties are expected ‘to act in good faith before and after a contract’¹²⁶ and ‘Italian law considers it an ethical obligation’¹²⁷ while in English law¹²⁸, the concept of good faith is not accepted as ‘clarity on its exact meaning is considered difficult to determine’¹²⁹. However, in other Common Law countries such as *the* United States the concept has been adopted, being defined as ‘*honesty in fact in the contract or transaction concerned*’¹³⁰. It appears that the Australia legal system is moving nearer towards acceptance of the concept as illustrated in *Renard Constructions (ME) Pty v Minister for Public Works where it was stated*, ‘Australian law has reached a point where it should consider the implied inclusion of concepts similar to good faith in contracts as is done in the US’¹³¹.

Article 7 of the CISG states that in the interpretation of the Convention regard is to be given to the ‘observance of good faith in international trade’¹³². The plain text of this provision appears to provide insufficient clarity as to the exact meaning of the good faith notion in the CISG ambit. The main discussion has been whether the concept of good faith is to be understood as a contractual duty of the parties or as an interpretative tool of the convention¹³³. In this regard Korenu has expressed that good faith cannot be said to exist exclusively as an interpretative tool as ‘it is not possible to interpret the Convention without also affecting the contract’¹³⁴. In practice it seems that the concept has been understood as a principle of interpretation and not as a duty¹³⁵. However, some courts and arbitral panels have implied a general duty of good faith to dealings between contracting parties¹³⁶.

The non application of the ‘perfect tender rule’

The ‘perfect tender rule’¹³⁷ proper of the Anglo American Law provides the buyer with a ‘broad right’¹³⁸ to reject the goods if they are nonconforming to the contract in any aspect however; this concept is not applicable under the CISG¹³⁹. Given the long distances that are implicated in international trade, the CISG requires buyers to accept delivery of nonconforming goods in most situations¹⁴⁰. This is intended to prevent the detrimental economic costs that may be involved if the goods were to be returned¹⁴¹. Where there is nonconformity, the CISG provides the remedies of ‘unilateral price reduction’¹⁴² and ‘subsequent claim for damages’¹⁴³.

Furthermore, the option exists for an additional reasonable period of time to be fixed by the buyer for the seller to perform his obligations¹⁴⁴.

The CISG also provides for the remedy of avoidance which requires a fundamental breach that 'foreseeably and substantially deprives the innocent party of what they were entitled to expect under the contract'¹⁴⁵; or alternatively, in cases of non-delivery, where the seller does not deliver within the 'additional period of time fixed'¹⁴⁶.

The CISG regulates the right to compel performance from both the buyer and seller¹⁴⁷ which is a right not ordinarily admissible in the Common Law system¹⁴⁸.

The application of article 7; an overview of the tendencies in the USA, Australia and Italy

United States

The attitude of U.S. practitioners and courts towards the CISG has drawn much criticism from scholars¹⁴⁹; exclusion of the Convention is common with many U.S. practitioners¹⁵⁰. Rather than apply the CISG, some U.S. courts prefer to arrive at outcomes exclaiming '*the CISG is not the law of the contract*'¹⁵¹. A minimal reference to CISG foreign case law has been displayed by the U.S. courts although, the majority have relied on domestic cases and authors¹⁵². Some federal decisions have incorrectly stated that 'there is little CISG case law'¹⁵³ while the truth is that to date, the CISG website of Pace University Law School has reported 161 cases

in the U.S. alone¹⁵⁴. However, the homeward trend is fragrantly evident¹⁵⁵. Many U.S. decisions erroneously have asserted that the UCC case law can constitute an aid for interpretation ‘where the language of the relative CISG provision tracks that of the UCC’¹⁵⁶ which, clearly contradicts the mandate of Article 7 of interpreting the Convention in accordance with its international character and its derived suggestion to refer to international case law¹⁵⁷.

