American actor. He is known for the television series [Party of Five](#) as Bailey Salinger, as Jake Hartman in [Everwood](#) and Chad Decker in [V](#).

After the episode...

‘I don't really know what happens now because Janet has never been murdered before only today, here on my watch, while I was distracted with a party that Tahani was throwing for me, which I didn't want.

‘Michael, you mustn't blame yourself’

‘I'm not. I'm blaming **you.**’

After the episode:

'I wanted to learn the difference between "toward" or "towards"'

- *Toward* and *towards* are completely interchangeable, so you can use either one whenever you want.
- *Toward* and *towards* are prepositions that mean "in the direction of someone or something, or close in location or time." As prepositions, they are followed by nouns or noun phrases.
- However, there is a difference in their **usage**. Although *toward* and *towards* are used at about the same frequency in spoken language, in written language *toward* is used much more often than *towards*, roughly five times as often. (This applies to American English only; in British English *towards* is the more common variation.) So if you'd like to be on the safe side, use *toward* and you won't be wrong. But the choice is really up to you.
