The benefits of education and of useful knowledge, generally diffused through a community, are essential to the preservation of a free government.

Sam Houston

Cultivated mind is the guardian genius of Democracy, and while guided and controlled by virtue, the noblest attribute of man. It is the only dictator that freemen acknowledge, and the only security which freemen desire.

Mirabeau B. Lamar

EXPLANATION

The University bulletins are so numbered that the first two digits of the number show the year of issue, the last two the position in the yearly series. For example, 3301 is the first bulletin of the year 1933. These comprise the official publications of the University, publications on humanistic and scientific subjects, and bulletins prepared from time to time by various divisions of the University.

The omission of a number from its place in the consecutive order indicates that the number has not been used. The following serial numbers have not been used:

3307	3325	3334	3343
3312	3328	3337	3344

3320	3331	3340	3346
