PUBLICATIONS BY MEMBERS OF THE FACULTY

OF THE UNIVERSITY OF TEXAS

1944

The following list of publications by members of the faculty of the University of Texas is based on materials supplied by each member of the faculty of the Main University and the Medical Branch. Members of the staff who are not members of the faculty have also been asked for their lists of publications. This list is not confined to important research publications, but includes all publications during the calendar year 1944, except newspaper items. There has been no editorial committee in charge, but a representative from each department has been asked to check the list for his department.