In *Delchi Carrier s.p.A. v Rotonex Corp* the Court, when applying Article 79 of the CISG, relied on case law interpreting 2-615 of the UCC, asserting similarity between the provisions. This argument has been reproduced in subsequent cases¹⁵⁸. In *Genpharm Inc v Pliva- Lachema*¹⁵⁹ the Federal District Court of New York stated that:

The result of the case would also be appropriate if analysed under the UCC. The Second Circuit has recognised that case law interpreting analogous provisions of Article 2 of the Uniform Commercial Code... may also inform a court where the language of the relevant CISG provisions tracks that of the CISG (Ibid).

Very little reference has been made to foreign doctrinal writing¹⁶⁰. In *Barbara Berry, S.A. de C.V. v. Ken M. Spooner Farms, Inc.*¹⁶¹, a brief reference was made to the author Franco Ferrari however, in a footnote only¹⁶².

Despite, the U.S. courts still having much to do in order to achieve at least a relative uniformity, some decisions have shown that there is a consciousness of the obligation to construe the convention in an international manner. The incorporation of domestic law concepts in CISG cases is still a constant but some improvements

have been observed¹⁶³. Some decisions have given light to the understanding of the inapplicability of some Common Law concepts in the scope of the CISG. One particular example can be seen below: *In Beijing Metals & Minerals v American Business Centre Inc.*¹⁶⁴, the Court stated that the ‘parol evidence rule’ would apply ‘regardless of whether Texas Law or the CISG applied’¹⁶⁵. Commentators¹⁶⁶ criticised the fact that the ‘CISG was treated as a mere extension of the UCC’¹⁶⁷. However, *In MCC-Marble Ceramic Centre Inc v Ceramica Nuova D’Agostino SpA*¹⁶⁸ the U.S. Court of Appeals, while reversing a District Courts judgment¹⁶⁹, considered the doctrine in this matter, finally concluding that¹⁷⁰ CISG Article 8 (3) displaces the parol evidence rule and furthermore dismissed the opinion in *Beijing Metals* as inadequately persuasive on the issue. This position was confirmed in subsequent decisions¹⁷¹.

Some cases, although not being a majority, have been considered a correct application of the CISG interpretative methodology, particularly because of their reference to foreign cases¹⁷². In *Medical Marketing International Inc. v. Internazionale Medico Scientifica, S.R.L.*¹⁷³ the Eastern District Court of Louisiana confirmed an arbitral award which granted damages to the plaintiff because the defendant had delivered units that failed to comply with U.S. safety standards¹⁷⁴. The court took into account a German Supreme Court case for the statement that under Article 35 of the CISG a ‘seller is generally not obligated to supply goods that conform to

public laws and regulations enforced at the buyers place of business¹⁷⁵. The court considered that the arbitrators gave correct application to the German case and that the situation fitted within an exception recognised by the German Supreme Court¹⁷⁶.

*Chicago Prime Packers Inc v Northam Food Trading Co*¹⁷⁷ is considered a correct application of Article 7 (1) of the Convention. The U.S. District Court, Northern District of Illinois, Eastern Division recognised the duty of interpreting the convention in accordance to its international character. The Court cited seven foreign cases¹⁷⁸. In this case the seller purchased from another 'U.S. company 40 500 pounds of frozen pork ribs'¹⁷⁹ that 'it immediately'¹⁸⁰ 'resold to a Canadian meat wholesaler (the buyer)¹⁸¹ who 'entrusted'¹⁸² a U.S. party to process the meat. When receiving the goods the processor expressed that 'they were in good condition with the exception of 21 boxes that had holes gouged in them'¹⁸³. Just 9 days later when starting to 'process the ribs,¹⁸⁴ the processor 'noticed their poor condition'¹⁸⁵. A USDA inspector established the poor condition and ordered them to be destroyed¹⁸⁶. 'Buyer informed Seller that it was not willing to pay'¹⁸⁷ and the Seller, who

had already paid its own supplier for the goods 'brought a law suit against Buyer for breach of contract'¹⁸⁸.

Leading issues to be identified were whether Buyer was dutiful in examining the goods within a reasonable period once receiving them and whether Buyer informed Seller of the 'alleged'¹⁸⁹ non-conformity within a reasonably acceptable term of time¹⁹⁰.

