## Preface

This proceeding book of Nostradamus conference (http://nostradamus-conference.org) contains accepted papers presented at this event in 2012. Nostradamus conference was held in the one of the biggest and historic city of Ostrava (the Czech Republic, http://www.ostrava.cz/en), in September 2012.

Conference topics are focused on classical as well as modern methods for prediction of dynamical systems with applications in science, engineering and economy. Topics are (but not limited to): *prediction by classical and novel methods, predictive control, deterministic chaos and its control, complex systems, modelling and prediction of its dynamics* and much more.

Prediction of the behaviour of the dynamical systems and modelling of its structure is vitally important problem in engineering, economy and science today. Examples of such systems can be seen in the world around us and of course in almost every science discipline, including such "exotic" domains like the earth's atmosphere, turbulent fluids, economies (exchange rate and stock markets), population growth, physics (control of plasma), chemistry and complex networks .

The main aim of the conference is to create periodical possibility for students, academics and researchers to exchange their ideas and novel methods. This conference will establish a forum for the presentation and discussion of recent trends in the area of applications of various predictive methods for researchers, students and academics.

The conference Nostradamus was officially established in 1998 and has been repeated successfully each year for 5 years. Due to administrative and technical conditions it has been cancelled since now. By this year 2012 we are opening this conference permanently with support of wide spectra of publishers (Springer, Computers & Mathematics with Applications, Journal of Unconventional Computing, International Journal of Energy Optimization and Engineering and Springer series Emergence Complexity and Computation), societies and organizations, one of the biggest university in the Czech Republic and with financial support of EU projects. Conference is supposed to be repeated every year to share knowledge and create new useful relations between researchers.

The selection of papers was extremely rigorous and we did it in order to maintain the high quality of the conference. We would like to thank the members of the Program Committees and reviewers for their hard work - each contribution has got 6 reviews. We believe that Nostradamus conference creates a high standard conference in the domain of prediction and modelling of complex systems.

Nostradamus 2012 enjoyed outstanding keynote speeches by distinguished guest speakers: Otto E. Rössler and Ali Sanayei (Germany), Hendrik Richter (Germany), Mohammed Chadli (France), Oldřich Zmeškal (Czech Republic) and Juan Carlos Burguillo-Rial (Spain). Also a few tutorials were done by Ivan Zelinka (Czech Republic), Roman Šenkeřík (Czech Republic) and Petr Dostal (Czech Republic).

Historically the first Nostradamus conference 1998

For this special edition, as a follow-up of the conference, we anticipate further publication of selected papers in a special issue of the prestigious journal Computers & Mathematics with Applications, special book in Studies in Computational Intelligence series and more.

Particular thanks go as well to the Workshop main Sponsors, IT4Innovations, VŠB-Technical University of Ostrava, MIR labs (USA), Centre for Chaos and Complex Networks (Hong Kong), Journal of Unconventional Computing (UK). Special thanks belong to Ministry of Education of the Czech Republic. This conference was supported by the Development of human resources in research and development of latest soft computing methods and their application in practice project, reg. no. CZ.1.07/2.3.00/20.0072 funded by Operational Programme Education for Competitiveness, co-financed by ESF and state budget of the Czech Republic.

Preface

We would like to thank all the contributing authors, as well as the members of the Program Committees and the Local Organizing Committee for their hard and highly valuable work. Their work has helped to contribute to the success of the Nostradamus conference.

The Editors

# Contents

## Keynote Speech

Is Hot Fusion Made Feasible by the Discovery of Cryodynamics? Otto E. Rössler, Ali Sanayei, Ivan Zelinka	1
Fitness Landscapes and Evolutionary Dynamics      Hendrik Richter	5
Observer Design for Polytopic Systems: Application to ChaoticSystem ReconstructionMohammed Chadli	9
Entropy of Fractal Systems	25
Modeling Complexity: From Cellular Automata to Evolutionary Game Theory and Multiagent Systems with Coalitions Juan Carlos Burguillo-Rial	27
Tutorials	
<b>On Evolutionary Synthesis of Chaotic Systems</b>	29
On the Evolutionary Optimization of Chaos Control – A Brief Survey Roman Senkerik	35
The Use of Soft Computing Methods for Forecasting in Business, Their Applications in Practice Petr Dostál	49

### **Regular Participations**

Adaptive Predictive Control of Time-Delay Systems	61
Specific Behaviour of GPA-ES Evolutionary System Observed in Deterministic Chaos Regression Tomas Brandejsky, Ivan Zelinka	73
Chaos Synchronization Based on Unknown Inputs Takagi-Sugeno Fuzzy Observer Mohammed Chadli, Ivan Zelinka	83
Modeling and Model Predictive Control of Nonlinear HydraulicSystemPetr Chalupa, Jakub Novák	93
Usage of the Evolutionary Designed Neural Network for Heat Demand Forecast B. Chramcov, P. Vařacha	103
Fuzzy Logic Decision Support for Long-Term Investing in the    Financial Markets    Zdeňek Brož, Petr Dostál	113
<b>Possibilities of Industrial Data Description Using Fractal Geometry</b> <i>Vlastimil Hotař</i>	123
Influence of Number of Neurons in Time Delay Recurrent Networks with Stochastic Weight Update on Backpropagation through Time Juraj Koščák, Rudolf Jakša, Peter Sinčák	133
Multiple Model Predictive Control of a Styrene Polymerization    Process	143
Impact of Various Chaotic Maps on the Performance of Chaos Enhanced PSO Algorithm with Inertia Weight – An Initial Study Michal Pluhacek, Roman Senkerik, Ivan Zelinka	153
<b>Extended Initial Study on the Performance of Enhanced PSO</b> <b>Algorithm with Lozi Chaotic Map</b> <i>Michal Pluhacek, Vera Budikova, Roman Senkerik, Zuzana Oplatkova,</i> <i>Ivan Zelinka</i>	167
Custom Winding Ratio Analysis of Evolutionary Optimized Audio Transformer	179

#### Contents

Evolutionary Synthesis of Control Rules by Means of Analytic Programming for the Purpose of High Order Oscillations Stabilization of Evolutionary Synthesized Chaotic System Roman Senkerik, Zuzana Oplatkova, Ivan Zelinka	191
Application of Self-Organizing Migrating Algorithm in Five-Dimensional Chaotic Synchronization Systems via Active-Passive Decomposition	203
Thanh Dung Nguyen, T.T. Dieu Phan, Ivan Zelinka	
Using Differential Evolution Algorithm in Six-Dimensional Chaotic Synchronization Systems Thanh Dung Nguyen, T.T. Dieu Phan, Ivan Zelinka	215
Asynchronous Synthesis of a Neural Network Applied on Head Load Prediction	225
<b>Prediction by Means of Elliott Waves Recognition</b> <i>Eva Volna, Martin Kotyrba, Robert Jarušek</i>	241
Pattern Recognition Algorithm OptimizationEva Volna, Michal Janosek, Martin Kotyrba, Vaclav Kocian	251
<b>Evolutionary Identification and Synthesis of Predictive Models</b> Ivan Zelinka, Lenka Skanderova, Mohammed Chadli, Tomas Brandejsky, Roman Senkerik	261
Data Mining by Symbolic Fuzzy Classifiers and Genetic    Programming    Suhail Owais, Pavel Krömer, Jan Platoš, Václav Snášel, Ivan Zelinka	273
Author Index	283
