Abstract

Citation: ICRISAT (International Crops Research Institute for the Semi-Arid Tropics). 1991. Union catalog of serials in international agricultural research centers (IARCs) (Basavaraj, N., and Gir, S., compilers). Patancheru, A.P. 502 324, India: ICRISAT. 2 vols.

Staff of ICRISAT Library and Documentation Services have compiled this union catalog of serials of 14 international agricultural research centers in response to the recommendations of the CGIAR Documentation and Information Services meeting held in 1987 at the International Potato Center (OP), Lima. The modified version of the software already in use at ICRISAT for the production of a catalog of serials was used for this compilation. For bibliographic description and codification of language, frequency, and country, the guidelines and rules provided by the International Serials Data System (ISDS) were used. The serial titles were indexed using the CAB International thesaurus. The catalog contains 5 401 entries from AVRDC, CIAT, CIMMYT, CIP, ICARDA, ICIPE, ICRISAT (including ICRISAT Sahelian Center), IFPRI, IIMI, ILCA, ILRAD, IRRI, ISNAR, and the Secretariat of the Consultative Group on International Agricultural Research. A micro CDS/ISIS database has also been developed using the catalog data. This hard copy version, as well as the database, are available for use in participating IARCs and other interested institutions.

Résumé

Référence: ICRISAT (International Crops Research Institute for the Semi-Arid Tropics). 1991. Catalogue collectif des publications en série possédées par des centres internationaux de recherche agricole (Basavaraj, N., et Gir, S., compilatrices). Patancheru, A.P. 502 324, India: ICRISAT. 2 vols.

Ce catalogue collectif des publications en série possédées par 14 centres internationaux de recherche agricole a été compilé par la Bibliothèque et le Service de documentation de l'ICRISAT. Cet important outil de référence a été réalisé suite aux recommandations faites à la Réunion des services d'information et de documentation du Groupe consultatif pour la recherche agricole internationale (CGIAR) organisée en 1987 au Centre international de la pomme de terre (CIP), à Lima. Une version modifiée du logiciel utilisé à l'ICRISAT pour la production d'un Catalogue des publications en série a servi à compiler les entrées. Les fiches descriptives ainsi que les codes des langues, des pays et de la périodicité ont été établies en conformité avec les règles du Système international de données sur les publications en série (ISDS). Les titres recensés ont été indexés à l'aide du Thésaurus de CAB International. Le catalogue comprend 5 401 entrées provenant des instituts suivants : AVRDC, CIAT, CIMMYT, CIP, CIPEA, ICARDA, ICIPE, ICRISAT (y inclus le Centre sahélien de l'ICRISAT), IFPRI, IIMI, ILRAD, IRRI, ISNAR ainsi que du Secrétariat du CGIAR. Les informations du catalogue ont été saisies en ordinateur en adoptant le logiciel Micro CDS/ISIS. Cette publication, ainsi que la base de données, sont mises à la disposition des instituts internationaux de recherche agricole et de tout organisme intéressé.

1991

The International Crops Research Institute for the Semi-Arid Tropics is a nonprofit, scientific, research and training institute receiving support from donors through the Consultative Group on International Agricultural Research. Donors to ICRISAT include governments and agencies of Australia, Belgium, Canada, People's Republic of China, Federal Republic of Germany, Finland, France, India, Italy, Japan, Netherlands, Norway, Sweden, Switzerland, United Kingdom, United States of America, and the following international and private organizations: African Development Bank, Asian Development Bank, Deutsche Gesellschaft für Technische Zusammenarbeit (GTZ), International Board for Plant Genetic Resources, International Development Research Centre, International Fertilizer Development Center, International Fund for Agricultural Development, The European Economic Community, The Opec Fund for International Development, The Rockefeller Foundation, The World Bank, United Nations Development Programme, University of Georgia, and University of Hohenheim. Information in this publication does not necessarily reflect the position of the aforementioned governments, agencies, and international and private organizations.

FOREWORD

In two meetings of the Documentation and Information Services officers of the International Agricultural Research Centers (IARCs) held at International Potato Center (CIP), Lima in 1987 and at International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) in 1989, the library at ICRISAT was asked to undertake a project to produce a Union Catalog of Serials in the IARCs of the world. The meetings also recommended that ICRISAT should develop a database of serials holdings in IARCs for use with microcomputers and public-domain software such as Unesco's Micro CDS/ISIS.

The objective of the project was to produce a source of information that would facilitate wide and easy access to the relatively rich serials resources of the IARCs for the benefit of users in the National Agricultural Research Systems (NARSS) of the developing world. Also, given the increasing availability and utilization of microcomputers in the developing world, it was felt that databases such as the IARC Union Catalog should be made available in microcomputer-readable form to enable developing country centers to make more effective use of such information sources.

Scientific and technical journals, and other serials are undoubtedly valuable sources of information on agricultural research and development. Access to such sources is essential for the conduct of research, and for the avoidance of wasteful effort in IARCs and NARSSs. Unfortunately, however, many NARSSs are seriously handicapped for lack of resources, particularly in hard currency, to subscribe to costly scientific, technical and other serials.

It has therefore become imperative that IARCs and NARSSs should cooperate with each other to share costly serials resources so that access to needed information in research, problem solving, and development is better facilitated. The present Union Catalog of Serials Holdings in IARCs is aimed at fulfilling this objective.

The production and distribution of the Union Catalog to NARSSs institutions has been greatly facilitated by a generous grant of U.S. \$ 5000 by the Technical Centre for Agricultural and Rural Co-operation (CTA), Wageningen, Netherlands.

The present project and its culmination in the production of the hard-copy of the Union Catalog and the microcomputer-readable database is an example of cooperation among the IARCs, and ICRISAT wishes to record its appreciation of the efforts put in by the libraries of the 14 IARCs represented in the present edition of the Union Catalog.

Ms. Nalini Basavaraj and Ms. Sandhya Gir of the ICRISAT library have been chiefly responsible for the compilation of the Union Catalog of Serials. The Union Catalog is one of the outputs of a microcomputer-based Serials Data System developed at ICRISAT library. The system was designed and developed by Mr L J Haravu, Manager II, Library and Documentation Services.

The hard copy Union Catalog and the Micro CDS/ISIS database are being offered to libraries, information centers and research stations in different NARSs and hopefully will contribute in making the serials holdings in IARCs more widely accessible to NARSs.

L D Swindale