In explaining that 'the buyer bears the burden of proving that the goods were inspected within a reasonable time'¹⁹¹ the Court relied on *Fallini Stefano & Co. S.n.c. v. Foodic BV*¹⁹², a case from the Netherlands. In elaborating on 'reasonable time'¹⁹³ in the identifying and informing of defects or non-conformity under the CISG, the U.S. District Court looked at a number of foreign cases related to distinct circumstances¹⁹⁴, concluding that Buyer could not provide suitable evidence that proved it examined the goods or had them examined in a 'reasonable time'¹⁹⁵.

The case *Treibacher Industrie, A.G. v. Allegheny Technologies, Inc*¹⁹⁶. Is an example of how lawyers can contribute to the improvement of the CISG jurisprudence¹⁹⁷. It involved a purchase of chemical compound for 'consignment'¹⁹⁸ which, amounted to a discussion concerning the meaning of this term. The buyer argued that this means that the sale only occurred when the compound is used. The supplier argued that according to the dealing between the parties it means that there is purchase

but the buyer ‘would not be billed until the product was used’¹⁹⁹. The court in the first instance determined that the buyer was obligated to pay for the compound delivered even when it was not used, in accordance ‘with evidence of the parties interpretation of the term in the course of dealing’²⁰⁰. The buyer appealed and the decision was confirmed during the appeal²⁰¹. The supplier’s lawyers submitted a ‘brief’ supported by exhaustive references to pertinent CISG foreign cases highlighting that CISG Article 8 (3) mandates that in determining the parties intent, all the circumstances surrounding the transactions, including the conduct of the parties must be considered²⁰². These arguments helped to support the Court of Appeal’s decision²⁰³.

Australia

The unfamiliarity of Australian lawyers and Courts in regard to the CISG has been strongly criticised by scholars²⁰⁴. The ignorance of the CISG by practitioners has been evidenced through a significant number of automatic exclusions of the Convention and with untrained behaviour at times when the CISG arises in litigation²⁰⁵. Court decisions have also shown an intense homeward trend, an undue return to domestic law, inclusion of Common Law concepts incompatible with the CISG and an almost inexistence of references to International case law²⁰⁶.

To date, the website of Pace University Law reports 25 CISG Australian cases with earlier decisions having received positive reviews by scholars although, there is criticisms of little progress since²⁰⁷. In *Renard Constructions (ME) Pty Ltd v Minister for Public Work*²⁰⁸, although this case did not imply application of the CISG,

there was a reference in the obiter to CISG provisions²⁰⁹. The case coming from an arbitral award to the New South Wales Court of appeals centred on a to 'show cause'²¹⁰ notice with 'subsequent termination of the contract'²¹¹. Priestley J drew from 'scholarship',²¹² the '*UNCITRAL Model Law on Arbitration*'²¹³ and 'Article 7 (1) of the *CISG*'²¹⁴ while referring to notions of good faith and concluded that the acceptance of the concept of good faith in Australia could be fast 'approaching'²¹⁵.

Spagnolo signaled *Roder Zelt Und Hallenkonstruktionen Gmbh V Rosedown Park Pty Ltd*²¹⁶ as one of the best CISG cases 'by Australian standards'²¹⁷. Roder Zelt, a German company had sold tent hall structures to the Australian buyer, Rose-down²¹⁸. The later was required to pay for the goods by installments and came in arrears with the company later being placed under administration²¹⁹. Roder sued Rosedown and the administrator, claiming that it had retained ownership of the goods by virtue of a retention of title clause in the sales contract²²⁰. Von Doussa J correctly considered Article 4 (b) which states that the CISG is not concerned with 'the effect the contract may have on property in the goods sold'²²¹ and applied Australian property law to support the effect of the Article²²². No reference was given to foreign CISG case law²²³.

*Downs Investments Pty Ltd v Perwaja Steel Sdn Bhd*²²⁴ was concerned with scrap metal sold by an Australia seller to a Malaysian buyer²²⁵ in which the latter failed in its obligation to open a the letter of credit. In this case it was decided that the failure constituted a fundamental breach in accordance with art 25²²⁶. This enabled the seller to declare the contract void pursuant to art 64 (1)²²⁷. In this decision, the only foreign case cited was *Delchi Carrier S.p.A v. Rotorex Corp.* which, has been strongly criticised for its poor quality²²⁸.

