Abstract

This is the presentation of the paper entitled "Design of an innovative approach based on Service Learning for Information Technology Governance Teaching" in the TEEM 2015 International Conference held in Porto (Portugal) in October 7-9, 2015.

Service learning is an approach that integrates social service into an academic setting. We present a design for a subject that uses a service learning based orientation to teach Information Technology Government based on the experiences of two different Informatics Engineering Masters Degree in two different universities.
