

Save the date! Oct. 23th -25th, 2017

Quebec Conference:

“Roads, Wildlife & Adaptation to Climate Change: From Research to Action”

Why?	The only road ecology conference in French in Quebec took place six years ago. This upcoming conference will share results from new research and various partnership projects initiated since 2011 to mitigate the impacts of roads on (terrestrial and aquatic) wildlife and habitat connectivity, and to better adapt to climate change. The conference will include presentations, workshops, kiosks and a fieldtrip, all available in French and English.
Where?	Hotel Ambassadeur, 3401 Boul. Ste-Anne, Québec City (QC) G1E 3L4
When?	Monday 23 th – Wednesday 25 th October 2017
For whom?	This conference is for all professionals working in road planning, civil engineering, wildlife management, terrestrial and aquatic habitat connectivity, and climate change adaptation. This includes biologists, civil engineers, researchers, land use planners and other professionals in hydrology, ecology, land use planning and development, climate change adaptation, etc., working in the public sector, in conservation organizations, universities, consultancies, and more! Students are also welcome.
More info?	Organizers and partners of this event are busy working hard to plan this event. A website with more information, including how to register, will soon be available. Until then, please send any questions, comments and suggestions to: colloque2017.routes.faune@gmail.com