In *Guang Dong Zhi Gao Australia Pty Limited v Fortuna Network Pty*²²⁹ Limited the court recognised that under CISG 8 (2) the parol evidence rule is not applicable stating that, *In determining what are the terms of contract that is partly written and partly oral, surrounding circumstances may be used as an aid to finding what the terms of the contract are*²³⁰.

Notwithstanding this reasoning, the court omitted the application of art 9 and relied upon domestic case law in its decision²³¹.

In *Castel Electronics Pty Ltd v. Toshiba Singapore Pte Ltd*²³² the court recognised the application of art 35²³³ but the claimant “invoked, further or alternatively, the warranties of fitness for the purpose and merchantable quality implied by section 19 (a) and (b) of the Goods Act 1958 (Vic)”²³⁴ and the Court considered that this provision has been:

The decisions cited by the Court had been previously criticised for ignoring the non-alternative application amongst the CISG and the Sale of Goods Act as well as the differences between provisions²³⁵.

Other jurisdictions; the italian example

A glance at the reported cases on the Pace website allows the inference that application of the CISG by Civil Law traditions has been higher compared to those of Common law jurisdictions. Germany has registered 493 cases, China 432, Netherlands 242 and Switzerland 186. Although, Italy has reported only 52 decisions its cases will be analysed due to important scholarly writings and decisions that have been produced by this country which, has contributed to the notion of 'uniform interpretation'.

Italy has produced laudable CISG decisions with International implications. The 'Cuneo case'²³⁶ has the merit of being the first CISG case to refer to foreign jurisprudence²³⁷. In 1996 the Italian District Court judge in Cuneo considered German and Swiss CISG jurisprudence when analysing a case that involved a French seller and an Italian buyer²³⁸. The seller shipped clothes in French sizes rather than Italian and the Court determined that the notice of non-conformity sent by the buyer 23 days after delivery was not within an acceptable time frame²³⁹. After this outcome, several Italian cases have invoked International Case Law²⁴⁰. Prominent cases that followed include *Al Palazzo Srl v Bernardaud di Limoges SA*

*Tribunale Rimini*²⁴¹ in which 30 cases were cited from nine states²⁴². *M Agri Sas v Erzeugerorganisation Marchfeldgemüse GmbH & Co KG*²⁴³ cited numerous decisions from Germany, France, Switzerland, Austria, Belgium and an ICC arbitral award²⁴⁴.

Of particular relevance is the ‘Vigevano’ case²⁴⁵ in which an Italian seller delivered vulcanized rubber to a German buyer for the production of shoe soles, after which the seller claimed lack of conformity²⁴⁶.

The Court cited 40 foreign decisions from Austria, France, Germany, the Netherlands, Switzerland and the US as well as arbitral awards²⁴⁷. When analysing the expression ‘reasonable time’ for notice contained within Article 39 (1) CISG, it was determined that it should be established case by case. On this point the court took into account decisions from German, Italy and the Netherlands²⁴⁸. When outlining the importance of the nature of the goods in establishing the ‘reasonable time’ the judge relied on Dutch, Swiss and German cases²⁴⁹. Again consulting German case law, the Court outlined the necessity of taking into account the time when the buyer was required to examine the goods which, is regulated in Article 38 (1)²⁵⁰. The Court relied on Swiss and German CISG in clarifying the necessity to specify ‘the nature of the defect’ when arguing non-conformity²⁵¹. The expression “caused problems” or “are defective” were deemed insufficient²⁵².

The Court stated that the burden of proof is a matter governed by the CISG but is “not expressly settled by it” rather, being ‘resolved’ through its underlying principles²⁵³. The Court outlined that Article 79 (1) CISG requires that the party in

breach ‘must prove that its failure was due to an impediment beyond his control’²⁵⁴ which allows the deduction that one CISG principle is that ‘the burden of proof rests upon the one who affirms’²⁵⁵.

The challenge for courts and lawyers in the improvement of the CISG

Analysis conducted thus far indicates the marginal relevance of the CISG in Common Law countries and outlines the low quality of case law amassed through its courts. A lack of understanding of art 7 of the CISG has undoubtedly been one of the main obstacles to consistent application²⁵⁶. The achievement of at least a ‘consistent’ uniformity is mostly dependent upon the aptitude of practitioners, tribunals and commercial parties²⁵⁷. The way forward is for lawyers to divorce from their prejudices in relation to the CISG and to permit greater familiarity with its ‘advantages and fundamental issues’²⁵⁸. The accusation of uncertainty in the CISG can be overcome if more parties consider its application to their contracts thereby, adding to the production of CISG jurisprudence and in turn allowing for greater improvement of the case law²⁵⁹.

This does not mean that the CISG must always be included²⁶⁰. The exclusion of the CISG is not always negative as it does not pretend to substitute domestic sale of goods regimes²⁶¹. The CISG must be understood as an available option for the parties with its application not being appropriate in all cases²⁶² however; the CISG is specifically designed for international trade and for that reason it can be

a more neutral and simple option in many circumstances²⁶³. Furthermore, some counsels can find strategic advantages for clients when considering the CISG as a choice of law²⁶⁴. The CISG can minimise the legal risk of misapplication of the law chosen by a jurisdiction with a different legal system²⁶⁵.

Spagnolo has observed situations in which the CISG can be substantially advantageous for some clients. For example, in the instance where there is 'non-conformity' in the goods, the seller may find removal from liability where the buyer is not prompt in communicating the defects as the CISG requires the notice of non-conformity within a reasonable time²⁶⁶.

Notwithstanding, the CISG application has evidenced some difficulties in national courts. The relevance of the CISG in international trade is highlighted by the number of signatory states which is still growing²⁶⁷. Many countries have shown a great acceptance and often include the Convention in their contracts, being China an important example²⁶⁸. The CISG has proven successful in arbitration which is a considerable merit acknowledging that the majority of international contractual disputes are being arbitrated²⁶⁹. The freedom conferred to the arbitrator to apply the law it considers more appropriate to the dispute²⁷⁰ has led to the application of the CISG to international sale contracts without consideration as to whether either party in the dispute is an adhering state or regardless of the site of arbitration²⁷¹. If a country is to be a leader centre of arbitration it must obviously be well versed and practiced in the CISG²⁷². The considerations mentioned above emphasise the necessity of Common Law countries to overcome their neglect of the CISG²⁷³.

Overcoming the incompleteness of the CISG; the aid of the unidroit principles

Taking into account the importance of the Convention, the search for solutions towards at least a consistent uniform application must be provided. As previously explained, the CISG Article 7 invites an international interpretation rather than a parochial approach. However, one of the main interpretative difficulties is that the CISG 'is unable to regulate every issue'²⁷⁴ and contains some gaps which scholars have differentiated as 'internal' and 'external gaps'²⁷⁵. 'External gaps'²⁷⁶ refer to the matters which the CISG definitely does not deal with while 'internal gaps' are matters that are regulated but not expressly²⁷⁷. Article 7(2) provides a guide to conduct the gap filling process:

Questions concerning matters governed by this Convention which are not expressly settled in it are to be settled in conformity with the general principles on which it is based or, in the absence of such principles, in conformity with the law applicable by virtue of the rules of private international law (CISG Art 7 (2)).

This provision has been understood to 'clarify the role of domestic law as the final resource in the interpretation of the CISG'²⁷⁸; provisions and principles of the CISG having been found 'unable to provide answers'²⁷⁹. In order to achieve the international interpretation predicated in article 7 (1) the use of domestic law in the gap filling process must be limited²⁸⁰. Scholarly writing in this field explains that domestic law should be restricted to matters that qualify as 'external gaps'²⁸¹.

A correct application of article 7 (2) is indeed for the achievement of the international interpretation demanded by article 7 (1).

In practice, the application of the interpretive methodology of the CISG has proven challenging²⁸² with a prominent point of difficulty being the ability to accurately identify which gaps are internal and which are external²⁸³. The CISG does not regulate procedural matters however, it has not provided a test to determine which are procedural matters²⁸⁴; often resulting in the obstacle of differentiation between substantial and procedural gaps²⁸⁵. Article 4 states that the Convention is not 'concerned with validity issues'²⁸⁶ although, in many cases there is confusion in establishing whether a particular issue characterises a validity question²⁸⁷. Some argue²⁸⁸ that validity has often been misleading and invoked merely because of its label²⁸⁹. A point that poses an even bigger challenge is compliance with the requirement to discern the principles underlying the CISG, a task for which the Courts and practitioners can feel unaided²⁹⁰. In practice, the Courts make little attempt to search for the general principles either through study of legal doctrine or international jurisprudence²⁹¹. This cumulative disorientation results in an overclassification of external gaps and a subsequent excessive return to domestic law which, obviously impacts the uniform application of the Convention²⁹².

Although gap filling is a complex matter, each day more supportive doctrinal material is produced. International case law in some matters has become abundant and a deeper study of the material available can allow for a laudable result. It may be accurate to state that the most difficult task for common law practitioners is the identification of underlying CISG principles²⁹³, not only because this activity

is unfamiliar with the accustomed interpretation method of Common Law as has been previously mentioned²⁹⁴, but also because it can be difficult to find a complete answer in the case law, with the finding of principles being mostly an independent interpretative exercise that is made case by case²⁹⁵.

The difficulties mentioned previously have led some to argue that the CISG Article 7 does not contain a detailed system of rules corresponding to a 'true methodology for interpretation', and simply constitutes an aim²⁹⁶. For this reason it has been further proposed that the principles of UNIDROIT can constitute a means of 'interpreting and supplementing the CISG'²⁹⁷. The preamble of the UNIDROIT Principles explicitly stipulates the possibility of its application in the interpretation and supplementation of 'international uniform law instruments'²⁹⁸.

The arguments to support application of the UNIDROIT Principles have been various. Some scholars suggest that in accordance with article 7 (2), the UNIDROIT Principles can be employed to fill CISG gaps as they 'constitute principles of international contract law upon which the Convention is based'²⁹⁹. Others assert that when they hold sufficient similarity, the provisions of the UNIDROIT Principles can be used to 'interpret or supplement'³⁰⁰ CISG provisions providing that the general principles underlying the CISG are expressed³⁰¹. A third and probably more extreme view considers that they can be invoked even when the principle cannot be inferred directly from the Convention³⁰² as the expression

“general principles”³⁰³ in CISG Article 7 includes the ‘evolving’ and ‘following transitions in international commerce’³⁰⁴.

The arguments outlined below have been subject to great debate. A considerable group of academics argue the impossibility of supplementing the CISG with the Principles of UNIDROIT as they are not an exact reflection of the principles of international contract law³⁰⁵. Reasoning eludes that the Principles as a whole do not mirror the general principles that underlay the Convention³⁰⁶ as they “reflect concepts found in many... legal systems... [and] also embody what are perceived to be best solutions, even if not yet generally adopted”³⁰⁷. This description is clearly established in the introduction of the UNIDROIT Principles³⁰⁸. This argument is further grounded with the fact that the UNIDROIT Principles are the work of the ‘International Institute for the Unification of Private Law’³⁰⁹ but not of the ‘UNCITRAL and therefore [they] cannot represent a formal source of law for the purpose of supplementing the Vienna Convention’³¹⁰.

Furthermore, a more formalist view denies the supplementary and interpretative role of the UNIDROIT Principles upon the argument that they were adopted post CISG. Application of the Principles of UNIDROIT requires parties consent otherwise its application is ‘illegitimate’³¹¹ as it is in contradiction of article 7(2) which mandates reliance upon the principles of the CISG³¹². UNIDROIT Principles are not the base of the CISG³¹³, they were merely construed from the CISG³¹⁴.

Some suggest³¹⁵ that in order to avoid the vicissitudes caused by the introduction of a national legal system the parties can agree to incorporate the following choice of law clauses on their contract: “*This contract shall be governed by CISG, and with matters not covered by this Convention, by the Unidroit Principles of International Commercial Contracts*”³¹⁶.

In this regard it is important to consider that one primary reason to reject the UNIDROIT Principles as a source for gap-filling is that its character of source of law has been questioned and is not considered of a ‘legal nature’³¹⁷. They were authored by private persons and have not been ratified by any State and therefore, possess no legislative power³¹⁸.

Many domestic legal systems restrict the choice of law clause to the ‘law of a country’³¹⁹ which thereby excludes any possibility of using the UNIDROIT Principles as a choice of law³²⁰. For this reason it has been asserted that the clause suggested probably will be considered by courts as an agreement into the contract which will be only apply if they do not affect provisions of the domestic law³²¹.

The truth is that in fact the UNIDROIT Principles have been applied in the arbitral process as a gap-filler for the CISG. A very renowned case has been the application of Article 7.4.9 of the UNIDROIT Principles to determine the rate at which interest accrues,³²² resolving the questions not addressed by Article 78 of the CISG³²³.

Bonell MJ has exemplified how the UNIDROIT Principles can assist judges and arbitrators in the task of finding the proper principles for the interpretation of the CISG in matters in which the CISG does not provide a particular answer³²⁴. He highlights that the principle of ‘reasonableness’³²⁵ is a base of the CISG and

for this reason the response to the question ‘if a seller is entitled to pay by cheque or by other similar instruments or by a funds transfer’ can be found in Art. 6.1.7 of the UNIDROIT Principles whereby, ‘the obligor may pay in any form used in the ordinary course of business at the place for payment, but cheques or other similar instruments are accepted by the obligee on condition that they will be honoured’³²⁶.

On the other hand, academics have suggested the possibility of invoking the UNIDROIT Principles, relying on CISG Article 9³²⁷; considering them as ‘usages or practices’³²⁸ established among the parties. In this regard, scholarly writing argues that trade usages are activities of commerce regularly observed by those involved in a particular industry or marketplace³²⁹. Therefore, ‘general contract rules’ per se do not constitute a trade usage³³⁰. In order to apply CISG Article 9(2), all of the articles of the UNIDROIT Principles would have to prove to be regularly observed and widely known³³¹. It is possible that in some cases a provision of the UNIDROIT Principles can be considered as a trade usage³³² although, this requires an ‘individualised factual analysis’³³³.

The afore mentioned makes clear that the possibility of using the UNIDROIT Principles to supplement the CISG does not seem a simple issue considering the assumption that they are not law in a strict sense. However, there are compelling reasons to consider that they can play an important role as an interpretative tool³³⁴, assisting in the confirmation of a principle that has previously been deduced from the Convention³³⁵.

Some³³⁶ may consider it fair to argue that both the UNIDROIT Principles and the CISG draw their principle ‘policy reasoning’s from shared ‘common ground’ and it might therefore naturally occur that the Principles identify an underlying

principle of the CISG³³⁷. However, in order to support this argument it would be necessary to infer 'the principle in question' from the text of the CISG³³⁸.

The UNIDROIT principles have been gaining much importance in the global sphere where they have been a model for lawmakers in states such as Russia, China, and Spain and have been cited in several domestic decisions³³⁹. Its incorporation as interpretative criteria in the CISG can assist towards the construction of the notion of 'international interpretation' and a uniform interpretation not just of the CISG but also of other international instruments. The UNIDROIT principles can provide equality; reducing the undue return to domestic law that often leads to an advantage for the local party.

Concluding remarks

The practical skepticism of Common Law countries in the acceptance of the CISG has been translated in a strong 'homeward trend' in the CISG case law, constituting a breach of Article 7 which demands interpretation of the Convention in accordance to its international character and the need to promote uniformity.

Relevance of the CISG in the International arena justifies the necessity that Common Law practitioners and Courts learn about the CISG and understand why it can be a good legal instrument to regulate international sales. Only the reduction of automatic exclusion and thereby, an increase in the application of the CISG can contribute to an improvement in the case law which, brings about greater certainty and predictability in outcomes.

The incompleteness of the CISG gives rise to the necessity to follow a gap filling process which, in some cases, can prove troublesome. There is abundant scholarly writing and case law that can assist in this process with the Principles of UNIDROIT constituting an appropriate guide in the identification of the CISG underlying principles although, its character as a first source in gap filling is doubtful.
